BY CATHY SPEARNAK
Daily Editorial Assistant

Al Yankovic has a way with "boy-girl duets." My Bologna, a comedy song by Yankovic, is the most requested song on one system's radio show and that's no baloney. Yankovic, a 19-year-old architecture major, said he wants the take-off on My Sharona, "the No. 1 hit by the Knack—just for fun."

After recording the tune to his own back-up on the accordion, Yankovic sent it to Dr. Demento, a nationally syndicated disc jockey renowned for his crazy antics on the air.

Dr. Demento played the song on KMET, his Los Angeles-based station. It was an immediate hit.

"It has made a big hit with my audience, to put it mildly," Demento said in letter to Yankovic. Yankovic said he was shocked by the song's success.

"I didn't even know if he'd played it or not and then I got the letter. After that I went around smiling for three days," said Yankovic, who is known to many as disc jockey "Ward All" on the campus radio station KCFP.

The Lynwood native is not new to the song writing business. With his tuning accuracy by his side, Yankovic has been writing novelty songs, and take-offs on top his since high school. He sent one of his first songs, "Belvedere Cruising," to Dr. Demento in 1976, and the tune made Demento's top hit list that year.

After the airing of Belvedere Cruising, Yankovic and Demento became friends. Yankovic answered phones for Demento's show on KMET and occasionally dropped in to play his accordion live on the show.

"You could say Dr. Demento has been my 'demento,' "Yankovic said.

Other tuners by the ingenious student includes:

—Campion Comes Alive
—Mr. Frump in the Iron Lung
—You Don't Take Your Showers Anymore
—More Flowers, Baby
—You Don't Bring Me My Sharona
—I'll Go Home, Take a Shower and Go to My Flowers Anymore

But the successes of his earlier days pale in comparison to "My Bologna."

The song, which rapidly became the most requested song on the Demento Show in Los Angeles and San Francisco, is now a top hit across the country. Oddly enough, although the song is number one, it is not currently available to the public.

The song to be released as a single, it first must be cleared with The Knack, which "shouldn't be too hard," Yankovic said, since a producer from Capital Records has already given the Knacks a copy of "My Bologna."

Last week Yankovic received a call from a spokesman at Rhino Records, a label that puts out novelty singles and albums. The company heard the song and is negotiating with Yankovic to put together an album of his comedy tunes.

Yankovic was amazed when he heard the call from the record company.

"This week is like the peak of my career," he said with a laugh.

"You can't believe how tempting it is—but I don't think so," said Yankovic who plans to continue his efforts to get the songs out.

"I'm not a very talented or experienced songwriter. I probably am a better guitarist."

Yankovic said he has no long-term plans for his recent success. "I'm just going to enjoy being a top hit for a little bit."

"I'll go home, take a shower and watch TV."
Opinion

Financial dilemma

Dividing up the money is a job that, in any government system, usually generates some disagreement. The same goes for the California State University and Colleges. Representatives from every campus and from the office of the Chancellor are meeting in committee to analyze the formulas currently used to determine who gets what. There is at least agreement, said Cal Poly Business Affairs Director James Landreth, that some changes need to be made.

That may be the good news, depending on which way changes go. For years administrators at Cal Poly have attempted to obtain recognition from the Chancellor in the formulas used to disburse CSUC funds. But, up to now, much of the dividing of funds primarily remained on the basis of how many students are at a campus and how many units those students took.

We agree with Cal Poly administrators including Landreth, Academic Vice President Hazel Jones and Executive Dean Douglas Gerard that it is time some compensation be made for the special financial needs of Cal Poly.

Special recognition in the budget should be given to Cal Poly for several reasons. One is that the philosophy of education at Cal Poly involves lab instruction. This type of education is inherently expensive. There is a much higher cost per student for such programs because of required supplies, equipment, facilities and faculty positions. By comparison, lecture-oriented programs of study are much less costly per student.

Of course, it could be argued costs should be cut by changing the mode of education at Cal Poly to a more lecture-based curriculum. But that would ignore the vote by many businesses to do so.

agricultural programs—as examples—cannot continue the current at each campus, Cal Poly will be more or less stuck at the present best they are holding steady) Cal Poly is turning applicants away.

study are much less costly per student.

administrators in their efforts to obtain better formulas for CSUC funds. But, up to now, much of the dividing of funds indicated their approval of "hands-on" education.

We encourage and support President Warren Baker and other administrators in their efforts to obtain better formulas for funding. This is important for the continuation of education at California State University and Colleges. Representatives from many of their campus are much less costly per student.

Alcohol opinion

Editor:

Your editorial (Oct. 3) supporting the sale of alcohol on campus argues that the administration has failed to protect students from the "outside world." Like liquor is just another campus, your argument, runs, why put it on campus?

Your view, however, completely ignores the fact that the university is not just another community. It's obviously a special, highly artificial world created by society to educate its (largely) young. So far as possible, outside influences of all kinds which might detract from this purpose have been consciously excluded or controlled. Those students, for example, who live on campus (mostly under 21) find themselves, strangely enough, in segregated dorms, most unlike the living conditions in the community at large. Then there are the fat, highly artificial world of classrooms and labs and much of their evening studying. They eat, oddly, in a common mess. Commercial enterprises of all kinds are strictly controlled.

If the university were just another community, of course beer would be in order. So would other kinds of booze, as well as discotheques, I suppose, and maybe a massage parlor or two—competition, after all, holds prices down. To keep us from feeling that we might well even yet be missing out on something that other communities have, perhaps we should establish a small industry somewhat on the edge of the campus—not polluting, of course. And to complete the picture, every community has its own style. Wouldn't it be quaint (and so much like the "outside world") to have our own special little slum, where student wusses, those who couldn't hold their liquor, could end up.

Krans actions clarified

Editor:

In my article on page 4 of the Oct. 4, 1979, dealing with certain "questionable" appointments which President Rose Krans made, I would like to offer some points of clarification. First, the President has no obligation to consult with the Student Senate regarding the tenure of appointees. The Senate, however, has the right to approve the appointments by a two-thirds majority vote at the annual meeting. In regard to Internal and External Affairs assistants, the President shall make these appointments "in consultation with" the student Executive (Executive Council) and approved by 2/3 vote of Student Senate (ASB Bylaws 1.8.1. and 2.4).

Other aspects of the article also require clarification. For example, the statement "Krans also appointed her boyfriend, Phil Dunn, to the Academic Senate," is made completely out of context. For those who may not be aware, Phil Dunn was last year ASI Vice-President and Chair of the Student Senate. He spent several years working on the qualifications alone dismiss the implication of skulduggery in his appointment. Also, the alluding to the selection of a number of other assistants are not based on the experience of these assistants or those of having any substantive to perform their jobs, but on the fact that they are personal associates of Rose Krans.

As a third-year Student Senator, I have had the opportunity to work with both Rose Krans and her executive assistants. This year, for the first time, I have seen the Senate open up to the public and to deal with the many issues it will be facing. One of our reasons for this openness was the work President Rose Krans and her executive assistants put in prior to the start of this fall. Personally, I feel that many of those accusations against Rose Krans are the result of a lack of knowledge on the part of the Student senators over the results of last spring's democratic election and highly controversial presidential election. I would hope that these few of my colleagues would be professional enough not to tear down the ASI internally by playing petty politics games. I would also hope that the student body would look at the issue more rationally than some of their elected officials, I, for one, do not subscribe to some allegations the ASI government this year is a dramatically more "open administration" than has been seen in years past.

New Student Record refunds

Editor:

There are a number of new students at Cal Poly who ordered a New Student Record but have not received their copy yet. The following steps are suggested to help them get their book or get their money back.

1) Check with your mailing address for last summer—that is where the book was specified with.

2) If you did not get your book, call Information Services and ask for the person for Bob Snodgrass and tell him the details. The number that you should call is (415) 364-8865.

3) If you are unsatisfied with the book or the delivery, I, S. I., will give you a partial refund. You must sign up in U. L. 217A with the officers' secretary and provide your name, an address and the phone number which you should be called. The copy of the book which are you unsatisfied with.

4) If you would like a partial refund for late delivery or would like to write to the company about the New Student Record, you should add your address as follows:

I.S.I.
2625 Broadway
San Francisco, CA 94061

5) Remember, you may not get the correct information on campus or you may not get assistance unless you contact the ASI officials in U. L. 217A. If another member of that office staff are the only persons who can help you and be satisfied.

I would like to express my regret that the books were shipped so late by the publishing company. It is my hope that the above information will help those students who have encountered a problem with getting their book.

Five jump from 'Golden Gate'

SAN FRANCISCO (AP)—Four Englishmen and a woman who called themselves the "Bungee Jumpers" jumped off the Golden Gate Bridge Monday morning, their legs broken by thick rubber bands that stopped them short of the water and bounced them back toward the bridge.

The men, one of whom suffered a bleded right hand, wore formal morning suits, complete with toppers.

The woman wore a sleek jump suit. They were arrested by the California Highway Patrol and charged with trespassing on bridge property.

When the jumpers quit bouncing at the end of their elastic or bungee cords, they let themselves down on ropes. Two "escaped" in a private boat waiting below.

Three were grabbed by the U.S. Coast Guard, one of them tangled in his own lines and cables, as was a man who got stuck on bridge cables, as was a man who got tangled in his own lines and didn't jump.

The "Bungee Jumers" are set to be shown this week, with the first showing Wednesday Oct. 10. The Pink Panther and A Shot in the Dark will show at 7 and 9:15 p.m. in Chummash Auditorium. Admission is $1 for Wednesday night, or $2 for the entire series.

CPR course

A class-in Cardiopulmonary Resusitation will be held from 3 to 5 p.m. on Fridays this quarter. The American Red Cross will provide low cost cardiac first aid training. Call Doug Gros at 541-4908 for more information.

Cancer talk

The Cancer Cell—the history of cancer and theories of its origins—is the topic of a speech set for Wednesday at 7 p.m. in Room 246 of Fisher Science Hall. Dr. Charles Daniel is the guest speaker and the meeting is sponsored by the Biological Science Department.

MEChA meeting

MEChA will hold its first meeting Thursday morning at 11 in U.U. 218. The group deals with the advancement of Latinos and welcomes all willing to help the group.

Study abroad

There are still seven openings to study all areas of agriculture and Natural Rources Management in New Zealand in 1980. The application deadline has been extended to Nov. 10. All work is transferable toward a Cal Poly degree. Contact Doug Gros at 541-4908 for more information.

Commuter plane crash in Ohio

CINCINNATI (AP)—A twin-engine commuter plane lost power in an engine and crashed on takeoff at Greater Cincinnati Airport today, killing eight people, authorities said. Fred Farrar, an official with the Federal Aviation Administration in Washington, said the pilot and six other people died when Comair Flight 444 crashed while taking off for Nashville about 10:15 a.m.

The eighth person died at Booth Memorial Hospital in Florence, Ky.

GOLETA (AP)—The derailment of a train carrying acid and flammable gas that forced the evacuation of several hundred persons Sunday night and slightly injured three men was "apparently sabotage," a spokesman for Southern Pacific announced today.

Spokesman Rich Hall said, "It was apparently sabotage. There was a barricade on the tracks. The enginer reported seeing a barricade that was piled pretty high—timber, wood, concrete and that kind of thing."

An 18-year-old hitchhiker near the scene, Dean Burke, also said he saw something on the tracks just before the accident.

Hall said the damage to the 100 box cars and four locomotives would run well over $1 million.

None of the 39 derailed cars contained the dangerous materials, said Southern Pacific trainmaster Bill Giles.

Testimony on nuke wastes

SAN FRANCISCO (AP)—The head of a California-based pro-nuclear group today called for "an end to constant vacillation" by the federal government on how to dispose of highly radioactive nuclear waste.

"Radioactive wastes can be handled, transported, stored, and even permanently disposed of in a safe manner," Michael R. Peevey told a panel appointed by the U.S. Department of Energy.

Peevey was one of a number of people scheduled to testify on a draft environmental impact report by the DOE on how to dispose of nuclear wastes.

The DOE will use the testimony to determine specific policies and sites for waste disposal.

W. Andrew Baldwin, of the San Francisco-based Friends of the Earth, assailed DOE's conclusion that radioactive wastes can be disposed of in the earth "with minimum environmental consequences."

Edmund Brown Sr.
Author urges students to go places, experience people

BY DEBORAH TUCKER

Schools tend to isolate and create a caste system, causing students as well as Americans generally to be removed from "the real world," said educator and writer Peter Marin.

"I have a lack of trust for institutions," said Marin, the first speaker in the Communicative Arts and Humanities fall lecture series. "People are damaged a lot by schools.

"There is no sense of moral responsibility. College makes you waste your time. The mind begins to deteriorate and so does human empathy," said Marin.

But Marin did not say everyone should immediately quit school in pursuit of a free life. "This is a society in which it is important to have credentials," said the graduate of Swarthmore and Columbia Universities.

Marin suggested that people go to places that they ordinarily would not go, such as Watts and other poor areas of cities, to see how others live.

"In school students don't get the chance to practice relating to the world. Everything is scheduled for you. You never get to see people being free," said Marin, a teacher and former director of Pacific High School in Palo Alto.

"Schools should teach people to educate themselves. They should make people ready for responsibility, each group should decide what to study, how to evaluate, when to meet and what time to stop meeting," said the educator.

He added that in our present system the teacher and the student don't decide anything. Everything is scheduled by others.

Then we begin to judge for ourselves what the world is.

"Then we begin to judge for ourselves. Experience can change things faster than anything else," said the author of several books including "Understanding Drug Abuse," a book about adolescents and drugs, and "The Limits of Schooling."

"People should make decisions in terms of the people they know, and should have closer contact with people that are unlike them," said Marin. "It is only in this way that people can judge for themselves and not draw their images and conclusions from media images and books."

"How can you be on their side (the minorities and disadvantaged) if they are not numbered among your friends?" he asked.

Marin suggested that people go to places that they ordinarily would not go, such as Watts and other poor areas of cities, to see how others live.

"In school students don't get the chance to practice relating to the world. Everything is scheduled for you. You never get to see people being free," said Marin, a teacher and former director of Pacific High School in Palo Alto.

"Schools should teach people to educate themselves. They should make people ready for responsibility, each group should decide what to study, how to evaluate, when to meet and what time to stop meeting," said the educator.

He added that in our present system the teacher and the student don't decide anything. Everything is scheduled by others.

RACING
JOGGING
FULLBACK Paul Dickens rushed for 163 yards and with the defense picking off five passes, the Cal Poly football team pounded the Fresno State Bulldogs 26-0, Saturday night before 8,600 fans, the largest crowd ever at Cal Poly.

"They beat us everywhere they could," said Bulldog coach Bob Padilla. "They outplayed us and outhit us." With the Mustangs' top two tailbacks, Louis Jackson and Jim Calvino, out for the game, Dickens responded by gaining 163 yards in 35 carries, by far his best performance as a Mustang.

Cal Poly's veteran offensive line opened holes all night for Dickens and Robbie Martin. Martin, usually a wide receiver, showed his versatility by playing tailback in certain situations against Fresno State. He carried the ball for 61 yards, and even threw a touchdown pass. Martin hit Mike Gilmore with a pass for a seven yard score midway into the third quarter. Quarterback Red Lundstrom also used Martin as a receiver, hitting him with four passes for 69 yards.

In the first half, the Mustangs' defense did all the scoring. Defensive end Tom Gilmartin tackled the Fresno State quarterback in the end zone for a safety during the first quarter. Then, early in the second period Ralph Gallagher intercepted a pass and returned it 22 yards for a touchdown.

This week the Mustangs challenge Northern Colorado in the Homecoming game. Last year the Mustangs were undefeated when they traveled back to play Northern Colorado, and were upset 15-10.

Dickens and defense whip Fresno

BY KELLEY WISE
Daily MUSTANG Staff Writer

Cal Poly running back Dan Craig dives for extra yardage against the Fresno State Bulldogs. The Mustangs overwhelmed Fresno 26-0. The football team will play the University of Northern Colorado next Saturday night in the Homecoming football game.

CHICAGO (AP) — "That's enough" said the strangely dressed robber. Then she took the money and ran, although the teller was ready to hand over more. Police were searching today for a young woman who was wearing both a pair of jeans and a skirt when she robbed the Pioneer Trust and Savings Bank of $2,000 Tuesday.

Police said the woman entered the bank about 3:30 p.m. and handed a woman teller a note saying: "This is a stickup. Do not press the alarm. Give me all your 3s, 2s and Is. No one will be hurt." The teller handed over two bundles of $30 bills and was getting more money when the robber suddenly said "that's enough" and fled the bank, police said.

Keyes continues to shine on the cross country courses

Maggie Keyes again won a cross country meet in course record time at the Cal Berkeley Invitational. The women's team placed third overall, with Arizona taking first over Cal Berkeley. Coach Lance Harter was pleased with Keyes' performance and was glad to see the rest of the women run in a tight pack.

"Maggie has claimed two records in as many weeks and her upcoming race at Stanford already has her name on the course title," Harter said. "Our second through sixth runners also ran well as usual." The team goes to the Stanford Invitational next weekend to face many of the same teams they ran against last Saturday.

Jim Schankel is shown finishing a recent race in first place in the Aztec Cross Country Invitational "m"eter course. He held on until the three-mile mark but not without putting up a fight over the 1,000 last Saturday. He finished third to two Kenyans, in 13:56 before the Kenyans surged ahead.

Mustangs run against Kenyans, come in close second

BY GREGOR ROBIN
Daily Sports Editor

"It would say we're one of the three best American teams in the country, and one of the five best teams in the country.

Coach Miller's words were put in gear last Saturday when the Mustang cross country team went up against the defending division I champions. The University of Texas at El Paso. Miller made the distinction between "best American team" and "best team" because there are foreign athletes competing on cross country teams across the country. UTEP is one such team and their top two athletes placed one and two in the Aztec Cross Country Invitational at Balboa Park in San Diego.

Cal Poly's top runner, Jim Schankel, placed third to UTEP's winner Jim Rotch and runner-up Solomon Nyambui on the 10,000 meter course. Nyambui ran the fastest 5,000 meters in the world last track season, but Rotch beat him on the course in San Diego because, said his coach, Ted Banks, he is in the best shape of his life.

Schankel was there to witness Rotch's as well as Nyambui's shape and he was impressed.

"It was the quickest I've gone in my life," Schankel said about the 4:37 first mile time. "At the first mile there were five of us. By the second mile Rotch was a little bit ahead. After the third mile I was just trying to hold on."

And that he did, beating Them Haya, who was the third place finisher in the division I Cross Country Championships last year and ran the second best time for the steeplechase in the country (8:26.8) in track competition last season.

Schankel's time was 30:04, while Rotch's winning time was only 14 seconds faster, 29:50.8.

Coach Steve Miller's main concern before the race was that the team not be intimidated by UTEP.

"If we got blown out it would destroy our mental outlook," he said. "I know that Schankel is making a bid for the Olympics, and Danny Aldridge is also. But our third through seventh men are great athletes by standards of comparison, and they were running against the greatest athletes in America. The only powerhouse that didn't show up was Oregon, and we placed second."

Individual finish: Jim Schankel, 3; Danny Aldridge, 8; Eric Huff, 14; Manny Bautista, 20; Ivan Huff, 26; Terry Gibson, 29; Jack Madden, 53.

Team finish: UTEP, 41; Cal Poly, 69; Northern Arizona, 93; Arizona, 110; Northbridge, 161. There were 14 teams in all.

The here's B team competed in the Cal Aggie Cross Country Invitational at UC Davis and came in third out of 12 teams. Tom Becker led the team in scoring, coming in eleventh over the five mile course with a time of 24:52. He was followed by Jeff Small (fifteenth) and Paul Diario (nineteenth) of Cal Poly.
