SD school girl kills
two, injures 10 more

RAN DIEGO (AP) - A 14-year-old girl who said she wanted to "get even" by shooting a crowd of elementary school students.

The girl's动机 was unclear, but authorities believe she was targeting school staff and other students. She was arrested and charged with attempted murder.

Harris hearings

Whether the 17-year-old suspect in the killing of a school principal in San Diego should be released to the custody of his father or another adult had not been decided by 4:30 p.m. Monday.

The suspect, who was identified as the "gunman" by investigators, was taken into custody after a shooting last Wednesday at an elementary school. He was later charged with murder and other offenses.

The principal, who police described as a teacher, was killed when the gunman opened fire during a school assembly.

The hearing, which was held in private, was expected to last several hours.

The principal's father, who was present at the hearing, said he was not sure whether his son would be released.

"I don't know what to do," he said. "I just want him to be safe."

Youngblood—Colin Youngblood took the stage at 8 p.m. to an enthusiastic crowd.

Youngblood, who is known for his energetic performances, started off the night with a high-energy set that included his hit song "American Pie." The audience was on its feet from the first note, cheering and clapping as he sang,

"I'm just a Southern boy, born down in Georgia."

Youngblood continued with a series of other hits, including "Takin' Care of Business" and "Sweet Home Alabama," all of which were met with thunderous applause.

"I can't believe how much fun I'm having tonight," Youngblood exclaimed as he took a bow.

The audience, which was packed to the rafters, responded with a thunderous round of applause.

Youngblood ended his set with a rousing cover of "Sweet Home Alabama," sending the audience into a frenzy.

"That was amazing," said one fan. "I've never seen Youngblood perform live before, but this was definitely the best night of my life."
The TNA syndrome

The time has come when I must sound my
objections to the work of cartoonist Chuck
Barber. As I mentioned in the past, I have found
the caricatures of Chuck Barber to be in poor taste and
offensively bad. In general, I have found the
work of Chuck Barber to be of a lower quality than
the work of other cartoonists. I believe that the
work of Chuck Barber is not suitable for
publication in this newspaper.

It was captioned "Superbowl XIII" and
appeared in the Tuesday, January 31 issue of
the Mustang Daily. I believe that a man
watching a football game. No, not a football
game. But a cheerleader with blown-out
hairstyles. It contained a sub
heading which read "Is it the battle of the 'A's and the 'F's'?" What is startling is that
Barber's work is so obvious.

The Superbowl was played between two
football teams, neither of which have the
initials "A" or "F." I urge the
school paper to use another means to
inform the readers of the results of the game.

Please do not misinterpret me. I am not
urging a publication ban of the works of
Chuck Barber. I am simply stating
my objection to the quality of his work.

Barber's work is not only in poor taste,
but it is also offensive. I feel that
Barber's work is not suitable for
publication in this newspaper.

It was not until now that I have
realized the true nature of Barber's work.
I believe that Barber's work is
not suitable for publication in this newspaper.

Recently a particular officer in the San
Luis Obispo Police Department arrested two
Cal Poly students in connection with what
he called "a sorority prank." The two girls
were released from the police station
without being allowed to make a phone call.

After sitting in the cell for one hour,
the girls were released and all records of
the arrests were destroyed. We feel that
the sections of the arresting officer and his use
of unwarranted tactics were totally un
justified.

We are aware that "pranks" between
fraternities and sororities can be a nuisance
in the police. But, if it is true that Barber's unique flavor
of satire is to be found on the college town
and included within the same twenty frustrations and
sorories. The frivolities and sororities at
Cal Poly are tame in comparison to their
counterparts at other universities.

But if anything should be said to a
student of Cal Poly's Greek system become a problem
for the local police, we would appreciate it
if they inform us either through the Cal Poly
Student Association, Inc. or the Daily
collegian's system become a problem for
the San Luis Obispo Police Department,
we would appreciate any information
that the use of petty goons tactics.

Recently there have been two alumni of
the Greek system at Cal Poly employed with
the San Luis Obispo Police Department.
We have the utmost respect and appreciation
for police officers and the entire force as a whole.

We most sincerely hope in the future
that the Greek system of Cal Poly become a problem for
the San Luis Obispo Police Department, that they will continue
their work in the field of preventing
structures and lines in the quality of
any Air. These are some concrete
approaches to the problem.

Raising the allowable level of ozone in
just a number of cases. A possible solution to
the problem of air pollution isn't going to be solved by
playing by statistics.

The idea of raising the standards for
ozone, which was overlooked by big
industry, only to delay an already
significant problem.

One is one of the most damaging
pollutants. It is an offensive gas that irritates
the respiratory tract and damages other
and other minerals. It is highly reactive and is
the result of a chemical reaction between
sulfur dioxide and nitrogen oxides
and hydrocarbons. Simply changing the
levels allowed is not going to make the ozone
any less dangerous.

But San Luis Obispo County does not need
reduced EPA standards. It does need healthy
eye. Being able to conform to the EPA levels
will be meaningless if the air is still un
healthy. Central Coast residents pride
themselves on the area they live in and clean
dirty is an essential part of the picture.

More research needs to be done, better
anti-pollution systems utilized, and tougher
enforcement procedures enacted before we
begin to see improvements in the quality of
any Air. These are some concrete
approaches to the problem.

If you can't beat 'em

If you can't beat 'em, you always have to
change the rules. That seems to be the idea behind
the Environmental Protection Agency's recent
action in changing air pollution standards.

The EPA raised the allowable level of
ozone by 20 percent, which allows 0.12 parts per million
instead of 0.08 parts per million.

The idea of raising the allowable level of
ozone, which was overlooked by big

Poly Twirlers swing and stomp while club grows in popularity

BY PEGGY DEVANE

The Poly Twirlers are in an "upswing period," according to Sue Tomlin, the club's president. The square dance club, chartered in 1964, has roughly 38 experienced dancers and about 18 beginners.

"It's been having its ups and downs," Tomlin said. "I think it's growing."

She said however that the group is very small compared to the campus.

At the present time the males in the club outnumber the females.

"It's a little unusual to have more males," Tomlin said. She said the gentlemen in the group get their fun and the rest of the men rotate in. The group is made up of people from a wide assortment of majors.

"I wouldn't stereotype them," Pete Oier, last quarter's president said. "It's not really Aggie. We have a very diverse group."

The two groups have different callers who direct the dances in a record. Gordon Donohe is the experienced caller and Jerry Van Saun is the beginner caller.

For the past four years Van Saun has been calling for square dances all over Central California. He started calling because he thought he would like it. It has been "a hell of a lot of fun," he said.

The experienced callers for the dances are the traditional long sleeve shirt and tie for the male and the full skirt for the female. But Tomlin said "we don't push it" because of the expense.

The club is basically a non-profit organization. They do however have a treasury for "special things." These include the club's attendance at the upcoming Visalia square dance festival on the Washington's Birthday weekend, along with other square dance events.

Although the group attends outside events it is a non-competitive sport Van Saun stated. Tomlin said; "It's just to have fun."

According to Tomlin, the group attends "depend on homework and time, but it's quite all right with us."

The cost for the beginners is $15 for 15 weeks of instruction. Classes are held at The Nectar Bar.

GRADUATING ENGINEERS

Have you considered these factors while determining where you will work?

1. Will the job offer challenge and responsibility?
2. If you don't like that particular job, does your future employer encourage job changing?
3. What does your future employer do to encourage you to keep your education current?
4. What plan does your future employer have to introduce you to the work?
5. Big starting salaries are nice—but can you afford the cost-of-living in the area, and what is the salary and growth potential?

At the Naval Weapons Center we have given these things a lot of consideration and believe we have the answers for you.

Arrange through your placement office to interview with our representatives, Charles Johnson & Lee Saxton, on Jan 31 & Feb. 4. We think you will like what we have to offer.

If you cannot fit an interview into your schedule, write or call:

Bond set for hijack suspect

NEW YORK (AP) - Irene MacInnis was ordered held on $50,000 bond yesterday on federal piracy charges for allegedly hijacking a 747 jetliner with more than 130 people aboard.

Friends in California said she had talked recently about a plan to make the world aware of her "new concept" in religion. A four-page tract she reportedly wrote in 1970 predicted "earth-shaking" events due to the extensive use of oil, gas and electric lines being disrupted by earthquakes after the exhaustion of the sun, said Frank Godfrey, a Cypress, Calif., real estate agent who rented Mrs. MacInnis a two-bedroom townhouse.

"She had the idea of a heaven on earth and the sun exploding and she had all this technological stuff which she seemed to understand just perfectly," Godfrey said Sunday.

Mrs. MacInnis, a 49-year-old California divorcée, was arrested this morning in federal court in Brooklyn. U.S. Magistrate John Caden ordered her held in lieu of $50,000 bail, which her court-appointed attorney said friends would try to raise.

Nelson Rockefeller buried

TARRYTOWN, N.Y. (AP) - The ashes of Nelson A. Rockefeller were buried yesterday in a family cemetery here, after a service by his 15-year-old son.

Absent from the graveside rites was any of the public officials with whom he was identified.

"Dad, we know how much you love us and we want you to know how much we love you and how much we will miss you," said Nelson Jr., one of two Rockefeller's second son.

"Your spirit will live on with us forever. We'll try to live up to the example you've set as a father, as a husband, as a brother, as a statesman and as a Truman.

"Dad, we're not saying goodbye. But until we meet again."
Poly beats Alumni

Smith, Krukow on hand

BY RANDY BAKER

Mustang Daily

Last year atkinson Stadium, the Cal Poly Alumni team picked up its first victory in the annual contest beating last year’s Mustang team, 4-3. The game featured many players from this year's team including former player Ken Smith who pitched for the San Francisco Giants organization. A few of last year’s hurlers were also on hand. Jack Pelletier, who earned All-CCAA honors last year, pitched the second inning for the Alumni team while Dave Pensil, another Cal Poly graduate now with the Chicago White Sox, pitched in the third.

Much to the delight of youngsters, two top league performers were also on hand. Ozzie Smith, former Cal Poly shortstop and now a top performer on the San Diego Padres’ team, and Mike Krukow, a pitcher for the Chicago Cubs, were both at the game signing autographs and talking to friends and reporters.

Smith, who was runner-up to Bob Horner in the “Rookie of the Year” voting, believed his next year with the Padres would be much better. “I’ll steal 50 bases,” said the lean shortstop. “I’d like to raise my average 10 to 15 points.”

I am excited for the Padres, Smith states. “They have 40 bases and we hit .307. I really think the National League West is starting to even itself out as far as teams are concerned,” commented Smith. “Evidence of this is seen in the San Francisco Giants. That proved to be instrumental in their downfall and now Tommy John and Lee Lacy are leaving, putting the Dodgers in the same situation.”

“The Giants improved their team as well as the Padres, so the whole division will be hard,” concluded Smith.

Smith, referred to by many as the “Wizard,” looked very much like a professional dressed in a stylish brown business suit. But while the pros were up in the bleachers signing autographs the Mustangs were down in the field usually running over the Alumni.

All four of Cal Poly’s runs came in the second inning off the former All-CCAA selection Pelletier. Mustang’s Craig Gilbrer and Bob Catino hit home runs in the games. Friday at 2:30 pm at Long Beach State, Allegro Field.

COME BY THE SENIOR PHOTO SESSIONS TODAY!
FRUSTRATION—Coach Ernie Whaler will try and stifle Mustang backcourt against latemont College tonight.

Although the Mustangs never led in the game, the team threatened with less than a minute remaining. A bucket by Wheeler's son, sophomore Ernie Wheeler III, brought Cal Poly within two points with 42 seconds left in the final period.

Champion led the victory seconds later on a three-pointer by Eric Butler to give the Mustangs their eighth defeat in 10 games on the season.

The team fell under .900 for the second time this season as their record dipped to 8-10. In CCAA league competition, Cal Poly remains in last place with a lonely 1-3 record.

The difference in performance between the two teams boiled down to shooting percentages. Cal Poly's 48 percent was no match for Champion as they only hit 40 percent with a 65-37 push for a 71-45 win.

They were led by Butler's game high 33 points. With help from teammate Joe Champion, the duo combined to score 46 points, over half the team total.

The Mustangs finished with four of a winning basket from four-shots. In addition to McCracken's 14 points, Mike Fagan came off the bench to score 14 with six rebounds. Junior Mark Robinson (12 points) and Bill Toth (11 points) combined to accumulate 30 of the team's 71 points.

Tonight, the Mustangs host Westmont College at 7:30 p.m. game.

Swimmers seventh
Cal Poly men's swim team was able to finish seventh out of a field of ten in the PMC Promote Relays this weekend. Pepperdine University won the two day event followed by CSU Northridge, the University of Hawaii and U.C. Irvine.

Sophomore Steve Wright placed sixth in the 100-yard backstroke with a time of 56.7.

Women place high
It was more than just another invitational swim meet for Cal Poly's women's swim team this weekend.

The women came out as the top California team placing, finishing fourth out of 30 teams at the Santa Barbara Invitational Swim Meet, University of Arizona finished first with 737.5 points.

Freshman Heather Darve set a new school record in the 100-yard backstroke with a time of 1:07.3. The old school record was set earlier this year by Kergin. The 100-yard freestyle relay of Ramona Kow, Mary Chan, Karen Kinaman and Karen Kergin set the sixth new school record coming in at 1:33.0. The relay finished fourth in competition.

Shortage of ag teachers

BY LARRY COLE

At a time when teaching jobs throughout the state are scarce, California has a shortage of high school agriculture teachers, according to Larry Kehlacken and Joe Sales from Cal Poly's Agriculture Education Department.

"Students on campus ought to hear that there are 200 job openings throughout the state in vocational agriculture education, and only 10 students to fill those vacancies," said Kehlacken, head of Cal Poly's Agriculture Education Department.

There will be 14 vacancies left throughout the state by the end of winter quarter, Kehlacken said, "and if we can't fill those vacancies, the state may close those positions due to the effects of Proposition 13."

There were 146 placements of new agriculture teachers in the state last year. Fifteen of those placements were vacant, but the shortage still exists, said Kehlacken.

The reason for the teacher shortage is because of the "need for agriculture industry work experience to be the most encouraging part of it for students," said Kehlacken.

Elliot Houston, electronic engineering, sophomore:
"Agriculture because no girls are ever really into the other they have in there. They think every year is beautiful, has a great career and 10 lovers."
