Student reactions to morning arrest

BY CINDY HAUNG
Daily Staff Writer

At 6 a.m., Mike Merwin of the Delta Tau Fraternity woke up to find three policemen on the roof of the house and members of the SWAT team surrounding the neighborhood. The police called and told fraternity members not to go outside. What seemed to be a dream to Merwin was an actual state-out taking place.

Members of the fraternity and neighbors watched silently as the San Luis Obispo Special Weapons and Tactics Team and other armed law officers surrounded the nearby house of a man who made 128 threatening phone calls to a policeman.

"I was totally surprised to see the police..."

John Robinson Young, 28, of 82 Palomar Avenue, threatened police officers that he had a high-powered rifle and would shoot any policemen that he had a high-powered rifle and would shoot any

"It was really exciting because it sounded just like the movies."

At 6 a.m., Mike Merwin of the Delta Tau Fraternity woke up to find three policemen on the roof of the house and members of the SWAT team surrounding the neighborhood. The police called and told fraternity members not to go outside. What seemed to be a dream to Merwin was an actual state-out taking place.

Members of the fraternity and neighbors watched silently as the San Luis Obispo Special Weapons and Tactics Team and other armed law officers surrounded the nearby house of a man who made 128 threatening phone calls to a policeman.

"I was totally surprised to see the police and SWAT team at six that morning," said fraternity brother Curtis Stallins. "It was pretty cool seeing all the action."

Stallins and Merwin were out in their front yard watching the entire incident. Policemen were talking to Young, telling him to come out.

The man said that the neighborhood was absolutely silent, except for the bulbous of the policemen, asking Young to come outside.

"It was the closest I came to waking up and seeing a war going on," he said.

The week before, he and other neighbors heard a woman screaming from Young's house. Some neighbors got concerned and reported the incident to the police. Other disturbances have also been going on in the past week from Young's house.

"There was lots of traffic in the early hours of the night, and huge dogs from his neighborhood roaming the streets," he said. "The language coming from the house was extremely profane and vulgar."

Victor Montgomery, who lives right behind Young's house, had also heard disturbances in the middle of the night from Young. He became aware of the incident Monday morning at 7 a.m. when he heard policemen's voices over the bullhorn.

"The police asked Young if he was in the house and told him he had 30 seconds to come out with this hands over his head," Montgomery said. "John yelled back at them that he'd be right out as soon as he got his clothes on."

Young is being charged with violating his probation and making threats to the police like Delta Tau Fraternity members. Although members of the SWAT team were stationed on his front porch.

"I made it a point to stay in the house when I saw police on the balcony of Tropicana armed with guns," he said, referring to a student apartment complex. "When I saw the SWAT team, I went into my living room, the furthest corner away from them and sat and waited."

MONTGOMERY HEARD NO ARGUMENTS OR NOISE FROM YOUNG, WHO WAS ARRESTED WITHOUT INCIDENT. MONTGOMERY AND OTHER NEIGHBORS WERE NOT CONTACTED BY THE POLICE LIKE DELTA TAU FRATERNITY was, although members of the SWAT team were stationed on his front porch.

"It was the closest I came to waking up and seeing a war..."

Members of the fraternity had suspected something was going on in Young's house earlier. On Sunday night, some of the members saw some men moving something out of Young's house at 2:30 a.m. The men were loading up the truck in a hurry, said Stallins.

"The guys we saw were in a hurry to get something out of the house, something they didn't want the policemen to see," he said.

Young is being charged with violating his probation and making threats to the police.

Firefighters free student from short-circuited elevator

BY MARYANN GILPATRICK
Daily Staff Writer

Cal Poly firefighters rescued a 21-year-old student from a shorted-out elevator in Engineering West Tuesday at about 10:30 a.m.

Jim Looram, a sophomore in agricultural business management, emerged from the clammy elevator smiling but visibly shaken.

Looram said he became "a little bit concerned when he smelled something burning, but was not too frightened.

"The fire department is great," said Looram.

Ironically, Looram said he had applied to work for the fire department here just last week.

He said he got on the elevator, pushed the button and it started to move, but it stalled between the first and second floor. He said there was no phone inside and "emergency" was the only button that worked. He said he pushed it and waited about five minutes before he called for help from a passerby.

Carmen Johnson, Cal Poly fire captain, said the malfunction was caused by an electrical short-circuit which was causing and burned relay wires.

Johnson said firefighters talked to Looram "to keep him involved" while they worked to hydraulically lower the elevator to the ground floor.

The firefighters instructed Looram to lie on the floor while they lowered the elevator. When the door opened after a 35 minute wait, Looram walked out with a smile on his face and a half-eaten apple in his hand.

"I ate my apple," said Looram with a grin.

"I made it a point to stay in the house when I saw police on the balcony of Tropicana armed with guns," he said, referring to a student apartment complex. "When I saw the SWAT team, I went into my living room, the furthest corner away from them and sat and waited."

"The guys we saw were in a hurry to get something out of the house, something they didn't want the policemen to see," he said.

Young is being charged with violating his probation and making threats to the police.
Opinion

Dirty laundry

There is new policy in the physical education department this quarter which requires students to wash their own dirty P.E. uniforms. Previously, uniforms that were required for a class and were loaned out by the P.E. supply service were washed off campus by a laundry company. The change in laundry policy is a step forward which will be of benefit to students as well as to the P.E. department.

The wash-it-yourself policy was instituted as a result of a 400-percent increase in the cost of laundry service. Thus the immediate beneficiary of the policy is the P.E. department. But students will benefit, too, because they will have the use of equipment and supplies purchased with the funds saved on laundry. Unless, of course, the money has to go toward replacing uniforms destroyed by amateur launderers.

There is one major drawback to the home-laundry plan which is foreseen by P.E. Department Head Jim Raily. Raily said the nice thing about having uniforms washed regularly by an outside contractor is that it cuts down on the smell in the locker room and in P.E. classes. If people are negligent to do the wash, odors from dirty uniforms may proliferate in the confines of the physical education building.

However, dures under circumstances, no matter how difficult, should not be allowed to block out the overall money picture. It is necessary to bear in mind that aside from the acquisition of a few facts and procedures the most important fruit of a college education is, for young people, learning to have a sense of responsibility for one's own mental, emotional and physical state. There could scarcely be conceived a better situation for this type of learning than that created by making each person responsible for what she or he smells. It is a classic operant conditioning set-up.

On a more practical level, too, forcing students to wash their sweaty P.E. clothes may be doing them a favor. For doing the laundry is a part of life in the American society which, barring unprecedented changes in predominant lifestyles, will be with us for the rest of our lives. The more skilled students can become at the task, the more time and money they will save later in life. In fact, it is a good idea to look into the possibility of holding classes in, or the provision for, changing habits in washday techniques.

With the initiation of its new laundry rule, the physical education department has taken a direction which is laudable. It is entirely in keeping with the philosophy of education at Cal Poly. Departments should indeed take a role in students' extracurricular education as P.E. has done. P.E. department personnel should remember that, until such time as a less expensive laundry company is found or the department buys its own machines, they are helping students get ahead in life. Their sacrifices in time and offactory displeasure are not in vain.

Motorcycle parking

Editor:

The differences between a moped and a motorcycle that looks like a moped is the presence of pedals. Mopeds do not need to be licensed. The owners of mopeds have the same privilege as the bicyclist in that they can roam anywhere around campus. On the other hand, motorcycles need to be licensed. As a licensed vehicle they also need a parking permit to be able to park in the designated areas on campus.

The other day as I walked from the library to the University Union I saw six motorcycles, pseudo-moped style, parked in various racks. These and other pseudo-moped owners need to be aware of the following " Beware".

— Beware of the campus police, especially those whose job it is to issue parking citations. If they're doing a good job, they'll find you.

A student on his break in The Cellar puts his burrito in the microwave oven and waits anxiously for the momentary “ding.” Could there be a danger in microwave cooking?

"Some people get all bent out of shape over the use of microwaves," said Emily Shuter, Cal Poly household equipment professor. "But microwaves are not accumulative like X-rays."

Although there is little radiation danger in cooking by microwave, there is a possibility of leakage which could cause burns to the eyes, Shuter said.

"It doesn’t pose any danger. To my knowledge there have never been any recorded injuries from a microwave oven," said Shuter.

Even though the oven itself may be safe, carelessly prepared food cooked in a microwave oven can be harmful, said Susan Levings, a foods and nutrition professor. Meat that is thawed out to thaw at room temperature for several hours and then is cooked in a microwave oven can cause food poisoning.

"Bacteria needs three things to grow: time, temperature and moisture," said Levings.

"The bacteria on moist meat is killed by normal oven cooking where the external temperature reaches about 180 degrees. Microwave cooking, however, creates an external temperature of only 110 to 120 degree and leaves bacteria alive and in the danger zone," said Levings.

"I don’t think it poses any danger. To my knowledge there have never been any recorded injuries from a microwave oven," said Shuter.

Although microwave ovens prove a blessing for those with little time on their hands, they can cause some problems.

"Microwaves are safe way to cook," professor says

Homecoming festivities

A schedule of festivities are set for Cal Poly’s 1979 Homecoming weekend this Friday and Saturday.

Homecoming will be presided over by a host and hostess, who were selected at last night’s Host and Hostess Pageant.

"The theme for this year’s Homecoming is Time Out for Homecoming with the weekend reserved for honoring distinguished alumni of Cal Poly.”

A rally is set for Thursday at 11 a.m. in the U.U. Plaza. Gary Hinze and the Run-A-Mac Band will perform during the hour.

Grand Marshall of Homecoming, Roy "Silver Fox" Hughes, former football coach of the Mustangs, will lead the Homecoming parade through downtown San Luis Obispo beginning at 10 a.m. Saturday.

A chicken barbecue will be held in Poly Grove at 5 p.m. on Saturday. The barbeque is open to all and tickets are $3.50 in advance, $4 at the door.

In the headliner event of the weekend, the Cal Poly Mustangs will meet the Northern Colorado Bears in the classic match at 7:30 p.m. in the stadium. Halftime activities will include awards honoring the alumni will be $1.50 in advance, $4 at the door.

Kranz stands by appointments despite criticism

BY MEG McConney
Daily Trojan Writer

ASI President Rose Kranz said she will stand by her brother Tony Kranz to the Interfraternity Related Activities Committee on the grounds that he is a member of the Campus Commerce and that several student senators that she is showing favoritism and subverting the appointments process by not putting the selection before the Student Senate for approval.

Kranz said she followed the ASI policy and precedent in making appointments to the numerous committees and subcommittees she is expected to fill. The appointments process was completed as a final year. According to ASI by-laws, the president is empowered to make all appointments to the executive cabinet, as well as to ASI committees, subcommittees and various campus boards. Paid positions, such as internal and external affairs officers, must be approved by a 3/4 majority of the Student Senate.

The position of IRA representative is unpaid, so Kranz said she does not believe the appointment of her brother Tony is a subversion of the process. Senator Anne Perry of the School of Business does not agree.

Referring to the first executive order by the Chancellor’s office regarding the selection of representatives to the powerful university’s Academic Senate meetings, she added that Kranz is expected to follow the same precedent in making appointments to the Student Senate for approval.

Kranz believes that this almost happened in the case of Ron Scholtz, who was denied appointment to the position of external affairs officer by the senate.

Discussion was raised at the September 26 meeting of the student senate concerning Kranz’s choice of persons particularly close to her for key ASI positions. Scholtz, who is the roommate of Kranz’s boyfriend Phil Dunn, was later voted down as external affairs officer at the same meeting. Dunn was known because Scholtz is a personal friend of hers and not because he is qualified. Kranz believes that this almost happened in the case of Ron Scholtz, who was denied appointment to the position of external affairs officer by the senate.

Later at the same meeting, Senator John DeAngeles, a member of the School of Architecture and Environmental Design, suggested that the senate might be voting on whether or not they approved of Scholtz’s qualifications for the job. Griffis said the first vote.

PE says do your own laundry

BY TERI BAUER
Daily Trojan Writer

If you want clean clothes, you have to do it yourself. That means, you have to do it in the Cal Poly Physical Education Department. It is the word from the P.E. Department, which has previously distributed and cleaned gym uniforms for students.

Due to a 400 to 500 percent increase in the cost, the department decided to discontinue the service and require students to wash their own dirty clothes.

Prior to last quarter, almost all students were able to check out uniforms and then turn them back in to the locked room to be laundered. Now, said P.E. Head Jim Ralley, they are given two sets—one to wear while the other one is being washed at home.

The new procedure seems to have been accepted pretty well. Ralley said, "I'm not getting a lot of feedback. I don't think that we would be a lot of difference," Ralley said. However, he is looking into the possibility of purchasing washing machines and two dryers, said Ralley. The Department would have to foot the bill for the new machines and equipment, but Ralley said it would have to be "easy to wash in a large load." The big from the laundry service is up to 50 percent.

"That's totally ridiculous," Ralley said. "The whole service cost only 30 to 40 cents for wash and dry."

As to charges by Perry and John DeAngeles, ASI senator from the School of Architecture and Environmental Design, that the senate might be voting on whether or not they approved of Scholtz’s qualifications for the job, Griffis said the first vote.

Scholtz was selected by Kranz to replace Ann Clendenon, who had been tentatively selected to bring IRA appointments to the Student Senate for approval. Kranz said Clendenon was not meeting her end of a verbal agreement made to municipal government meetings and California State Student Association meetings. The senate later formally appointed the position to Scholtz by a vote of 9 to 1 as requested by the senate. Clendenon was never formally appointed to the position she was to receive by the senate. Her name never appeared in the Daily Trojan.

Kranz believes that this almost happened in the case of Ron Scholtz, who was denied appointment to the position of external affairs officer by the senate.

Later at the same meeting, Senator John DeAngeles, a member of the School of Architecture and Environmental Design, suggested that the senate might be voting on whether or not they approved of Scholtz’s qualifications for the job. Griffis said the first vote.
Our annual PRE-SEASON SKI SALE is here. It's tomorrow, THURSDAY 7am - 11pm
San Luis, once again it's time for Copeland's biggest and best ski sale of the year and low prices like these don't come by often... so you'd better not miss it! Get here early and save even more on EARLY BIRD SPECIALS. Be there October 11th!

FIRST 6 HR. SPECIALS!
•FREE TO THE FIRST 50 PEOPLE THROUGH THE DOOR...

$20 SKI BOOT CERTIFICATE
Good towards the purchase of any ski boot in stock priced over $100. Limit one certificate per pair of boots. Valid first 6 hours only.

•FREE 17" BARRECRAFTER SKI POLES
To the first 50 people to purchase any ski or ski package over $100.00. (Limit one per customer)

•FREE DRAWING!
Register at store Thursday, October 10th, to win a free pair of Rossignol St. Comp Ski. No purchase necessary. Drawing will be held Thursday night at 10:30 p.m.

In order to prepare for this sale we will close all day on Wednesday, October 10th.

Original prices are based on last season's selling price. Current price reduction may have been taken.

Consumer
The ABC's of consumer fraud in San Luis Obispo
BY SEANNA BREWER
July 21, 1975
The District Attorney of San Luis Obispo handles consumer fraud cases from A to Z. Ray Jauregui, head of the consumer fraud division, can literally name fraud cases for every consumer over the telephone. "That's why we are the Automatic... Insurance... Postal Fraud... Real Estate... Service Stations... Utilities... Warranties; we handle them all through W, " said Jauregui. The consumer fraud effort handles about 200 calls a month from upset consumers who feel they have been cheated. The District Attorney's office is the only place in the country where people can complain about the service they have received. "We do three things," said Jauregui, "We advise the consumer directly, refer them to another agency that would help or prosecute the business. The main role of the office is to act as a mediator between the consumer and the business."

Heavy trading
Stock market takes big drop
NEW YORK (AP)—The stock market took a sharp drop in more than five years today, jolted by a surge in interest rates and fears of a deepening recession. Trading was heavy.

Canada and the United States
Many of the nation's banks today raised their prime lending rates from 13 1/4 to 14 1/4 percent. The unprecedented increase of a full percentage point, which followed new credit tightening moves by the Federal Reserve over the weekend, came as a shock to many Wall Street brokers. Analysts said interest rates had been expected to rise, but not so rapidly.

Jauregui said fast-breaking developments appeared to have increased fears among investors that the Fed's tough anti-inflation tactics might lead to a deeper economic slump than had been expected earlier.

"We are slow key," said Jauregui. "We don't try to run the business out of town. We have excellent cooperation in town. They respect the power of the district attorney and cooperate, because they are good businesses."

The problem starts when people from outside of the county try to pull a fast one, according to Jauregui. For example, Jauregui said the man who supposedly slipped on restaurant floors and then proceeded to sue the restaurant. That person was sentenced to prison for six years, said Jauregui. Insurance fraud is a crime that comes into the county frequently, Jauregui said. Out of town scammers sell senior citizens over-priced health insurance.

Other types of fraud that the District Attorney handles often are mail and repair fraud.
"People are always calling about appliance repairs," said Jauregui. "We can get insurance for the consumer. The consumer fraud division was started in January, 1973. It has continued to remain

ELECTRICAL, ENGINEERING, COMPUTER SCIENCE & MATH SPECIALISTS HELP US DEVELOP...

Tomorrow's Technology, Today

SOFTWARE ENGINEERING
Design and develop real-time computer software.

SYSTEMS ENGINEERING
Participate in systems engineering, system analysis, and system testing. Conceptualize, design, develop, and test optical products for scientific applications and optical tracking and ranging systems.

MICROP otoring ENGINEERING
Design and test microprocessor integrated circuits.

RF & MICROWAVE ENGINEERING
Develop specifications for microwave and receiver subsystems, design amplifiers, detector circuits and receivers.

ELECTRO-OPTICS ENGINEERING
Design and develop new electro-optical systems and components. Design and develop the various functional subcomponents of a complete optical, electronic, and opto-electronic system. These are systems that involve the development of new components for defense and medical applications.

SYSTEMS ENGINEERING
Participate in design and development of new component types, and provide technical assistance. Plan and perform various developmental activities. Conduct test and measurement equipment projects and supervise test and measurement equipment projects. Contribute to the development of new systems and components for defense and medical applications.

COMING WORK WITH US
If you are ready to begin your career in a dynamic and expanding environment, write to GTE Systems Systems Group for an exciting and generous benefits package.

WE WILL BE INTERVIEWING ON CAMPUS
Tuesday, October 16

Call soon with us. Please call your Placement Center for details. If unable to meet with us on campas, please write letter of inquiry to: Career Relations Coordinator, GTE Systems, P.O. Box 20108, Mountain View, California 94049. GTE Systems is an equal opportunity employer. Minorities and females encouraged to apply. U.S. citizenship required.

FEDERAL RESERVE POLICY
hit home owners, buyers, sellers
NEW YORK (AP)—The first victims of the Federal Reserve's new tight-money policy will be the people who buy, sell and build houses. But analyst say consumers and businesses also will feel the impact of the Fed's moves.

"I would think that it's going to be a little harder to get a car loan, a little harder to get a mortgage," said economist William E. Gibson of the brokerage firm of Harris Upham & Co. Inc.

"It will be very tough to buy or sell homes without mortgage financing. It's difficult to see institutions funding mortgages one or two months in advance when the cost of money is so uncertain," said bank analyst E. Gray of Sanford C. Bernstein & Co. Inc.

The tight mortgage situation is likely to slow residential building and that means makers of appliances and home furnishings may experience sales and increasing inventories of unused products as its major market

PRICE CONTROL 'TOP PRIORITY' FOR CARTER
WASHINGTON (AP)—President Carter renewed his commitment Tuesday to do "whatever it takes" to fight inflation, even if this means unpopular economic policies that could damage him politically.

In a nationally broadcast news conference, his first in more than 21/2 months, Carter said he supports efforts by the Soviet Union to withdraw 20,000 troops from Central Europe and NATO's earlier proposal to strengthen defense in the event of a German reunification.

He also said he supports efforts by NATO to strengthen defense in the event of a German reunification.

"Whatever it takes to continue our commitment to fighting inflation, even if it hurts politically," the president said.

Carter endorsed Reserve plan
WASHINGTON (AP)—President Carter endorsed the Federal Reserve's new tight-money policies Tuesday and said he was giving "top priority to fighting inflation even if it hurts politically."

"There is no doubt in my mind that as an economist, I know that inflation is a threat to our national economy," the president said.

"There is no doubt in my mind that as an economist, I know that inflation is a threat to our national economy," the president said.

Land calls housing, alcohol, Foundation issues

Housing, the Cal Poly Foundation and alcohol on campus are major issues to be dealt with this year, said ASI Vice President Jeff Land.

ASl Vice President Jeff Land conducts a meeting of the Student Senate. Serving as chairman of the Student Senate is included in ASI by-laws as a duty of the vice president.

The 22-year-old business administration major said he believes the San Luis Obispo City Council's imposition of a three unrelated persons per dwelling limit is unreasonable. The number of four bedroom houses in San Luis Obispo warrants a change in this limit, said Land. It is not fair to expect three persons to split the rent on a four bedroom house, he said.

Land said the ordinance makes the campus more of a limited option for students who would like to be close to campus and close to friends. The Student Senate is included in this duty of the vice president.

The Foundation operates El Corral bookstore and the campus food service.

Land said he is in favor of the student senate's stay on campus restricted areas. He said ASI is working to set up a pub set up in the Mustang Lounge that would serve beer and sandwiches.

As long as students don't start "carrying beers to class" there should be no problem, said Land.

Land first became involved in campus activities when he volunteered to represent the Society for the Advancement of Management at the Student Health Services Council. Attending council meetings "made him mad because nobody was working" so he and a friend wrote up codes for a new organization, the Student Health Advisory Committee.

"It simply doesn't make any loan payments, Ryan said. A bank will check to see if a student's combined income is over $100,000," said Diane Ryan, a financial aid counselor.

There are hundreds of students who do not realize that they do not have to be poor to receive financial aid, Ryan said.

"Students have this false 'need idea,'" she said.

Three banks—Bank of America, Security Pacific and United California Bank—are still accepting applications through the end of October. The only prerequisite to getting a loan is that the student must use the funds for educationally-related expenses.

These include rent, gas, medical costs, and even new clothes.

Aside from the deferred interest advantage there is one basic difference between a student loan and a regular loan, Ryan said.

"You can be denied a consumer loan if there is no established credit" she said. "You can't be denied a student loan on this basis."

A bank will check to see that a student's combined resources of the loan plus income are enough to keep him or her in school.

As of June 1, all new student borrowers take a California guaranteed student loan, rather than a federal loan.

Many banks have been dropping out of the federal program because of defaults on loan payments, Ryan said. The federal loans are gradually being phased out in favor of the new state loan to attract the lenders back.

"Banks had a real sour taste in their mouths about student loans, but now that's improving," said Ryan.

"California loans are really beginning to boom. The Financial Aids Office has stopped collecting financial information from the students who apply for loans, said Ryan.

"It's not a criterion to process a loan," said Ryan. "It simply doesn't make a difference."
Choking seminar: More than just a pat on the back

BY BARRY SHORTZ

The San Luis Obispo Chamber of Commerce, working with the Red Cross, has developed an anti-choking training program for restaurant employees and interested citizens.

Carole Todd, community programs director of the Red Cross, said choking is the number six cause of accidental death in the United States. More than 4,000 people choke to death each year, she said.

In the last two years, San Luis Obispo County had five choking deaths, said Todd. Most people do not associate choking with dying, said Todd, so they do not take it seriously.

"It's our goal to have every restaurant employee in San Luis Obispo trained to recognize a choking victim and to give aid," said Todd.

The training takes only 10 minutes and costs 25 cents per employee to cover booklet expenses, she said. Instructors from the Red Cross will conduct seminars at restaurants to train employees in anti-choking aid.

Instructor French Morgan said objects blocking a victim's air passages may cause partial or complete obstruction. A partial obstruction means the choking victim can still breathe and is coughing, trying to expel the foreign body. In partial obstruction cases it is important not to interfere with the victim, Morgan said.

If air passage obstruction is complete, a choking victim cannot breathe, cough, or speak, Morgan said. In such a case quick action is needed because without four minutes a person whose air passage is entirely blocked will be dead.

Morgan said two actions—back blows and abdominal thrusts—are recommended in helping choking victims. Back blows, he explained, are a rapid series of hand thrusts to the victim's back. While whacking with one hand the other hand is used to support the victim's chest.

To administer abdominal thrusts the person giving aid stands behind the victim, wrapping his arms around the victim, Morgan said. With one hand grasp in the other, a sharp upward thrust is given into the victim's abdomen.

The latest choking death in San Luis Obispo occurred in a pizza parlor. A 17-year-old youth choked to death while his boyfriend was paying the bill. Could she have been saved? "Yes," said Morgan, "if someone got to her in time and knew what to do."

More information about the anti-choking training program may be obtained by calling the Red Cross at 543-0066.

SF tries to stop bus violence

SAN FRANCISCO (AP)—Saying "discipline must begin in home," Mayor Dianne Feinstein is appealing to parents for help in combating attacks by mobs of black youths on white bus passengers.

She also ordered that police officers be used to help guard the buses, saying, "We are going for arrest... It's the only way I know to stop this sort of thing."

Police officials said Tuesday that they had not yet decided how many officers would be assigned to guard buses. Transit officials said about 50 percent of the buses are running at any one time carrying an unsecured security guard.

Mrs. Feinstein said an announcement late Monday came a day after about 5 black boys and girls swarmed aboard a Municipal Railway bus and robbed the five white passengers aboard. It was the latest in a series of such racial incidents.

"We must have strictness and discipline in the city and most of the discipline must begin at home," Mrs. Feinstein said. She urged parents to "restrict their youngsters at night and not allow them to just be roaming around the city at 2 a.m., when they are bound to get into trouble."

"We have asked the courts to give strong sentences when these cases come before them," she added. If any of the offenders are caught, she added, "they'll do time."

Bus driver James Pyatt, 38, who is black, said the youths, aged 12 to 20, swarmed aboard his No. 38 Canyon bus in the Western Addition when he stopped to pick up passengers about 2 a.m. Sunday.

8F sniper hange himself in cell

RUMagne (AP)—Wayne Calliumine, the alleged sniper who killed more than 50 shots from a high-rise office building and held a hostage for almost 31 hours last weekend, hanged himself before dawn under his cell, authorities said.

"They should have put him under very close supervision," said a distraught Jeff Brown, the public defender assigned to the case.

"I can't figure out for the life of me how he would have been allowed to commit suicide."

Calliumine's body was found at 5:00 a.m. PDT by a trustee delivering breakfast, according to Ray Roberts, legal counsel for the San Francisco Sheriff's Department. The trustee summoned a medical examiner, who put the body down.

Halvemik pleads innocent

OAKLAND (AP)—State Court of Appeal Judge Paul N. Halvemik pleaded innocent Tuesday to charges of possession of marijuana.

Halvemik, 17, was a high school student when he was arrested recently.

"I was a screwball kid. I started to really like the guy."

"There is no doubt in my mind," Carter told a nationally broadcast news conference, "the No. 1 threat to our national economy is inflation."

Carter also predicted that the SALT II treaty will be approved this year by both houses of Congress against inflation even if it hurts him politically.

"I don't know what to do," Carter said Tuesday he will pursue tight money policies as a weapon against inflation even if it hurts him politically.

"There is no doubt in my mind."

The spokesman did not say what was on that cassette, but said police were in the process of finishing up the investigation and questioning the employees to leave.

"The General Assembly decided that the electric car may meet the majority of our driving needs and virtually all the needs of a second car, and do so economically," said Unita Wonlts of Globe-Union Inc.

"The General Assembly was sponsored Tuesday as proof that electric cars can meet the needs of the American public.

"SALT III treaty to be approved this year by both houses of Congress against inflation even if it hurts him politically."

**State champ runs for Poly**

**BY LORI ANDERSON**

By Lori Astor Writer

Kathy Perkins has only two years of competitive experience behind her, but one couldn’t tell by the way she’s running at Cal Poly today.

Kathy, who runs cross-country for Cal Poly, said she started running when the coach at West Valley Junior College saw her in a jogging class and asked her to join the team. She has come a long way since then and is now one of Cal Poly’s top women runners.

Kathy, who won the junior college state meet in 1978, came in 12th in the Mustangs in about 80 entries in the UC Berkeley invitational, last weekend. The junior microbiology major from San Jose said as a high school senior she juggled to get in shape. She said she started running about half a mile and took about a year to feel good about running five miles.

"I had planned on coming to Cal Poly just for school," said Kathy. But, when she found out she could compete and was awarded a full scholarship she went out for the team.

"Cal Poly is a great school and has a great group of girls to run with," said Kathy, who feels that the men and women’s teams are equal at Cal Poly as far as runner interest is concerned.

Before running a race, Kathy said, "I think about the course. I think about how to run it, where to push and where not to get tired." She said most of her running is done "just for myself."

This year her goal is to be in the top 20 at the nationals and next year she hopes to reach the top 10.

Kathy said she looks up to teammate Maggie Keyes and the other girls on the team.

"I push myself to push Maggie," she said. After all, Kathy said of Maggie, "She’s here to chase after.

Kathy Perkins won the state junior college meet last season in cross country. She is now second woman on the cross country team at Cal Poly behind Maggie Keyes.

Back in California, spikers in a must-win situation

BY BRIAN MILLER
Daily Trojan Writer

After a very successful tournament in Utah where it gained needed respect, the Cal Poly women's volleyball team is again searching for an identity.

The Mustangs are 0-2 in conference play and Coach Mike Witham is looking to winning all three matches this week if they are to sustain playoff hopes.

"For us to entertain any thoughts of post-season play, we'll have to win most or all of our remaining conference matches," said Thursday the Mustangs hosted the University of California at Santa Barbara, and lost in four games.

WATER POLO TEAM: \textbf{season on rise}

BY PIPER PARRY
Daily Trojan Writer

The Cal Poly men's water polo team ended their season on a high note. They went 11-2-1 in the season and lost only to UCLA, 17-13.

The Mustangs will be seeded sixth in the MPSF (Megapower South Pacific) conference and will host the MPSF tournament in San Luis Obispo. This is the first time in the school's history that the team will host a MPSF tournament.

The Mustangs are looking to improve their record in the MPSF this year after finishing third last season. They hope to make a statement in their first MPSF tournament.

The tournament will be held on Saturday and Sunday at the Mustang Aquatic Center. The Mustangs will face off against the University of California at Santa Barbara in the first round and the winner will advance to the MPSF championship game.

The Mustangs are a young team with a lot of potential for the future. They are looking to build on their success from last season and make a run for the MPSF championship this year.
CAREER CONTEMPLATION.
The time has come to choose the career path to meet your objectives. You know what you want — a stimulating environment, challenging, but comfortable; a competitive wage, career growth and benefits.

For the past 15 years you've studied and trained rigorously. You've solved thought problems. And now the training and discipline is about to pay off.

LOOKING FOR MORE THAN PROMISES?

DATAPRODUCTS, the #1 independent manufacturer of computer printers, is seeking Career Minded Professionals who demand a stimulating environment — a company that recognizes talent and promotes on the basis of performance.

What sets us apart from most corporate enterprises is this: We don't make promises we can't keep.

In 1962, a team of highly experienced managers and engineers paved the way to develop printer design and technology. The results were growth and product excellence. Today, Dataproducts facilities span the United States, Europe and Asia. Our printers are harnessed to the most sophisticated computers manufactured today.

We're able to supply much of the world's need for quality printers due to our stimulating work environment. We're "people-oriented." Our employees' dedication and enthusiasm have given meaning to our leadership. And we've shown appreciation. We share our profit, provide 12 paid holidays throughout the year, vacations, and offer one of the most comprehensive benefit packages in the marketplace today.

If you're a professional who has something to say, WE'LL LISTEN. Our products are the net result of your creative energy. You're entitled to a voice and the increasing responsibility of a professional.

You deserve an environment which encourages professional thinking. Our promotions, based on job performance and planned growth, provide this environment.

We are now concentrating on the recruitment of ambitious, technically curious individuals in a variety of disciplines, including mechanical, electrical, metallurgical and manufacturing engineering.

There are all kinds of corporate enterprise, but only one Dataproducts.

Our campus recruiter would like to discuss your future at the Cal State Poly College Placement Center October 17, 1979
