Black students hold sit-in at UU Galerie

BY GREG CORNING
Daily Student Writer

A group made up mostly of black students demonstrated in the University Union Galerie yesterday to bring attention to black culture and needs.

About 50 students, some holding signs printed on card board, sat on the floor of the Galerie in the demonstration which began at about 11 a.m. and lasted to about noon.

One student in the sit in said the demonstration was related to the Galerie management’s refusal to schedule a display of black art. According to the student, the Galerie management would not give a reason for its decision.

Holly Smith, adviser to the ASI Program Board, said no show was hung for Black Heritage Month because an advance notice of one year is required. Last year, the black students of Cal Poly did not get a proposal together for a show.

Smith said the students demonstrating in the Galerie are a different group from last year.

She said some of the students told her they feel the Galerie should have put on a show for Black Heritage Month regardless of what students failed to last year in requesting a show.

The Programming Board did not want to put up a show without the direction and advice of black students, she said.

"The people in the programming board are trying to be open," she said. "It’s a matter of getting the communication going."

James Patton, president of the Black A wares Council, said the university— including administration and students—has failed to give consideration or support to black culture.

"The saddest part is they don’t really know anything about us right now," he said.

"Every organization on campus that has a way to convey black culture to the public has refused to," said Patton.

ASI Programming Board has given no consideration to February being Black Heritage Month, he said.

The Mustang Daily, too, has failed to give blacks the attention they deserve, he said.

"At least for this month they (transap organizations) could do something special," Patton said.

"We feel we have something that’s proud, that’s worth consideration," he said.

The whole objective of black publicite effort was to get special consideration at this point in time—from everybody.

"I think we’re deserving of it. The time is past, said Patton, when blacks will accept a token representation at Cal Poly."

"We want to represent all the time, and in numbers," said Patton.

Victor Churchill, secretary of URRSAC, said black issues are not getting publicity as they should.

"I feel that a whole month is more important than Valentine’s Day," said Churchill, alluding to the publicity given Valentine’s Day and the lack of it for Black Heritage Month.

Churchill said black students at Cal Poly want to establish a cultural base for blacks coming into the area. Without such a base, he said, black students get caught in the wash—the mainstream of white attitudes—or they become alienated.

"It’s not like we’re visiting up here," he said. "A lot of us live up here."
Rebutting the editorial board
New editors, new opinions

It is surprising the difference a year makes.

Last year the Mustang Daily was ringleader in the movement to force the ASI student senate to rescind a bill allowing the senate free admission to all ASI sponsored events. The Daily blasted the senate for passing a measure which would cripple many ASI organizations and at the same time give to the senate an unnecessary privilege.

However, this year's editorial board, in an editorial last Friday, advocated the ASI senate receiving a limited number of free passes to ASI events in lieu of preregistration. This complete turnaround in the newspaper's policy at best, shows wishy-washiness and at worst smacks of hypocrisy.

Author Tom Johnson is a sophomore journalism and Mustang Daily staff writer.

Giving free passes to each senate member, contrary to reports in the Daily, would severely hurt several ASI organizations that are fighting to stay in the black. It does not make a math major to determine that if each of the 26 senators were given, say 20 passes, the number of free passes would be a major ticket snafu. Before each event, ASI clubs must engage in a mind game to determine how many people with free passes will attend in order to decide how many tickets will be sold. This often results in an event being over-issued or under-issued, a situation which would be aggravated if more free passes are available.

The free pass dilemma also dredges up the ethical question of whether it is fair to turn away the general public to make room for the people with free passes.

Some organizations, such as Film Committee, already have a long line of people with season or free passes, so the number of regular tickets would be reduced even further should the senate be given passes.

Finally, it is curious the Mustang Daily and the senators feel the senators deserve some type of incentive, such as free passes or preregistration, as a reward for their efforts. There are many individuals, such as club presidents and drama actors in Cal Poly plays, who devote long hours without thought of extrinsic rewards. The only rewards they receive are the chance to gain certain skills and abilities which may aid them after college, and the knowledge they are providing a valuable service to the students. If these intrinsic rewards aren't enough to motivate senators, then they have no business in that legislative body.

Letters

Dorm contract

Editor:
Please allow me to voice some concerns over an article by Ron Kwan, quoted in the Mustang Daily on Feb. 1: "If resident advisors have a good rapport with their charges, they can easily ask them to dismantle their aluminum towers for other residence halls." It would seem to me that this would lead to a breakdown in "rapport" with our charges, as we would have to. As resident advisor, I have found that building a aura of friendship and trust with our residents to be of paramount importance.

However, should resident advisors be required to ask residents to periodically dismantle their objects of art in order to find the boxes of beer, this would lead to a break down of that trust and friendship. The use of such KGB-like tactics would be dangerous for both the resident agent, who would have to confront the resident with such a request, and the resident, whose rights of privacy could be jeopardized by an over zealous resident advisor.

In short, the easiest solution to the problem is the current housing policy, as silly as it may seem from the outside. There are sufficient posters and glassware, etc., available to satisfy most interior decoration requirements for building an aura of friendship and trust with our residents to be of paramount importance.

For the "discriminatory" rule concerning extra speakers in quiet dorms, it has been our experience that many of the people who have applied for quiet dorms do so in order to study in the evenings, helped by various "reasonable" levels of music emanating from several rooms.

Having specifically chosen a quiet hall, the residents' rights for quiet service should not be abrogated. Should a resident find a quiet hall not to his or her liking, there are several avenues through which they could change their situation.

We agree there are some clauses in the current lease contract that should be altered; however, any proposed changes in the existing contract should be examined very carefully. For many students, the residence halls are their first home, they from home and the responsibility of the Housing Department and Student Senate Council's address to this situation is great.

Opinion

How can I come out against Prop. 9?

Author: Tom Johnson

As a member of the Mustang Daily editorial board, I must ask for a voice for the students who are unable to speak for themselves.

My public, uh, the people of California, want taxes cut. And I am not even governing in November.

What I am trying to say is that it does not make sense for the people who are currently in the majority to try to cut taxes when they are increasing the price of $3.50 per ticket. It is not the end of the world, just as the present system is not either. This move is not going to hurt the students at all.

Some organizations, such as Film Committee, already have a long line of people with season or free passes, so the number of regular tickets would be reduced even further should the senate be given passes.

Having specifically chosen a quiet hall, the residents' rights for quiet service should not be abrogated. Should a resident find a quiet hall not to his or her liking, there are several avenues through which they could change their situation.

We agree there are some clauses in the current lease contract that should be altered; however, any proposed changes in the existing contract should be examined very carefully. Academic senate recommends two days

BY MEG McCONAHEY
Daily East Winner

Students will have two extra days prep for final exams if a recommendation made by the academic senate is adopted Tuesday.

The senate voted overwhelmingly to suggest two extra days instead of Christina Smith, who initiated CPR training recently, for additional study and office consultation, or the designation of an official evaluation day to submit grades after reading final exams and papers.

Program counselor Sam Spoden of the Activities Planning Center was not happy with the senate’s suggested plan.

Spoden cautioned that Week of Welcome activities would be disturbed by making the first day of fall quarter instruction fall on Monday.

New students would have to arrive over a week before classes begin if they wanted to participate in WOW, she explained, adding that parents usually want to help their children move in and need a weekend in which to do so.

Such a large time lapse between moving in and starting classes would discourage participation in WOW and encourage new students to move in the weekend before classes begin, Spoden said.

New students need that extra time to help them get integrated into a new environment,” she added. “WOW helps reduce the anxiety of worrying about meeting classes and making new friends.”

The senate, nevertheless, rejected Spoden’s arguments in favor of a more uniform academic year, and instead, took up the problem of where to insert extra days left open by CAR.

In the past, instructors were expected to participate in walk-through registration and those six days were then deducted from the total number of required academic work days. Cal Poly instructors are currently putting in the minimum 170 work days required by the Council of Presidents, so those extra days must be accounted for.

Although the senate has left open several possible ways for utilizing the six extra days, Brown suggested they be accounted for by requiring a full week in the fall quarter for the fall conference and academic planning, a full week each quarter for examinations, end of quarter evaluations and participation in yearly commencement.

Part of the reasoning behind the recommendation was to allow for an equal number of Mondays, Wednesdays, Fridays and Tuesdays and to clean up the academic calendar.

One year ago, the State Department demanded a full report from the Soviet Union on its role in the death of U.S. Ambassador Adolph Dubs in Afghanistan.

Today’s Birthday: Football player Ken Anderson is 31.

Correction

In the article, “CPR rescue lead to award,” appearing Wednesday, Feb. 13, Julie Ambach was reported to have received CPR training recently, instead of Christine Smith. Ambach had CPR training about a year ago.

In the next article, “Students seek day before classes,” not Albach, who initiated CPR training, was reported.

The campus fire department said it arrived as the smoke cleared within two minutes instead of 10.

Further, Christine Smith, was mistakenly referred to as “Cindy.”

History today

From The Associated Press
Today is the 40th day of 1980.

Today’s highlight in history:

On Feb. 15, 1898, the battleship Maine was blown up in the harbor off Havana, Cuba, setting off the Spanish American War.

On this date:

In 1844, the Italian astronomer, Galileo, was born in Pisa.

In 1824, the pioneer crusader for women’s rights, Susan B. Anthony, was born in Adams, Mass.

In 1933, President-elect Franklin D. Roosevelt narrowly escaped assassination in Miami. The shot fired at him missed but killed Mayor Anton Cermak of Chicago.

In 1972, Attorney General John Mitchell resigned his cabinet post in direct President Richard Nixon’s re-election campaign.

Ten years ago, Britain’s Lord Dowding, who led the Royal Air Force to victory during the Battle of Britain, died at the age of 87.

Five years ago, the Soviet Union carried out a nuclear test to see if such explosions would be feasible for building canals.

One year ago, the State Department demanded a full report from the Soviet Union on its role in the death of U.S. Ambassador Adolph Dubs in Afghanistan.

Today’s Birthday: Football player Ken Anderson is 31.

Electronic Engineers Wanted

Graduate Electronic Engineers are needed to take up the challenge of Communications-Electronics as Federal civilian employees for the worldwide U.S. Army Communications Command headquartered at Ft. Huachuca, Arizona. Duties are global, demanding, rewarding. Benefits are liberal - 20 vacation days the 1st year, 26 after 15, plus 9 paid holidays - plenty of time to enjoy sunny Arizona and nearby Mexico. Walk thru Wyatt Earp’s Tombstone, rockbound, hunt gold, silver. Golf year round. Ski Tucson, McNary, Flagstaff. Fish the Sea of Cortez, Mexico’s water wonderland.

For recent college graduates who are American citizens, the Government offers an Intern program which features rapid promotion and continued education and training.

Page 3
I N F O R M A T I O N  I N  T B B M A T l á  M A l, evoked a frightening result in 33 deaths, inmates mutilated, and New Mexico, in which

BY TOM KINSOLVING

The recent prison riot in New Mexico, in which inmates mutilated, and New Mexico, in which.

He said the state’s already overcrowded prison system will, within two months, reach complete capacity, if the present rate of incarcerations continues.

It was overcrowding and the presence of mentally disturbed inmates that constituted some of the primary reasons for the savage eruption at the New Mexico State Penitentiary in Santa Fe last week, according to Dr. L.J. West, chairman of psychiatry at UCLA who was quoted recently in a Los Angeles Times story.

Obledo, speaking at a Los Angeles news conference, cited San Quentin, Soledad and Vacaville as examples of the state’s oppressively populated prisons.

Does the California Men’s Colony located three miles from Cal Poly, also have the potential of being a powder keg? "There’s always a possibility of having a riot in our state’s prison system," said Charles "Bud" Moey, the classification and parole representative at CMC Monday, Feb. 11. The Mens Colony, which is designed to hold up to 2,400 inmates, has now reached near-full capacity, with a population of 2,380. Half of these inmates are labeled as mentally disturbed, according to Moey. Moey, however, feels confident the devastation at New Mexico will not happen at the Mens Colony.

"We are fully equipped to handle such a riot situation," said Moey. Of the 660 employees on the prison staff, over 300 are guards. CMC, a medium-security prison built in 1961, is also a single-cell facility, thus each inmate is not subjected to overcrowding.

The New Mexico State Prison, built for only 850, housed over 1,100 convicts. Many of them slept in cramped cells with their feet pressing against the bars and heads touching the toilet. There was a shortage of guards and some of the guards employed were insufficiently trained.

"Our staff is well-trained," said Moey. He explained his staff has a conscientious attitude.

The California Men’s Colony, built in 1961 to hold 2,400 inmates, is nearing its population capacity. A spokesman for the prison said the conditions are not nearly as bad as those which caused a riot in a New Mexico prison earlier this month. He said CMC guards are better trained than were those at the New Mexico prison.

A Stable Force Designing The Future Varian Associates

At Varian Associates, we are proud of our reputation as a high technology leader. The Palo Alto, California, facility is concerned with all phases of research, development, design and manufacture of traveling wave tubes, klystrons and gyrotrons - the newest microwave tube.

If you are receiving a Bachelor of Science Degree in:

*Electrical Engineering
*Industrial Engineering
*Mechanical Engineering
*Physics

Then, our representatives would like to discuss your plans for the future when we visit your campus on:

Year of Monkey: unexpectedness

Gong! There is a Chinese legend that tells of an island far out in the middle of The Great Ocean, an unhabited by man. It was known as the Island of Flowers and Fruits, a place where animals thrived on a great variety of vegetation.

**Commentary**

Loren Schniederman

A mammoth rock measuring 366 inches tall and 24 feet in circumference marked the center of the island. These numbers had a mystical association with the number of days in the year and the number of moons in one day. According to legend, the rock burst open long ago and an egg-shaped object rolled to the ground. As it revealed itself, it unbled into the form of a monkey—and that is how the Monkey King came to earth.

This legend contains images necessary to construct hints of what we can expect in 1980-81, the Chinese year of the Iron Monkey.

According to the I Ching—the Chinese Book of Changes—the Iron Monkey is a rare occurrence that manifests itself every 60 years.

The Chinese calendar is based on 12 animals, each representing a segment in time and a prevailing attitude. These animals repeat every 12 years, but the Iron Monkey, which starts Feb. 16, comes in a cycle of 60 years. It is a year of the unexpected.

As we enter this decade, we begin a countdown for another 10 years. During this countdown, the I Ching prognosticates events we can watch out for and labor in with more understanding. The I Ching is not a religious item—it does not favor one god over another. But the I Ching is a guide for noting cyclical changes found in the universe. It can be compared, somewhat, to astrology.

We are now leaving the Year of the Earth Ram, a grazing animal, roaming the earth looking for a pasture to rest for what follows.

The Year of the Iron Monkey is a time of ideological emptiness, economic uncertainty, global terrorism, psychological warfare and cultural decadence, according to the I Ching. Iron is a symbol for the monkey's hard metallic body that begins to glow as it transforms from material blankness to light. This light, as the I Ching says, is to lead the individual through political, economic and spiritual abuses.

Much of what the I Ching says about the coming year is unexpected because the monkey lives in a giant jungle where everything can happen—that is why the monkey must remain alert. The full expression of the Iron Monkey will not come until the seventh moon, which is the transition between spring and summer. All through spring the monkey unfolds. The I Ching warns that we must not behave as a monkey stretching to reach the reflection of the moon, but rather distinguish between image, reflection and object.

As we reach a new time with many complications, with a wink, the Iron Monkey leaps into the wisdom fire submerging himself in the blaze. As quickly as he jumps in, he jumps out, radiating the compassionate waves of his fearlessly open and confident heart. As the I Chings says, "The Iron Monkey leaps into the Wisdom Fire."

Chicago firemen defy court

CHICAGO (AP) — Most of Chicago's 4,350 firefighters walked out of station houses in defiance of a court order Thursday and refused to answer fire calls, hitting the city with its third major public employee strike in two months.

Mayor Jane Byrne called it "a sad and sick day" for the nation's second-largest city as the first strike ever by Chicago firefighters left fire protection for 3.5 million people up to a few non-strikers and supervisory personnel, Fire Academy cadets and other city workers with help from suburban departments.

By early afternoon no major fires had been reported.

The main issue in the dispute was the city's refusal to grant firefighters a written contract instead of the traditional handshake agreement unless the union agreed to a no-strike clause and binding arbitration.

The strike came three days after public school teachers ended a two-week walkout to protest layoffs and delayed paychecks.

Last December, employees of the Chicago Transit Authority walked out for several days in a contract dispute.

Soviets suffer casualties by rebels

EDITOR'S NOTE: The following delayed dispatch was received Thursday.

KABUL, Afghanistan (AP) — Soviet tanks and at least one MiG-23 fighter bomber battled what was believed to be a rebellious Afghan army unit this week near Kabul, witnesses reported. They said they believed the MiG dropped napalm bombs and that an undetermined number of persons were injured.

In the northeast, a Soviet armored column suffered severe casualties when it came under heavy attack this week by anti-communist Afghan rebels, reliable diplomatic reports said. The Soviets, who have been in Afghanistan since late December and presently have an estimated 90,000 troops there, were trying to relieve a rebel-surronded Afghan army garrison, they said.

There was no official comment on either report.

Meanwhile, the status of Soviet-backed President Babrak Karmal, who has not been seen in public for more than a week, remained obscure.

In Afghanistan said the Soviets fought a sharp three-day battle Monday in the village of Cergah, 12 miles north of Kabul.

Western diplomats in the vicinity said Soviet infantry and tanks went into action against an Afghan army barracks in the village of the Soviet-backed Afghan army.

The MiG was seen dropping a cluster of small bombs, followed by a cloud of black smoke rising from the ground. The witnesses said they believed the bombs were incendiary devices made of napalm, chemicals added to gasoline or oil to form a jelkylike substance used in bombs.

Ambulances were seen removing an unknown number of casualties, some to the military hospital in Kabul. Afghan policy prevented the diplomats from approaching close enough to the barracks to get a clear view. All resistance apparently was crushed within an hour.

Prison

From page 4

towards the needs of the CMC inmates. Included is a team of six psychiatrists, six psychologists and one neurologist.

"We stress staff-inmate contact," Moey said.

When asked about how bad the Men's Colony was in regards to the basic prison element of homosexual rape, stragglings and gang activity, Moey replied, "We do not have a lot of bad problems here."

Nor-Cal swim meet to be tough

BY KAREN LUDLOW
Daily Sports Writer

The men's swim team will be in the fast company this weekend when they compete at the AUU Nor-Cal meet at Salinas. The Mustangs will be swimming Saturday through Monday trying to qualify for the NCAA Division II Nationals.

The list of competitors expected to be in fast company this weekend is a who's who in the world of swimming. Brian Goodell of the Mission Viejo Swim Club, and a 1976 Olympian is entered in the 50-yard freestyle. The Bottom brothers, Mike, Dave and Joe will be using the meet to qualify for the Olympic Trials. Joe holds the American record for the 50-yard freestyle at 19.70. His sister Lori, is a member of Cal Poly women's team.

NCAA Division II Nationals will be at Youngstown, Ohio and coach Mark Johnson has a list of swimmers who want to make the trip. Seniors Bill Bischoff and John Holbeck need to hit a time of 16:38.86 in the 1,650-yard freestyle. Bischoff, the assistant coach of the team, has already qualified in the 200-yard and 400-yard freestyle. All American Steve Wright has already surpassed the standard for his specialty, but will be swimming the 100-yard, 200-yard freestyle and the 200-yard backstroke.

According to Johnson the meet will be extremely fast, and the swimmers turn in good times are expected to qualify in the 50-yard and 100-yard freestyle. Senior Glenn Perry would like to add the 200-yard individual medley to his list of events that he will swim at the Nationals. Perry met the standards for the 100-yard, 200-yard butterfly and 400-individual medley early in December. Sprinters Ron Hensel and Jim Keefe are expected to qualify in the 50-yard and 100-yard freestyle.

According to Johnson the meet will be extremely fast, and the swimmers turn in good times are expected to qualify in the 50-yard and 100-yard freestyle.

Bill Bischoff and John Peterseim will swim at the Nationals. 'Wright will swim the backstroke, John Edwards will handle the breaststroke assignment, butterflier Perry, and Hensel or Keefe will combine to swim the 600-yard medley relay.

Follow the Dataproducts path...

to success, to professional growth, and to career contentment.

You can see the largest independent printer-manufacturer in the world, and we can provide you with a career that offers much more than ordinary products.

We intend to continue our vast growth in the coming years and we are proud of our growth in the years past. We are sure that you will find the opportunity to get involved in the management and development of your own business and products. Product ranges from thermal printers to copiers and new products are being introduced on a regular basis. If you are interested in an independent business opportunity, your phone call to us will be handled with all the information and cooperation necessary.

Bill is a free-lance engineer, business, sales, and marketing consultant and understands the right balance with a company that is flexible in field, please hang up for an order with your placement office. Company inquiries will be on a simple basis. Let's talk and find out if this is an opportunity that will be of interest to you. We will always respond in a positive manner and your request will be handled with all the information and cooperation necessary.

Coursing the white water

BY GUILLERMO BROCK

Many students feel their senior project won't affect anyone but themselves and their advisors, but three landscape architecture students know their project could affect at least 40,000 people and the world of sports.

Students Mark Forney, Bruce Oswald and James Ripley are seniors in landscape architecture, and the task they have undertaken is to design the site for the 1984 Olympics white water kayak course.

At present, they are in the final stages of completing their analysis of the 150-acre area. Final plans will be designed this spring, after they have moved on to the required professional project.

The site for the course will be on the Kern River, 15 miles east of Bakersfield. Both short and long distance kayak slalom events will take place on the river, which is rated 4 on a scale of 5.

The river has long been favored by white water enthusiasts because it is the third swiftest in the United States. The site has already been approved by the American Canoe Association for the 1980 National White Water Championships scheduled for this June. There is one other proposed site in San Diego.

Planning for the Olympic Games is a big task, Oswald admitted, due to all the considerations the group must take into account.

Their focus is not so much the layout of the course itself; rather, it is the design of the Olympic center with its competitor facilities, heli-pads, television camera sites, judging areas, awards areas, orientation centers, temporary and permanent parking lots and camping sites.

The key to the whole project is to include these facilities without detracting too much from the scenic beauty of the area, which is described as a "boulder garden."

"Our ultimate aim is to orchestrate all these requirements into a package which will retain much of the environmental beauty and cater to George Nickel's and Olympic needs," said Forney.

The land is part of the 13,000 Rio Bravo Ranch owned by rancher George Nickel. It was Forney, a Bakersfield native, who provided the link to Cal Poly.

"We have to keep his short and long term interests in mind as much as those of the Los Angeles Olympic Committee," said Forney.

The Olympics will come and go and the structures that remain must be of a multi-purpose nature in order to be useful to Nickel. There already exists a golf course and country club on the Rio Bravo Ranch and the river complex would be a valuable enhancement to the land.

The work is by no means over for the three designers and it will continue to be a driving influence in their lives for several more months. When it's all over, they will relax and let the sports world enjoy the creation.
