General education

Baker against unit increase

BY RAS GRAHAM
Daily Staff Writer

A round of applause echoed through the Ag Patio in response to Cal Poly President Warren Baker's announcement that he was not in favor of increasing the number of general education credit hours.

Baker said that he was more interested in improving the quality of the general education courses and encouraging students to take advantage of what is available at the university.

Also, Baker felt since Cal Poly is a unique institution: "We should be known for what we do best." Baker said that he was more interested in improving the quality of the general education courses and encouraging students to take advantage of what is available at the university.

A united front of students, faculty and administration that would make known Cal Poly's needs and let the outside world see that we know where we're going is needed, said Baker.

The question of alcohol being permitted at off-campus activities by Cal Poly organizations was addressed by Baker. The president said he did not like rules that kept students from using their own judgement off-campus because students are young adults. The outside world will see them as Cal Poly does, according to Baker.

Baker said discussions he had from students indicate alcohol on-campus is not the "most burning" issue at Cal Poly.

Proposed general ed changes may add to required courses

BY JILL HENDRICKSON
Daily Staff Writer

New general education requirements proposed for the California State University and Colleges could mean an increase in non-major courses students have to take.

If accepted by the Board of Trustees, the recommendations would also create stricter guidelines limiting the types of classes qualifying as general education.

According to Dr. Michael Wenzl, communicative arts and humanities representative to the Cal Poly Committee reviewing the new requirements, student demands for "relevant" courses in the 1960s led to the re-evaluation of educational objectives in the late 1970s.

In the sixties, he said, students told faculty what was important.

"Some would ask, 'How can you stand up there and call it a Cal Poly's Symposium when people are dying in Vietnam?'

In response to student demands, Wenzl said universities began offering a wide range of unrelated courses and general education became too general.

"There's a very important things that are a part of this program (PCIYRA)," he said. "The question is should students spend all their time studying to get an entry level job? Or should they study something they won't get a chance to use for the rest of their lives?"

This is one of the arguments between academically and technologically-oriented schools.

Dr. William Stone, of the mechanical engineering department, is chairman of the Academic Senate General Education-Breadth Committee at Cal Poly.

This has been a topic of hot debate in recent years from Harvard to Cal Poly. A report from the state-wide Task Force on General Education indicates that letting students pick and choose their courses has not solved the problem.

The report stated fragmented general education stems from the "largely unrestricted availability of hundreds of courses which are certified for general education."

Course combinations are determined by "such factors as convenience and accidents of scheduling."

Essentially, the 28-point report calls for an increase from 60 to 72 quarter units of general education.

It stated that at least 12 must be taken as upper division courses at the campus granting the degree.

Wenzl said he supports the recommendations.

"We have a real over-emphasis on majors," he said. "The question is should students spend all their time studying to get an entry level job? Or should they study something they won't get a chance to use for the rest of their lives?"

Sailing team loses charter

BY JEANNINE FRANUSICH
Daily Staff Writer

The ASI student senate threw the sailing team and their codes overnight at its Wednesday night meeting.

The senate voted to void the sailing team's codes and put the team under direct supervision of the Poly Corinthian—the sailing club.

Problems with the sailing team arose when team members checked out a state bus in June under the pretense that they were going to compete in a Santa Barbara regatta. However, there was no regatta in Santa Barbara that weekend. But there was a rock concert.

Members of the team passed the bus and drove it to the concert. The bus was returned with traces of paint still on it, concert ticket stubs on the floor and evidence that there had been liquor aboard, said ASI Vice President Jeff Land.

Land said the senate has had other problems with the team in the past years.

He said the team has a debt in the ASI budget "that has been outstanding and overdue for some time."

In addition, the team tried to sell a boat last year that was ASI property.

In May, the senate set a date to take inventory of all the sailing team's equipment, which ASI owns, but team members failed to show up.

The team ignored an order to show up and have an inventory taken of ASI property," Land said. Bill Wiedemann, captain of the sailing team, said members would like to be able to use the money they were allocated last year.

"They—the ASI—destroyed our account," Wiedemann said.

Wiedemann said the club has to pay dues to the Pacific Coast Intercollegiate Yacht Racing Association. "We will still attempt to sail with the program (PCIYRA)," he said.

In other action:

— The senate voted to keep the Cal Poly yearbook, and to contract with a new yearbook company, Herff Jones, after an editor and an advisor are chosen.

— The Ecology Action Club was granted $140 for wooden boxes for the "Recycle the Daily" project.

— A $19 budget extension was approved for WOW to cover the increase of flight costs to New York for a national convention.

Opinion

Mustang Daily

A longer stay

Cal Poly now costs $78 a quarter. Majors such as engineering or architecture cover a five-year program. A state-wide Task Force on General Education favors the addition of 12 additional general education requirements and the limiting of the selection of classes. All these are interfaced in a controversy to restrict and hand-guide students—the real taxpayers of the California State University and Colleges System.

Presently 60 general education requirements are needed to graduate. Among these, varying numbers are taken in natural science, social sciences, humanities, basic subjects (mathematics and English) and physical education. But that is where the current regulations end and where the recommendations begin.

The Task Force recommends all majors to complete at least 12 units upper division general education courses. Also, general education— as proposed by the committee— will have less leeway as to what students can choose.

One Cal Poly teacher said the university has an over-emphasis on majors. This logic begs two questions— why are we called a polytechnic university and why doesn’t the current education system work?

As a technical school, our priority should be toward lab- and major-oriented education. As a university, a well-rounded graduate is mandatory. But it would be a crime against the goals of the university to delete 12 units from major classes. Equally unjustifiable would be the additional burden to students— they would have to either stay in college longer, an additional expense, or take more units per quarter.

We agree with President Baker’s speech on Thursday to have no increase in the recommendation.

What needs to be done instead is a gross re-evaluation of how and why certain courses are offered in general education. Sixty units is enough to make college students proficient and, as Baker earlier said, well-rounded university and why doesn’t the current education system work?

Engineering speaks out

Editor:

Perhaps some of the "insensitive" events which occur in the School of Engineering and Technology (in particular the Mechanical Engineering Department) are not as interesting as grape judging, competing in the football bowl or keeping a feedback boiler problems, but why is there almost none of the mention of the aforementioned school or department in the Mustang Daily?

The "minor" events to which I refer, and which are apparently not worthy of coverage in the Mustang are:

1. A New assistant dean of the school.
2. A new EE/EL department head, which by the way did receive coverage in the local Telegram Tribune.
3. The donation of some expensive laboratory equipment through the Poly Phase Club to the Senior Project Lab (the presentation of which the Mustang never even bothered to cover, but no report even materialized).

And I am sure there are newsworthy items in other schools and departments which similarly are not reported. No offense intended, but I am sure students who are disappointed in the Mustang's lack of systematic seeking for the news will see the fact that I am mentioning those events as a very unimportant point.

But it would be a crime against the goals of the university to delete 12 units from major classes. Equally unjustifiable would be the additional burden to students— they would have to either stay in college longer, an additional expense, or take more units per quarter.

Parking regulations are a snare to the unaware

Even though she'd been backing into Cal Poly parking spaces for years, Marilyn Niu found a slot on her windshield wasn't good enough to do it again under penalty of fine—and the CSUC campus police department was not happy about the surprise.

"I was really mad about that," she said.

"Don't they have anything better to do than give out those things?"

Niu is not alone in her curiosity over why the new rule was suddenly imposed.

Officer Lisa Fleming, Carlos Ramirez and Glenda Souza of the traffic patrol give out the warnings. Fleming, a seven-year veteran of the campus police force, explained why the new regulation was put into effect.

"Starting this fall, parking permits are to be displayed on the right rear corner of the back bumper, so if people back into parking spaces, we can see whether they have permit or not," Fleming said.

Warmline helps parents under stress

BY SEANNA BROWDER

When the children are screaming, the house is a mess and there seems to be no escape, parents can call "Warmline" for help.

On the other end of the telephone will be a sympathetic volunteer ready to listen as they share their parents and have been in the same situation.

Warmline is a service of the Family Service Center, a non-profit organization. It began as a junior project by Walter, a student. Walter explained War­

meline started through our office," said Mrs. Gruettner.

When the children are in the same situation.

"A lot of students are of the notion that with a "C" permit, they can park in the car. Faculty and staff members with two cars often have this type of permit for their second auto," Fleming explained.

Planning explained officers are more efficient when they can see every rear bumper from the side. Only when the bumper does not have a permit do officers have to get out of their cars to see if a permit is hanging inside.

The new permit actually has a dual purpose, she said. It discourages theft. When permits were stuck to the inside windshield, she said thieves were not afraid to break into the car.

"Some students get 33-40 tickets a quarter," Fleming said. "They have to really work at it though. If they continue to get tickets, they get a warning that their car will be impounded if they don't pay the fine."

Fleming pointed out that it would be more economical for parking violators to purchase a $12-per-quarter permit.

Other little known parking regulations include the hours that permit requirements are in effect—7 a.m. to 9 p.m. Mon.-Fri. for lots C and D and 11 a.m. to 6 p.m. for all other areas.

All other rules and regulations are enforced 24 hours a day, seven days a week.

Students, faculty and staff concerned with keeping parking costs down can pick up a "Parking Rules" handbook at the campus police offices on the North Perimeter next to the fire station.

The California State University and College was allocated $28,700,034 by the Legislature for the 1979-80 fiscal year. This reflects a compromise with the budget proposal from Gov. Edmund Brown Jr., which was $126,430,444 lower.

Most of the total ($19,351,236) is in the general category of support. This portion of the allotment to the CSUC will provide for $29,390 full-time students (students with 12 units) or for the equivalent, approximately, in part- and full-time students.

The appropriation for support is less than last year. This means there must be a cut of $17,030,000 from traditional levels of program support.

Pesticide rule changes proposed

Sacramento (AP) - State Food and Agriculture Director Richard Rominger is to announce major proposed changes in state rules on pesticides today, his department says.

Spokesman Dick Thompson said Wednesday that Rominger would make a "major announcement" to the state Board of Food and Agriculture.

The department has been airing some proposals at public hearings, where they have run into hot criticism from both farmers and environmentalists.

---

College Bowl to air Sunday

Charleston, W. Va. (AP) - Art Fleming is waiting for the day when Americans cluster around their radios on weekends, eagerly listening to questions about ancient history and nuclear physics.

Fleming, who probably will be engraved forever on the memories of two generations as host of the television game show Jeopardy, is the new master of ceremonies for College Bowl, the academic quiz show matching college teams.

Since it first went on the air in 1943, College Bowl has evolved into a major event featuring teams from scores of campuses in a coast-to-coast battle for the national championship. The competition has been televised or broadcast on radio uninterrupted since its inception.

College Bowl, Fleming said, "won't be the be-all and end-all of show business," but will provide an alternative capable of appealing to a broad audience hungry for serious entertainment.

Carter promises increase

Washington (AP) - The Carter administration has promised Senate Democratic leaders it will soon send Congress a five-year defense plan that will increase military spending in an effort to win support for the SALT II treaty with Russia.

"I believe they can do it by November," said Senate Democratic Leader Robert C. Byrd. "And I will go further to say not only that they should, but that they better do it because I do not anticipate this treaty being called up prior to the presentation of the five-year plan."

Senate Democratic Whip Alan Cranston said he has been "given assurance" by the Defense Department that the administration expects to be able to send the plan to the Senate floor by November.

Hansen brings 60's to Pismo

**Concert review**

Jimi Hendrix was a virtual creation at the Central Coast Theater Wednesday night to step back in time as Hansen raised the dead. Or maybe that impersonation is that good. I think if Jimi came back, people would know it. I don't really copy him. I try to get his spirit," he said.

Along the Watchtower, to Red House, to If I Were A Woman, to Foxy Lady, Hansen had the audience up and out of their seats as he raced up and down the aisles sampling whatever drugs the audience had to offer him.

"If I was to play it wrong, I don't really copy him. I try to get his spirit," he said.

Laping on top of his amplifiers for his second encore, Hansen ended his show with Gloria recorded also by Pati Smith as well as Hendrix.

With the same instrument arrangement as Hendrix consisted of Tim Kelber on drums and Larry Epperly on bass, Hansen sound is very similar to Hendrix's. In fact, both are from Seattle.

Hansen was asked about the ads on local radio stations telling of Hendrix's father meeting him: "Yes, I met him in Seattle. He was right up front at the show. He said he never really went to see his son's shows when he was alive, Jimi was a recluse when he came to his home town. All the relatives would be calling him up and he never had a moment of peace."

Sitting there with his make-up off and pale-white skin giving him away as someone who has been on the road a long time, it's hard to imagine Randy Hansen as the one who just finished performing. But then he really wasn't trying to be Randy Hansen ten minutes ago.

The S. S. Universe is fully air-conditioned, 18,000 tons, registered in Liberia and built in America.
It's round-up time for the rodeo team

The men's and women's rodeo teams return to competition this weekend at Cochise College, in Douglas, Arizona.

Returning to the men's team are Captains Ralph Rinaldo, a senior from Hollister; John Jones, a sophomore from Morro Bay; Ralph Rianda, a senior from Figueroa; and Ray Gomez, a sophomore from Hartnell College in Salinas.

Last year's team finished second in the region behind Hartnell to qualify for the national finals where Cal Poly finished 13th.

For the women's team, it will be a case of replacing the three performers who had Cal Poly leading the national finals standings until the final day of competition when they finished third.

Among the team prospects this year are Robbi Rinaldo and Diane Williams, two transfers from Hartnell and a strong crop of freshmen, including several high school rodeo champions.

THIS WEEKEND IS YOUR WEEKEND AT THE NEW "SEA STREET SOUTH," (formerly "The Jetty")

FRIDAY: There will be 75¢ cocktails until midnight and drawings for Sea Street South T-shirts.

SATURDAY: Don't miss "Slippery Saturday. Between 7 p.m. and midnight, all well drinks will be 20¢ each with a 10¢ increase every 15 min. And, there is no cover for anyone wearing a Sea St. So. T-shirt.

SUNDAY: Don't forget to come back and enjoy the sounds of "Kick Back" and wear your T-shirt or be in the first 50 and get one FREE! Sea St. South Shell Beach Rd. 773-5557

Cal Poly Mustangs(6,12),(995,988) lead allóterate Bakersfield
BY ROB BENES
Sandy Holt Wagner
Soccer team high scorer Jaime Saucedo led the Mustangs to their first league victory against Cal State Bakersfield last week.

Saucedo exploded with four goals in the first five minutes of the second half, but Poly was still just 8-1 at the half. By the end of the second half Poly was well on its way to a 10-1 rout over the coachless Bakersfield team.

Cal Poly's next home game will be against Cal State Bakersfield on Friday, Oct. 12 at 7:00 p.m. This Saturday the Mustangs will play Cal State Northridge.

Have you considered these factors in determining where you will work?

1. Will the job offer challenge and responsibility?
2. Will your future employer encourage job mobility?
3. Will your future employer encourage, support and reward continued professional education?
4. How much choice will you have in selecting your work assignments?
5. Big starting salaries are nice — but what is the salary growth and promotion potential in the job?
6. Can you afford the cost-of-living in the area?

At the Naval Weapons Center we have given these things a lot of consideration and believe we have the answer for you.

Arrange through your placement officer to interview with our representatives.

Finding your way out of the jungle of companies that visit your campus each year is tough. Sometimes you haven’t even heard of them before they arrive for interviews. In order to survive, you have to take the necessary precautions.

**KNOW THE COMPANY.** We’re Lawrence Livermore Laboratory, operated by the University of California for the U.S. Department of Energy, and we’re involved in many exciting projects concerning energy, national defense, and biomedical research. Some of our major projects include:

- Nuclear Weapons R&D
- Laser Fusion
- Magnetic Fusion Energy
- Automated Cytological Diagnosis of Human Cancer
- A Search for Alternatives to Fossil Fuel: Solar, Wind, Geothermal, Oil Shale, Coal Gasification

**KNOW THE LOCATION.** The Lab sits in California’s Livermore Valley—a country of open space, beautiful hills and lakes, a country of cattle, and a country of vineyards—just minutes away from the San Francisco Bay Area.

**KNOW THE ATMOSPHERE.** You’ll work with top scientists on projects that go well beyond the state-of-the-art, and you’ll find a friendly environment where the freedom to determine your own pace and direction is the key.

We want you to know about us. If you have or are about to receive a degree in engineering or computer science, see us on campus at your Placement Office. Or contact us for more information about our many career opportunities by sending your resume to Employment Division, Lawrence Livermore Laboratory, P.O. Box 808, Dept. JCN, Livermore, CA 94550.
