ASI leaders considering move to get students to vote

BY CATHY SPEARNAR

ASI leaders are considering a move that will reward students for voting in campus elections.

The move might be considered a revenue sharing policy which has been tested on other college campuses.

On the 19 campuses in the CBUC system, Associated Students (the campus student governments) increase voter turnout at ASI elections, from shallowing snows with the candidate’s name, to paying voters in the form of $1 rebates.

In a workshop on ASI elections given by ASI Pres. Larry Robinson at this month’s Cal State Students Association meeting in Sacramento, the 30 or so students attending raised one major concern: If the workshop all agreed on one thing, their biggest problem was getting students to vote for ASI elections at all.

"Revenue sharing" was one device used to boost voter turnout on the Chico State campus. Revenue sharing is giving students a chance to bid on the books to which they would like one dollar’s worth of their student fees to go.

At Hayward State, students are also being rewarded for voting, providing a glass of free Pepsi, free lunch at a nearby restaurant, and a quarter to charge at the student union.

In last year’s ASI election, 16.4 percent of Cal Poly students turned out at the polls, 2,349 ballots were cast in the spring election.

Cal Poly’s ASI is considering adoption of the revenue sharing policy for its elections this May.

Cal State Long Beach also gave free ice cream to all voters by giving students a red envelope card good for one ice cream cone at the Beach-Robinson on campus, the AS at Long Beach boosted voter turnout to 14 percent — the highest in four years.

Cal State Northridge gave out buttons emblazoned with "I Voted" to stick on a sweater or jacket after students had voted.

They said this helped remind other students to vote.

At Cal Poly Pomona, the Associated Students hired a live band to play near the polling station on campus. The band entertained students to sit around and listen to the music, and hopefully to vote, too.

In his presentation to students at the workshop, Robinson said the number one way to boost the students was through the campus newspaper. Robinson said newspaper coverage was vital to campuses of over 3,000 students.

Robinson also suggested sending sample ballots to all students in the form of student urban and turnouts.

But, the greatest advantage and effective voter-getting scheme came from Chico State. This year at Chico’s AS elections, students who vote will get a $1 gift rebate.

BY CATHY SPEARNAR

Several ASI Student Senators attended Wednesday night’s Senate meeting "in cognito".

Some Senators and ASI Pres. Larry Robinson considered turning over Senate control to the Mustang Daily editorial board before the next Student Association conference.

The move might be considered a revenue sharing policy which has been tested on other college campuses.

"Revenue sharing" was one device used to boost voter turnout at ASI elections, from shallowing snows with the candidate’s name, to paying voters in the form of $1 rebates.

Sacramento, the 30 or so students attending the ASI Pres, Larry Robinson at this month’s ASI Student Organization last weekend in Sacramento, campus revenue sharing is giving students a boost voter turnout on the Chico State campus. Robinson said he is ready to face the sub-zero Washington weather, although he has a sprained ankle.

The trip will be financed by the ASI and will cost approximately $400 to $450. Dunn said.

After Wednesday night’s two new Senators were approved to fill vacant seats. Bill Horner, a 21-year-old Business major will sit as a Senator from the School of Business Administration. Horner is chairman of the Masters Board of Control. This was not looked upon as a conflict of interest because the Board receives no funds from the ASI.

According to one ASI source.

Tom Walsh, a 19-year-old from the Council of Math and Science will fill a vacant seat from the School of Math and Science.
Editorial/Opinion

Nuclear rites

It's time for a verdict. The Diablo Canyon nuclear power plant licensing hearings came to a close last week and over the next three months it will be up to the licensing board to decide if it will give the go-ahead to Pacific Gas and Electric Company's concrete monstrosity. PG&E lawyer Bruce Norton said the hearings were enjoyable but that's understandable considering the utility company's perspective about the plant. With the licensing hearings out of the way, PG&E is one step closer to the day when it can flip the switch on Diablo Canyon. When PG&E looks at the nuclear plant all it sees are dollar signs and, unfortunately, money talks. The company continues to exult about what an energy utopia Diablo Canyon will be has succeeded in blurring the real issues of locating such a potentially dangerous plant so close to our own community. Because of the upside-down approach of the nuclear Regulatory Commission, PG&E holds a definite advantage in obtaining licenses. While the licensing board is out deliberating on whether or not Diablo Canyon should be allowed to operate, the plant, with over $1 billion worth of materials and labor invested in it, looms in the background. It would be much easier for the board to deny a license to a plant in its planning stages than one that is ready and waiting to go. Bill. It has been done. The voters in Australia said no to a nuclear power plant that was already completed and the plant has not been allowed to operate. It would be better to deny Diablo Canyon a license now.

We hope that the licensing hearings were more than just a ritual. If the licensing board puts aside PG&E's prestige and power and concentrates on the real safety issues of the Diablo plant it should come up with a denial of a license for the plant. The licensing board needs to prove it is not just a puppet of the nuclear industry. It should take the time to weigh the evidence presented during the hearings and make an objective decision. We would like that verdict to say no to Diablo Canyon.
These little piggies are going to market

Having neighbors who work, roost and root in the mud may seem a bit odd, but it's an everyday occurrence for Cal Poly students Rich Bauer and Galindo. Bauer and Galindo live at the 30-acre swine unit on the northwest edge of campus which also happens to be home for some 100 pigs of every shape and size.

Life among the piggies is a unique experience for the two students who occupy a portion of a classroom building in the center of a conglomeration of pens, metal buildings, barns and grassy fields. Between classes and homework they keep busy caring for the unit's 100 inhabitants.

Keeping the piggies happy involves washing down stalls, trimming hooves, lifting feeders, vaccinating, spraying for parasites and giving medication. No two days are alike, according to Bauer, a sophomore majoring in animal science. He said each day a different pig needs different things and he and Galindo put three to four hours a day into their pig work.

Bauer and Galindo say they have gotten some strange reactions when they tell people where they live.

"People laugh and don't believe you or else they just look at you and don't say much," said Galindo, a junior majoring in animal science.

But the pair have no complaints about their neighbors and said the piggies are what make the job.

"They are almost like people. Some are friendly and some stay away," Galindo said.

He pointed to the back of a dusty, slow-moving hog and said, "Groover here is really relaxed and mellow."

Bauer said he has raised cattle, sheep and chickens and pigs are much cleaner. They have to be kept clean, he said, because they have no sweat glands and they want to stay dry, he explained.

Because the animals are close and easy to work with, Bauer and Galindo enjoy their jobs. They said they plan on working in some animal-related industry after graduation.

The future does not look as bright for their four-legged neighbors. Most of the little piggies will go to market. Whether the pigs are raised through the university foundation or through student enterprise projects, they will be sold, he said, because the pigs are raised to provide meat and the meat is sold.

According to Dr. Russell Anderson, supervisor of the swine unit and an instructor in the Animal Science Department, the pigs at the unit are there for student projects and instructional use.

Student projects may not be hog heaven for the pigs but they can be profitable for students. Students involved in ventilating projects are given a group of pigs—about 20 pigs in two students—and they take them from their feeder pig weight of 50 pounds to their market weight of about 220 pounds. Anderson said students get two-thirds of the profit for their pigs and a third goes back to the foundation.

Besides the ventilating projects there are also show projects and some of the swine unit's inhabitants end up on the show circuit. There is no college credit for the projects but he said he has gotten very positive feedback from them. Anderson said there is sometimes a problem with students who get attached to the pigs which eventually end up going to market.

"Getting attached to a pig is always a problem with some people," he said.

Galindo is matter-of-fact about the problem.

"They're like little pet pigs but you know they're still pigs," he said. "That's what they are for. Besides, I love hogs too much."

The pigs serve more of a purpose than the profit they bring for their meat. According to Anderson, they are extremely valuable in the instructional process and are used to teach classes about everything from farrowing (giving birth) to marketing.

Students in various classes are involved in our opinion, clipping needle teeth, tail docking, castration, vaccinations, giving iron injections and spraying for parasite control. Bauer and Galindo say they are mainly involved in caring for the pigs not used for student enterprise projects. Anderson explained that some of the pigs have to be sold through the foundation because the unit can't afford to feed all of the pigs through student projects.

From births to marketing, Bauer and Galindo watch the pigs come and go and they feel better consumer information about the process is needed. Bauer said consumers need to learn more about the agricultural end of the business and that the swine unit is helpful in that respect.

"We get tons of visitors," Bauer said. "Consumers learn more and it is better for everyone."

Baby pigs are the number one attraction for the sightseers, he said.

"I've had people ask me if there is a way to make a pig that stays small," he said.

Galindo echoed the need for better consumer relations and information.

"I had one lady who didn't know where pork came from," he said.

"She acted shocked when I told her."

Story and photos by Laura Christman
“Saturday Night Live" will undoubtedly recognize "Hey Bartender" and "I Don’t Care." The latter song is also the best cut on the album. When Jake Blue starts those lyrics, you know he’s livin’ it.

No poppa told me, my momma said down and cried.
Now that you’re a man, how many women you got?

Looking at my mamma dear, didn’t even crack a smile.

Often notable cuts are "Soul Man," currently moving up on the AM charts, although just one of the better songs on the album. "Groove Me," blues with a Jamaican flavor; "Shout Out Blues," a tribute to the summer side of life, and "Almost," which is almost a love song.

The brothers manage to belt it out with the help of Paul Sheffer on organ and piano, Steve Jordan on drums; Donald "Duck" Dunn on bass; Matt Murphy filling out the rhythm section; Lou Martini, Alan Rubin, Tom Scott and Tom Malone on brass.

"Everyone says thank under the conditions of a line that they would normally dance under, like at the Gradama.

A partner is not necessary to take the class. The class offers a chance to dance with different people, become more aware of how to dance with different people.

Although all the classes are popular among students, full classes are more challenging. A large number of students want to add a ballet or jazz class. Both ballet and jazz are popular. A large number of students want to add a ballet or jazz class.

Ballet is full, but probably because it’s the basic form of discipline they said. "Jazz dance is fun for people who are more modern to contemporary."

So who said "The Navy don’t pay well?"

The Navy right out of boot camp. 1976 and 1977, 120,000 men and women. According to the control of body movements in dance. Undergraduate students can take a ballet or jazz class, a full body class, a full class in the folk class, a full class in the jazz class, a full class in the dance class, a full class in the folk class, a full class in the jazz class, a full class in the dance class, a full class in the folk class.

The Dance Arts Studio on 13th Street and 3rd Street, which offers both full classes and full classes in the folk class, a full class in the jazz class, a full class in the dance class, a full class in the folk class, a full class in the jazz class, a full class in the dance class, a full class in the folk class, a full class in the jazz class, a full class in the dance class, a full class in the folk class, a full class in the jazz class, a full class in the dance class.
KEY SCENE—Rebecca Koppa as the distraught wife confronts her husband and best friend (Tahm Streich and Bernadette Burkett) in Cal Poly's production of "Night Watch"

‘Night Watch': Spine - chilling

BY KATHY McKENZIE
Daily Bell Writer

Key chills going up your spine? It may be more than the rain. You may have just walked out of Lucille Fletcher’s "Night Watch,” Cal Poly’s winter quarter play.

While the production is not perfect, it has enough energy to start the chills almost immediately. The mystery thriller, which ran on Broadway, uses words rather than action to create moods and feelings in the show.

The plot, set in the present, involves a woman (Kathleen Koppa) who sees a dead man in the abandoned tenement building across the street from her home. No one believes her story, especially when the police are unable to turn up any sign of a body or any victim of the murder.

The woman, Elaine Wheeler, must convince her husband John (Tahm Streich), her friend, Blanche Cooke (Bernadette Burkett), and the police (Lawrence W. Benton) of NYPD that she is not insane and that someone was killed.

But other suspicious characters abound. There is Hilda, the early German maid (Julie Harders), Curtis Apodaca, a new neighbor (Russ McDermott), Dr. Tracy Lake, a psychiatrist (Cindy Vagian), and Sam Hoke, detective owner (Booth St. Clair). Helping out with the investigation is Patrolman Mason (Maree Mason).

Miss Koppa was handed a difficult role to play in the character of Elaine, and unfortunately does not quite capture the feeling of the haunted, high-strung woman. She has a tendency to play it in only one key: hypnotted. Her emotions are not believable.

Her best moments come when she plays opposite Mr. Burkett. They have a good chemistry between them that is almost visible. But Tahm Streich as John, a somewhat unorthodox stockbroker, must win the cigar this time.

Streich comes across as the most real character in his role as a man caught between his neurotic wife and the affair he is having with her best friend (Kathleen Koppa). The real show-stopper, however, was Miss Haders as Hilda. She gives the play some vital comic relief, but by turns seems both sympathetic and menacing. She stole the first few scenes from under the rest of the cast through her portrayal of the suspicious, sword-carrying Hilda.

The show was well-paced and made good use of some eerie music at appropriate times, although the sound effects had a tendency to sound tinny and misplaced. Although some scenes came across as wordy, the overall impact was nonetheless definitely spine-stirring. It does the audience to oust the author, but beware of red herrings.

The production, shown in the Little Theatre, will be on tonight and tomorrow at 8 p.m. Tickets are available at the box office and the UC ticket office.

Probing prices and bookstore bucks

**BY SUSAN SUMNER** "daily@calpoly.edu"

Cal Poly students don't have far to go to get competitive prices on textbooks, binder paper, headbands and film -- just walk to El Corral.

In a price comparison study on more than thirty items, El Corral consistently undercut other businesses in town on several school supplies and had prices competitive to those down town on personal items such as shampoo and deodorants.

The advantages offered downtown are a wider selection of items and sizes and convenient lunch request that cut the prices to levels significantly below those at the bookstore.

El Corral hasn't always had competitive prices. The bookstore's management has been making a special effort to reduce prices on school supplies, since September 1978, said Ivan Sanderson, manager of the bookstores.

The bookstore has used two ways to reduce their prices. Sanderson said. The first is in membership in the Western Colleges Bookstore Association, a group of bookstores from 33 four-year college that purchase paper and notebooks in volume direct from manufacturers, Sanderson said.

"We're able to wheel and deal with big suppliers and cut down on some of the middleman costs," the manager said.

Even with these measures, the bookstore makes a profit each year. After the bookstore has made its revenue amount, which is more than El. 10 million this year, the remainder is turned over to the University Union Board of Governors said Al Amirali, executive director of Cal Poly Foundation. Last year the bookstore returned more than $20,000 to the University, he said.

Below is a list showing prices on campus and those in town:

The price range on dry plates also favored the bookstore. El Corral offers plates from 32 30mm. while a high is 30mm. An air spokesman said the store's prices ranged from $10.09 to $30, with the average cost being $13.95.

**KCPR Newsday: Typewriters for tunes**

**BY PAMELA RAMBTRUM** "copy@calpoly.edu"

If Mike Walker, John Chamberlin and Barbara Walters grab your ear more than Billy Joel, the Doobie Brothers or Linda Ronstadt, this is ready for you. News Tuesday higher.

KCPR 8.13 will replace hot tunes with hot news all day.

Once a year for an entire week, KCPR broadcasts only news. Beginning at 8 a.m. and lasting through 6 p.m. on Feb. 26, news will be the only thing on air.

"Culinary arts students at Cal Poly were invited in the state of California that does this every year," said Tomastik, a journalism major.

Tomastik has planned it in honor of national news, local and campus news and sports.

"I am aware that KCPR only does this every year," said Tomastik, a journalism major.

Producing 10 hours of news instead of hot music is a test to KCPR's ability to operate the machinery so the staff can keep It interesting.

Tomastik is confident that this year will be a repeat of last year's news day. Tomastik is confident that this year will be a repeat of last year's news day.

BY SYLVIA DESOTO

For most college students the ultimate goal of their four or five year academic order is graduation. But as the last few weeks of school are over, they are now looking to the future. Will it be graduate school, the job market or...?

Statistics on types of jobs and where graduates received their graduate degrees are compiled by the Placement Center. This information reveals the benefits many graduates are finding in the job market.

Rich Equino, Placement Associate said although these statistics only apply to graduates who went in job information, they still show trends of starting salaries in the job market. The highest average starting salaries were awarded to engineering majors ranging from $11,750 to $7,900 a month. Chemistry and computer science majors received from $1,000 to $1,750.

Students who are interviewing for jobs that require technical majors are finding this year’s salaries are even higher. “It’s definitely a buyers market,” said Jodi Cron, a Computer Science major whose average salary offer has been $18,500 a year. She anticipates having more than five job offers before she graduates.

In business administration, management and marketing average salaries began at $1,000 a month. One Junior major a computer science major with $3,000 a month. He is graduating in May in a marketing finance manager began at $1,500.

Monthly salaries moved below the $1,000 range for biology and natural resource management majors. They averaged $800 a month.

Tay - Sachs testing comes to Poly

Imagine your child at 6 months old. He is a normal, healthy child except he doesn’t seem to know how to crawl. Your child is cut off from the world and his ability to eat and to smile. Within three years he will die. He is suffering from Tay - Sachs disease.

In 1977 right Col Poly students were found to be carriers of the Tay - Sachs gene. Last year two were detected as a result of testing on campus.

Last solar eclipse of the century

Darkness will come only a few hours after sunset Monday, March 12, in many parts of the United States and Canada. The sun and moon will be the only objects in our skies, and the earth and moon will be the only objects in our skies, and the earth and Sun. Creating a shadow on the earth, creating a temporary darkness. The moon will be between the earth and Sun, creating a shadow on the earth, creating a temporary darkness.

Mottmann says San Luis Obispo High School had a 90 percent eclipse because it was in the path. The next time it will be at 93 percent.

"If you were not paying any attention you would not even notice it," he said. "It’s a little thing referring to the eclipse as seen from San Luis Obispo."

The professor, who is flying to Winnipeg, Canada to view the full eclipse, says the total eclipse darkens with 30 miles per minute. Any one point along its path will remain dark for 23 minutes.

"On Saturday it will be dark enough to read a newspaper," he said. "On Sunday it will be dark enough to read a newspaper." That’s because, in our business, an outstanding technical staff is the key to success. Magnavox has been remarkably successful because we offer small company atmosphere with large company benefits and challenge! Hence the pitch, and this ad. If you like what you see here, get in touch. Maybe both of us will be glad you did.

WE WILL BE ON CAMPUSS:
Monday, March 5, 1979

Worst rains are over - for now

Although blue skies are not yet in sight, the worst of the storm that hit San Luis Obispo on Sunday is over—at least for the next few days.

According to Harvey Happrup of the U.S. Weather Service in Santa Maria, the storms will be partially over by this weekend and could be ended by another chance of rain.

However, said Happrup, there is a chance of a storm system building up over the next few days that could bring rain late Saturday or early Sunday.

The last storm caused no major damage, reported County Engineer Oscar Marquez, but it did cause some inconvenience for those who had to travel in the heavy rain.

Mustang Daily

**Newsline**

**Air travel tightening smoking rules**

**WASHINGTON**—Tightened restrictions on smoking aboard commercial airliners take effect today.

The new Civil Aviation Board rules follow a study of the problem of smoking in the confined conditions of aircraft.

The rules ban smoking, unless it is done in a non-smoking section of a plane, so as to protect passengers and crew from second-hand smoke.

**Farms contract talks resume**

**HOLTVILLE** (AP) —— Peace returned to Imperial Valley fields Thursday after a violent confrontation between more than 1,000 striking farm workers and sheriff's deputies and police that left at least five people injured.

Meanwhile, contract talks resumed between the United Farm Workers and negotiators for 28 vegetable growers and shippers in California and Arizona.

On Wednesday, the union rejected, at least publicly, a second offer from the company.

The work stoppage, which led to the confrontation with police as large crowds gathered outside fields where work was continuing, was called "because those farms that were not struck were making incredible profits. It was designed to stop those profits at least for a day," Lopci said.

Chinese launch new attacks

**BANGKOK, Thailand** (AP) — In the hottest fighting on the 10-day-old border war, Chinese forces launched fresh attacks on a Vietnamese-held mountain range that links Hanoi with Vietnam's northeastern border, reports from Peking said Thursday.

A Chinese government official in Peking said today that China's "punishment" on Vietnam is not finished. Japan's Kyodo news service reported the unidentified official reportedly said China will not back down over the military situation as it is.

In Moscow, a Soviet Foreign Ministry official denied reports of a heightened alert for Soviet troops or troops in Sino-ruled Mongolia because of the Vietnamese situation. He denied the reports "dubious provocative twaddle."

**Chinese relations justified**

**WASHINGTON**—The Carter administration has tried to justify the establishment of normal relations with China by depicting it as a major step towards peace and stability in Asia.

That rationale has come back to haunt the administration as the cutoff of war on the front in Southeast Asia has created perhaps the most dangerous situation facing that continent since the Korean War.

Within three days after President Carter's announcement of his new China policy, assistant secretary of state Richard Holbrooks told reporters, "normalisation of relations with the People's Republic on China was viewed by the president as a step towards increasing peace and stability in the region."

It was not long, however, before Vietnamese-ruled forces invaded neighboring Cambodia and overran the pro-Peking regime headed by Pol Pot. Therefore, China, not wanting to be seen as a powerlessness bystander in the face of the current of a threat to its borders, responded by launching what appears to be a limited attack on Vietnam.

The new rule requires that no smoking be allowed in aircraft when the ventilation system is not in full operation, such as while waiting for takeoff, or while passengers do not object.

Finally, the new rule requires that no smoking be allowed in aircraft in the cabin of a passenger who wants to be in the same area as a smoker.
Latest SLO phenomenon puts people in hot water

BY RAYMOND MCKENZIE

When the water temperature of a hot tub at Sycamore Mineral Springs in Avila Beach finally exceeds 100 degrees, pump it to the not tubs.

Sycamore is a familiar name to many, but the tubs are not. The hot tubs are not, however, for everyone. Some conditions, such as skin problems and heart disease, prevent people from using the hot water, which can be dehydrating and irritating.

"It's a great deal of work," said Ron Christ, manager of Sycamore. "But it's like..." and something

Sycamore get into the soaking business about three years ago, although most of the tubs have been added in the past year. Raymond Keating, the current owner, who is also the manager for the future, Keating explained, "That we want to build a tub, and a restaurant and some sort in addition to the tubs and indoor pools that are here now.

Previously, Sycamore had been open and owned that period in 1977, Keating said. Sycamore is a historic spring in Avila Beach, which has been turned into a hot tub. Sycamore is a popular spot for people who want to enjoy a hot tub in the winter. It is usually only open during the winter months, but in the summer, it is open every day. The tubs are not for everyone, however, because they are not for people who have heart problems, diabetes, or arthritis. The tubs are not for people who are pregnant or have a history of heart disease.

Public swimming pools, health clubs, and spas are also considered to be relaxing and therapeutic. The water temperature of the hot tub at Sycamore is between 7 p.m. and 3 a.m.

...It's like throwing a party every night of the year.

...or Make Your Move in Aerospace!

But health problems are not the only concerns at Sycamore. "If you're going to have the same problem with any other tub in the area," Keating said, "it's going to have the same problem. That's the situation that they face. They work with a guy. When the tubs get out of hand, they have to get rid of them. They really had too much trouble to make that happen.

"You're going to have the same problem with any other tub in the area," Keating said. "It's going to have the same problem. That's the situation that they face. They work with a guy. When the tubs get out of hand, they have to get rid of them. They really had too much trouble to make that happen.

Long hard hours for the children

BY PAULA KREDEL

Two Cal Poly students are putting in long hours telling organizations, getting together clubs, and putting together a project so they can finish their senior project. Two Cal Poly students are planning a week-long celebration of children for their senior project: "Week of the Young Child."

Music group hosts formal

"Spring into Spring" is the theme for this year's 54th Annual Civil War Era Formal dinner on Saturday at the San Luis Obispo Veteran's Memorial Building. The formal will start at 5 p.m. and continue until 1 a.m., featuring a live band called "Instinctive." The music club is a group of students interested in music, inviting all Poly students to attend. The event will be open to all Poly students for a fee of $2 per couple (members of the music club have a two dollar discount). Tickets may be purchased at the door, or one may phone the band and at Premier Music Co., Inc. in San Luis Obispo and the University Union Ticket Desk on campus. Priest will be available for help.

Events Hewitt and Gossen have planned for the special week will culminate on April 17, when from 11 to 3 p.m. in the Mission Plaza, there will be entertainment for parents, their children, and all prospective parents, teachers, and friends. Most of the events on that Saturday will be geared toward children. Gossen and Hewitt have worked together with different organizations participating and sponsoring activities by sending out to preschools and organizations for help. As visiting their plans, volunteer groups will be providing cooking, making and puppet shows, a mini-story reading, and health demonstrations.

Last year only other adults felt left out, the two students have arranged for information about children's rights to be available at booths including nutrition, child abuse, and health information. Gossen and Hewitt have been busy trying to put together volunteers and activities for their planned day. Each one of them spends two different clubs about two hours a week, keeping up with the participating organizations, writing articles for papers, and works on publicity displays.

"It's quite a lot of hours," said Hewitt, "but I've met a lot of people, and gotten to know some of the system works. Because of this the project has been worthwhile, added Hewitt, who plans after graduation to go for her teaching credential, then into the Peace Corp, for two years, and come back for a special education teaching credential. We have found that they've benefited from the speaking experience their senior project subjects them, and say each new presentation is a little easier than the last.

Recently Gossen and Hewitt have been calling a student to the local high schools, making a trip back in time.

"Fun to talk to people who are as young as we are years ago," Hewitt said. "We got to tell them what it's like to go to Cal Poly."

The community has been really responsive. It gives a good name to Cal Poly.

Bend concert

Cal Poly's annual Winter Concert Series presents "A Dance of Nightingale and Trees," featuring the San Francisco Chamber Winds, and Sacred Chords, to be held at the San Luis Obispo County War Memorial Arena, Saturday, March 16, at 8 p.m. The acapella group of choral and instrumental music will perform a variety of music from around the world, including works by Richard Wagner, John Rutter, Roger Wagner, and others. Tickets for the concert will be sold beginning Wednesday, Feb. 20, by members of the school band and at Premier Music Co., Inc. in San Luis Obispo and the University Union Ticket Desk on campus. Prices will be $3 for adults and $1.50 for students.

Cal Poly: Similar to Bible college?

BY PAULA KEGEL

Friday, February 23, 1979

Cal Poly is about the size of a small college, always going to get you to a Bible college without actually attending one, says Armand Madrid, president of the Navigator.

Navy Capt. wheels, who estimates that about 250, is just one of approximately 18 Christian organizations on campus. Madrid adds that Cal Poly in general is very active in other areas.

"At Cal State Los Angeles, where Madrid attended classes, there was only the "social" or even "heathen" crowd that were putting out pamphlets in their weekly newspaper," says Madrid. "But at Cal Poly, when registration day comes and it's time to pay the fee, many students at Christian organizations for Jesus pamphlets are what end up on the hands of passersby, because of the large percentage of Christians here," says Jim Whethel, president of Campus Crusade for Christ, which has a membership of about 250.

There may be a larger population of Christians here because Poly doesn't harrow so hard on parties, and because it is not as academically competitive, leaving time for students to get involved, Whethel believes. He explained, it is more appealing to be a Christian at Cal Poly.

"Someone who wouldn't be involved in a Bible college at another school, might be here," says Whethel.

Jim Whethel has a Harvard connection with at least one of the Christian groups on campus, says Whethel. Henning has been to Harvard, one of the students in the dorms know someone who belongs to one of the groups.

Both navigators and Campus Crusade for Christ are evangelists, in that one of their purposes is to spread the same amount as the previous year. Martinez said the library wasn't granted the full amount for the allocations for books, periodicals, and services.

The year's budget did solve some problems said Martinez. One of these problems concerned student assistance. The library didn't pay off any assistance because the budget didn't cover the required pay rates. Each time the student's minimum wage goes up, the library is forced to raise their wages. The budget was designed from the preceding year's budget which had received more money from Proposition 13 and Martinez said the library has to transfer money to cover the deficits produced by the discrepancies in student assistance.

Proposition 13 has forced people to adjust their budgets to coordinate with the new brought on by the proposition. The library has survived with relatively few problems to date, and their budget this year, but until next year's budget is designed it is uncertain what state the library will be in.

Prof's stories in national limelight

Playboy and Redbook magazine have published stories written by English Professor Alfred Landwehr. As number one storytelling professor, it would seem fitting that he has a short story published in Redbook, the famous magazine for married men.

Landwehr has sold a short story to Redbook and it has been published. "The Taming Of The Earth" will be sensitively published in July by Playboy, and "A Cup of Coffee With The Cardinal" will be published in May. It tells the story of an executive league baseball player and his alcoholic father. Landwehr is one of the finest short story writers published by national magazines, though he has sold other stories to "little magazines affiliated with universities." These symposiums contain good company. I was in the beginning of the year, he finally wrote the story in two days.

Redbook bought "A Cup Of Coffee With The Cardinal" for appropriation. The story is about a distinguished baseball player and his alcoholic father.

Landwehr's bachelors, masters and doctorate degree are from the University of Missouri. He's taught at Cal Poly since 1970 and has written three other published books, but he didn't pay much mind to Redbook.

Landwehr will not say how much he was paid by Playboy and Redbook for his stories. (He did say "in money") but he said "I'd rather have them published than I'd ever more before.

California Stereo Liquidators, a manufacturer's representative will dispose of its inventory surplus of new stereo equipment. The items listed below will be sold on a first-comer, first-served basis at the Howard Johnson's - 210 S. Nicholson Rd 103-105 Serrano Blvd Inland Empire.

Me, take another exam? Are you crazy??

G. The Navy Officer Qualitative Test (KOCT) is a place of stress, right?

A. Here are some tips that should help.

If you're majoring in engineering or another technical area, we would expect you to do better on the KOCT than on the other diagnostic tests. Cultural Arts major, but you won't hear anything anyone that is involved in KOCT. The test is to determine the best fit for the KOCT layout, dealing with numerical and verbal reasoning, logic and reasoning, problem solving, interpretation, word analogy and reasoning, etc. For those interested in KOCT, I would like to tell you that is an extra section dealing with verbal orientation.

The Navy Officer Information Team will be stopping by the shop at 9 a.m. Monday, 26 Feb. 11 a.m. Tuesday, 27 Feb. 11 a.m. Wednesday, 28 Feb. 11 a.m. Thursday, 29 Feb. 11 a.m. Friday, 3 Mar. 1 p.m. and Thursday, March 9 at 9 a.m.

Tests will be scored immediately and an Officer will be there to answer your questions. If you have various programs you may want to consider.

Taking the exam in no way obligates you to the Navy. You can still go to college and work on yourself. Come in and give it a shot — you might even pass!
SCAA champs travel to Stanford

Coach Kathy Barthel is the only Cal Poly swimmer who has qualified for the NCAA National this far. She has met the qualifying standards in both the 50 and 100-yard breaststroke events. But Coach Barthel is hopeful that at least two more girls will be able to qualify at Stanford. Sophomore Debbie Forslund from Madera has a chance to qualify in the diving events, while freshman Kathy Kerrigan from Santa Clara needs to drop a second and a half from her Season's best time to qualify. This will be the final opportunity for Cal Poly's swimmers to qualify for the national championships. The Mustangs will be traveling as the champions of the Southern California Athletic Association.

Save $15 on any ArtCarved College Ring!

Choose Gold or Siladium

- Classic
- Blason
- Colorado

ENDS FRIDAY

Save $15 on any ArtCarved College Ring!

Why you should buy your ring now:
1. You deserve it. You've accomplished a lot.
2. Save $15 on any 10K gold or Siladium ring instead of the $41 or $81 you might get from another company.
3. Different Rings! The largest selection to choose from. Over 20 different ring designs! See traditional and contemporary men's designs and beautiful fashion rings for women.

REBATE CERTIFICATE

Get a $15 REBATE on any ArtCarved College Ring with this certificate. Valid on any ring in the ArtCarved Collection (even gold). Choose from a wide variety of traditional, contemporary or fashion rings, each made to your individual taste.

To get your $15 rebate by mail, fill out form:
1. This coupon must be presented with your order.
2. Limit one rebate per purchase.
3. Purchase pays any taxes.
4. Offer valid only on ring purchased during this sale.
5. Refund is void if returned or issued after paid for at point of sale.
6. Once this certificate has been redeemed, cannot be redeemed for future purchases or rebates.

Poly rodeo teams enter tourney in second place

The Cal Poly rodeo teams resume action this Saturday and Sunday, at Mesa, Arizona poised to move closer to the top in regional standings. Cal Poly is currently seventh in the West Region of the National Intercollegiate Rodeo Association rankings. The Mustangs are in second place in the Southern California Rodeo Association.

No. 3 USC hosts Poly volleyeys

By Brian Cardello

Cal Poly's next opponent in volleyball will be the University of Southern California. The Mustangs are not met third ranked USC in league competition previously, but faced the Trojans once this year. Once last year in interconference play.

"We lost both times (to USC) but the competition was fierce and the scores were even. It was really exciting volleyball," said Wilton. Although the match last weekend, Coach Mike Wilson says that the team earned respect from the conference.

"Our passing, our good and our offense ran well against Pepperdine in the second match (15-16). Our passing and setting were not good in the other matches." Pepperdine won the first game 15-16 and the third game 19-14, 16-14.

Wilton's goals for the team are to "give everything possible" against each opponent. "We accomplished that against both teams last weekend, but that doesn't mean we won our best. That second match should be typical. We proved that we can play and win a top level competition and we learned that we can improve one area and struggle in another. I think that we perform at that level consistently," said Wilton.

But Coach Wilson did not make excuses about the losses. "Our passing, our good and our offense ran well against Pepperdine in the second match (15-16). Our passing and setting were not good in the other matches." Pepperdine won the first game 15-16, the third game 19-14, 16-14.

One of Wilson's goals is that his team "gives our opponents everything possible" against each opponent. "We accomplished that against both teams last weekend, but that doesn't mean we paid our best. That second match should be typical. We proved that we can play and win a top level competition and we learned that we can improve one area and struggle in another. I think that we perform at that level consistently," said Wilton.
Women gymnasts to end season

The regular season concludes Saturday for Cal Poly's women's gymnastics team and Coach Andy Proctor is optimistic.

"I'm hoping for us to score 196 points or better," said the second-year coach. "I'm looking ahead for us to score 196 to 198 points when the conference meet comes up in a couple of weeks."

The Mustangs take on Diablo Valley College, a team they lost to last year by a score of 190.96 to 184.48.

Competing in All-American competition for Cal Poly will be Amy Byerly, Laura Kune, Donna Meyer, and Diane McLean. Senior Leslie Phillips will enter the vaulting and bar events. She is McDonald, is entering three events, the vault, exercise, uneven parallel bars, and the balance beam. Terri Calhoun will enter in the balance beam and sophomore Judi Underhill will enter in the uneven parallel bars.

"It was the worst meet of the season for our team," admitted Proctor, "but this year, they have an injury in their top performer."

Wednesday's meet with Chapman was scored 198.92-198.08 in favor of Chapman. The junior varsity scored 196.6 over Northridge.

Friday's events with best times:

400-yard individual medley: Holbeek, 1:50.4
50-yard freestyle—Hassel, 1:50
100-yard freestyle—Hassel, 1:49
200-yard freestyle—Hassel, 1:48
500-yard freestyle: Holbeek, 1:47.5
1,500-yard freestyle: Wright, 1:30

Men swimmers vie for CCAA title this weekend

Coach Mark Johansen takes his Cal Poly Mustang men's swim team to Northridge this weekend hoping to qualify several swimmers for national and finish ahead of Cal Poly Pomona in the California Collegiate Athletic Association championship.

Competitions begin at 10 a.m. Thursday, Friday and Saturday with final meet day at 5 p.m. Cal State Northridge is the host school for the swimming events, while Cal State Los Angeles will host the diving.

In a meet against U.C. Riverside last Saturday, Steve Wright became Cal Poly's first qualifier for nationals by swimming a 51.9 in the 100-yard butterfly.

Cal Poly's entries for Thursday's events were:

200-yard freestyle: Bill Bishoff, John Holbeek, Brian Crawford
300-yard individual medley: James Lopes, Craig Petersen, John Reams, Alan Payne, Gary Yeo, Andy Kune
50-yard freestyle: Ron Hassel, David Smith, Wright, Bill Murray, Roger Lenoe, Mike Petersen, Alan Bell, Matt White, Mike Doyle
400-yard medley relay—Hassel, Lopes, Reams, and Wright

Mustang baseball squad hosts Cal State Hayward today at 2:30 p.m. and Saturday in a doubleheader beginning at noon. Both games are at Mustang Field.

Friday's events with best times:

400-yard individual medley—Holbeek, 1:50.4
100-yard freestyle—Hassel, 1:49
200-yard freestyle—Hassel, 1:47.5
500-yard freestyle: Holbeek, 1:44
1,500-yard freestyle: Wright, 1:30

Thursday's events:

200-yard butterfly—Holbeek, 2:14.0
200-yard breaststroke—Wright, 2:15.8

Wednesday's events:

200-yard butterfly—Holbeek, 2:16.1
200-yard breaststroke—Wright, 2:14.8

Friday's events:

200-yard medley—Hassel, Lopes, Reams, and Wright

Earn over $650 a Month Right Through Your Senior Year!

If you're a junior or a senior majoring in math, physics or engineering, the Navy has a program you should know about. It's called the Nuclear Propulsion Officer Candidate-Collegiate Program (NUPOC-C for short) and if you qualify, you can earn as much as $650 a month right through your senior year. Then after 16 weeks of Officer Candidate School, you'll receive an additional year of advanced technical education. This would cost you thousands in a civilian school, but in the Navy, we pay you. And at the end of the year of training, you'll receive a $3,000 cash bonus.

It isn't easy. There are fewer than 400 openings and only one of every six applicants will be selected. But if you make it, you'll have qualified for an elite engineering training program. With unequalled hands-on responsibility, a $24,000 salary in four years, and gilt-edged qualifications for jobs in private industry should you decide to leave the Navy later. (But we don't think you'll want to.)

Ask your placement officer to set up an interview with a Navy representative when he visits the campus on Nov. 14-16, or contact your Navy representative at 213-468-3321 (collect). If you prefer, send your resume to the Navy Nuclear Officer Program, Code 312-R257, 4015 Wilson Blvd., Arlington, Va. 22203, and a Navy representative will contact you directly. The NUPOC-Collegiate Program. It can do more than help you finish college; it can lead to an exciting career opportunity.

Navy Officer. It's Not Just a Job, It's an Adventure.
Women sailors won't go to Humboldt for regatta

The three women on the Cal Poly Sailing Team will not make the trek to Humboldt State for the third Northern Coast Sailing Regatta this weekend. They'll stay home and practice.

"Humboldt is so far," said team member Barbara Crowell. "It wouldn't do the women or the team any good to go that far when we would better spend the time working out."

Several men will drive the 12-hour drive to compete against Stanford, Santa Cruz, Berkeley, Davis and Sonoma in the regatta at Big Lagoon, according to team member Barbara Crowell. But she said the women need to work on a few things, such as starting and SOSing strategy.

Two women, Crowell and teammate Cindy Petroski, competed in the Stanford Women's regatta last weekend—they finished tenth out of ten two-woman teams, according to Petroski.

"It was due to our inexperience," said Petroski. "It was also the lack of wind and unfamiliarity with the boats—I can say that, but it really lacks the experience that counts."

Nine two-person Fezzar class boats, which are similar to the Flying Junior class so important in intercollegiate sailing, were sailed in the round robin meet last Saturday. All nine boats are owned by Stanford, according to Petroski.

Two teams from Santa Cruz placed first and second in the regatta, held at Stanford's campus Lake. Women from Stanford, Sonoma and Berkeley competed as well.

Both Cal Poly women were philosophical about their last place showing in the regatta, said Petroski. "It was worthwhile for the practice and the chance to sail against a woman. It was getting the woman together."

The third woman on the Cal Poly Sailing Team, Barbara Crowther, who did not attend last weekend's meet, said, "There's still a lot of work involved in coming in last."

Crowther, who did not attend last weekend's meet, said, "There's still a lot of work involved in coming in last."

Bordley rights turned over to San Francisco

CASA GRANDE, Ariz. (AP) - The San Francisco Giants were negotiating rights to California's pitching sensation Bill Bordley, a drawing Wednesday.

"The reports I have on him are great," said Bsp Richardson, general manager of the Giants, at the team's spring training camp here. "He would have a chance to stay with the big club today."

Bordley, a left-hander with a 36-2 record over two seasons with the University of Southern California Trojans, refused to consider signing with the Cincinnati Reds. Earlier in the week, the Reds announced they had given up trying to sign the pitcher.

Richardson said he talked by phone with Bordley on Wednesday and that Giants scout George Cenovar would also work on signing the pitcher. If Bordley signs, he'll be invited to join the Giants in spring training immediately, Richardson said.

"We'd give him a good look, and at that point it would be up to our manager, Joe Amodei, and his staff where to keep him on the big league roster," the general manager said. "From my conversation with Bill, I can see he's an intelligent young player, and I'm sure he realized the decision we made on him would be for his good."

Many of the Giants pitchers and catchers reported to the spring training camp Wednesday. The first workout is scheduled Thursday.

SAGE THE GATOR—No. 21 Laurie Sage misses on the jump ball but hopes to extend a little bit higher during Saturday's last home match for the women's basketball team. "The game is against Cal State Los Angeles at 6:30 p.m. before the men's game."
**HEATON HURTS—Usual 187-pound wrestler Scott Heaton enters competition this weekend at 186 pounds. He's been nurturing a shoulder separation but hopes to come back in style this week-end during regional competition. The event will be held in South Bend, Indiana.**

Poly matmen seek fifth regional title
Ten wrestlers entered in South Bend, Indiana tournament

Cal Poly presses into the "second half" of its collegiate wrestling season this weekend and for most mat men in the most prestigious part of the campaign—the national championship series. It all begins for the Mustangs at South Bend, Indiana this weekend where Cal Poly will be one of 17 schools vying for the 25 available berths in the NCAA Division I national championships to be contested at Iowa State University in Ames, March 8-10.

Returning All-American 186-pounder Gary Plischke placed fifth in his weight class last year. Plischke has a 16-3 mark. Competition will begin at 1 p.m. Saturday at Water Dam's Athletic and Convocation Center. Semifinals are set for Saturday evening with two rounds of elimination matches. Championship matches and consolation finals will be held Sunday afternoon beginning at 4 p.m. Central Standard Time.

Cal Poly will be seeking its fifth straight Division I Western Regional championship. But qualifying for the national championships is the most important business at hand. To do that a wrestler must finish first or second in his weight class or be chosen as one of the five "wild card" wrestlers for the national championships.

Five wrestlers who represent Cal Poly in the 1979 NCAA tournament will be hard, ones more. Scott Heaton was a regional champion at 187. Robert Clark won the title at 158 and David Jack took heavyweight honors.

Farmer, a regional runner-up and senior Billy Flingham, a third place finisher at 137, and Cal Poly's other returning 1978 regional place winners. A year ago Cal Poly qualified seven wrestlers for the national championships.

**Heaton in regionals—Separation still a problem**

**BY JOHN KELLER**

A shoulder separation may have doomed wrestler Scott Heaton down, but after three weeks, the All-American will return this weekend to compete in the Western Region Tournament.

The junior refused to undergo surgery on his shoulder after suffering a third degree separation. Jan. 30. "I've been saying it every day and working out really hard," said Heaton.

Since the loss to Iowa State, Heaton has been out of action and dropping weight in hopes of competing in the annual meet at the 150-pound level. Heaton has not wrestled under 187 pounds since his freshman year when he finished with a 27-1 record.

Normally I weigh 171, said Heaton. Tonight I'm at 160 and it should not be too hard to lose two more pounds before Friday. Heaton said.

The gap at 160 is larger and I'm more apt to get hurt, the All-American said. At 161 I have more strength as compared to my opponents than three at 157.

"If hadn't been that bad getting down a weight because I haven't wrestled and I know I'm on my way," Heaton said. "My legs are up and my rifle down and now I'm working on the weight." Heaton weighed in at 183 pounds at his last meet.

With a 23-3 record this year, Heaton returns to the regional tournament to defend his two-time western regional crown. The taker wrestled the 1978 regional championship last year after winning the 150s as a freshman. Over a three-year span Heaton has wrestled in 56 duals, 11 of which he has won and one tie.

The decision to return surgery was made by Heaton against the advice of his physicians C. Boying Farmer. Farmer wanted to operate on the shoulder and "ask a fellow," added Farmer.

A few days after the shoulder operation instead of help the injury, said Heaton. If he landed on the same shoulder, the pin would either give him stern and might knock a bone.

The business major said the operation would have taken up to six weeks to heal.

"Dr. Farmer has helped me a lot since I made my decision to return surgery," said Heaton. "He wanted to operate, but he helped me along with my shoulder after I returned surgery," Heaton said. Farmer was not available for comment.

The separation occurred in Iowa against Iowa State on the back road trip of the dual meet season. Dave Powell led Heaton and before the freshman got his bearings he delivered a punch to his shoulder. Heaton stood up after being on the bottom when he threw him to the mat.

Heaton fell in two weeks, when the nation's take place. Heaton would do really well. The weekend's competition begins today in South Bend, Indiana and will continue through tomorrow.

**FINDING AN OUTLET—Mustang guard Earl Muse finds a passing lane in a recent contest. Cal Poly concludes their season tonight and Saturday in two home games. Tonight's visitor is Cal State Northridge. Saturday's guest is Cal State Los Angeles.**
