Students are warned to take English examination

BY KATHY MCKENZIE
Daily Stall Writer

Although the CSUC English Placement Test (EPT) must be taken at the end of the quarter, it is a course requirement and is included in the student's activity fees, said Nick Forestiere, ASI Finance Committee chairman.

The test is given in order to determine what courses a student needs to take in order to fulfill the English requirement. The test is not given to determine a student's intelligence, and it is not graded on a curve, said Murphy.

Since the test is an important determinant of which classes a student will take, and since the test is included in the activity fees, students should not avoid taking the test.

Students who take the test are those that entered Cal Poly in 1977 or later. This also applies to freshmen that have started this quarter.

However, said Lucas, the following students who have fulfilled one of the following requirements are exempt from the EPT:

- a satisfactory score on the CSUC English Equivalency Examination
- a score of 3, 4, or 5 on the English Composition Examination of the College Board Advanced Placement Program.

The CSUC English Placement Test will be given October 27 in the Testing Center. The deadline for registering for the test is October 5.

The test is given in order to determine which course a student needs to take in order to fulfill the English requirement. The test is not given to determine a student's intelligence, and it is not graded on a curve, said Murphy.

Bogus Bust

Students are easy targets to kick around. Concerned with studying for exams and passing classes, we will often accept unfavorable situations. As such, we have been easy scapegoats for San Luis Obispo Ilis.

A Weekend Telegram-tribune article, called Party Bust, appearing Sept. 22 booted Cal Poly students back into the crib. The article—detailing a Delta Tau Fraternity party—went beyond the scope of impartial and accurate reporting.

The article makes the reader envision city police, with riot gear and plenty of tear bombs on hand just in case, breaking up the party. The story would convince even pacifist readers that students are an osery bunch to be scrutinized at all times.

Among the most glaring flaws of the story were:

—sensationalism. The article was given front page, main story space when it would have hardly warranted such play even on the inside of the paper.

The story occurred Thursday night, but was not run until the following Saturday. If the news was so important, there is no logical reason for it not appearing in the Friday issue.

—biased reporting. An estimated 1,000 people were said to have been at the event. In reality, sources at the scene indicate the number was closer to 600 or 700.

—the cutline and the story would lead people to believe trouble of the story. The remainder of the story dealt with occurrences same manner had it covered a party at any one of San Luis Obispo student socialize, that is news. After an article like that, it is little wonder why the City Council passes ordinances restricting

students. The story would convince even pacifist readers that students are an onery bunch to be scrutinized at all times.

We wonder whether the Telegram-tribune would behave in the same manner had it covered a party at any one of San Luis Obispo country clubs and halls used by older groups. It is unlikely a front page story would detail the gathering.

But somehow, the Telegram-tribune seems to feel when college students socialize, that is news. After an article like that, it is little wonder why the City Council passes ordinances restricting students.

The writer of the article tried to tell a story, but he ended up just storytelling.

Letters

Rose Krantz welcome

Dear Editors:

In the mass confusion of re-entry to Cal Poly, I would like to welcome everyone back. For those of you who are new to this campus, I'd like to assure you it is not always this crazy.

I am excited about the prospects of the 1979-80 school year. We have experienced a transition in administration, which, with all due respect to the old officials, we will bring some positive long overdue changes to our campus.

At this time, I'd like to take the opportunity to invite all of you to be a part of those changes. The ASI (Associated Students, Inc.) is full of universe-wide positions ranging from representing students on the Food Service Committee to helping pick the next distinguished teachers of the university.

The involvement doesn't stop there. Over 200 clubs represent almost every area of involvement.

For more information, stop by the University Union, Room 217A, or call 566-1291.

Sincerely,

Rose Krantz
ASI President

Teacher rebuttal

To the Editor:

Why does the Mustang Daily do it? Last Spring for Poly Royal the Mustang produced an editorial, from an incredibly sagacious source, that stated that only a very few faculty members cared if they ever saw another student. Now for the first issue of the year the same type editorial appears.

We are sorry that we don't know if the same student wrote both editorials, since we did not recognize the same editor either time.

We have an allegiance to entering students, apparently from the other side of the battlefield! Our statement is that most people teach because they love to teach, they like people and enjoy talking to them, they are fervently concerned that others should know and love the topic at their expertise, they are delighted when students find their niche and are successful in it, and they teach in spite of the money. Faculty members sweat, they bleed, they miss meals and alleat their mates, they stay up too late and get up too early in order to teach. They teach in spite of some student who persists in always having some other activity to do during lecture or lab besides listening, taking notes, or performing the assignment or experiment.

When this type of student is given the security of the editorial page for the key issues of the Mustang Daily, he becomes an insidious burden for the vast majority of faculty and students who strive day after day to maintain enthusiasm, academic integrity, sincerity and endurance. We are tempted to wonder why such a student bothers with a college education.

The Poly Royal and registration issue are the tow editions which are the major showpieces for those considering Cal Poly for their education. To entering students and fellow faculty members, let us remember that a university is a place for dissenting ideas, lively discussion, and broader minds than the writer of this student editorial.

Sincerely,

Ralph A. Jacobson
Gail M. Jacobson

Bookstore Lines

We have waited in grocery store and gas lines; now, we have to wait in book lines. Wednesday morning, purchasing books was like being on the L.A. freeway during rush hour.

Due to higher than expected enrollment, a fading of Poly Phase and student panic, the book store lines are longer than normal. But the book store will not extend their longer first-week hours. We think this is a mistake.

The bookstore's main purpose is to serve students. This need will not be met if many students are left without books before the weekend approaches. Already, teachers have assigned homework. Unless books are purchased early, students may fall helplessly behind in a course.

The bookstore should maintain its extended hours through the middle of next week and/or remain open this weekend. One of the reasons for the long bookstore lines is that students have purchased books, dropped a class then bought books for other classes added. Although there is no way to demand students buy books after they are sure of staying in the course, a few signs warning against procrastination help.

Another reason for the bookstore's "people congestion" is the decline of Poly Phase. We hope this situation will be rectified before the start of Winter quarter.

A final reason for bookstore "people congestion" is a seeming decline in Poly Phase. There are fewer books available, and this more people jamming overflowing aisles in El Corral. Perhaps more students are keeping their books.

Whatever the problem, we hope the situation will be corrected before the start of Winter quarter.

ASÍ
From page 1
programs in the ASÍ," Forestiere said.
The cut in funds to IRA was by far the
largest reduction to any group in the
current ASÍ budget.
Research done by the finance committee
this fall should show where further cuts can
be made for the 1980-81 budget, Forestiere
said.
"In the past if a group had been funded
by the ASÍ previously it would get funding
again almost automatically," Forestiere
said. "This year we'll look at which
programs are worth continuing and which
we should begin to phase out.
"We'll trim off (from the budget) groups
in which students are not interested
anymore."
Prior to budget hearings this year ASÍ
may establish a 90 percent base budget
policy, said Forestiere.
"We tell groups to request 90 percent of
what they had been operating on," Forestiere
said. "Then each group has to
list in order of priority its items paid for by
the last 10 percent (of its ASÍ subsidy)."

FROM PAGE 1
making up the list of students
from 1977 in order for the
Testing Center to bring its
records up to date and to
prepare the students who are
now juniors for the Junior
Level Writing Proficiency
examination, which is a
requirement for graduation
and will be given in January.
The English Placement
Test started in 1975 in order
to insure that incoming
freshmen knew how to read
and write proficiently in their
class. Students who have
low scores on the EPT may
get counseling which will
recommend classes that will
improve the verbal area they
are weak in.
Lucas said the classes
recommended do not have to
be taken. The counseling is
only to help students do
better in school as a whole.
For more information
about the English Placement.
Test, call Donna Redd at the
Counseling Center, 546-

MARTIN MARIETTA

SEE OUR REPRESENTATIVE ON CAMPUS OCT. 16-17

Our Denver Division has many new oppor\n

tunities awaiting recent college graduates. Major facilities are located at Denver, CO; New Orleans, LA; Santa Mem, CA. Currently there are 365 con\n
tracts that involve work in such exciting areas as Space Launch Systems, De\n
fense Systems, Command and Informa\n

Opportunities Now

Within these areas are many entry\n
level growth positions that offer prac\n
tical experience in the advanced state of the engineeringart. Such fields as - Software • Test • Propulsion • Ther\n

mophysics • Structures • Missiles • Cir\n

culations • Product Development • In\n

dustrial Engineering • Logistics • In\n

egration • Systems • Guidance & Con\n

rol • RF Systems • Communications •

data Handling • Power Systems • Payload & Sensors • Quality • Safety and Manufacturing.

Careers Begin Here

If you're considering a career in aero\n
tics, you won't find the challenge greater nor the work more rewarding then at Martin Marietta.

In addition to job opportunity, the com\n
pany's comprehensive program of em\n
ployee benefits has a financial value equivalent to approximately forty percent of the employee's income. Included are: Company paid insurance, performance sharing plan, retirement plan, vacation, education reimbursement and long term disability plan. Interested graduates please contact Martin Marietta Aerospace, Allin College Relations, P.O. Box 179 (ECOSLO10 Denver, CO 80201)

Lecture

African history-authority Dr. Yosef A.A. ben-

ochanan will speak on The African Origins of Western Civilization Thursday at 11 a.m. in U.U. 220. Admission is free.

Extension

A Cal Poly extension course on small farm animals is being offered on Tuesdays from 7 to 9 p.m. through October 23 in Room 301 of the agriculture building. The course is taught by animal science faculty member Colleen Childress and the fee is $25. Call 2053 for more information.

ROTC adventure

Cliff rappelling, group problem solving and a barbeque are scheduled for Adventure Day set for Saturday, September 29 and sponsored by the campus ROTC department. Adventure Day starts at 6 a.m. in front of Dexter Library. All Cal Poly students are invited.

Health Council

The Student Health Advisory Council is ac\n
cpting applications for membership on the 79-80 council. Applications can be obtained at the health center or by contacting Jeanette Reese, ext. 1211. For more information call HAC chairman Ted Oyama 544-7230 or 541-0525.

Going Mobile

Transportation Project at ECOSLO. 605 Palm St., is seeking in\n
terested members. The Project is a group of local people working to improve the San Luis Obispo area by bettering transportation. Those interested can attend a meeting on Thursday evening, October 1 from 7-9 p.m. at the ECOSLO offices of the Student Advancement Council at Ronald Mule, MS 1615.

The Student Health Advisory Council is ac\n
cpting applications for membership on the 79-80 council. Applications can be obtained at the health center or by contacting Jeanette Reese, ext. 1211. For more information call HAC chairman Ted Oyama 544-7230 or 541-0525.

THE SLEEP LOFT

We'll be open until 7:30 pm tonight!

Brown said to have changed opposition to Diablo

SACRAMENTO (AP) – Gov. Edmund Brown Jr. denied a report Wednesday that he promised to drop his opposition to the Diablo Canyon nuclear power plant.

Brown and the labor leaders surfaced Wednesday when news organizations received copies of a news release from the union carrying the headline, “Brown Makes Surprise Concessions in Meeting with IBEW Official.”

Gov. Brown sign rape bill

SACRAMENTO (AP) – An Oregon-type law allowing a wife to charge her husband with rape has been signed by Gov. Edmund Brown Jr. The measure, AB546 by D-Pleasanton, goes into effect next Jan. 1.

The measure makes no reference to gender, so a woman theoretically could be charged with rape by her husband. It also provides for less severe penalties for spousal rape than other types of rape.
Deer, bear, rattlesnake from 12-3 p.m. —— wild game barbeque on Sunday, Sept. 30 at Cuesta Park county. Although most meat consists of venison, fowl, and fish, a few of the entrees that will be offered to the public at the barbeque include elk, hare, deer, squirrel, raccoon, bobcat, venison, beef, pork, chicken, and fresh salmon.

Observing time varies from 12-16 hours.

The association has been the leader in the battle to open Whale Rock reservoir to public fishing. While the battle has been successful, $7,000 in attorney’s fees have been accrued by the association.

For cross-country training. Combines".

Campus ponds open to fishing

Long gas lines, higher fuel prices and tight budgets are causing most people, especially students, to look closer to home for recreation.

Cal Poly students, whether dormitory or off-campus residents, don't have to look any farther than their own back yard. A short walk or bicycle ride from any place on campus provides the opportunity to picnic, birdwatch, sketch or fish at one of four ponds scattered among the more than 5,000 acres that make up Cal Poly. Although there are nine ponds on campus, only Indonesia Reservoir, Shepard and Drummon reservoirs have populations of fish and are accessible to fishermen. These waters are used by the Natural Resources Department as freshwater ecosystem study areas and for crop irrigation. The ponds support populations of redear sunfish, bluegill and largemouth bass. Shepard Reservoir, the largest and most widely known, is located between the student horse barns and the swine unit. It's open to the public for recreational fishing and is easily accessible by car. No boats are allowed on the lake, which offers easy access to most of the shoreline.

Smith Reservoir is adjacent to Shepard and parallels the airstrip. It too has an exposed shoreline that often has crops growing down to the waters edge. Chattering red-winged blackbirds, the soft 'plop' of a turtle entering the water and the constant buzzing of dragonflies and other insects are common greetings extended to visitors. Most of the ponds have resident duck populations, largely consisting of coot, although real and other species are seen frequently. People interested in trying their luck with rod and reel will be most successful during morning or evening hours, when the fish are most active and the wind isn't blowing.

Don Van Acker, Environmental Health and Safety Coordinator at Cal Poly, said, "A conscious effort must be made to observe all safety requirements when at the ponds."

Requirements include closing any open gates, leaving animals alone and not climbing fences.

**Tellico dam approved**

An angler enjoys the solitude while fishing at Cal Poly reservoir.

AILIY IMPROVEMENT GROUP
A group experience designed to encourage academic progress. Students will have the opportunity to explore reasons and solutions for lack of motivation, concentration, etc. Two sessions weekly will provide the time to encourage students to progress through a variety of techniques and procedures. Pre-registration is required before October 6th.
Time: October 8th, Time to be arranged — Leave Class Schedule at Learning Assistance Center.
Place: University Library, Room 208A
Maximum Number: 10
PRESENTERS: Learning Assistance Center Staff

ASSERTIVE BEHAVIOR
A structured social skills training experience for persons who seek to increase their capacity to express themselves effectively and gain confidence in self-assertion.
Groups will run 5 weeks. New sections will be offered mid-quarter.
Time: MW 1100-1200; TH 1300-1400
Place: Counseling Center
PRESENTER: Bob Barrows

ASSERTIVE TRAINING FOR WOMEN
A skills training experience especially geared to the needs of women who seek to increase their capacity to express themselves effectively and confidently.
Time: Mondays, 1300-1500
Place: Counseling Center
PRESENTER: Lois Drakes

BLACK ENGINEERING GROUP
The group will obtain information about opportunities and the preparation required for an engineering career. Members will work on increasing the minority engineering population at Cal Poly as well as how to assure the successful completion of their undergraduate work. The main intent of this group is to aid Blacks in a technical field. However, anyone who is supportive of the goals of the organization will be welcome.
Time: To be arranged
Place: EOPHillcrest
Maximum Number: No maximum
PRESENTER: Fred Small

CARDIOPULMONARY RESUSCITATION (CPR)
A CPR class will be co-sponsored by the Health Center and Student Health Advisory Council (SHAC). This Fall Enrollment will be limited for this emergency training program.
Time: To be arranged
Place: To be arranged
PRESENTER: Contact Health Education at 546-1211

CAREER EDUCATION RESOURCES PLANNING
An Educational Opportunity Program student workshop to explore career and educational planning alternatives. We will be planning what we want to do after graduation from Cal Poly.
Group of 4 to 7 students to identify Career/Graduate Resources and the skills we can highlight in our job search.
Time: Wednesday, 1900
Place: To be arranged
PRESENTER: Roberto G. Brady

CONTRACEPTION AND DECISION-MAKING
A weekly workshop to help men and women choose a contraceptive method well suited to their lifestyles. Participants will have the opportunity to explore personal reactions, advantages, disadvantages, side effects and modes of effectiveness for those methods currently available.
Time: To be arranged
Place: To be arranged
PRESENTERS: Health Center Peer Counseling Staff

ESSAY TEST PREPARATION AND
TEST TAKING SEMINAR
Students will learn how to deal with both short and long answer written tests by learning to assess the kinds of questions they will be expected to answer, to put the practice from all sources together, and to review the material for the specific exam. Please bring class materials for personal help.
Time: November 1st — 1100-1200
Place: University Library, Room 208A
Maximum Number: 20
PRESENTERS: Learning Assistance Center Staff

HOLISTIC
This group is designed to integrate the whole person. The student who will benefit most from this group is the one who feels his whole person is functioning less than satisfactory and is ready to make a commitment to explore alternative methods of self help. The following tools will be placed: keeping a daily log, nutritional awareness, meditative techniques, exercise, scheduling, and spirituality.
Time: Tuesday, 1000-1200
Place: Counseling Center
Maximum Number: 10
PRESENTER: Clare Foggart

HUMAN UNDERSTANDING AND
GROWTH WORKSHOP
A positive experience in values clarification, team building, leadership and personal styles, quality decision-making, and communication to give students a greater understanding of self and others in task-oriented group situations. Please note that this is not an encounter group experience.
Dates: November 2 through 4. (Deadline to sign up: October 30)
Place: Camp Pinecrest in Cambria
Maximum Number: 60
Fee: $6.50 (covers food, lodging and materials)
For further information, call or stop by the Activities Planning Center in the University Union (546-2476)
PRESENTER: Sam Spoden and selected students

INDIVIDUALIZED TEST ANXIETY
The Test Anxiety Program consists of five one-hour sessions designed to help students alleviate test anxiety individually with the help of a counselor using tapes and games. Individual programs will begin September 24, 1979.
Time: For more information call 546-1256 or stop by the Learning Assistance Center
Place: University Library, Room 208A
PRESENTERS: Learning Assistance Center Staff

INTERPERSONAL RELATIONSHIPS
A group designed for persons who seek an introductory group experience, who wish to make contact with others, who wish to find out more about themselves through relationships with others. An attempt is made to look at relationship. What do we mean when we say we want to relate at more than a surface level? How do we communicate? What is the difference between a monologue and a dialogue in communication? These questions and others are addressed in this group.
Time: T, 1:00-2:00
Place: Counseling Center
PRESENTER: Bob Barrows
INTERVIEW TRAINING WORKSHOPS
A workshop designed to prepare the prospective job seeker for the most critical phases of the job seeking process. The interview. Students will be exposed to the various phases of the interview, types of questions to expect and what they can do to prepare in advance. Students will also have the opportunity to role play various parts of the interview. Pre-registration is mandatory.

Time: Contact Placement Center - 2501
Place: Placement Center
Maximum Number: 15

PRESENTERS: Professional members of the Placement Center Staff

THE JOB SEARCH STRATEGY
This workshop is designed to acquaint the student with the different steps involved in the job seeking process. Narrowing the job objective, where to look for a job, researching and contacting companies, and what employers look for in an applicant are the types of subjects covered during this time. Adequate time is provided for specific questions about the job search.

Time: Contact the Placement Center
Place: Placement Center

PRESENTER: Rich Equiona

LATINOS IN AGRICULTURE
To explore and discuss the opportunities available for students of bi-lingual, bi-cultural background in the fields of international and national agriculture.

Time: To be arranged
Place: EOP Hillcrest
Maximum Number: 18

PRESENTER: Armando Peso-Silva

MATH ANXIETY GROUP
The math anxiety program will help students alleviate math anxiety. Each session will provide students with an opportunity to explore reasons and solutions for difficulty in math courses. The math anxiety program consists of two one-hour sessions weekly. Pre-registration is required before October 15, 1979.

Time: October 22nd, Time to be Arranged— Leave Class Schedule at Learning Assistance Center.
Place: University Library, Room 208A

PRESENTERS: Learning Assistance Center Staff

OBJECTIVE TEST PREPARATION ANL-
TEST TAKING SEMINAR
Students will learn to take multiple choice type tests, to assess the kinds of questions, to put course materials together and to study the material for the examination. Attend one or both hours. Please bring class materials for personal help.

Time: November 15th — 1200-1400
Place: University Library, Room 208A
Maximum Number: 20

PRESENTERS: Learning Assistance Center Staff

REACHING OUT
A group aimed at interpersonal effectiveness and self-growth; each session will allow for personal exploration of expression of feelings, helpful styles of listening and responding, acceptance of self and others, constructive confrontation, and development of communication skills to enable the participants to develop skills for living.

Time: Th 1000-1200
Place: Counseling Center
Maximum Number: 10

PRESENTER: Lois D'Arcy

RELAXATION, STRESS CONTROL,
AND MEDITATION
Relaxation, sensory awareness, and meditation skills will be practiced in a small group to help students who feel that tension and anxiety are interfering with their academic and personal lives.

Time: MW 1100-1200
Place: Health Center Conference Room

PRESENTER: Jim Akin

RESUME PREPARATION WORKSHOP
Preparation of the resume, its importance, types, contents and its many uses are aims of this workshop. Pre-registration required at Placement Center.

Time: Contact Placement Center
Place: Placement Center
Maximum Number: 15

PRESENTERS: Professional members of the Placement Center

SUMMER JOB SEARCH
Designed to acquaint students with the ways in which the Placement Center can assist them as they look for summer employment. Information regarding application procedures and deadlines for Federal and State summer positions; government and private internships; opportunities with summer camps/ranches; on-campus interviews for summer positions; general job-hunting techniques for major related summer work.

Time: Contact Placement Center
Place: Placement Center

PRESENTERS: Gretchen Beckmann & Tim Gafney

SURVIVAL SKILLS — THIRD WORLD APPROACH
A series of mini courses and seminars to teach the strategies and skills which are necessary to help Third World students survive in college. Designed to deal with all facets of the educational and academic experience, problem solving processes will be discussed.

Time: M 1800-2000
Place: EOP Hillcrest

PRESENTER: Locksley Geoghagen

TEST PANC TIPS SEMINAR
Students will learn shortcut techniques on how to reduce tension, anxiety, or panic at exam time, and tips for last-minute test preparation and test taking.

Time: November 29th — 1100-300
Place: University Library, Room 208A

PRESENTERS: Learning Assistance Center Staff

TIME MANAGEMENT SEMINAR
Students will learn how to become organized. They will assess study time needs related to how they would like to perform academically, learn strategies to meet these needs and implement study-plans to guarantee efficiency, realism, and freedom.

Time: October 9th — Assessment, 1100-1200
October 16th — Strategies & Implementation, 1100-1200
Place: University Library, Room 208A
Maximum Number: 20

PRESENTERS: Learning Assistance Center Staff

WHAT WILL I DO AFTER GRADUATION — GRADUATE SCHOOL
To assist EOP students in evaluating the opportunities available through graduate programs. How to seek and secure admission and financial assistance.

In groups of 3-5, a person will explore the advantages and disadvantages of graduate school and alternatives. Students will be introduced to graduate placement exams and study guides and special admissions.

Time: T 1500
Place: EOP Hillcrest
Maximum Number: 10

PRESENTERS: Roberto Brady & EOP Staff

WINNING WITH TA
The principles of Transactional Analysis will be introduced and demonstrated. This group will focus on understanding your transactions/relating with others and emphasize personal responsibility for growth. What does it take to be a winner?

Time: F 1100-1300
Place: Counseling Center

PRESENTER: Dale Federer

HUNTINGTON BEACH (AP)—The music that brought you the generation gap in the 50's has broadened it...
Students may have computer assistance for jobs

BY MEG McCONNELLY

Cal Poly students having problems deciding on academic majors and careers may soon have some non-human help in the form of Student Interactive Guidance Information (SIGI), a computer-based career guidance counselor.

According to Dean Russell Brown, California State Student Association (CSSA) has endorsed the concept. A proposal to install SIGIs on campuses throughout the California State University and Colleges systems awaits approval by the Board of Trustees.

Cal Poly Pomona and UC Irvine already have SIGI. The student response from those campuses has been excellent, Brown said.

“They’re not designed to replace counselors. It’s rather a tool to help make the time a student spends in those sessions with a counselor more efficient,” he explained.

To students, SIGI would appear as a counselor equipped with keyboard and video screen. Dr. Charles Hicks, coordinator of the Career Development Center, said its operation may seem imposing, but he insists even students with no background in computer operation could easily operate SIGI.

Dean Brown describes SIGI as a value-based system that takes the student through a series of sequential steps designed to disclose what is truly important to him or her individually. For example, such personal values as wealth, security, helping others, upward mobility, and free time will be determined. In other words, SIGI probes student’s minds to surface those values and suggests career options best suited to satisfy those individual needs.

San Jose State U.
Nudes back on stand

SAN-JOSE, Calif. (AP) - Nude models at San Jose State University art classes have ended a week-long strike, but promised to get dressed and resume the job action if administrators fail to meet their demands.

The 29 male and female models are seeking hourly pay of $6 instead of $4, dressed and resume the job to meet their demands.

Several hurdles must be overcome before SIGI could make its debut at Cal Poly, Dr. Hicks said. Approximate cost for the computer counselor would be $9,500, beyond the budgetary reach of the Career Planning Center which operates on only $1,950 per year.

SIGI could also suggest more specific jobs for those students who wanted to narrow down their options, Brown said.

Financing is the other major obstacle in the implementation of SIGI at Poly, Hicks said. Limited space available in the Career Planning Center, although SIGI could possibly be expanded to other locations on campus with additional funds.

SIGI makes a good impression on the administrators. "Many people discovered that there’s a conflict between the initial impression they had about a career option and their final values as a human being," Brown explained.

SIGI reaches a mode of thinking valuable when making these types of vital decisions," Brown explained. "Many people discover that there’s a conflict between the initial impression they had about a career option and their final values as a human being.

For students with no specific career plans at all, SIGI would make suggestions for generalized fields of concentration based on their individual values and interests. SIGI could suggest more specific jobs for those students who wanted to narrow down their options, Brown said.

LONDON (AP)—Beatle Paul McCartney's name appears so many times in the Guinness Book of Records that the compilers have decided to present him with a special medalion next month. 

McCartney is listed as the most successful composer of all time, the owner of the most gold discs—42 in Britain (a gold disc is awarded for sales of 500,000 singles records) and the world's most successful recording artist for estimated global sales of 10 million singles and 100 million albums. 

"Paul McCartney... is almost a permanent fixture in the book," Guinness editor Norris McWhirter said Wednesday.

SF teachers on strike

SAN FRANCISCO (AP)—Defiant San Francisco teachers remain on strike, despite a court order to return to work. 

The city's middle schools were scheduled to open today even though at least 2,600 of 3,600 teachers were off the job Tuesday in defiance of judicial orders that they go to work while negotiations in the more than two-week-old strike continue. 

Schools were supposed to open Sept. 12, but because of the strike, only elementary schools began on Sept 24. 

Union leaders, who told their members that they could ignore the court orders, have said they will urge an immediate ratification vote if the district agrees to their new 10,000 of 1,200 laid-off teachers. 

In addition, the leaders said they would have to submit pay and other major issues to a three-member fact-finding panel whose decisions in 30 days would be binding. 

Figures provided by the district showed 967 regular teachers in all grades—40 percent of an expected 2,428—reported to work Tuesday. That was up from 33 percent on Monday. 

Brown shoots for second

Kennedy will sweep the nation's earliest primary, Tom Quinn, chairman of Brown's exploratory committee said Tuesday. But he said Brown's come-from-behind bid for the presidency hinges on placing second in New Hampshire. 

"Our goal is to finish in second place and make this a two-person race between Kennedy and Brown," Quinn said, meeting with a small group of supporters in San Diego. 

Brown, who has not yet declared his presidential intentions, said Quinn's reference to a "come-from-behind" bid for the presidency hinges on placing second in New Hampshire.

"We are running third all the way through the primaries and what is going to be the nominee," said Quinn, referring to Brown, who has not yet formally declared his presidential intentions. 

"If we are running second all the way through, we're not going to be the nominee."
Cal Poly may get new land

BY CATHY SPEARNAK
Dally Editorial Assistant

Approximately 800 acres of land may be added to the Cal Poly campus if the Department of Health, Education, and Welfare approves an allocation to the university from current surplus holdings in San Luis Obispo County.

An estimated 1,200 acres of land bordering partly on the Cal Poly campus in the Camp San Luis area (formerly a military camp) have been declared surplus by the federal government. Cal Poly and four other applicants—Cuesta College, county department of education, city of Morro Bay and the Department of Fish and Game—are seeking title to the land.

Doug Gerard, executive dean, said the HEW is finalizing plans for apportionment of the holdings. "The HEW is going to put together a proposal to be reviewed by all applicants," he said.

Gerard said the proposal should be on his desk within the next two weeks.

"The likelihood is that the land will be shared between Cuesta, the county office of education, the city of Morro Bay and Cal Poly. I'm uncertain how the Department of Fish and Game will not get their request," Gerard said.

Gerard said the DFG wants to turn their portion of the land into a rifle range, which would not be compatible with what other applicants use requests. He added the HEW may turn down more than one request.

If Poly receives part of the acreage, Gerard said it will be used for agriculture. The land would help complete "package" of 3,500 acres needed by the university to further agricultural growth, Gerard said.

Cal Poly acquired 2,300 acres of land two years ago and the 800 acres on Highway 1 north, across from Cuesta College would be added to that total.

If given to the University, the land will go at a "100 percent educational discount," Gerard said. Cal Poly will pay only for filing fees and title transfers.

Other applicants are asking for various number of acres from the holdings.
Women run in the hills of Fresno

The legs begin to ache and there is a burning pain in the stomach, but the runner pushes over the hill and down towards the finish line.

It might not seem lady-like, yet there are 22 women trying out for a chance to experience this agony and all the fringe benefits that go along with being a member of the women's cross country team.

Lance Harter, the new women's coach says the environment at Cal Poly is responsible for the turnout.

"We won't have a day go by without people coming in with an interest in trying out for the team," the 29-year-old coach from Denver Colorado said.

Harter, who coached men's and women's cross country and women's track at Smoky Hills High School in Denver already has a good idea about the strengths on the women's team. His strongest asset is returning All-American Maggie Keyes.

"She has speed, maturity and confidence," Harter said about the fastest collegiate 1500 meter runner in the nation last year. Maggie ran a 4:14.9 for 1500 meters in the AAU Meet last June.

"She's definitely got to be considered a national contender in cross country.

Before the Fresno State Invitational on Saturday, we'll have a good idea about how she's going to do. I think she'll be a national contender."

Saturday's meet will also give Harter a chance to see how the rest of the women do in competition. The next two women behind Maggie are Sue Oran from Cherry Creek High School in Denver, Colorado, and Kathy Perkins, from West Valley Junior College in San Jose.

When we asked about these two girls' performance in the City to Port Run Sunday, Sept. 23, Harter exclaimed:

"Excellent! Way ahead of what we expected they were capable of. We didn't rest Carman, Kady Wanasaker, Karen Moore, Kris Kuore, Lisa Valacich, Melanie Barry, or Sheila O'Donnell."

Harter said the Fresno State Invitational will decide the standing of his top seven.

It is Saturday, Sept. 29 at 11 a.m.

In 1929, after 16 years of co-educational classes, enrollment at Cal Poly was limited to men. This trend continued until 1956.
Cal Poly Quarterback Reid Lundstrom is the man head on an Adams State defender as Mike Daum, Jim Colvin and Paul Dickens look on.

**Mustang Corral**

BY GREGOR ROBIN
Daily Poly Sport Writer

When candidates for the Cal Poly cross country team go to a road race they don't fool around. At the City to Port Run on Sunday, Sept. 23, the men trying out for the team took 21 out of the top 26 places in the 11.3 mile race. The top three spots went to Mustang runners. Jim Schakel, who took first, ran from the Cigar Factory to the Seal Beach Pier and finished at the Seal Beach Pier. She took 21 out of the top 26 places in the 11.3 mile race.
The good news is:

**CLINIQUE**

has a bonus for you

YOUR BONUS: CLINIQUE'S
"CHOICE SELECTION." Yours
at no charge whatever
with any Clinique purchase
of 6.50 or more.

For a fast, free skin analysis,
come and meet the
CLINIQUE COMPUTER.

Clinique is a total system of skin Care. And the
very heart of the system is the Clinique
Computer. Programmed by a group of leading
dermatologists, it asks eight essential questions
and analyzes the answers to determine skin type
and the proper Clinique products and pro-
cedures. Then a sequence of three minutes in
the morning and another three minutes at night
results in better looking skin.

If you could pick five representatives from all Clinique, you couldn't make better choices
than the selection of beauty-workers in this group. Each one is dedicated to the job of
face-improvement. And each one is in the convenient small size that smart women
collect for travel. The Choice Selection here: two important parts of Clinique skin care,
two great makeups, and mascara that makes lashes their lushest.

Facial Soap Mild. Clinique's superstars that's told the world how good soap can be.

Dramatically Different Moisturizing Lotion. Famous golden "drink" your skin thirsts for.

Ripe Peach Colour Rub. Most-wanted shade of this sheer skin tint for cheeks, highlights.

Pressed Powder. Skin-perfector in the shade for all: Transparency. Tiny mirrored
compact.

Glossy Brush-On Mascara. Portable size of the world's greatest; in Glossy Black.

One bonus to a customer: Cosmetics, downtown and Morro Bay.

We now have a complete line of Clinique for men.

ALL CLINIQUE PRODUCTS ARE ALLERGY TESTED AND 100% FRAGRANCE FREE.
