Hiring to see Canyon around for 85 years

BY SEANNA BROWDER

A mile is north of See Canyon Road there are several apple farms. One of them is special. See Canyon Fruit Ranch has been producing great apples under one family for sixty-eight years. His daughter and son-in-law are still bearing good fruit. DuVaul has worked for the ranch for a quarter of a century, but he insists he is not an apple specialist. "Hell, I'm no apple man," said DuVaul.

His perennial blue eyes contrasted with the slow, easy manner in which he spoke. "I'm no apple man," repeated DuVaul. "I'm just an old man. I'm sixty-eight. Born here in San Luis Obispo Country in the red house at the end of Madonna Road. "I've been in agricultural things all my life. We came to See Canyon about twenty-five years ago and after my wife's father passed on.

DuVaul has "retired" and today lives in San Luis Obispo. But he continues to come out to the farm almost everyday. "It's a family operation," explained DuVaul. "Everyone pitches in.

See Canyon Fruit Ranch is set off the road by a dirt road leads to the apple shed. Inside the dark apple shed are boxes of apples. Every year more and more people come to buy the apples, according to the present owner, Tom DuVaul. "See Canyon's reputation has spread by word of mouth and quality," he said.

DuVaul said, "I probably know more than I do about the apples produced by other farmers." Schluman explained that there is no irrigation or fertilization of the trees in order to keep them at a good size for picking.
Proposition 1

Of the four state propositions to be placed before voters on Nov. 6, Proposition 1 is perhaps the most controversial. The proposition deals with the issue of busing and school desegregation. Specifically, the proposition would require California courts to go by the United States Constitution and federal court rulings in determining cases of pupil assignment to schools, or desegregation. The reasoning behind the proposition is that the U.S. Constitution requires desegregation in fewer cases than does the California State Constitution. The federal standard has been interpreted to require desegregation, by busing or other means, only when segregation in a district results from deliberate and discriminatory government action. On the other hand, California’s Constitution is interpreted to require desegregation no matter what the cause of segregation.

It seems Proposition 1 would release at least some school districts in California from court orders to buss students. Where deliberate segregation cannot be proved, the proposition leaves it up to the individual school districts.

The proposition should be passed in order to limit the power of California courts to order busing. Dr. Allen Settle, associate professor of political science at Cal Poly, said busing has not alleviated segregation in some areas, but instead has actually worsened it. Settle said "white flight" has occurred in some districts as a result of required busing. When whites leave districts to avoid busing, they leave schools and neighborhoods more segregated than before busing began. Thus, in the interest of reducing segregation Proposition 1 should be approved by voters.

An additional reason to cut back on required busing is the rising cost of fuel, buses and drivers. If the proposition is passed, likely negated. In year and in the last ten years, the effect of Proposition 1 might be reducing districts as a result of required busing. When whites leave districts alleviated segregation in some areas, but instead has actually California courts to order busing. Dr. Allen Settle, associate constitutional challenge, it is worthwhile to pass nation, has caused deep divisions in American society. Despite a which desegregation may be required. As a result, Settle said, a possibly more districts will be free to determine how to best spend up to the individual school districts. The proposition should be passed in order to limit the power of California courts to order busing. Dr. Allen Settle, associate professor of political science at Cal Poly, said busing has not alleviated segregation in some areas, but instead has actually worsened it. Settle said "white flight" has occurred in some districts as a result of required busing. When whites leave districts to avoid busing, they leave schools and neighborhoods more segregated than before busing began. Thus, in the interest of reducing segregation Proposition 1 should be approved by voters. An additional reason to cut back on required busing is the rising cost of fuel, buses and drivers. If the proposition is passed, possibly more districts will be free to determine how to best spend their money which is limited under present inflation and govern ment fund squeeze and inflation.

Dr. Settle said in view of U.S. Supreme Court rulings made this year and in the last ten years, the effect of Proposition 1 might be largely negated. In Columbus Board of Education v. Penick (1979) the Court in effect broadened the circumstances under which desegregation may be required. As a result, Settle said, a federal standard applied under Proposition 1 might now require segregation in about as many cases as under California Constitutional law.

But it is apparent that busing is not effective in solving problems of segregation and equal educational opportunity. And busing, an issue receiving intense focus in California and in the nation, has caused deep divisions in American society. Despite a probable constitutional challenge, it is worthwhile to pass Proposition 1. The stakes are too high not to do so.

If you’re like most other people, you’ve found that it’s hard figuring out what to say when you write to your parents. Well, never fear! With this all-Purpose Letter From College. Just Clip it out, circle one or more of the choices offered for each sentence, and send it off. What could be easier.

Rockin’ with ‘Rocky Horror’ on Halloween

By Loren Schneiderman
(Daily Bruin Writer)

Halloween is usually a holiday when the young at heart mask themselves behind their creative costumes to trick-or-treat around the neighborhood—but this year some decided to visit Chumash Auditorium. Workers at Chumash were not handing out the usual candy on the block and they were not having a masquerade ball, although it might have seemed that way. Instead, they entertained costume clad guests with the showing of The Rocky Horror Picture Show.

When the sun finally set and the Halloween moon was in full bloom, crowds of all kinds came out of the closet to fill the lobby of the University Union. Luckily workers knew what to expect—otherwise they might have needed to visit the Health Center for premature heart attacks.

Tickets for the movie sold out quickly, leaving many trick-or-treaters with no place to roam. It was a monster of a chore to keep the restless left-out crowd off the lawn. For this reason, lines for the movie were weaved and stretched through and around the ASI offices and even blocked bathroom doors. For this reason, many movie goers stayed on campus to watch the costume parade.

Lines for the movie showed the festive spirit of those without tickets. Many movie goers remained in costume, despite the cold, but many movie goers stayed on campus to watch the costume parade.

The over-riding theme of the evening could be the "Don't dream it, be it." Halloween is usually a holiday when the young at heart mask themselves behind their creative costumes to trick-or-treat around the neighborhood—but this year some decided to visit Chumash Auditorium. Workers at Chumash were not handing out the usual candy on the block and they were not having a masquerade ball, although it might have seemed that way. Instead, they entertained costume clad guests with the showing of The Rocky Horror Picture Show.

Poly student killed in DC-10 crash in Mexico

By Piper Parry

Call Poly student Robert Kies was one of three San Diego area residents killed in the crash of a jetliner early Tuesday morning near Mexico City.

Kies, 24, was traveling with two friends to Mexico City for a two-week backpacking trip:

The crash killed 72 of the 89 on the plane and three persons on the ground.

Kies was travelling with his wife, Jan Kies, and Jeff King, both from the San Diego area. They are also presumed dead.

Kies had planned to announce his engagement when he returned from Mexico.

CARER OPPORTUNITY IN ELECTRONICS

If you are graduating with a degree in Electrical Engineering, WILTRON may have just the career opportunity you are looking for.

We manufacture state-of-the-art microprocessor-based electronic test instrumentation for the microwave and telecommunications industries. Our proprietary products have an international reputation for excellence that has helped provide a history of steady growth.

You will enjoy challenging work in a modern facility with an outstanding benefit package that includes Cash Profit Sharing and Flexible Work Hours.

A WILTRON technical representative will be on campus Friday, November 9, to conduct pre-employment interviews. Contact your Placement Office today to arrange a convenient time.

to fight LNG terminal

who did a solo rendition of the classic "Turn, Turn, Turn."

Browne then returned with Joe Walsh and Don Henley of the Eagles to perform his 1979 success "The Pretender." Crosby, Stills and Nash followed to do a well-received set including "Our House," "Judy Blue Eyes," "Blackbird" and "Teach Your Children."

Browne and Walsh encored with a spirited "Runnin' On Empty," and left the audience cheering as the house lights came up.

"The music is really secondary to the value of what took place here tonight between these people," said Jackson Browne eyeing me intently.

Backstage, crowded into a small room after the show are Stills, Nash, Brown, Walsh and McGuinn. Stills, Nash and Browne easily answer my questions as I'm the only one asking any.

"This is to bring us together and show that we are at the front lines of the struggle," Browne adds finishing the answer to my question on whether people attend these shows for the music or the message.

I ask Browne what provisions or plans have been made in case the LNG terminal is given the go-ahead.

"Just because a judge of the United States legalizes this LNG terminal it doesn't change what we believe in or what we believe is right," he says, revealing a little emotion.

Graham Nash was more emphatic.

"The real power is going to come from people laying their bodies down," he says looking around. "I'm totally against violence and I don't condone 'civil' disobedience, but I can understand it. We've got to go over the wall."

Stills looks exhausted as I approach him, but he easily answers my questions in either drawn-out phrases or short "that's-all-she-wrote" responses.

Will Neil Young ever appear with Crosby, Stills and Nash at one of these benefits?

"No," he says frowning.

I ask Stills about the Stop Diablo Canyon movement in San Luis Obispo and whether he believes the musicians movement is having any impact on the licensing procedure.

"I refuse to take the defeatist attitude that we can't do it," he says. "We may have to deal with storing waste that remains toxic for enormous periods of time."

Will Crosby, Stills and Nash appear together again in the future?

"Who knows," he says looking up at Nash who just looks away. "It happens week to week."

Stills added that he is currently working on a solo album to be released within the upcoming year.

Browne, Stills, Nash and Crosby are all members of the Musicians for Safe Energy (MUSE), an organization of anti-nuclear organizers and musicians. The organization puts on benefit concerts for the anti-nuclear movement and on Saturday night, it looked like they were also moving into opposing Liquid Natural Gas.

Nash and Browne are the apparent backbone of the organization and that night in Santa Barbara they also appeared to be the behind the scenes organizers.

MUSE recently put on a series of rock shows in Madison Square Garden in New York that earned the anti-nuclear movement some $300,000. With both shows sold-out days in advance, Saturday night's show could also be called a financial success for the Native American Community.

Rock and politics seem destined to cross more frequently in the future. Even Stills had a Joe Walsh for President button pinned on his lapel.
Aerospace industry is booming

LOS ANGELES (AP) — It used to be you could tell an aerospace engineer by the pink slip stuffed in his shirt pocket along with six pens. But now they're so scarce that defense firms are paying bounties to steal them from each other.

A simultaneous jump in defense and airliner business has Texas Instruments running ads here on the virtues of Dallas, Northrop offering $1,000 in cash for new workers and Boeing hiring overseas for the first time in a decade.

The Commerce Department's Bureau of Economic Analysis predicts that aerospace companies will sell $47 billion worth of missiles, planes and other defense equipment this year, a 20 percent jump over 1978. In addition, several companies are beginning new commercial airliner programs and the result is an unprecedented demand for engineers and other skilled workers.

"When we're in sync with Douglas, Rockwell and Hughes, that's when the problems," says Lockheed-California Co. spokesman Dave Crowther. "It's timed so that when we're hiring, Hughes is laying off, that's beautiful. But if the needs are the same across the board, there's just not enough people to meet the demand."

Halloween causes dog death

SALINAS, Calif. (AP) — A 6-year-old German shepherd that went missing Tuesday night and was found by city workers Wednesday morning has been identified as Topo, the dog that was taken by a group of youths in protest of the takeover of a school by the Bolivian military.

Topo had been taken by a group of youths who were protesting the coup led by Col. Hugo Banzer, the military commander of the Bolivian national guard.

"We lived sort of primitive times," said Mrs. DuVaul. "I'm not an apple farmer and this land is not real valuable."
Puget Sound players face suspension
Mustangs still unsure about who they will be tackling

BY KELLYE WISE
Daily Sports Writer

Cal Poly’s football team will travel to Tacoma, Washington to play the Puget Sound Loggers this weekend, but there is still a question over which team they will face.

The Mustangs, who rose to fifth in the week’s NCAA Division II national rankings, will play a Puget Sound team that had 26 players suspended last week. Just prior to their game with Humboldt State, the Loggers players were suspended for disciplinary reasons. Earlier this week, Puget Sound head coach Ron Simmons said he hadn’t yet decided whether or not to allow the players to see action against Cal Poly.

Because of the suspensions, Puget Sound started 13 underclassmen, and only four seniors against Humboldt State. However, it took a Humboldt State recovery of a fumble in the Longshore end zone with 10 seconds left to defeat the Logger team. These same 13 underclassmen will start this week if the suspensions aren’t lifted. This includes fourth string freshman quarterback Wade Stephens, who threw three interceptions last week against Humboldt State.

Coach Joe Harper is looking for the probable return of tailback Louis Jackson this week. Jackson, last year’s number five rusher in Division II, has missed four games due to a hurt ankle. He is slated to make the trip to Tacoma, and should see action. Paul Dickens, who shifted to tailback when Jackson was hurt, will probably keep his starting position in the Mustang backfield. Dickens has gained 433 yards since switching to tailback, and averaged over five yards a carry. Last week, Dickens gained 264 yards. The effort was three yards shy of the school record. He tied a school record by scoring four touchdowns in the triumph over Portland State.

Quarterback Reid Lundstrom, who is ranked as the number five quarterback in passing efficiency in Division II will have both of his favorite receivers back. Kobe Martin, who missed a game with mononucleosis, returned to action last week, and caught seven passes for 81 yards as the Mustangs had 17.5 yards per catch, and has been Lundstrom’s top receiver. Split end Dwight Cross is averaging almost 20 yards per catch, and leads Mustang receivers with three touchdowns.

Harriers run a 2 mile race
BY GREGOR ROBIN
Daily Sports Editor

Fans will have one last chance to see the Cal Poly cross country team run in San Luis Obispo today before they depart for the National Meet on Nov. 10. The team will run in the Second Annual State Mill Invitational Two Mile Time Trial on the upper track at 3 p.m.

Although many members of the team have not run competitive two mile races, two members have gone under nine minutes for the distance. Jim Schankel has run an 8:33 two mile and Coach Miller thinks he is ready for a good time today.

"On Wednesday Schankel ran a workout of four repeats of a mile," Miller said. "He ran a 4:33, then a 4:31, a 4:23 and a 4:10 to finish strong. He is running well now."

Danny Aldrich has run an 8:52 two mile and will be running the distance which is twice the length of his specialty race today, also.

Paul Medvin’s best is a 9:03, while Terry Gibson has run 9:10 and Eric Hugg has a 9:13 to Iris credit.

Miller thinks he is ready for a run 9:10 and Eric Hugg has a run twice the length of his best mile race. He is running well now.

Call M i...
BY BOB BERGER

A blond streak flashes in front of the net. The point of impact is a beardy head and a soccer ball. When the dust settles both coach and player are in shock. "Wolfgang knows the game," said Strphl. "He's only been playing soccer for six years," said coach Gartner. "But he's got a good sense for playing the ball and passing." "When I'm up front I look for help," said Strphl. "I'm very aware of being alone when I'm up front and I usually look for help." The 21-year-old Environmental Engineer is in his fourth year at Poly and is expecting to graduate this year. Arizona is ranked fifth in the nation. They will face Cal Poly which does not make the top ten in the recent poll, but UC Berkeley women did, ranking sixth and UCLA did not. Cal Poly will be led by Maggie Keyes, who was under-oft in the four cross country events she competed in last season. She set course records in each.

In the region championship the Mustangs will also be fighting for a spot in the AIAW national meet. The top three teams in the AIAW-qualifying meet, which will be held in conjunction with the region eight meet at Tallahassee, Florida, will go to Tallahassee, Florida to compete in the nationals. A fourth team from the region will also get to go by a selection process.

Coach Lance Harter hopes the Mustangs fit into one of the four spots. If the Mustangs finish fourth in the qualifying meet, Harter will petition for the fourth spot.

Maggie Keyes will meet the women world record holder in the half-marathon (1:13.1 miles) when she runs at Rockland, Kansas. Kathy Mintie, a UCLA freshman recently set the record and is also unbeat¬ed this season in cross country.

Harter said the rest of the women must "dwell upon the positive qualities of their teammates in the past" to have a chance at being national finalists.

The other women on the team that Harter hopes will score highly for the Mustangs will be Cathy Perkins, Ellen Kramel, Sheila O'Donell, Janiece Kelly, Kady Wannamaker, Kris Kucera and Evelyn Stewart.

Among the many changes he has seen, the style of play seems to be the biggest, said Strphl. "When you change your style of play it just doesn't seem to be the same. We're playing as a team, not individually." Indeed it will. Cal State L.A. needs a win to be able to move into N.C.A.A. Division II play-offs. The Mustangs will be looking for a win to clinch third place in a tough league.

"I've never seen the caliber of play as good as it was this year," said Strphl. "Everybody was good. The top teams have been spending money to recruit players." Poly doesn't recruit any of its players. Like Strphl, most get by on their love for the game.

The skill in soccer leagues has improved exponentially with the popularity of the game. The crowds attending Mustang soccer games this year have been the biggest yet. Many of the players believe this is why they have only lost one game at home this season.

"The crowds have been great," said Strphl. "It helps get the team psyched."

"The stands are filled with the younger kids who are just getting into soccer, but we'd really like to see more Poly people out there."

Strphl won't be graduating this year. Since he has used his four years of eligibility, Strohl will be sitting in the stands next season.

"I'd like to try coaching. I won't be away from the sport for another."

The Mustangs last home game will be tonight in Mustang Stadium at 7 p.m.
