**Sex in dorms may soon be legal if plan survives**

Dorm residents may be able to have sexual relations legally in the residence halls next year if a group of students that has proposed changes to the housing license law to the Student Affairs Council is successful in implementing its suggestions. The Student Affairs Council is to decide on March 12.

The issue has not gone without criticism, however. Housing Director Robert Bowstrom of Cal Poly has rejected the changes, and said Cal Poly's image may be at stake if dorm residents are allowed to keep alcohol in the residence halls.

By Dave Berkeley

The only liquor license in San Luis Obispo has been sold to a Cal Poly student who has handled its (18 to 21) year old patrons. He has to worry about the safety of his license, however. For the last two years this Cal Poly student has never even been licensed.

For the new owner, Scott Hallquist, a junior Ornamental Horticulture major, the sale of the license represents an investment of $500 to $1,000. He was able to do this by eating a hamburger in Chinese.

"It still is a burger, but it will have a theme," Hallquist said.

The Poly senate plans to convert the license into "Station 31," with the theme of an American Indian fire station.

"I want to work with bands, sign-plaques, plants, signs and advertising," he added. "I have 20 arcade games, wide screen TV, sandwiches and a lounge.

Hallquist said he doesn't feel he could increase business by obtaining a liquor license. "They turn people away at the door. It's a fantastic concept," he said. "A liquor license would afford the 18 to 20 group with nothing to do last two years by Pat Jackson and her husband. Ms. Jackson is a dance instructor in the area and feels she did a good job with PJs, but was too much work.

"We're still young, and you can only work for 14 hours a week," he said. "I was going back to the old contract," she said.

**SLO Council: Billig: Better leaders**

**By Jay Alling**

The city council is not providing leadership for San Luis Obispo and that is why she is running for one of the two council seats up for bid on the March 6 ballot, said 37-year-old Melanie Billig in a recent interview.

Billig picked the council for not deciding whether or not to import water from other sources. Although Billig said she sees no imminent need to import water, she said she would push to complete plans that would ensure ample water resources in times of drought.

Billig said the council did not inform the public during the 1977 drought. "The council did not tell people what the facts were," she said.

Billig said the council had plenty of water at its disposal during the 1977 drought but refused to import water from other sources, in order to prevent a shortage in 1978.

Billig also said she is an independent. "A lot of citizens, try to break through a long-standing bottleneck preventing the completion of a growth management plan."

Billig is a city planning commissioner.

Billig said she wants to attract more merchants to San Luis Obispo, to start the chamber of commerce.

The city has not gone without criticism, however. Housing Director Robert Bowstrom of Cal Poly has rejected the changes, and said Cal Poly's image may be at stake if dorm residents are allowed to keep alcohol in the residence halls.

Money to burn

At a time when governments on all levels are scrutinizing their budgets and cleansing their souls, we were disturbed to read of a travel fund allotted to Poly. Larry Robinson, often used by him and other student government members for trips in the state. The fund amounted this year to $5,000, the equivalent of the $80 ABI fees from 150 full-time Cal Poly students.

Frankly, we would be pressed to list names of 150 students who could afford $30 for the playful cruises of our elected officials. Feb. 16-18, Robinson and 10 other student/government members, along with a Mustang Daily reporter, went to Sacramento for a leadership conference. The conference was probably lots of fun, judging from the participants childish reactions when they returned, but when the bills were collected they amounted to about $600. That’s $600 of student fees, treated like other campus groups and should not have to raise it themselves.

We had thought our “leaders” were considerably more fiscally conservative, but then very little about Cal Poly’s student government surprises us these days.

Apparently, the trip participants thought they should use the ABI funds for the trip, rather than to pay for it themselves or even raise money like other clubs are often forced to. When campus leaders decide they’d like to travel somewhere for an event, you’ll find them washing oars, sponsoring raffles and organizing other fund-raising affairs. For a conference, you are willing to go to court or boycott the military for an advertisement. In the right were minor student petitions of demonstrated revenue on and away from their lobbies.

Now and then, groups who need money are forced to appear before the student senate. Often they are turned down, like the sitting team, for little apparent reason. The student senators turn their backs on groups only to hop in cars and take a leisurely vacation of their own.

The student senators apparently felt they should not be treated like other campus groups and should not have to raise their own money. Instead they used our ABI fees—which can be construed as a direct step in the face to students.

Prop. 15—clearly the mandate of the voters—implied voters wanted the fat cut out of governmental budgets. Expenditures for frills and frivolities would have to go, the voters decided. Apparently it may take a Prop. 15 of our own at this university to get the military table with the soldiers passing out literature by the cash registers. But Mustang Daily cannot just sit idle in this case. We’re as much a problem as the one we criticize here. Unfortunately, we did not have the foresight to realize where this money for the Base from the SACL was originating from when we agreed to send reporter Cathy Spearman. Spearman traveled on ABI funds as well, and we were wrong to assume the trip was “free” as others told us. We were wrong to send her on ABI funds, we admit it. Had we known who was actually paying for the trip, we would either have paid for it out of our funds or chosen not to send a reporter. Therefore, we apologize.

Now, it is the time for student senate to join and out travel funds for themselves and for the president of the ABI. There is no clear reason why that group should be above all others and use our money to have a good time.

-- Mustang Daily
Liberal students are a major force in job market

BY PAULA KREIGER

Thursday, March 1, 1979

There is a myth that liberal arts students have few opportunities in the job market. However, the student organizations that exist, their efforts, and their interactions will tell you a different story.

Non-college majors are finding that in these tough times, there are alternatives to the hard-to-find teaching jobs, according to professors at Cal Poly.

“As for English majors, jobs with large companies can be available which most people consider reserved for the ad-"administrative business major or the pre-law engineering student. “Companies need people who can write—people who can communicate,” said Bill Wahl, English professor at Cal Poly. As a result, companies are hiring technical people as well as people in the "non-traditional" area.

Some jobs other than teaching which are open to English majors are in technical writing, editing and publishing. One Cal Poly English graduate has been an editorial assistant for the United Press International in Los Angeles, and has moved on to become a technical writer for Ori magazine.

“Although the jobs may not be as rewarding as one would like, they are available,” admitted Wahl. "It’s been found that English majors tend to run quickly to management in companies which need technical majors don’t as often.”

Middle management jobs are also open to history majors, according to Daniel Kriger, Cal Poly history professor. "History majors are usually excellent at analyzing historical problems,” explained Kriger as another strength of history graduates. "They’re able to move from assignment to assignment, and go to different jobs,” he added.

Large companies like Sears Roebuck and Co. and the Los Angeles Times are hiring history majors for such reasons. Kriger gave an example of a person who was hired at $35,000 a year to compensate for a top executive who was writing indescribable memos.

 Participating in history majors are able to get teaching jobs now, said Kriger. “But,” he said, "there are many alternatives. History majors seem to be well-qualified in public relations jobs, said Kriger, something his study on job opportunities seemed to confirm.

"One history grad went in to where a company was planning to build a plant and said, "Can we do a history of the area and find some of the problems that might arise?"" Kriger said.

Public historianships are also a fairly new area which history majors can find jobs in, said Kriger. "Workers in the area break down modern-day problems into a history, so as not to deal with the same problem time after time,” Kriger explained.

History majors are also qualified to do museum work, developing historical pamphlets for towns and companies, work for the national parks system, and other jobs, according to Kriger.

"It’s not as dismal as we thought at first,” Kriger said. “We have the traditional problems—a lot of writing and nothing concrete in our concerns, but we’re more ready than ever to go into different kinds of fields.”

In the Social Science Department at Cal Poly, Donald Floyd, social sciences professor in charge of placement, has found that half of the students are heading for teaching. But Floyd points out that a wide range of social work jobs, "which management jobs with companies, as well as two schools are open to the social science major. "It takes more imagination, than say engineering, to find the kind of work you’d like,” said Floyd of a social science degree. "You’re able to convince employers that you have a range of skills.”

As part of their course load at Cal Poly, social science majors have interned at such places as the probation department, California Youth Authority, a local hospital, the welfare department, and art hall, said Floyd. “And often these places will hire the intern after they graduate, to serve in entry-level jobs.”

During past Career Days in the Social Science Department, speakers from Pacific Telephone, insurance companies, government agencies and department stores have told them they are all looking at social science majors who can fill middle management jobs.

“Social science doesn’t leave you with a skill that’s as directly useful,” admitted Floyd. "But it gives you four years to hang your eyes open, and to take courses which will give you a combination of all this.”

Newsline

UFW calls for banana boycott

CALExico (AP)—United Farm Workers leader Cesar Chavez called for a boycott Tuesday against Chiquita brand produce. The United Farm Workers, based in Los Angeles, has moved on to become a technical writer for Ori magazine.

"We’re just asked for a boycott of Sun Harvest,” Chaves called for a boycott Tuesday against Chiquita brand produce. The United Farm Workers, based in Los Angeles, has moved on to become a technical writer for Ori magazine.

**KPCR talk show**

KPCR listeners will be able to call in and talk to the KPCR station manager during “Talk to the Manager” show tonight at 9 p.m. The number to call is 546-4640. Questions and comments are welcome.

**Communication**

“Communication: the science of science,” a presentation on the importance of communication awareness in the performance of scientific investigation, will be held in Science A-12 today at 11 a.m. The presentation is sponsored by the Red Conservation Society of America and is open to the public.

**Smoking clinic**

“A Five-Day Plan to Stop Smoking” clinic is being offered by Concerned Christians March 6 through 9. Guidance and counseling on how to kick the habit and resources on the dangers of smoking will be presented at the Adventist Community Center, 1301 Osuna Street, every evening at 7 p.m. A $5 registration fee is required to cover materials.

**Bicycle Club**

The SLO Bicycle Club will hold their monthly meeting tonight at 7:30 p.m. in the SLO Recreation Center. Everyone is invited to participate in all events.

**Vegetarian potluck**

The Vegetarian inclined People are having their monthly potluck dinner Tuesday at 6:30 p.m. at Meadow Park Recreation Room. Dr. Ruth Raspall will talk on nutrition, stress, and biochemistry. For more information, interested persons should call 499-5661.

**Dessert potluck**

Women In Engineering are holding a dessert potluck at Mustang Village Apt 123 Tuesday at 6 p.m. for Spring Quarter. Tickets will be sold at the door and interested persons should bring their own dessert to share.

**Talk on nutrition**

“Cancer and Nutrition” is the topic for a special guest lecture by Dr. Phyllis Williams from Loma Linda University Monday at 7:30 p.m. in Ag Engineering 123. Admission is free.

**French, Russian**

Classes in basic French and Russian are being offered by the San Luis Obispo Coastal Unified School District’s Adult School. Basic conversational French will be taught to help tourists in France and other French-speaking countries and basic conversational Russian will be taught for those interested in learning the language of the land of the 1980 Olympics. The classes will begin March 20 and for more information, interested persons should call 546-4090.
Entertainment

Very NICE—Rock group Ambrosia, Burleigh Drummond, David Pack and Joe Puerta will be playing to a sold-out audience at Chumash Auditorium this Sunday Mar. 4.

Eclectic rock by Ambrosia

Ambrosia, Warner Bros., recording artists and performers of last year's hit single "How Much I Feel," will appear in concert at Cal Poly on Sunday, March 4, Auditorium. The group has scheduled one show only at 8 p.m. A special guest act will be heard by classical engineer Gordon Perry, who arranged for the group to meet the Los Angeles Philharmonic. In his 1971 "All American Mystery Tour" production, Mehta, then conductor for the Los Angeles Philharmonic Orchestra, featured Ambrosia vocals and lead vocals; Joe Puerto on bass and vocals; David Pack, lead guitar, keyboards and vocals; and Burleigh Drummond, percussion, persuasion and vocals.

The group recently signed with 20th Century Records, which resulted in their self-titled debut album, and had two hit singles, "Hold On To Yesterday" and "Don't Make A Fool." The latter song was nominated for a Grammy award, and the group has been invited to perform by several major orchestras. The group's debut album, "All This and Wasted War," was released in 1972.

Ambrosia's first album, and the follow-up, "Somebody I've Never Traveled," were nominated for Grammy awards. The latter album was produced by Tobe Rock of the Eagles, and the group has been invited to perform at several major orchestras. The group's debut album, "All This and Wasted War," was released in 1972.

Ambrosia is now sold out

The Ambrosia concert Sunday is sold out. Concert Committee Chairwoman Lisa H. told the Mustang Daily that more than 1,200 tickets had been sold to Sunday night's concert in Chumash Auditorium. The band will be playing one show only at 8 p.m.

Poly are reminded that smoking, drinking, and food are not allowed in Chumash Auditorium. Photo ID may be required as proof of being over 18 years of age. The campus concert is being presented by the Concert Committee of ASI.

Big dance contest

The largest dance contest of the year by Cal Poly with over $300 worth of prizes will be held in the Mustang Lounge on Friday Mar. 3. This annual event will be sponsored by Sequoia Hall. An addition to the dance contest, Barry Durand and Thalia Vendayrot from Dance Dynamix will be putting on dance exhibitions. Durand, who developed the "Mustang Hustle," is part of the half time activities at last year's football games. The regional lap spoons for Dance Dynamix while Vendayrot, a junior biology major at Poly, is his assistant.

The Dance starts at 9:00 p.m. and will last until 1:00 a.m. The Cover for all this will be $1.00—residents; $1.50—non-residents over 18 years of age. Special guests will be invited to the Dance and may be subject to the procedures pertaining to the Sequoia Hall Activities Fund.

Mozart concert

Four of the principal players of the Mozart Festival Orchestra will travel to San Luis Obispo for the Mozart weekend of March 4 to present a special chamber concert in the Old Mission at 2 p.m. to benefit the 1979 Mozart festival. Flautist Louise Di Tullio, violinist Dorothy Wade and cellist Reber and cellist Robert Avedash will perform works by Mozart, Rossini and Chopin. Reserved seating will be $12.50, available from Mozart office at 543-4880. General admission $5 and $3 will be available at Pidity Savings.

IT'S A GREAT WAY of LIFE
Poly visits SB with high hopes of victory

UC Santa Barbara plays host to the Cal Poly volleyball team tonight and it should be a very good match. Both teams have the same record in the California Inter-collegiate Volleyball Association (CIVA) at 3-3 and both teams lost the same amount of games to form UCLA and Pepperdine earlier this season. Earlier this season, the Gauchos lost in three games to the Bruins and lost in four to the Waves. Cal Poly did the same thing against the two highest ranked teams in the nation.

Coach Mike Wilson had the team get together and talk about some of the problems they have been having while on the court.

"After that meeting, we've been playing on a new level," said Wilson. "We found out a lot of the guys were bringing some of their outside problems into the games."

Wilson said some of the team members were concerned with trying to produce and that contributed to some of the team's previous performances.

"We're ready, now," commented Wilson.

"If we play our best and they play their best, we'll win," said Wilson of tonight's match with Santa Barbara.

Some lineup changes will definitely result, said Wilson. Probable starters for this evening's game will be Paul Draper, center blocker; Rick Hauser, outside hitter; Linda Crow, outside hitter; Talento Reyes or Oregg Kelly, setter; and Chuck Hayes, outside hitter.

The Mustang nine picked up their fourth win in a row Tuesday, pounding the UC Santa Barbara Gauchos 18-0. It was a home run game for Cal Poly as the Mustang hitters tagged Gaucos pitchers for seven home runs.

Centerfielder Eric Payson highlighted the hitting barrage as he slammed three four-baggers himself. The 6-foot-4-inch, 185-pound Orange Coast College transfer boosted his season average to .343.

The game was played at Cal Poly Field because the rain had left Sisemore Stadium.

Paying too much for Imported Auto Parts?

The Mustang nine blasted SB for 18 runs en route to win

...to help.

**Poly sailors place in Humboldt regatta after 12-hour drive**

Two sailors from the Cal Poly sailing team, located at the northwest corner of California, and eight others from Humboldt State, were the only participants in the Humboldt regatta. Despite the event being held two hours later than normal, the sailors managed to complete the race.

According to Brown, Biddle and Belote, the team's regatta was a success. They thanked all their volunteers and supporters for their help in making the event a success.

**Sparky plus Yanks: winning combo?**

(AP) — Sparky Anderson in New York Yankees'estimating that he'll have to get used to the dugout and those silly high socks and long pants. His tenure as interim manager of baseball's most powerful and volatile franchise is finished after this season — win, lose or draw. He insists he is.

So what does that leave? A rich, talented baseball team without a skipper and a highly respected, winning field general without a role. Put them together and — voilà — you've got powerful chemistry.

His magic merger seems inevitable to anyone studying the shifting winds and the strange vagaries of the personnel involved.

When Anderson was unceremoniously fired by the Classi-

**Jackson won't play baseball**

(AP) — Reggie Jackson, smooth-talking, smooth-sailing, Hall of Famer, retired Tuesday and made his first pitch of the year for a full-time job at New York Yankees headquarters.

"If I come and talk to me, if they say we don't think you can play outfield any more, that it would be better for the team, I'd have to do it," Jackson said of the rule he dislikes — designated hitter. "But I have plans for playing the outfield. When I don't belong out there, I won't play the game. I'm not going to DH at 35 years of age. I'll quit first."

"I'm not trying to lay down any kind of law. I'm not trying to run things around the club... I'm not trying to lay down any kind of law. I'm not trying to run things around the club..."

**Giants still trying to sign North**

(AP) — San Francisco Giants General Manager Bob Bilton talked again Tuesday with the agent for Billy North, but the former Oakland A's pitcher still was without a baseball home at the end of the day.

North finished last season with the Los Angeles Dodgers, then became a free agent. He reportedly has turned down an offer from the Cleveland Indians.

North's agent, Gary Walker, talked to Richardson at the Giants' spring training base here Monday and returned to North Texas yesterday.

Manager Joe Amiel, who was most of last season with some pitchers on the staff, said that he plans to carry 10 this year.

**Engineers**

Let's be candid... This is a pitch. We're looking for talent.

At Magnavox Government & Industrial Electronics Co., we want to hire the best engineers and computer scientists we can find. If you qualify, and you're interested in a career with the world's leader in communication systems, Magnavox may be for you.

That's because, in our business, an outstanding technical staff is the key to success. Magnavox has been remarkably successful because we offer small company atmosphere with large company benefits and challenges.

Hence the pitch, and this ad. If you like what you see here, get in touch. Maybe both of us will be glad you did.
