The Cal Poly Foundation is seeking to be exempt from paying unemployment insurance tax on the wages of student part-time employees, according to Robert Griffin, assistant to the Foundation executive director.

The Foundation, Griffin said, has taken the position that an exemption allowed to Cal Poly university from paying unemployment tax on the wages of student employees should apply also to the Foundation. Student part-time employees of the university and of the Foundation perform similar jobs, he said. In many cases, students are employed by both.

James Dunuw, attorney for the Foundation, said, "What the law says is that the exemption is for students employed by the university. We're saying that working for the Foundation is the same as working for the university."

Unemployment insurance tax is paid by all employers as a percentage of their employees' wages. No money is taken from employee paychecks for the tax. The tax payments go into a fund from which unemployment insurance benefits are paid.

Jim Neal, Foundation controller, said the tax rate on student wages is 4.2 percent. He said that means the total taxes paid for unemployment insurance just on student wages is about $40,000 per year. The tax is capped at $150,000 in back unemployment taxes. The Foundation paid the tax last year.

Currently, the Foundation did not pay tax on student wages, said Griffin. The Foundation paid the tax on student wages while appealing the action of the law judge has already denied the request of the Foundation to get unemployment insurance benefits for ex-employees of the foundation for whom unemployment insurance benefits are now available.

Robert Griffin, assistant to the Foundation, said, "What the university wants to do is to expand coverage, not increase exemption," he said.

Baker forum

University President Warren Baker will hold an open forum this Wednesday night to answer questions from students and the Cal Poly community.

The forum, to be held in Room 220 of the University Union at 7 p.m., is open to all Cal Poly students and faculty. Questions can be submitted in writing at the opening of the forum.

This is the first forum open to all Cal Poly students that Baker has held since taking office last August.

Energy conservation difficult at Poly

BY GLEN COLEMAN
Daily Staff Writer

Inefficient buildings and outdated equipment on campus are making the job of energy conservation difficult and expensive, according to members of the University's Energy Conservation Committee.

The committee recently was formed to find ways that Cal Poly's energy consumption can be cut by 40 percent, as mandated by the Trustees of the California State University and Colleges.

The Trustees' goal is to reduce energy consumption on campus 40 percent by 1983-84 using 1973-4 as the base year.

University Union Operations Manager Martha Blood is a member of the committee and is concerned with the amount of electricity and heat that the University Union complex uses each year.

Last year, according to Blood, the University Union used over $130,000 worth of electricity and heat. This figure could be substantially reduced, Blood explained, by making some modifications to the building's heating and lighting systems.

"This building was designed in the mid-60's when energy was not an issue that concerned architects," Blood said. "We had effective heating and cooling when the systems are working correctly, and the lighting is very good throughout the complex, but all are very expensive to operate," she explained.

Blood indicated lighting costs could be improved by modifying the neon fixtures so that they provide direct illumination. Most of the lighting in the Union complex is reflected, with the fixtures shining toward the ceiling.

See Lights, page 3
The Cal Poly Foundation provides many vital services which aid the educational efforts of the university. Besides the supplying food, books, school materials and funding for student projects, the non-profit organization helps many students pay for their education by employing them part-time.

The Foundation's financial ability to employ students part-time may be jeopardized by the imposition of unemployment insurance tax on the student payroll. Until about one year ago, the Foundation did not pay unemployment insurance tax on the wages of student part-time employees because it was thought to be exempt under the Unemployment Insurance Code. However, an audit by the state Employment Development Department resulted in a $153,590 assessment against the Foundation for back taxes.

In addition, the Foundation is now required to pay tax on the wages of student employees. Jim Neal, Foundation controller, said the tax rate is 4.2 percent of the student payroll. That comes to about $40,000 per year which goes into an unemployment insurance benefits fund, to be paid out on valid claims by ex-employees.

Potential unemployment benefits for Foundations student employees are of dubious value. Students who apply for benefits after having worked for the Foundation are by no means guaranteed them. Not everyone who is eligible to receive benefits does file a claim.

Unemployment benefits are exempt by law from paying unemployment tax on student wages. Howard Grisham, claims supervisor with the Employment Development Department, said the exemption is meant to encourage universities to hire students for part-time work.

If the Foundation were allowed to keep $40,000 annually rather than pay it into a state vault the money could be directed at least partly into student wages.

The Foundation has done some work to obtain changes in unemployment insurance laws, hoping to get a similar exemption as is given to universities.

It is an uphill fight. Robert Griffin, assistant to the Foundation executive director, pointed out that the trend in the United States is to expand the coverage of unemployment insurance rather than to give more exemptions for employers.

The purpose of unemployment insurance is to protect workers in the case of losing a job. But for college students paying the bills now is more important than having protection against some future loss of employment. In view of the best interests of students here and at other colleges, the law should be amended or interpreted to exempt the Cal Poly Foundation and similar university auxiliary organizations from paying unemployment insurance tax on student wages.

Gymnasium registration is history.

Before coming to Cal Poly I attended a junior college in Orange County where computer registration was a normal occurrence every semester.

Orange County College had twice the number of students that Cal Poly has—30,000—so with many of the registration hassles we've had to put up with here. As GCC, registration was problem-free. Students selected classes that rarely closed and a computer print-out confirmed times and schedules.

I hope CAR works as well as other computer registration systems, but sometimes I wonder.

Will the Cal Poly bureaucratic machine become bogged down during its first operation in spring quarter?

We've seen some Cal Poly systems malfunction before—will it be able to handle the radical changes CAR will bring?

As an example, I picked up my report card for some more good news.

Another Computer?

The news was surprising.

Along with the normal grades for classes that I have taken, I received a report card for a course I had never even attended, signed up for, or had even a remote possibility of taking.

Cycling 110—a one-unit, F.E. course on the comprehension report card with a CR on my grade.

Author Karyn Houston is a junior journalism major and a Mustang Daily staff writer.

But it's OK. I can always use an extra unit, even if it is in F.E.

However, it raises the question: Will Cal Poly be able to handle another computer? Will Cal Poly be able to handle CAR? Will CAR be too much of a shock for the system?

I wonder what it will be like when the computer gets here.

"That grade just isn't fair!"

A student with this complaint who fails to persuade either the professor who gave the grade or the department head that an injustice was done can take a third step: appeal to the Fairness Board.

"This is something they can turn to and get some satisfaction from," said Mary Harris, a political science major and one member from the Counseling Center. It bears appeals on grades and other student grievances of an academic nature.

"I hope that students are aware that they actually can be heard on campus if they have a problem, and it's confidential," said Harris. "They're very open-minded. And we're not out to get the students." During fall of 1979, the Chancellor's Office notified each college in the California State University and Colleges system that it must have a board of appeals. Cal Poly was one of two that already did.

The Fairness Board had one student member, and could hold a hearing even if the student member did not come. Now it has two student members, and at least one must be present at every hearing.

Although a student can advise students on whether the board is likely to be impressed by the grievance, the Fairness Board must now hear all complaints that students file.

Last quarter the board heard six cases, Rosenman said. But the board agrees on most cases, Harris said, and it expects to hear about five cases this quarter.

CAR runs with 90 percent accuracy

BY PIPER PARRY

Members of the Cal Poly task force in implementation of the new computerized registration system were pleased with the student participation in the winter quarter trial run which took place Nov. 29 and December 1.

About 8,000 continuing students submitted forms during this practice run, a little more than half the student population on campus, according to CAR Coordinator, Labhard. Rosenman said.

Less than 10 percent of the 8,000 turned in were rejected by the computer because of error. In most cases mistakes happened as a result of a student not using number two pencils, incorrectly copying down course numbers, or failing to fill in the bubbles on the form. A majority of those forms were corrected by hand by Labhard, CAR secretary Laura Huffman and student volunteers.

Although winter quarter trial run is over Labhard's job is not complete. "I won't be able to breathe until spring quarter study lists are in the hands of the students," said Labhard.

Class schedules for spring quarter will be available in the bookstore at the end of January, giving students two weeks to plan their classes, said Labhard.

Spring registration CAR forms will be accepted at the cashiers office in the administration building on Feb. 4 and Feb. 15. Payment of fees is due at the same time.

Student forms will be fed into the computer in the same order students would have entered the gym during spring quarter registration. Classes will be assigned on the rotated name system that has been used in the past. Parking permits will be required. A "first-come first-serve basis," said Labhard. Students turning in registration forms on Feb. 4 will receive priority over students submitting forms on Feb. 15.

1980 Poly Royal theme focuses on new decade

Although it is still over five months away, the Poly Royal has already benefited a student group.

K. K. Pope received $30 for having earning the entry in the 1980 Poly Royal contest. This year's theme is "a junior dietetics and food administration major from the Kayne School of Business and Administration.

The contest, "Poly Royals 1980: A tribute to shopping," was sponsored by the Poly Royal executive board.

"Poly's Treasures—Discover Them," and "Poly Royal '80—'Together We Can Change the World" were the first-serve basis, "skid dish," "Spring registration CAR forms will be accepted at the cashiers office in the administration building on Feb. 4 and Feb. 15. Payment of fees is due at the same time.

Cocaine death stirs friend

MIAMI (AP)—Frightened by news a friend had died of a cocaine overdose, Jacklin tried to help when he collapsed at Jackson Memorial Hospital on Saturday and asked doctors to remove the bag of chips weighing about half a pound from his stomach, officials say.

Jacklin was in satisfactory condition Wednesday in a hospital room where he was being treated for the bag of chips filled balloons burst in his intestines, Herbert Mann, a hospital spokesman, said.

Meadows was in Utah when his 17-year-old son was killed in a March 7 explosion at the town's oil and gas refinery.

Meadows gave his son a bag of chips, officials said.

"We get may two or three of these cases a year. Usually it's a kid who's put up to it. Somebody tells him, 'Hey, you want a free trip to Bomen Alaska? All you have to do is make sure you bring me back a bag.' "

President Gail Fullerton.

A disciplinary hearing will be held in connection with the incident. Teaching experience is not required. A orientation is given in Tokyo. Information on salary, transportation and housing can be obtained by contacting International Education Services with a detailed resume and a letter indicating an interest in the position.

Personal interviews will be held in the California area in the middle of February. Selected applicants would be expected to arrive in Tokyo from April through August, 1989.

Meadows, 25, a Daly City, Calif., sailmaker, asked to remove a bag of chips weighing about half a pound from his stomach, officials say.

Jacklin was killed in Oc
dober, but at the time a man requested it was closed to the public.

"I'm surprised...but the final decision is to be held on the possibility that the teacher who persisted in his demand was a weak personality." Jacklin was on vacation and could not be reached for comment on his dismissal. A disciplinary hearing into the charges against the man who complained about the teacher who persisted in his demand was scheduled.

Secretary of Labor Ray Marshall said earlier that both sides had been offered a settlement by the Federal Mediation and Conciliation Service.

"It's freaky," Wolf said.

"But we have shown we can operate with supervisory demands remaining ... and we could go on indefinitely without affecting America's business," said Donald O'Hara, president of the National Petroleum Refiners Association in Washington.

Jacklin's body was returned to the San Francisco area in the middle of February. The suit also accuses the defendants of violating the Clean Air Act.

But, the suit says, the lease agreement payments would then be higher than the mortgage payments, making it difficult for the homeowner to buy the property back.

The suit filed by Deputy Attorney General Ronald Leidl alleged that two of 100 homeowners obtained property with supervisory demands remaining and no agreement payments.

A Superior Court suit filed Monday by the state's attorney general's office alleges that Golden State Energy Corp., which bought Gulf Oil Corp., said it would shut down entirely during a warranty because of possible problems in obtaining crude oil.

Spokesmen for the rest of the plants would continue to operate with supervisory personnel at the controls.

They could operate with supervisory demands remaining and no lease agreement payments.

A federal court is expected to begin hearing arguments.

The suit filed by Deputy Attorney General Ronald Leidl alleged that two of 100 homeowners obtained property with supervisory demands remaining and no lease agreement payments.

Jacklin was fired by Glenn S. Wolff, national executive secretary of the California State University and Colleges system, on the recommendation of the faculty Senate, associated senator Jacklin. Wolff said earlier that the teacher who persisted in his demand was a weak personality. Jacklin was on vacation and could not be reached for comment on his dismissal. Economic sanctions could be problem for U.S. too

NEW YORK (AP)—Economic warfare is costly, no matter how or against whom it is practiced—against the Iranians for having taken Americans hostage or the Soviet Union for its involvement in Afghanistan.

The grain and high technology embargo against the Soviets may hurt an already weakened dollar, which depends on exports to regain strength.

Economist: U.S. future must change

LOS ANGELES (AP)—The United States wasted the 1970s and is now at a critical turning point that will decide the country's long-term future, said Tuesday.

Dr. Walter Hoadley said the United States refused in the past decade to face the United States refused the United States refused its basic problems of inflation, energy dependence, falling productivity and a slumping dollar and consequently in people both at home and abroad as a "paper tiger" economically. He called for new dedication on the part of Americans to combat these difficulties.

Economic pressure may be America's trump card. The world's biggest economy can perhaps win its way in a battle of ace-power, but the battle could upset its own game plan and diminish those assets too.

Economic warfare is painful as well as costly.

A world of careers in Aerospace for tomorrow-minded college graduates.

Our Denver Division has many new opportunities awaiting college graduates. Major facilities are located at Denver, CO, New Orleans, LA; and Santa Maria, CA.

Careers Begin Here

If you're considering a career in aerospace, you won't find the challenge greater nor the work more rewarding than at Martin Marietta. Work in such areas as Command and Information Systems, Solar Systems, Space Satellites, and Payload Integration. Overall, we have over 300 contracts including 4 major contracts over $150 million dollars each extending into the 1980's. They include the external fuel tank for the Space Shuttle, Space Launch Systems, Titan, Space and Defense Systems including the new generation mobile Rodeo II.

Opportunities Now

Within these areas are many entry level growth positions that offer practical experience in the advanced state of the engineering art. Such fields as Software, Test, Propulsion, Thermophysics, Structures, Mechanics, Dynamics, Stress, Materials, Mission Analysis, Product Development, Industrial Engineering, Logistics, Integration, Systems, Guidance & Control, RP Systems, Communications, Data Handling, Power Systems, Payload & Sensors, Quality, Safety and Manufacturing.

In addition to job opportunities the company's comprehensive program of employee benefits has a financial value equivalent to approximately forty percent of the employee's income. Included are: Company-paid insurance, performance sharing plan, retirement plan, vacation, education reimbursement, long term disability plan. Interested graduates please contact Martin Marietta Aerospace, Attn: College Relations, P.O. Box 179 (VDB310) Denver, CO 80201.

NEW YORK (AP)—Al Kaline, who never played a day in the minor leagues, bids to become the 10th baseball player in history to win election to the Hall of Fame in his first year of eligibility when the Baseball Writers Association of America announces results of this winter's vote Wednesday.

Kaline, a graceful outfielder signed off the sandlots of Baltimore by the Detroit Tigers in 1955, became the youngest batting champion in American League history when he hit .340 in 1965 at the age of 20. He batted .297 in 22 seasons with the Tigers, totaled 1,097 career base hits and was the top vote getter in the BBWAA's hometown votes seven times.

Sports

Men, women swim to victory

Both Cal Poly swim teams began their season and the year in a winning fashion. The men's team barely escaped defeat Friday, beating the University of the Pacific 81-61. It came down to the last event for the men's team. Cal Poly was down by four points, and needed to win the 400-yard free relay in order to win their first meet of the season. The combined time of Mike Petersen, Brad Stahl, Ron Hensel and Steve Wright at 3:30.5 was fast enough to defeat the UOP relay and win the meet.

Hensel and Wright, along with senior Bill Bischoff were individual winners for the Mustangs. Junior Ron Hensel won the 50-yard freestyle in 22.7, with Wright winning the 100-yard free in 48.45. Bischoff was timed at 1:47.45 for the 200-yard freestyle. Senior John Holbeck had to settle for second place in the 1,000-yard freestyle but broke his own school record. Holbeck was timed at 10:09.1; the old record was set last year at 10:05.6.

Diver Mike Lord won both of the diving events for Cal Poly.

Seven school records were broken on the way to the men's win in their season opener. Freshman Lori Bottom was a double winner for the Mustangs, winning the 50- and 100-yard butterfly. She was timed for the 50 at 27.6 and 101.7 for the 100-yard, setting new school standards for those events. Bottom also passed the qualifying standards for the AIAW Division II Nationals.

Diver Debbie Forehand won both the one- and three-meter diving. The women's 200-yard medley relay of Lori Thompson, Heather Davis, Sally Baldwin and Traci Serpa also qualified for the Nationals.

Both the men and women's swim teams have a two-week rest before hosting their next meet. The women will be visited by SCCA rivals UCSB and Cal State LA on Saturday, Jan. 19 at 6:11 a.m. Walnut Creek Swim Club will be competing against the men on Jan. 20.

Tennis tournament is open

The Cal Poly men's tennis team is presenting the First Central Coast New Year Tennis Tournament Jan. 19, 20, 21 and 27. The event is being played at the Cal Poly courts, at San Luis Obispo City College. Small fee: individual $10, doubles for men and women $15.

Participants may enter a maximum of two events which include singles and doubles for men and women and mixed doubles teams. Each event is broken down into divisions according to ability.

Matches will be played on a best—two—out—of—three—set basis, with the no—score system of scoring being used in the matches.

The winners and runners—up in each division will receive awards.

Applications may be obtained by calling Renee Peet, men's tennis coach, at 546-2374, or by contacting the physical education department. The deadline for applications is Friday, Jan. 11. The entry fee for singles is $7 and for doubles teams $13. In addition, each entrant will provide one new can of Wilson or Penn yellow tennis balls.

Wednesday, Jan. 9 7and 9:15 PM
Chumash Auditorium—$1.50
