Test your abilities in a wheelchair, and you'll find out how difficult it can be.

It was terrible," said Bob Bostrum, Director of Housing. "I went the wrong way to my office. I couldn't get over the curbs on the sidewalk. I couldn't fit into the bathrooms."

Anne Perry, a student senator, wheeled into the University Union exhausted.

"My hands hurt," she said.

Thursday was Disabled Student Awareness Day. The awareness day was put on by Disabled Student Services. One of their programs was to have students and administrators tackle the campus in wheelchairs.

The participants discovered normally-easy activities became difficult tasks—such as using a desk or eating lunch from a wheelchair.

At lunch, Perry said she had a burrito in one hand and a can of soda in the other. She explained that she couldn't move their way.

Housing Director Bostrum said there was a salad bar at lunch.

"But I couldn't see over the counter," he said.

In a wheelchair it becomes very apparent that the campus is built on hills.

"Going up hills was hard work, but going down hills was worse," said Dean of Students Russell Brown.

And the rain pouring down Thursday afternoon didn't help much. Richard Equiano, Acting Director of Placement, said there was no way he could stop the wheelchairs from going over the curbs.

Doors were another obstacle. Bostrum said: "You need doors like they have at supermarkets. Most of the time though, people opened the door for me."

Those in wheelchairs commented on how helpful and friendly the students were.

Asi Vice President Jeff Land looks determined as he wheels out of the University Union. Land was a participant in the Disabled Student Awareness Day.

Robert Bond, coordinator for Disabled Student Services said: "Robert Bond pointed out that most of the participants became aware of physical barriers."

"We need to educate people," said Bond. "That takes time and money—not only too easy."

"I am really happy about the involvement in Awareness Day. We have to do it again.

"It was a really education," emphasized Jeff Land.

"So many people are afraid when they see a blind person walking around. They are afraid to stop and ask him questions because they're afraid they might hurt his feelings—why in the heck, I don't know."

Change in job status declined

BY JEANNINE FRANUSICH

The Student Senate Wednesday night rejected increased job security for ASI executive employees.

A proposal aimed at giving the executives "permanent status" failed to gain senators' approval. The vote was to 18.

The proposal would not have affected ASI executives now holding office, including Martha Blood (University Union Building Manager), Steve Adams (Program Manager) and Roy Gersten (Business Director).

"Permanent status" would make it difficult for future ASI executives if they were doing a poor job.

ASI Business Director Roy Gersten said all non-executive ASI employees who have completed probationary periods have permanent status. Gersten said the discrepancy between non-executive job security and that of executive employees could create a morale problem.

Non-staff felt that everyone should have the same benefits," Gersten said.

Also during the meeting, Vice President Land told the senators about the California State Students Association meeting he attended in Turlock. LCPR.

"We need to have the same benefits," said Land.

Gersten said the discrepancy between non-executive job security and that of executive employees could create a morale problem.

Human Development and Education Senator Heather Lawrence said the proposal was rejected because senators felt it was too difficult to fire future ASI executives if they were doing a poor job.

ASI Business Director Roy Gersten said all non-executive ASI employees who have completed probationary periods have permanent status. Gersten said the discrepancy between non-executive job security and that of executive employees could create a morale problem.

Non-staff felt that everyone should have the same benefits," Gersten said.

Opinion

The playing board

Editor's note: There are many ways in which to view life. This article is one writer's commentary on what he sees.

The players are divided into two sets: the primary set, consisting of the primary player (winner); and the secondary set, consisting of every other player (losers), ranging in number from two to as many as will fit in the room.

The ultimate aim of the game is freedom— for the primary player, freedom to control; for the secondary players, freedom from control.

The amount of money distributed is arbitrary, but the primary player must start the game with one thousand times the combined total of the secondary players. The same conditions apply to property squares, factory diamonds, material goods cards, influence and political clout quotes, and other assets which can be added as the game progresses, provided all players agree on their validity.

The playing board is a conical pyramid. The secondary players move around in a continuous horizontal circle at the base of the pyramid; the primary player moves vertically upwards to the peak—his rate of ascent is determined by the extent of his ruthlessness of play and by the rate at which the secondary players forfeit their human dignity quota cards.

If a secondary player lands on one of the regularly-spaced red squares, he must pick a red card from the 'Death' pile. If the card is a 'retired' or 'death' card and another player takes over his role; if a 'revolution' card is picked, the primary player looses all his gains, which are evenly distributed among the secondary players; his pyramid is leveled and the game progresses as the secondary players decide. Complications frequently arise—this move should not be relied upon.

Warning: this game has been known to last for years.

The freedom of bikes

Bikes are nice, but when it is raining I'll disagree with anyone who thinks I should ride one. Last summer I rode upright on a newly purchased bike, oblivious to long gas lines and accompanying high prices. Now winter has shrunk my warm-weather upright onto a bike. Last summer I rode upright on a

Add-drop period

Editor:

After reading the opinion section of the Mustang Daily on Oct. 23, I could not help but think that the school administrators were trying to pull another fast one on the students. Director of Administrations, Gerald Holley, obviously has things out of proportion concerning his new proposal to shorten the drop period and lengthen the add period for class enrollment.

He stated that a longer add period would give students more flexibility in scheduling planning. This however is not the case. A two week add period would cost more confusion to both teachers and students. If a student has not finalized his course schedule by the end of the first week, he has lost all possibilities of doing well in a course he has not yet added.

It seems to me that if Holley was truly concerned with helping students in schedule planning, he would draw up a proposal to lengthen the drop period instead of shortening it. It's plainly apparent to me that he is more concerned with administrative simplicity than with helping students in schedule planning.

Sincerely,

Kevin J. Allen
**Assiative training offered**

The Counseling Center will offer new Assiative Training groups beginning the week of November 6. The groups will meet at the Counseling Center or call 546-2311 for further information.

Admission to Assiative Training is 50 cents. Beverages and snacks, such as coffee, tea, apple juice, cookies and punch, are offered throughout the program.

Most of the people who take the assiative training have little or no real experience playing in front of a live audience, according to Baer. Some use the stage as a testing ground for new material or to perform songs they have written. Others, including the Cache Valley Drifters, perform at Cal Poly so that they can get some audience feedback on their work.

"Cal Poly audiences are responsive and are critical listeners," Baer said.

Many times the program goes on longer than its scheduled time. This has been the case in the last two programs.

"(Coffeehouse) is a flexible thing," Baer said. "The program is structured in such a way as to be open to people and to be able to get some money into the program.

In future programs Coffeehouse will feature an evening of "open stage" in which people can perform in 5- to 10-minute segments. This gives performers an opportunity to work up, please drop by the Counseling Center or call 546-2311.

The counseling center is located on the second floor of the Administration Building, Room 211.

### Assertive Training

**At 8 p.m. the lights waned and the crowd quieted as the performer took centerstage.**

Some members of the audience focused their attention on the performer and listened to the music being played. Others engaged in quiet conversation.

The atmosphere was subdued and relaxed. The lighting was purposefully dimmed, with the majority of light provided by candles. Tables placed around the room were covered with patchwork tablecloths.

Yet it was not the surroundings but the musicians who were directly responsible for setting the mood of the evening. In two of the first programs the majority of performers played acoustic guitar, in soft rock, folk, and classical selections. Some played cello, mandolin, electric guitar or piano.

This was a typical evening at the Cal Poly coffeehouse, which features amateur and professional entertainers from San Luis Obispo. Every Thursday night the program highlights performers from musicians to bellhoppers to comedians.

"It's whole purpose is music," said Tim Baer, activities planning vice chairman of the ASI Special Events Committee. "The coffeehouse provides good entertainment at a minimal cost."

### History today

Today is Friday, Oct. 26, the 296th day of 1979. There are 66 days left in the year.

Today's highlight in history:

On this date in 1823, the Erie Canal opened, connecting Lake Erie to the Hudson River.

On this date:

In 1760, King George III of England was crowned.

In 1823, the Erie Canal opened, connecting Lake Erie to the Hudson River.

In 1927, Queen Elizabeth and Prince Philip attended the opening of the new Grand Opera House in New York City.

In 1949, the World Court in The Hague convicted a German general of war crimes against humanity.

In 1964, the Supreme Court struck down the University of California's policy of reserving one-fifth of its graduate admissions for minority students.

In 1968, President Lyndon B. Johnson signed the Civil Rights Act of 1968, which prohibited discrimination in the sale or rental of housing.

In 1973, President Richard Nixon ordered the Defense Department to fire over 1,000 black postal workers.

### The All American Drug

To many college students today, beer signifies a time to relax after finals, a time to gather in front of the tube to watch the Super Bowl, or maybe to tune in the next T.G.I. to get rolling. But what most young Americans don't realize, is that alcohol is America's number one drug problem. Whether with beer, wine, or hard liquor, it is a good occasion to become bad experience. Look at yourself. Do you sit down everyday to a beer or two for lunch, a few suds after school, and maybe a couple of "wet ones" in the evening? You may be obvious to the fact that you are dependent upon or abusing the number one drug in the country to keep you going. Most college students don't realize that depending upon beer is just like being hooked on acid, amphetamines, or any other kind of drug. Beer can also result in just as many interpersonal, social, academic, and financial problems as other drugs even if there is no addiction. If this story is familiar to one, maybe you'd better make the step to analyze your problem. Alcohol has become a serious problem in the Cal Poly community. For counseling or more information, contact the Health Center or call 546-2311.

### Abortion protests set in Spain

Feminists readied demonstrations across Spain as the state prepared to put 11 women on trial Friday on abortion-related charges in a case that has brought the nation's criminal code and Roman Catholic family life under attack.

Still smarting from police clubs and insults, the Assembly of Women in Spain's northern Basque region said it expected hundreds of feminists to demonstrate nationwide and outside the Justice Palace here to protest the trial and demand amnesty for the defendants.

Hordes of other women were coming by bus to Bilbao, where some of those defendants were being held, said Carmen Diez de Rivera, principal of the Basque region, feminists said.

MONDAY OCTOBER 29.
Pot is large crop in Tulare

WASHINGTON (AP) - Tulare County, the nation's second richest farm county, is seeing the large-scale appearance of a new cash crop this harvest season - marijuana.

In the past, Tulare County Sheriff's deputies have raided illegal marijuana plantations and seized close to $1.1 million in high-grade "Sinsemilla" marijuana. Two fields featured drip irrigation systems that drew water from dams across small streams. The third field was found in an olive grove.

"This is the first harvest season we've run into such large scale operations," Tulare County Sheriff's Sgt. Larry McLaughlin said in a telephone interview Thursday. "We think three operators have been in the area for at least a couple of seasons, but this is the first time we have informant reports as to who and where they are operating." In the two most recent busts, the farmers managed to elude authorities.

Deputies discovered two patches with a combined size of nearly a half-acre and worth $95,000 were confiscated in the Porterville area. The FDA does not consider findings below 5 parts per billion of the cancer-causing agent nitrosamines. It found only trace levels in 5 brands tested, in amounts ranging from none to 2.3 parts per billion.

The FDA also released new test results on a check of Scotch whiskies for nitrosamines. It found only trace levels in 29 brands tested, in amounts ranging from none to 2.3 parts per billion. The FDA does not consider findings below 5 parts per billion to be scientifically reliable.

Last month, the FDA released the results of tests on 30 brands of beer in which 28 had some level of nitrosamines. Most were below 5 parts per billion.

Governor Brown hit with pie

WASHINGTON (AP) - President Carter said Thursday he may pursue proposals to punish the oil industry if Congress fails to produce a satisfactory "windfall profits" tax.

Carter made the remarks at a White House breakfast meeting with the National Citizens' Coalition for the Windfall Profits Tax.

Carter's comments were echoed by New Jersey Gov. Brendan Byrne, who was accompanying the president on an afternoon trip to New Jersey for an energy forum and a Democratic Party fund-raiser.

In the president's first public comments on third quarter profits announced by the major oil companies, Carter said the figures "vividly demonstrate the need for a major portion of unearned profits from the oil companies to go into the general service of the American people."

Mustangs to face top passer in Division I-AA Saturday

Sports

BY KELLYE WISE

Vikings: The Vikings 13-2 are led by junior quarterback Neil Lomax. Lomax, the top passer in the NCAA Division I-AA the past two years, including the current season, has already passed for over 2,000 yards and 15 touchdowns in six games. Last week against Northern Colorado, Lomax threw the ball 77 times, completing 44 for 499 yards. All three figures set new NCAA Division I-AA single game records. However, Lomax also threw three interceptions, and his team lost 21-20.

This week Lomax will have to contend with a defense that has picked off 19 opponents’ passes in six games. The Mustang defense is nine short of the school record with four games left in the regular season. "Lomax will present a big challenge to our passing defense," Coach Joe Harper said, "not only in the secondary. Pressure by the defensive line is an important factor as well."

Leading Cal Poly’s defense in interceptions are junior LeCharles McDaniel and Chris Jones. Each player has five thefts, with McDaniel returning one interception for a touch down. Cornerback Ralph Gallagher has three interceptions, two returned for touchdowns. His third interception was also returned for a score, but was called back on a clipping penalty.

Although hampered by injuries, the Mustangs have won five straight games since opening the season with a loss to University of the Pacific. Tailback Louis Jackson has missed three games since injuring an ankle against UC Davis. Fullback Paul Dickens was moved to tailback when Jackson was injured, and he has run for 375 yards in the last three games. Twice, against Northern Colorado and Fresno State, Dickens gained over 100 yards in a game. Running back Mike Jackson has backed up Dickens at tailback, and he has gained 262 yards in five games. Last week Colvin also returned a kickoff 94 yards for a touchdown. Both Dickens and Colvin are averaging over four yards a carry. Jackson, who was hurt, had gained 319 yards, averaging well over five yards a carry, and had scored four touchdowns.

Cal Poly’s leading receiver, Robbie Martin, may return to action on Saturday. Martin has 20 catches for 392 yards, and missed last week’s game due to mononucleosis. If Martin does return, quarterback Reid Lunday will have both of his starting receivers back. Dwight Clamp, the Mustangs’ split end, returned to action last week after missing one game So far this season, Lunday has hit on 46 passes out of 82 attempts. He has only thrown seven touchdowns, but he has also only thrown four interceptions.

The Mustangs have never lost to Portland State, and they won last year 36-20.

Correction

Also, in the article about women’s cross country which appeared yesterday, it was stated that the women go to the National Qualifying Meet this Saturday. That was incorrect. They go out week from Saturday.

Surf and Surfer Matt George, Bob Bennett and Dave Parmenter are members of the Central Coast Surfboards team, not Surf’n’Wear’s as stated in Wednesday’s paper.

Our product line range from electronics components to transducer instruments to computer peripherals and medical equipment.

Each part of our business offers a new world of technological challenge, greatly enhancing your expertise. As our global marketplace demand continues to climb, more opportunities make themselves available for your growth within the company.

Because we’re more than an engineer, our Riverside lifestyle will also be of importance to you. We are centrally located, only minutes drive from mountains, beaches, desert resorts and Los Angeles. While many activities are within a short distance, Riverside supports its own cultural and sporting events. And our housing costs are more reasonable than you might think ... considerably below other Southern California areas.

Consider Bourns in your career search. We’re at the Career Placement Center on

November 2
Harrisers run in regionals

The Mustang cross country team will defend its Division II West Regional Title Saturday at UC Riverside.

Cal Poly won last year's West Regional Title, scoring 25 points to Sacramento State's distant 73. Four of the men who ran for the Mustangs last year will return to run for the title.

The top four teams qualify for the NCAA Division II national championships. The Championships will also be held at UC Riverside, on November 10.

Jim Schankel will be favored to repeat his NCAA Division II West Regional win of 1978. Cal Poly teammates Danny Aldridge (seventh in regionals in 1978), Manny Bautista (eighth), and Eric Huff (ninth) also return.

Rounding out the top seven for the Mustangs are junior Terry Gibson, junior Ivan Huff and freshman Paul Medvin. Gibson and Huff have been bothered by bad chest colds this season.

Should any of the top seven for Cal Poly not be able to run Saturday, Doug Arvill will be the substitute. The Mustangs only lose this season was to the University of Texas at El Paso, by a score of, 23-33.

Eric Huff have been bothered by bad chest colds this season.

With a 27-1 dual meet record this season, Cal Poly's Coach, Steve Miller sees Sacramento State as the one team that might give the Mustangs some trouble.

Cal State Northridge, UC Riverside, Cal Poly Pomona and Southern Oregon will probably battle it out for third place, Miller said.

Bootsers win one

BY BO* BERGER
Daily Poly Writer

After a devastating three game road trip the Cal Poly soccer team came home to beat CSU Dominguez Hills 2-1.

While on the road the Mustangs took on defending league champs Chapman College, second place Cal State Los Angeles, and Dominguez Hills. The Mustangs failed to win any of their away games.

Three games in five days is a rigorous schedule, said booster Jon Backer.

"I know I was exhausted," he said, "we played Cal State L.A. Saturday night and Dominguez Hills last Sunday."

Becker scored one of the two goals that beat Dominguez Hills last Wednesday night.

This Saturday the Mustangs will be playing their last home game of the season. They will meet Cal State Monterey Bay at 7:00 p.m. in Mustang Stadium.

Healthy Living Chiropractic Center

Natural Health Care by Dr. Runeh Schechter D.C.

"...all it takes is a little confidence."
COORS asks the question:

What if Napoleon had been 6'2"? Imagine how the course of history might have changed if that extra height had meant extra ability, more power to be victorious!

The capital of the U.S. might be New Orleans. You might be flunking English instead of French. Eating frog's legs at a Burger Rei. And growing up to learn about English perfume, English postcards and English kisses.

Had Napoleon been a foot taller, his chest would have been 1/2 inches higher. Then his most famous pose might have underscored the mark and gone down in history as an obscene gesture.

Even if he had still lost at Waterloo, Wellington might have figured that Elba was too small for Napoleon, put him on Sicily and then, instead of the kiss of death, the Mafia might have been handing out French kisses.

What's that got to do with Coors Beer? Not much. But think about this—what if Coors Beer weren't brewed up in the high country? Then it wouldn't be the only beer brewed with pure Rocky Mountain spring water and special high country barley. It would be city beer like all the others.

But luckily for beer lovers, it's not. It's Coors. And you can taste the High Country. Vive le Coors!

Taste the High Country.

1979 ADOLPH COORS COMPANY, GOLDEN, COLO.
