Poll of 532 students shows majority also want to have women be drafted

BY JOHN KELLER

If Congress voted to reinstate draft registration, 49.6 percent of Cal Poly men and women said they would register according to a poll conducted by a journalism class.

In addition, 80.5 percent thought that draft registration is going to be reinstated for men and 62.2 percent said women should be asked to register for the draft.

The poll was a project for 25 juniors and seniors who received 532 responses out of 1,800 students polled Feb. 22-29. Names were taken from a master Cal Poly enrollment list of students. Because each student had an equal chance to be picked from the master list, the 532 answers gives the student survey more than 95 percent confidence level, said Dr. Rob Logan, the class instructor.

Logan said every poll question asked accurately reflects Cal Poly student public opinion on the draft within 4 percent of the total enrollment.

Students in the class, “Mass Media and Public Opinion,” interviewed Cal Poly students on their views concerning the draft, draft registration, women in military and whether or not the United States is imminent with a major war. The responses were made up of 54.9 percent male, 45.1 percent women. About 40 percent answering were between 18-20, 52.8 percent between 21-26 years old. More than 90 percent said that the draft registration will be reinstated for men while 11 percent did not believe so. On the same question with women, 52 percent think Congress will ask women to register. Thirty-eight percent of all polled said women will not be asked to register.

But should women be asked to register? A majority, 62 percent said women should be asked. About 27 percent said no. Some 3.8 percent were unsure on the question—3.8 percent, while 5.8 percent said they had no opinion, meaning they understood the question, but had no response.

On the question should women be given combat duties, 75.6 percent said no and 17 percent thought they should be given the duties.

Twice as many students indicated they would register for the draft as those who opposed it—68.6-25.4 percent. Almost 21 percent believed that people would very likely be drafted if registration was approved. Twice that amount—43.8 percent—said it was somewhat likely and another 28.8 percent said it was not likely that people would be drafted. But six-tenths percent were unsure.

Boat race skims cream of the milk carton crop

BY KAREN GRAVES

Cool weather and approaching rain did not stop a crowd of more than 300 people from going out to Laguna Lake to view the Fourth Annual Milk Carton Boat Races, sponsored by the Los Lucheros Dairy Club Saturday.

Photo feature of the race on page 3

Twenty entries joined the competition, which the Dairy Club uses as a promotion of dairy products, said Lee Ferrera, Dairy Club advisor.

Milk cartons of all colors and brands imaginable gave the competition a variety of color. The boat with the most milk cartons, 544, was built by students in the Ag Engineering Society, and finished second in the sail-powered category.

Participating in the competition donned wet suits, life jackets, and shorts in order to guide their boats around the triangular-shaped course.

There were victories and there were defeats. The two boats in the sail-powered category of the competition could not navigate their boats around the first buoy so the race was never completed, even though the Society of Civil Engineers was declared the winner.

The winning boat in the finals of the people-powered division, which had 16 entries, was the Bullet of Alpha Gamma Rho Fraternity. The 21-foot streamlined-designed craft had a bed completely made of milk cartons and an outside hull of Cal Poly milk cartons.

The four members of this victorious boat, Dan Adams, Andy Cole, Jerry Cordova, and Pat Maddox, jumped off their boat into the water when they reached the dock. Rodeo Club finished second.

Taking first place in the mechanically powered division was the American Society of Automotive Engineers.

After finishing the course in second place, in the same division, the Rose Float Club boat capsized.

The boat that won the award for the most imaginative boat was entered by the Panhellenic Club. The craft, crewed by eight men, had a perch cap on its top, which had a white chicken named Gerta, the club's mascot. Gerta often tried to climb out of her perch, but despite this, the club managed a third-place finish in the people-powered division.

Opinion

Openly channelled

Troubles in providing enough dollars to meet Cal Poly program expenses regardless of the Jarvis II outcome in June. President Baker faces a challenge to maintain the current quality level of education at Cal Poly and if Proposition 9 passes, the president will have to decide what reductions the university must make.

These reductions are still not known, Baker said on a recent KCPR broadcast called "Open Channel." Whichever be athletics, summer quarter or increasing the teacher-student ratio, Baker remains unsure on budget cuts to meet Jarvis II mandated reductions. In addition, students' don't even know if they will be paying a tuition next fall.

Baker's vague responses to budget-cutting questions on "Open Channel" included "summer quarter is under fire again," and "Philosophically, I don't think some tuition is a bad idea." It is true that Jarvis II voting is still months away, but we need to anticipate major reductions and plan a budget around reductions Cal Poly may have to come up with. Students need to be told by the president and administration which programs will be cut or if tuition will be charged to meet costs.

Jarvis II is currently favored by 54 percent of California voters while more than 20 percent do not understand the budget cutting implications of the proposition. Instead of sending letters to students' parents requesting money, as Baker did over Christmas, he should have requested support for the defeat of Jarvis II—the bill which will cut more out of our budget than donations that parents give. They need to know what educational programs Jarvis II will take away from their children.

The president wants to improve the quality of education and do that, Jarvis II must not pass.

To improve the quality of education, the Cal Poly president said the university must consider market factors in hiring teachers and that vacancies must be filled with qualified instructors or those making good salaries in the "outside world"—as engineers and accountants, for example.

He said proposals are being developed and given to department heads to improve capital funds available to the university in areas where the state won't help. He mentioned the university Career Counseling Center and its inadequate facilities for companies to come and interview students.

Those problems, however, must be dealt with after we know if Jarvis II will cripple Cal Poly programs. Decisions will have to be made by Baker in the near future affecting all associated with Cal Poly. But for now, he should give us straight talk on our college's future.
Wet and wild

Thrills and spills awaited the contestants at this year’s milk carton boat race. At left, members of Alpha Gamma Rho fraternity glide to victory in the people powered division, while others compete below in the same event. Greta, the mascot on the Poultry Club entry waits to get back to shore (distant left) while she verdicts the boat视力 after completing its race outside the event.

Poll
From page 1
A majority, 51.8 percent, think a major war involving the U.S. is not imminent while 23.9 percent did believe so. Maybe responses were skewed up a bit. 4.4 percent said they were not sure.

Logan said he was amazed by some of the answers and that he was happy how accurate the poll was because the margin was greater than the 3 percent error margin and in class Monday morning to interpret results of the poll, finished Saturday. Two obvious surprises, Logan said were the great majority who said they would register if Congress approved registration and that women should not be conscripted.

"Most students didn't want to be tagged as a draft dodger," said one student.

"I think this disproves conventional wisdom that the students are against the draft," said Logan.

Students in the class felt that as a whole, most people polled were not "super patriotic," but nevertheless willing to register.

When asked what the reasons were for registering or not registering, Logan said were the great majority who said they would register if Congress approved registration and that as a whole, most people were not "super patriotic," but nevertheless willing to register.

Another assumption the class interpreted from the question results is that since most people interpreted the major war as not imminent, they believe registration is inadvisable although actual drafting is less likely.

A low percentage of unsure and no opinions individuals. Logan said said students had definitely stands on draft registration and knew the difference between registering and actually being drafted. Most importantly, Logan said, the survey showed "50 Poly students know the issue and are concerned.

Even though a majority think women should be asked to register, Logan and the class declaRed Cal Poly conservatism exists because combat duties should be given only to men.

Draft exemptions are an exception

WASHINGTON (AP) - America's young men and women have become a rare breed: Conscientious objectors, under President Carter's register, have a chance to be discharged as conscientious objectors.

Carter has called for a draft. And he would need congressional approval to do so.

But at the same time, Carter has asked Congress to pass legislation that would allow conscientious objectors to avoid the draft.

Carter's proposal would be the first in 20 years to give conscientious objectors a chance to avoid the draft.

The theory is that any deferments and exemptions should be granted on the merits of the individual case, such as hardship or conscientious objector.

"There will be no student deferments, no occupational deferments and no automatic deferments for family status, such as having children," said Carter.

The only automatic exemptions, he said, will be for minister of religion.

Local draft boards will make the decision about who is eligible to register.

President Carter sent Congress a report recently detailing his decision to call for the resumption of draft registration.

Carter has stressed that there are no standards or present circumstances calling for a draft. And he would need congressional approval to do so.

**Carter stresses war preparation**

WASHINGTON (AP) - The Carter administration has approved efforts to improve American industrial readiness to produce greatly increased quantities of key weapons and equipment in the event of an emergency.

Meanwhile, the administration is building up stockpiles of ammunition, and the Pentagon is putting U.S. combat forces back into readiness status after the 'watch and wait' period from the expected production of a new missile.

"The U.S. industrial base would be hard-pressed to provide the quantities of war material necessary to assure meaningful support in a NATO conventional conflict after inventories of war reserve material were exhausted," Defense Secretary Harold Brown told Congress recently.

Brown said there will be no "blackmail" experts and other specialists to provide recommendations for "enhancing our industrial preparedness."

U.S. wants negotiations in Bogota

BOGOTA, Colombia (AP) - The United States has called on Colombian officials to use negotiation to win the release of some 37 hostages held by guerrillas in the Dominican Republic's embassy here. A second round of talks between the government and the captors of the mostly high-ranking diplomats is set for Tuesday.

The government released no details of any progress after the initial round on Monday and so no reason was given for the one-day delay between sessions.

The Colombian foreign minister and the U.S. ambassador here Sunday released a list of 20 diplomatic hostages being held. American Ambassador Diego Asencio is one of the 16 ambassadors or acting ambassadors on the list.

The United States has told Colombian officials that negotiations should be used to settle the hostage situation, according to the Austrian foreign minister. Secretary of State Cyrus Vance sent a letter to that effect to Austrian Foreign Minister Willibald Pahr, the presidential said Monday.

Sunday's 90-minute meeting was held in a van parked outside the embassy. The government said it was set up to clarify guerrillas' demands and to emphasize the government's interest in resolving the matter.

The government was represented by deputy foreign ministers Ramiro Zambrano and Camilo Jimenez. The guerrillas were represented by a masked woman. She was accompanied by Roberto Galan, the hostage Mexican ambassador, who is thought to be trying to mediate between the guerrillas and the government.

Kidnapper had abduction record

MEREDS (AP) - The man arrested for investigation of kidnapping a 4-year-old Ukiah boy, himself a kidnapper, served time in prison for the abduction of an 8-year-old boy, police officials said today.

Kenneth Eugene Parnell, 48, of Manchester, was in jail Ukiah for investigation of the Valentine's Day abduction of the Ukiah boy. Police in Merced continued to investigate the kidnapping of Steven Stayer, 14, seven years ago in Merced. Parnell had been booked yet for that abduction.

Rhodesian truce-force withdraws

SALISBURY, Rhodesia (AP) - The truce force began withdrawing its 1,300-man Commonwealth truce force in Rhodesia today as counting continued in the general election that will create a new independent Zimbabwe.

Hundreds of British-led Commonwealth troops were pulled out of the assembly camps where they monitored 22,000 black nationalist guerrillas during the two-month election campaign that began with the Jan. 4 Rhodesian truce. The soldiers are to begin flying home this week.

A handful of troops will remain behind at each of the camps as the guerrillas are integrated into the armed forces in preparation for Zimbabwe's independence later this month.

Britain is to grant sovereignty to its last African colony once a government is formed, based on the outcome of the voting last Wednesday.

Election results are to be announced Tuesday morning, said British officials supervising the count.

5.2 earthquake jolts Eureka

EUREKA (AP) - An earthquake jolted the north coast of California early today, but apparently the only damage was some windows.

"We didn't feel it here," said Dorothy Williams, who ran the Eureka police department. "Apparently it was a very short jerk." Williams gave a police telephone caller to the department.

The 5.2 registered 8.2 on the Richter scale and was centered in the Pacific Ocean about 50 miles southwest of here, according to U.S. Geological Survey reports from its Earthquake Information Service at Golden, Colo.

The Richter scale is a logarithmic scale and is recorded on seismographs. An earthquake on the scale could cause considerable damage in some areas when it strikes.

The tremor struck at 6:17 a.m. P.S.T.
Solar seminar
A seminar will be given on the Solar One Project by Joseph Reeves of the Southern California Edison Co., sponsored by the Electric Power Institute. The free seminar will be given in Graphic Arts 104 on Thursday from 11 a.m. to noon. Refreshments will be served.

Tax assistance
The Accounting Club is sponsoring a tax assistance program to aid students fill out their federal and state income tax forms. Students should bring their W-2 forms to the Mustang Lounge on Mondays and Wednesdays for free assistance until March 12.

Newscope

KCPR Review
This week on KCPR, Donna Pangburn will review Bob Seger's latest, "Again: The Wind," on Wednesday at 7:15 p.m.

Los Lecheros
Guy Davis of KVEC, Tim Scott of KJFO, Bill Larson of KATY, Captain Bullion of KSLY, Weird Al of KCPR, Dave Harley of KCOY and Nancy Bauer of KSBY will show their stuff in the DJ Hand-miling Contest on Thursday at 11 a.m. in the UU Plaza. Los Lecheros Dairy Club is sponsoring the competition.

Sailing Club
A limited number of spaces are available on the Sailing Club's annual cruise to Catalina on March 22-25. The cruise is open to everyone. For more information, go to the meeting of the Sailing Club Wednesday night at 8 in Science E-46.

Design women
Women in Environmental Design will meet Thursday at 7 p.m. in Computer Science 235 to discuss plans for Poly Royal and future club social events.

Student senate
The Business Council is now accepting nominations for a student senate position. Interested candidates should come to the council meetings, Mondays at 6 p.m. in Fisher Science Hall 292.

Interface
A membership meeting of Interface has been scheduled for Wednesday at 7 p.m. in the Business Administration Building, Room 113. The meeting is sponsored by concerned students in business with management information systems and computer science students with business opportunities.

Position open
The Architecture and Environmental Design Council has an opening for a public relations officer. The only prerequisite is lots of energy. Open to all Cal Poly students. For more information, call Scott or Ken at 546-1311 or 541-1149.

Auto-cross
The Cal Poly Sports Club will host an autocross on March 8 titled "When In Doubt, Wind It Out." Registration is from 8 a.m. to noon and costs $4 per car. Those interested should meet at the baseball diamond parking lot.

K CPR Debut
Dave Elliot Stein will be your host this week for Deb" Wednesday at 8 p.m. Dr. Hook, Al Stewart, the Hollies and the Moody Blues will be featured.

Film series
"Whatever Happened To The Human Race?", a five part film series, is being shown on Mondays by the First Assembly of God Church, 515 Cesar Romualdo Ave. The first film starts at 7 p.m.

Speakers Forum
The Speakers Forum meeting will be today at 11 a.m. in UU 219. All are welcome to attend.

Birth control
The Health Center will give two birth control workshops this week: one today from 10 to 11:30 a.m. and on Thursday from 2 to 3:30 p.m. Both workshops are free.

Student payday
Students who are student assistants or under the work study program can pick up their paychecks on Wednesday. This change is for the month of March only.

Play auditions
Auditions for Cal Poly's spring musical, "The Fantasticks," will be today and Wednesday from 7 to 9 p.m. in Room 212 of the H.P. Davidson Music Building.

CD Club
The Child Development Club will have a Poly Royal meeting every Tuesday night at 7:30 p.m. from now through April 22. The meetings will be in the Home Economics 196.

Draft coalition
Coalition Against The Draft will meet to continue planning for its May 3 seminar. There will also be officer elections. The meeting will be Wednesday at 6 p.m. in UU 219.

Soil speaker
Dr. Seim, a soils professor, will speak on William Albrecht at the Agricultural Forum, today at 11 a.m.

Dance Concert
A variety of dances will be performed by the Oivic Ballet of San Luis Obispo in the Cal Poly Theater on March 12 at 5 p.m. General admission is $4, students and children $3.

Kenny Loggins
Tickets On Sale
Thursday March 6
SUNDAY, MARCH 9, CAL POLY MAIN GYM
MUST BE 18 YEARS OR OLDER
NO CHILDREN OR CHILDREN UNDER 12 ADMITTED.
NO CARRYING AND VALID PHOTO ID REQUIRED AT DOOR.

TICKETS GENERAL: $8.50 ADVANCE, $9.50 AT DOOR

ASI CONCERTS PRESENTS
More dorms proposed; 595 spaces may be added

BY TOM JOHNSON

A critical lack of student housing in San Luis Obispo has spurred Cal Poly Housing Director Bob Bostrom to submit a request for 595 additional dorm spaces. Bostrom said Wednesday.

Bostrom said if the dorm measure passes, residence halls will be ready for student use in the fall of 1984. Executive Dean of Facilities Planning Doug Gerard was less optimistic, setting the date for 1985.

No names have been chosen for the proposed dorms, Bostrom said, but since the others have been named after mountains or parks, he hopes to continue in that vein.

Bostrom and a housing task force last fall presented a proposal to the Cal Poly administration that would increase the school's housing capacity by nearly 2,400 available spaces by building seven new dorms.

Though Cal Poly already has over 1,000 more dorm spaces than any college in the California State University and Colleges System, Bostrom justified the request, explaining that Cal Poly has a unique housing problem.

"This university has more on-campus housing than any college in the state system because Cal Poly, unlike the other state universities, is not a commuter college. San Luis is a small city and the college has statewide appeal, so 90 percent of Cal Poly students come from outside the county."

"Colleges like Los Angeles State or Nor..." Bostrom explained that plans for building the 595 additional spaces, which will be located on Slack and Grand streets next to Yosemite Hall, are currently at a standstill, and will remain so until the project clears a number of obstacles.

The most formidable barrier the housing department must cross is the securing of government funding for a project that may cost $6 million to $7 million, said Gerard. The housing department will be seeking a Housing and Urban Development interest subsidy loan that would reduce the interest rate on money borrowed to 3 percent.

The university would have to shoulder the entire building and resources cost, and if the asking price proves too steep, the project might be dropped entirely.

"We need to get a study done for cost. We have to pay 100 percent of the cost and this will be paid by funding. If it's too expensive, student rent would have to go up considerably so we wouldn't build it," said Bostrom.

The housing department is also casting a wary eye at the state's June election when Proposition 9, popularly called Jarvis II, will come before the voters. State university officials as well as local administrators estimated that if the initiative passes, Cal Poly funds might be cut as much as 30 percent. This could have a bearing on the passage of the dorm proposal.

"Jarvis II has a lot more questions than answers," Gerard said. The administration will probably decide on the dorm issue in June see if Jarvis II will have a direct bearing on the decision. If tuition is charged because of Jarvis, it may reduce the amount of students who want to come to Cal Poly and thus reduce the need for more housing.

"However, I don't think Cal Poly will be quite as affected as most campuses because we have a surplus of students who want to apply and the others don't," Gerard said.

Lastly, Gerard said the proposal will not pass unless President Baker and his staff view the housing scarcity as serious enough to merit the new dorms.

Should the dorm proposal receive the thumbs-up sign from the administration, Bostrom envisions the new complex as having one large dorm building 217 residents sandwiched between six smaller dorms of 63 residents each. The large dorm would be modeled after the current red brick dorms and the small dorms would resemble the North Mountain dorms.

Bostrom favors the Mountain design over the newer Sierra Madre and Yosemite Halls because he believes the mountain dorms allow a greater amount of quiet and privacy than the newer dorms. Also, Bostrom claimed he has received numerous complaints that the lower dorm rooms are not wide enough to facilitate rearranging the furniture.

Bostrom sees these dorms as being primarily for single students, though one might be built exclusively for married students if economically feasible.

"I'm open to converting it to married dorms, but I see it for single housing," Bostrom said. Students have to bear the total cost of the room, which isn't so bad if each is paying half. However, a married couple or wife would have to pay for both parties.

"As a result, it would be more economically sensible for the married student to live off-campus," said Bostrom. Students have to bear the total cost of the room, which isn't so bad if each is paying half. However, a married couple or wife would have to pay for both parties.

"I see the need for married student housing, but we can't figure out how to build it for a low enough cost so that they could afford it," Bostrom said.

For engineering students competition is name of game

BY LOREN SCHRADERMAN

One sure-fire method to land a job is to first inform employers you are looking.

Members of the Cal Poly Industrial Technology Society have entered the job market by producing a collective resume index which acts as an advertisement for students peddling their talents.

This index contains student biographical information that will help 51 students compete for technological jobs. The society sold the index to large companies for $50, but the success of the project is not fully known yet.

Technical Vice President Bill Dussell said, the original 25 copies have been sold and more resumes were being added.

He said the group expected to see results this fall, when the index will be used.

"I hope we can get some jobs," said Dussell.

Crate labels are a valuable item

COVINA, Calif. (AP) — Collectors are squeezing sweet profits from California's ripe past as old citrus crate labels resurface with price tags that might have bought the whole orchard back in the golden years.

The vibrant labels that onceeldig oranges and lemons now are pulling in anywhere from $500 to $500 apiece as works of art and remnants of a time gone by.

One drawback to the project, Dussell said, was that some students had left out because they missed indexing deadlines. He said he hopes there are other chances for them, because the resume index is a great idea.

We have fun working on the index while gaining exposure, he said. I just hope we can get some jobs.
BY SUSAN MEE

A Cal Poly student found a fried cockroach in his pancake while eating at the Vista Grande cafeteria Sunday, Feb. 24.

Larry Craig, a sophomore political science major, was halfway through his pancake breakfast when he thought he saw a Burns piece. “I picked it up and it was a fried roach,” said Craig.

Craig said he was quoted by the incident. He went to the kitchen to report it, and to try and get his money back. However, said Craig, “all they offered me was more pancake.”

Craig contacted the San Luis Obispo Health Department, but no action will be taken on this particular incident. Steve Carnes of the Health Department said the department is aware of the bug problem for Vista Grande.

“I was the guest speaker for a home Economics class earlier this month. We took a tour of Vista Grande, and it was then we encountered the roaches,” said Carnes.

Carnes said the department has talked to Food Services, and “the food service is not derelict in its duties. We have a contracted pest control. It’s the time of year for bugs, and it’s just a continuous thing that happens in food industries,” he said.

However, Craig insists that what bothers him the most is that he didn’t get an apology.

“They acted like it was a roach and you find cockroaches in your food every day,” said Craig. McPhee, manager of Vista Grande, says he did apologize to Craig.

“I said to Larry that I was sorry it happened and that he could have a free dinner. If he wants his $2.25 back for the meal, I won’t refuse it,” said McPhee.

Craig insists it’s hard for him to go into the cafeteria and eat. “My roommate and I have just been eating apples and other fruits,” he said.

Carson wants fewer hours

NEW ORLEANS (AP) — Johnny Carson says he wouldn’t mind staying on the job at NBC if his Tonight show was cut from 1 ½ hours to one hour.

“The last half hour gets kind of draggy,” Carson said while here for weekend ceremonies opening the Saenger Performing Arts Center.

“There has been speculation that Carson will retire from the Tonight Show, and I’m one of the most popular talk show TV personalities opening the Saenger Performing Arts Center.

RUSH HOUR

IN RIVERSIDE

IS GETTING

UP TO THE

SLOPES

AFTER WORK

BOURNS INC

ME's & EE's

The Southern California good life is pretty famous. And so is the Southern California rush hour. But there’s a Riverside solution to the problem of getting the best of both worlds. Bourns of course.

Bourns is a company of diversified products ranging from electronic components and instruments, solders and surveillance cameras to pediatric and adult ventilators and emergency equipment.

As an international leader in the electronic field, we offer you the opportunity to work on the latest products — in an innovative environment — with some of the top management in the industry.

And with Bourns in Riverside, you also get Southern California living at its best. Bourns enjoys a calimescent mountainies. Picturesque deserts. Reasonable housing costs. After hours, the city lives on.

Of course, as a growing leader, we offer excellent benefits and compensation.

If Bourns, excellent work environment appeals to you and if you have the desire and the drive to succeed, then we want you: then be at the Career Center on the site below.

It could be the day that you connect, with a rewarding career.

Law enforcement officers say 'long arm' ready for escapes

BY TOM JONHSON

Daily News Writer

When a prisoner escapes from the California Men's Colony, San Luis Obispo County is blanketed with officers from all county police agencies, assured police officials from the San Luis Obispo Police Department and the Cal Poly Public Safety Department.

San Luis Obispo Police Reserve Officer Cindy Sullivan and Lt. William Whitmar of the California Public Safety Department explained that an escape triggers a series of actions designed to maximize the chances of catching the "criminal.

The first is receiving the details of the escape from the Men's Colony which is two miles north of San Luis Obispo on Highway 1.

The message is transmitted over what Sullivan described as the "Red Channel," a police radio channel received by all county police agencies.

Actual message receiving is the only established procedure of attempting to capture the escape. Actual staking of the criminal requires decisions that are highly discretionary.

A police agency may even decide not to pursue a criminal if there is some doubt an escape occurred at all or if the man is not considered dangerous.

The way in which we act on a report of an escape depends largely on the situation. For instance, does he have a weapon? If a person is armed and dangerous, we will probably send one to two units with one or two men in each unit," said Sullivan.

Sullivan added that an escape's criminal background will also have a large bearing on how many units the San Luis Obispo City and county police departments and the California Highway Patrol will send. For instance, a murderer or rapist will generate a large police response.

"If the escaped prisoner appears as if he will be a threat to the community, a BOL—be on the lookout—message will be dispatched to units from each police agency. The officers are advised to be on the lookout for anyone who matches the description of the escaped prisoner and interrogate anyone who fits that description," said Sullivan.

The Cal Poly Public Safety Department engages in a separate but often integral, part of the procedure to catch a prisoner, said Lt. William Whitmar.

"If the escape sounds dangerous, then the Public Safety Department notifies all resident halls, telling the resident adviser to warn all residents about the escaped prisoner. The department will send two to three cars to patrol within a mile of the wall," said Whitmar.

Whitmar explained a clause in the educational code restricts the officers from covering an area more than a mile in radius around the campus, unless an emergency arises.

"We are limited to one mile off campus unless we are in hot pursuit or if another agency requests our assistance," said Whitmar.

The campus patrol can be an important part of the overall effort to capture the criminal, said Whitmar. Because Cal Poly is only two miles southeast of the Men's Colony, there is a chance the criminal might journey toward campus.

Sullivan said San Luis Obispo residents have a role in the capture plan—by not making themselves easy victims.

"Always-lock your door and windows. If someone knocks at your door, really check it out first before opening. If a strange person knocks on the door and says something like 'Delivery' and you're not expecting anything, don't open it," advised Sullivan.

Minimum price on wine abolished

WASHINGTON (AP) — A unanimous Supreme Court on Monday struck down California's practice of requiring wine wholesalers to establish minimum prices.

The court said, the pricing scheme, although supervised by the state, essentially was an illegal restraint on competition imposed by wine producers.
Students design therapy pool for disabled

BY BILL BROCK

A local elementary school stands to benefit greatly from the senior project efforts of three concerned landscape architecture students.

Students Brad Whaley, Scott Fred and Tony Hough are in the latter stages of designing a hydro-therapy pool for the Chris Juppsen School for the Handicapped, located next to the Pacheco Elementary School on Grand Avenue.

The project, titled Special Ideas for Special People, was sparked by the school's principal, Jackie Pratt, greatly from the senior Jesperson school to offer achetd stands to beneht workers went to the Chris Juppsen School on Grand Avenue.

Special Ideas for Special class is taught by Whaley's Barrier Free Design. The project is being designed as well as a special water table. The table would allow students to use their hands to play in water carried in an elevated trough.

The pool will be made of granite, as are blown concrete mold, with a surface area of between 50 and 100 square feet. At depth, the figure is near 120 square feet. The depth will range from two to onefourth to four feet, and water jets will be installed along the sides to keep the temperature between 88 and 92 degrees. The pool will be large enough to accommodate two, possibly three students, along with a volunteer therapist for each handicapped individual.

While trying to keep construction costs at a minimum, the group cannot say just how much the proposed pool will cost. "There is a very wide range of needs which we have to take into consideration," said Fred, a fifth year student from Blufford. The three designers have been aware of the specific needs since the project was presented and the three I.A. architecture students set to the task.

The biggest obstacle facing the group, main tained Fred is becoming aware of the specific needs of the pool users. In this respect, Beth Currier of the architecture students center has provided invaluable advice, he said.

The three spent much of last quarter getting to know the children involved by swimming with them and reading case histories of similarly handicapped persons. "There is a very wide range of needs which we have to take into consideration," said Fred, a fifth year student from Blufford. The three designers have been aware of the specific needs since the project was presented and the three I.A. architecture students set to the task.

Women bring home SCAA swimming crown

BY KAREN LUDLOW  
State Northridge was third swimmers in the top twelve with 481 points, followed by UC Irvine 436 and Cal State Los Angeles 102.

Cal Poly only captured the race, but won the 200-yard medley relay and finished second on Thursday of Pacmen. When the 100-yard backstroke event, the Mustangs laid the bed for a to a disqualification for an early start on the 400-yard free relay.

Sophomore Heather Davis turned in three individual firsts by winning the 50, 100, and 200-yard backstroke events, and a 1:59. All-AAC, finished the season with a major unbeaten in three events.

Cal Poly has only had a women's team for four years, and captured the SCAA crown by a narrow margin over Cal State Northridge last year.

Lori Thompson was part of the SCAA championship meet last weekend.

Trackmen trip UCSB

**Tennismen tear Chapman in conference win**

**BY SUE BOYLAN**

The Mustang men’s tennis team worked hard to win 5-4 over Chapman College on Cal Poly’s courts last Friday. The tennis team won four of six singles matches and one of three doubles matches to claim the win over Chapman. This is the first completed conference match for the Mustangs. Their first scheduled conference competition was against Cal State Bakersfield, but play was postponed because of rain. That match will be finished this afternoon at 3 p.m. on Cal Poly’s courts.

Including noconference matches the Mustangs are now 3-2 for the season.

Cal Poly’s second single, Martin Dydell played a long and tough third set match to beat Chapman’s Vick Kuman, 6-4, 6-7, 6-3. Coach Peet said the Mustang’s were strong in singles play. Peet said he looks forward to a good season for number one singles Robb Chappell.

The Mustang’s played five split set matches and won three of them. Peet said the hard fought victory over Chapman gives some indication of how competitive the league this year.

“The talk around the league,” coach said, “is that Chapman and Cal State LA are the teams to beat this season.”

Singles:
- 1st singles: Nick Yates (Chapman) 6-1, 7-6, 2nd singles Martin Dydell (Cal Poly) def. Nick Yates, (Chapman)
- 2nd singles Martin Dydell (Cal Poly) def. Vick Kuman (Chapman) 6-1, 6-7, 6-3;
- 3rd singles Lee Schiel (Chapman) def. Tom Morris (Cal Poly) 6-7, 6-3, 6-1;
- 4th singles Phil Seeman (Chapman) def. Ken Utsun (Cal Poly) 7-6, 7-6,
- 5th singles Andrew Weber (Cal Poly) def. Mike Lind (Chapman) 6-1, 6-2;
- 6th singles Bill Prink (Cal Poly) def. Chip Nedeau (Chapman) 6-0, 6-1

Doubles:

Women's basketball to see playoffs

The Mustangs ended their 1979-80 basketball season on a disappointing note, losing to U.C. Riverside for the third time this year in the NCAA Division II West Regional Tournament Sunday afternoon in Tacoma, Wash.

After earning a berth in the regional finals via a 66-46 come-from-behind victory over San Francisco State Saturday afternoon, the Mustangs dropped a 62-53 verdict to California Collegiate Athletic Association (CCAA) rival U.C. Riverside Sunday. The team will go in the school record books as one of the greatest ever. Aside from accomplishing its No. 1 goal—that of capturing the CCAA title—Coach Ed Jorgensen's Mustangs compiled a 22-7 win-loss record.

The 22 victories ties a school record set in the 1950-51 season by Coach Marilyn McNeil and earned a berth in the regionals for the fourth time in 10 years.

Cal Poly received its first invitation in school history to play in the AIAW Western Regional women's basketball tournament after the Mustangs beat Cal State Northridge Friday, 70-52, in Norridge, Calif.

The Division II regionals will be played at Cal Poly Pomona on Thursday and Saturday. Cal Poly will play Cal State Los Angeles in the first game Thursday at 6 p.m., while Cal Poly Pomona squares off with Cal State Dominguez Hills in an 8 o'clock game. The two winners play for the championship Saturday at 8 p.m. with the third place game preceding at 6.

Pomona gained entrance by winning the Southern California Athletic Association title, while Cal Poly and Cal State L.A. tied for second in the CCAA with 9-4 records.

The 75.8 percent winning percentage is the best in 25 years.

Cal Poly won its fourth CCAA title in nine years, and earned a berth in the regionals for the fourth time in 10 years.

The Mustangs and Pomona, both 22-8, will meet Thursday night in Pomona with the winner advancing to the title game Saturday night.

Pomona's win over San Francisco State on Thursday night will be recorded as a 70-52 victory over the Mustangs.
