A reformed alcoholic now a grad student

BY JOHN KELLER

Student's 10-year nightmare is over

FROM AGE 20, WHEN he became an alcoholic, Bill said his life was one big blank until he reformed at age 30. "I look back and I had beautiful experiences," he said. But he said he did not have any personal growth. He called the period of his addiction "a big joke."

First of three parts on alcoholism

The earliest stages of Arblaster's alcoholic health problem took place after he quit school to work for the U.S. Postal Service. In 1967, Arblaster decided to turn a new leaf. He requested that the article be deleted from nine until twelve. "I had all the classical symptoms," Arblaster said. "I'm pretty community-minded now."

And now, two years after quitting alcoholism, Arblaster is living in Morro Bay hoping to open a shop to sell imported goods from Mexico and second-hand merchandise. "I had all the classical symptoms," Arblaster said. "I'm pretty community-minded now."

The graduate student is back in school again and wants eventually to teach and counsel on alcohol abuse based on his exposure to an increasing knowledge of alcoholism. He plans to work at the Health Center with the Alcohol Education Program, which is now months old.

Alcohol abuse is something Bill never learned about while growing up. He said he fell into alcoholism without knowing it because no one ever warned him of habits and symptoms and what they lead to.

"I had all the classical symptoms," Arblaster said. "I don't think I need to tell everyone to scare them. My story is nothing. If someone wants to get scared, tell them to go to an AA (Alcoholics Anonymous) meeting. They'll get the message."

"I had to realize that the shit the monkey was on the shelves was poison," Arblaster said.

Those are the feelings of Bill Arblaster, 32, a reformed alcoholic who is in the second year of what he called "starting life all over again." After suffering from alcoholism for 10 years, the lean, bearded, slow-talking man is enrolled in an English graduate program at Cal Poly.

I met Bill while researching information at the Cal Poly Health Center on alcohol abuse. At the time he wanted to write a letter to the editor in response to an editorial appearing Oct. 3 in the Mustang Daily advocating the selling of alcohol on campus. He intended to voice his disagreements through a letter, but wanted the chance to share his alcoholic experience in an article as well.

"People say once an alcoholic, always an alcoholic and that's the truth. But you don't have to drink," said Arblaster.

"That point is that I'm a reformed alcoholic. I never even met a reformed alcoholic and the whole point of this interview is my desire not to hide my experience in life. It is to share it and to confront the bias against reformed alcoholics," he requested that the article include his name.

"I'm proud that I'm a reformed alcoholic. Not saying who I was, is like not becoming sober," said Arblaster.

It took him 10 years to sober up. Arblaster said he first realized his dependence on alcohol eight years before knocking it out of his life. "I was drained," Arblaster said. "I realized I was capable of doing other things."
Opinion

Prostitution hunting

In an effort to crack down on prostitution, Mayor Edward Koch of New York has instituted a modern day witch hunt of sorts.

Last week the mayor ordered a New York City radio station to begin broadcasting the names of men caught patronizing prostitutes.

"We're going to call it the 'John Hour,'" Koch said in a quote from a United Press International article.

The mayor said he is bothered by what he views as unequal treatment by the courts between prostitutes and their clients, and he thinks public pressure can be applied to both partners in a "sex-for-sale" liaison.

"I believe that the best way to deter people from committing some crimes—not all crimes—is to bring on public pressure and attention," said the mayor.

Koch's bold move can be applauded in one sense—someone is finally taking steps to see that the man, as well as the woman is chastised when both are arrested for prostitution. For too long, laws dictated responsibility for the act entirely on the women who solicit their favors and not the men who receive them. This is a gross injustice.

On the other hand, it seems silly the mayor is even trying to stop prostitution in The Big Apple. Isn't there enough crime in New York—and for that matter in the rest of the country—to keep police busy, instead of utilizing their time trying to stop a so-called "victimless crime"?

Koch's move is a hilarious example of the time, money and effort wasted in trying to stop these crimes.

People of one sort or another have probably opposed the world's oldest profession since the day it was begun. In fact, one of Koch's statements confirms that idea.

"You know in the old days, the Pilgrims put people in the stocks," said the mayor. "People would pass by and say, 'look at that guy, he's in the stocks. He must have been with a prostitute.'"

That deterred people.

It might have deterred people, but it obviously did not stop them or we would not still have the problem. Koch broadcasts the names of men who were caught soliciting "tricks" as his modern version of the stocks—a way to publicly embarrass people for their behavior.

The Puritan ethics our country has been raised on can clearly be seen. Prostitution is a no-no.

If prostitution must continue to be looked upon as a crime, Mayor Koch is doing a service by judging equally the men and women who indulge in it.

But announcing men's names over the radio is not protecting anyone—possibly because there is nothing to be protected from.

Letters

Econ counterfeit

Editor:

The Mustang Daily editorial on Friday, "Economic Lifesaver", was a poignant example of the garter commercialism prevalent among the media and among establishment economists. Inflation is not caused by greedy businessmen. Neither is it caused by workers demanding higher wages. And, the Carter administration new-feeding, neither is OPEC the culprit.

An overall decrease in the supply of goods and services has almost never happened in recent years. Therefore, if consumers must pay more for things, it must be because the money they use is not as valuable as before. They must use more of it to buy the same item. The focus, then, must be: how to change the supply of money, or "economic life saver".

Contrary to your editorial, the Federal Reserve does not "bravely extend a helping hand... to boost the United States economy.

"The Federal Reserve and the government are desperately trying to keep the side of a runaway inflation that is the direct result of years of political flim-flam that has brought our economy to the brink of disaster. We must all strive to prevent this cloud of obscuration and scampering. The Federal Reserve is not the doctor. It is the disease!"

Petition refusal

Editor:

We urge you NOT to sign a petition which is being passed around by the real estate interests—calling themselves "Californians for Fair Reats." In contrast to the large print description of the initiative, which deceptively suggests that it is a rent control measure, the initiative itself is really an anti-rent control measure.

This initiative would amend the California Constitution to deprive California citizens of the right to vote on any meaningful rent control ordinance.

1. It prohibits ANY statewide rent control law.

2. Any local rent control law cannot be voted on over an over time there was a local election every two years for the City of San Luis Obispo.

3. If a short-term local law were passed, the initiative would guarantee that any time a tenant moved out, a landlord could raise the rent to ANY amount he/she desired.

4. It prohibits local representatives, such as the City Council or County Supervisors, from enacting any form of fair rent ordinance. It makes any fair rent action go to the people for voting at the expense of the taxpayers.

If you are interested in making housing more affordable, you may be interested in the formation of a Housing Action Group for the county of San Luis Obispo. A meeting to organize this Group will be held in the recreation building on Meadow Park or South Street in San Luis Obispo on Saturday, October 20, from 3 p.m. to 5 p.m. All are welcome.

Not just another Saturday night

Homecoming night '79 included excitement both on and off the field. The Cal Poly cheerleaders helped in the alma mater (top) after the Mustangs got sweet revenge (above) against the Bears. Meanwhile, host Ed Freitas and hostess Anna Newlander attend to homecoming duties at halftime (left), while the crowd cheers and alumni pose for a homecoming photograph (below).
Poly student killed

A Cal Poly student was killed Sunday morning when the car in which he was a passenger collided with another car. The driver was also killed.

A spokesman from the California Highway Patrol said Brian Johnson, 18, a mechanical engineering major from Costa Mesa, was pronounced dead at Sierra Vista Hospital after the resuscitative action by the Vista Hospital after he was declared dead at Sierra Vista Hospital. The driver also killed another car. The driver was also killed.

Joseph Hindman, 18, from Huntington Beach, was dead at the scene.

Deputy Richard Powell of the San Luis Obispo Sheriff’s Department reported that at 12:26 a.m. Oct 14 Hindman was traveling north in the southbound lane of Highway 91. His car collided with a southbound vehicle on the Moore Street overcrossing. The seven passengers and driver of the other car received minor to moderate injuries.

Some seniors expressed concern that the Health Center may become too crowded and that the wait for an appointment could be longer if faculty and staff were to use the facilities.

Brian Johnson, 18, a California Highway Patrol off-duty police officer, was killed. He was pronounced dead at the scene.

In other student senate action:

— ASI president Jeff Brown proposed a survey of faculty and staff use of the Health Center to accommodate rapidly increasing operation costs, the increase in health cards if the fee-for-service rates of all physicians’ salaries below the income (of the Health Center) was considered.

Several senators were opposed to the five to six dollar increase that would occur in health cards if the basic health service was also included.

In order for the Health Center to accommodate rapidly increasing operation costs, the fee-for-service rates of all services will probably be raised to more adequately reflect current prices.

“Costs have gone up more than the income of the Health Center,” Brown said.

Brown said a 25 percent salary increase was approved for the physicians in July. He said the increased salaries will still result in Health Center physicians’ salaries below the income of the Health Center.

Physicist: Third World needs nukes

Calling California the “greatest shining” in working the energy crisis, Teller said nuclear reactors are necessary for humanitarian reasons.

“We need all the energy we possibly can get,” he said.

Teller said the economic, environmental and humanitarian reasons accompanying a severe oil shortage—accelerated inflation rate and increased unemployment—would be off-set if the United States relied more on nuclear reactors.

Obstetrician ASI Vice President Jeff Land said a $430,000 cut in health services in the CSUC system largely contributed to the financial crunch the Health Center is feeling.

Kranz said the major objective of the survey is to “help us understand where they (the students) are coming from and what they would like to see.”

Industrialized countries including West Germany and Japan face greater energy problems than the United States, he said. But he said underdeveloped countries are the worst off. Those with budding economies have increased their per capita energy consumption threefold between 1950 and 1971 (the per capita energy consumption in the United States rose 70 percent in the same period).

Teller presented a survey on the energy problems late last year.

The survey was conducted to determine the objective of the survey is to find out how students feel on the issue of alcohol on campus, athletics and commencement.

Sen. Anne Perry, a Cal Poly student, and others expressed concern that the Health Center is suffering from a financial crunch and of students killed.

Brown said the Health Center has adequate space to accommodate the increased number of patients.

The possibility of the Health Center offering physical examinations at a basic health service was also considered.

The Health Center has adequate space to accommodate the increased number of patients.

Recently, faculty and staff members are offered emergency care and immunization services. If faculty and staff use of the Health Center is approved, they would pay on a fee-for-service basis.

Some faculty and staff members may be one way to alleviate the problem.

Currently, faculty and staff members are offered emergency care and immunization services. If they would pay on a fee-for-service basis.

University of California at Berkeley faculty and staff members are offered emergency care and immunization services. If they would pay on a fee-for-service basis.
SLO lacks radiation treatment

By Vicki Miller

In a forum held at Cuesta College last week, nuclear power was the only speaker Mitchell, San Luis Obispo Health Agency Director, said that San Luis Obispo is not prepared for a nuclear disaster. "What we have been hearing so far are future subjective. I would like to talk to you in the present tense," said Mitchell, the last of the speakers.

Presently, a small facility at French Hospital is prepared to care for patients exposed to excess radiation said Mitchell. The hospital facility can handle six people. The emergency services that the San Luis Obispo Health Agency is trying to develop are: a working evacuation plan for all people within the danger zone of Diablo Canyon, including special services for the disabled; preparation of drugs, food, shelter, sanitation, and waste disposal; a potassium iodide distribution plan (a drug used to prevent thyroid cancer); a long range plan to monitor the health of those exposed to excess radiation.

Communications during a nuclear disaster would be a problem, said Mitchell. The last time a nuclear disaster drill was held, the radio equipment was insufficient and participants had to resort to using a pay phone. A radio signal booster is needed, he said.

The greatest risk from operation of a nuclear power plant said Conyers Herring, is not the "spectacular accident," but the risks of cancer and future genetic problems. "The likelihood of a major release of radioactivity in the environment is one in 300," said Herring.

Mitchell said that San Luis Obispo is not prepared for any type of radiation problem. "I don't think a plan should start until we can deal with it," he said.

BY MARYANN GILPATRICK

Diable Canyon supporters gathered Saturday in Cuesta College auditorium to discuss political, economic and scientific issues related to nuclear power.

Speakers from as far away as New York stood at a podium beneath a banner boldly lettered "Nuclear Energy Education Day." A crowd of about 500 chased eight speakers in a panel sponsored by the pro-nuclear groups Alliance for Safe Available Future Energy and Nuclear Energy for Environmental Development.

John R. Stoestinger, a political scientist from the City University of New York, said nuclear power is essential for America's "life, liberty and pursuit of happiness." He said nuclear weapons have saved lives by preventing limited wars—Korea and Vietnam for example—from becoming world wars.

He said in order to pursue happiness, Americans must value the work ethic. According to Stoestinger, anti-nuclear people are "essentially the unproductive people," who will not be able to provide their children with the present standard of living and happiness.

Self-employed nuclear engineer Sandra J. Keifer, who came from Pittsburgh to speak, discussed the nuclear waste system at Diablo Canyon. She said she helped design numerous nuclear power plants.

Keifer said nuclear waste, or spent fuel, would be converted to a solid ceramic form and stored in pools of neutron-absorbing water at the power plant. She said it would be handeled under water, by remote control, to insure plant workers' safety. The spent fuel would remain stored at Diablo until a permanent underground disposal site in a geographically stable area could be developed.
The Sheriff is back Monday nights at nine bringing you one hour of uninterrupted music from your favorite artists.

COUNTDOWN The electric excitement of the golden era of rock music is highlighted Mondays at 7:30 PM when we mark off the top 30 songs from 1964-1974. Brian Hackney hosts.

DEBUT What was the very first song that formed the cornerstone of legendary artist's careers? Find out Wednesdays at 8:00 PM. Dave Stein reveals the answers.

Mustangs fight back in third quarter to beat UNC, 17-3

BY KELLYE WISE
Daily Sports Editor

On Saturday night, the Northern Colorado Bears almost upset Cal Poly again—almost, but the Mustangs pulled it out 17-3. Behind 3-0 late in the third quarter, the Mustangs appeared as though they might get upset. Last year an undefeated Cal Poly team traveled to Greeley-Colorado to play the Bears and was upset 15-10. On Saturday night it was a different story.

The Mustangs started moving the ball, and scored a touchdown with just over two minutes left in the third period. Paul Dickens scored on a nine yard sweep around left end.

After a high snap from center, Graham Wiggall missed the extra point. Wiggall had made 49 consecutive extra points going into the game.

Earlier in the third quarter, Northern Colorado's starting quarterback, Al Winslow was injured. With less than a minute left in the period, Winslow's replacement, Frank Boyce had a pass picked off by Ralph Gallagher. Gallagher, for the second game in a row, returned the pass for a touchdown. This time he went 33 yards for the score, went 33 yards for the score.

After the ensuing kickoff, Wiggall kicked a 44 yard field goal to end the game's scoring.

Cal Poly's offense moved the ball in the first half, once all the way down to the Bear 2 yard-line, aided on the drive by a fumbled punt. The Mustangs powerful defense held, and the Bears settled for a field goal.

Paul Dickens had another outstanding game for Cal Poly. He gained 143 yards on 33 carries. Tailback Jim Colvin returned to the lineup with 77 yards on 14 carries, an average of over five yards per carry.

In the first quarter, and then again late in the third quarter, Cal Poly unveiled a new offense. In a lineup similar to that of the Dallas Cowboys, the Mustangs ended up in the backfield, and the running backs had to shift, with the ends and backs covering places. The motion seemed to confuse the Bear's defense, as the Mustangs gained yardage every time they tried to off set.

On Saturday, October 20, the Mustangs travel to Northridge to play the Matadors in a 7:30 p.m. game.
Volliers begin turn-around

BY BRIAN MILLER

With round two of S.C.A.A. play coming up, Mike Wilton knows his women volleyballers are going to have to play tough to stay in the thick of it. After a slow start in which they lost their first two conference matches, the Mustang netters have bounced back to win their last two and have an even 2-2 conference mark.
The Mustangs swept Cal State Los Angeles Friday night 15-4, 15-11, 15-6. On Saturday afternoon they bucked the Broncos from Cal Poly Pomona 15-7, 15-2, 15-7, to round off a successful homecoming weekend.

All this is impressive, but there is a small catch. Both L.A. State and Pomona have fairly underdeveloped volleyball programs. Both are struggling in the S.C.A.A. caller.

Friday night in the Cal Poly Main Gym, the Mustangs play Irvine. "This Friday night is the biggest," noted Wilton. "Irvine is looking awesome. They beat Santa Barbara in the San Jose tournament earlier. They've also beaten Northridge, whom we lost to. They lost to Santa Barbara in five during the first round of conference, but then they edged San Diego State in five. San Diego State is ranked fourth nationally."

Against Cal State L.A. Friday night the Mustangs flexed their muscles from the opening point. Both Aileen Semann and Susan Forse hit over 40 percent efficiency on spikes. Wendy Lewis and Kathy Lynch were playing excellent defense and CSLA buried themselves in their own mistakes.

"I thought we played very well," said Wilton, "Everybody got to play tonight. I was pleased with the fact that there was a fairly high level of intensity. With a 2-2 conference record, and an 8-6 mark overall, the Mustangs need to keep right on winning. According to Wilton, Irvine, Santa Barbara, Northridge and Cal Poly are all capable of beating each other on any given night. For the Mustangs, they hope a given night is this Friday against Irvine. This is Cal Poly's next to last home match and will begin at 7:30 p.m.

Chess team wins in area tourney

The Cal Poly chess team virtually clinched their third straight league title by defeating Santa Maria 4-0 and Santa Ynez 216 to 1 Vi in the Central Coast Chess League Tournament.

In each match the Mustang's top two boards, Michael Wood and Robert Martin, racked up quick wins, but the lower boards were in doubt until the last move. Eric Nelson, in extreme time trouble managed to checkmate his opponent and Michael McHugh saved his match by holding onto a draw.

Cal Poly is first in league standings with a 4-0 record, while Morro Bay is second, Santa Maria third, and San Luis Obispo fourth.

Homemade Country Goodness

COMPLETE DINNER only $3.75

Homemade senate bean soup
Crisp green salad
Homemade stuffing, giblet gravy
Hot cornbread and honey...and yes, dessert too

BIG TURKEY DRUMSTICK
(each weighs at least a pound)
and dessert

HOMEMADE PUMPKIN PIE

Tickets are still available for the game between the Los Angeles Lakers and the Portland Trail Blazers of the National Basketball Association. They can be purchased at the University Union ticket office for $4. The regular price for tickets is $7. The game is Friday October 19 at 8 p.m. in the Forum in Inglewood. The Cal Poly Band is selling the tickets and will play at halftime.
MEET THREE PEOPLE WHO FOUND CAREERS WITH NSA.

ELECTRONIC ENGINEER

At a college student faced with finding a job and starting a career you are presented many options. NSA should be one of them. Your newly-acquired degree is your passport to NSA. The future will be linked to the nation's. At the National Security Agency your future will be linked to the nation's communications security or the production of foreign intelligence. NSA is challenge. NSA is opportunity. NSA is a career you are presented many options. NSA should be one of them. Your newly-acquired degree is your passport to NSA. The future will be linked to the nation's communications security or the production of foreign intelligence.

CAREERS

Electronic engineer

Job responsibilities include the design, development, and maintenance of electronic systems and equipment. These systems and equipment may be used in counterintelligence, communications exploitation, or research and development activities.

Mathematician

Job responsibilities include the application of mathematical techniques to solve problems in areas such as signal processing, data analysis, and computational science.

Computer scientist

Job responsibilities include the design and development of computer systems and software. These systems and software may be used in areas such as national security, intelligence analysis, or research and development.

Mark Welch

A graduate of Mississippi State University with a B.E.E., M.E.

Electronics engineer

A graduate of the University of Maryland with a B.S., M.A. Mathematics.

Computer scientist

A graduate of the University of Michigan with a B.S., M.A. Mathematics.

ELECTRONIC ENGINEER

Job responsibilities include the design, development, and maintenance of electronic systems and equipment. These systems and equipment may be used in counterintelligence, communications exploitation, or research and development activities.

Mark Welch

A graduate of Mississippi State University with a B.E.E., M.E.

Mathematician

Job responsibilities include the application of mathematical techniques to solve problems in areas such as signal processing, data analysis, and computational science.

John Smith

A graduate of the University of Maryland with a B.S., M.A. Mathematics.

Computer scientist

Job responsibilities include the design and development of computer systems and software. These systems and software may be used in areas such as national security, intelligence analysis, or research and development.

Ed Johnson

A graduate of the University of Michigan with a B.S., M.A. Mathematics.

Computer scientist

Job responsibilities include the design and development of computer systems and software. These systems and software may be used in areas such as national security, intelligence analysis, or research and development.

PUT YOURSELF IN THE PICTURE

At the National Security Agency your future will be linked to the nation's. Whether your interests are in electronic engineering, computer science, mathematical research or high priority translation, you will play a meaningful role in the protection of our nation's communications security or the production of foreign intelligence. NSA is a challenge. NSA is opportunity. (National Security Agency headquarters are located in a pleasant Maryland suburb, close to Washington, D.C., Baltimore and Annapolis, Maryland — just minutes away from countless of the nation's cultural, educational, recreational and educational opportunities. Find out more about career opportunities offered by NSA: schedule an interview with us through your College Placement Office. Or call us collect at 301-766-1616. Mr. Bernard Novell, College Recruitment Manager. will be happy to talk with you.

NSA National Security Agency

Horse Show

A horse show with competition in both intercollegiate and open class will be held Saturday, Oct. 20 at 9 a.m. in the Cal Poly Equestrian Center.

Dietetics

The Dietetics Club invites everyone interested to attend the first meeting on Thursday, Oct. 18 at 7 p.m. in Home Economics Room 135. Refreshments will be served after the meeting.

Alpha Rho Chi

The Alpha Rho Chi fraternity will discuss choosing a college name at a meeting on Wednesday, Oct. 17 at 7 p.m. in the Architecture and Environmental Design Building, Room 234. Those who wish to join the fraternity may come and sign a petition to do so.

Student service

Student Community Services invites all interested students to an orientation meeting to be held in Chumash Auditorium on Tuesday, Oct. 16 from 7 to 10 p.m.

Speakers Forum

The ASI Speakers Forum welcomes new members to its meeting today at 11 a.m. in the College Student Services Building, Room 218.

Classical concert

The first meeting of the month of the Phi Beta Sigma and the American Institute of Architects will feature a film and an explanation about the club and its activities. The meeting will be held tonight at 7:30 in the Architecture Building Gallery.

Women Engineers

Speakers will give information on finding summer jobs and will detail upcoming events of the Society of Women Engineers at a meeting tonight at 7 p.m. in Science Building Room A-12.

Fiesta picnic

Latino in Agriculture and ME/CEA are sponsoring a picnic for all Cal Poly students on Saturday, Oct. 20 in Santa Rosa Park. The picnic, which will be from noon until sunset, will include food, drinks and activities. The cost is $1.50 per person.

Bagpipe band

The Central Coast Highland Society Pipe Band is looking for bagpipers, drummers and Scottish-style dancers. Meetings of the band are held Tuesdays from 7 to 9:30 p.m. at 1750 Alto St., Santa Luis Obispo.

WORLD SOCIETY

The upcoming Pepe Romero concert will be discussed this Sunday, Oct. 17 at 7 p.m. in the Meeting of the Pre-Law Club. Students of agriculture and environmental design are invited to attend.

Hawaiian dance

The upcoming Pepe Romero concert will be held at a meeting tonight at 7 p.m. in the Agriculture Building. All students who are interested are invited to attend.

NSA National Security Agency

Star Trek bloopers

The Circle K Club is sponsoring two showings of the film "Star Trek Chumash Auditorium.

20 at 7 and 9 p.m. in Chumash Auditorium as part of the Second Annual Film Festival. Tickets will be on sale at the door for $2.

Drinks

Every Tues., starting at 7 p.m. Well drinks are 20¢ with a 10¢ increase every 15 minutes until 9 p.m.

It's Tipping Tuesday

Salvador rebels seize barracks

SAN SALVADOR, El Salvador (AP)—Army rebels claimed to have seized four military barracks in this Central American nation's capital and said their "right-wing Romero regime" claimed to have seized four Mustang Daily government overthrows Gen. Carlos Humberto Romerito under "central control."

A spokesman for the "right-wing Romero regime" said the government was in "an attempt to overthrow Gen. Carlos Humberto Romero's regime." Neither claim could be independently verified.

Some shooting was reported in late morning at the barracks in Chalatenango, 35 miles south of here, but reports from the same said there were no casualties.

A spokesman for the rebels, seizing ammunition, told the Associated Press the dissidents also seized barracks in San Miguel, 12 miles east of San Salvador, in San Salvador, eight miles west of here, and in San Carlos, near the capital.

The spokesman refused to describe the political leanings of the rebels, saying only that they intend to "seek a change in the forces and effect that are necessary in the country."

There were to have been differences within the military. Some officers feel the rebels should reestablish his regime, while others contend a tougher crackdown on the increasingly active leftist element within the country is needed.

Submarine explores Tahoe

TAHOE CITY (AP)—A tiny submarine silently glided into the Lake Tahoe Monday for test runs about an hour later.

The 17-foot-long submarine, dubbed Pioneer I, will explore a submarine and lake wall. It will use a mechanical arm to pick up test objects during a four-day, around-the-clock procedure with a cost of more than $30,000.

The sub entered the lake at 8:45 a.m. PDT and began its test runs about an hour later. After resting a large cliff, the sub will leave the lake at 8:45 a.m. PDT and begin its test runs about an hour later.

For your convenience we are
OPEN 24 HOURS A DAY.
Top talent always makes the right move, and so does TRW. Every facet of what we are doing is on the cutting edge of now and the future...tuned into the wavelengths of the farthestmost reaches beyond. If you feel your career is in "check" position, think hard...then make your move. Because, at TRW, we are looking for top engineering talent with that intuitive quality of mind who are capable of making the synaptical leap into the future. There is space for you among your peers and lots of head room. Think about it. The point of power is acting now! It's your move!

WE WILL BE INTERVIEWING ON CAMPUS...
OCTOBER 29-31

For the following disciplines:

ENGINEERING
- AERONAUTICAL
- CIVIL
- ELECTRICAL
- ELECTRONICS
- MECHANICAL
- MATHEMATICS
- PHYSICS

COMPUTER SCIENCES

BS, MS, PhD—

At TRW, we have one of the most advanced high technology facilities in the world. Our products, from the smallest micro circuit to the largest satellite, are designed by the top notch teams of professionals...with a growing need for bright young people like you who can contribute new ideas and concepts. We are diversified enough for you to build a sound career and grow professionally as your responsibilities and contributions increase.

Consider carefully your career goals, then consider a company called TRW.

REMEMBER...top professionals are known by the company they keep. Especially when the company is called TRW, an equal opportunity employer offering excellent salaries and an outstanding Flexible Benefits Plan.

If you would like TRW to know about you, come by and see us when we're on campus or send us your resume:
