Wrestlers were not eligible at nationals

BY JOHN KELLER
West Coast

Two members of Cal Poly's Western Regional championship wrestling team were academically ineligible during post season competition. As a result, the university may face disciplinary action.

President Warren Baker announced Friday, March 21, that a university review headed by Academic Affairs Vice President Hazel Jones has determined that two wrestlers were ineligible and five others are currently being investigated.

Wrestling coach Vaughn Hitchcock denied allegations Tuesday concerning his wrestling team. "I don't know what he tells people, but he can say whatever he wants," Jones said in response to Hitchcock's remark. The investigation, Baker said in a March 21 Telegram-Tribune story, focused on whether team members fudged class enrollments to remain eligible to compete in National Collegiate Athletic Association meets.

"When we found two students were strongly ineligible, we reported it to the NCAA," Jones said. "When we found the additional five students, that's how we found out about them."

Two athletes could not possibly complete the work in a class because they were added to the class role so late in the quarter, Jones said. One student never attended the class and therefore could not receive credit. Without credit, the wrestlers fall short of the required 12-unit load.

She has met with several faculty members and coaches individually to seek information. "I'm trying to get straight stories so I know what I am talking about," said Jones.

The NCAA has asked Cal Poly to investigate the allegations and submit evidence on their findings. The academic vice president is putting together a report on her findings which will be given to Baker. She said too many other things that occurred at the end of the winter quarter and beginning of spring have prevented her from focusing on the wrestling situation. It will be wrapped up within the next 10 days, she confirmed.

Baker will use the information to issue a statement to the NCAA. The association will evaluate Baker's response and possibly implement disciplinary action.

Vic Buccola, athletic director, refused to comment on the allegations and he could not specify what action the NCAA might take.

Hazel Jones said, "I don't know what the implications are. There are a lot of unanswered questions and we don't know what the NCAA will do.

A spokesman from the NCAA Enforcement Division in Kansas City, Dale Smith, said the decision is up to the Committee on Infractions. A five-member group consisting of educators from different colleges. He was unable to say if the Western Regional Championship would be forfeited by Cal Poly, but the committee could do anything from a private reprimand by mail to various probation sanctions.

Loss of funds could mean job

BY JAY ALLING

Moped rules proposed

BY TOM KINSOLVING

A new proposal that would vastly restrict the use of mopeds on campus will soon be decided on by the Cal Poly Campus Planning Committee.

The planning committee will meet sometime this month to consider the proposal, titled the Moped and Motorcycle Parking Related Issues.

The proposal prohibits moped drivers from using inner-core campus pathways, and restricts them to the North and South Perimeter roads. Three new parking lots will be established to accommodate both mopeds and motorcycles and will include moped racks.

If passed by the campus planning committee and approved by President Warren Baker, the proposal will become campus law this fall.

Doug Gerard, executive dean for facilities planning, admitted some moped drivers are "not going to be particularly happy" if the proposal is passed. He predicted the proposal will pass, and most likely will be approved by Baker.

Gerard said the proposal is necessary to combat the problem of increasing numbers of moped drivers on campus.

Attributing the recent surge in the use of mopeds to rapidly escalating fuel prices, Gerard said he is not against more people riding them.

"We just don't believe mopeds are compatible with pedestrian traffic," he said.

"The moped issue centers around concern for safety around the academic core," he explained.

University Police Lt. Leroy Whitmer was asked just how many moped-related accidents and complaints have been reported since January, 1979, to present.

"It is very rare that we get complaints," said Lt. Whitmer, who has recorded only one moped accident for this period. That was a Feb. 7, 1979 collision between a moped and an automobile, with no pedestrians involved.

Whitmer stated there are no records to show exactly how many mopeds are on campus, since registration with the University Police is not required.

Gerard said there are some inconsiderate moped drivers who have driven on sidewalks and even through hall corridors in campus buildings.

"It's an unswe and unrealistic... see page 6
Opinion

Farewell to the old way

I realize that most students feel Computer Assisted Registration is the best thing to happen to Cal Poly since sliced bread. I understand that CAR will be faster and more efficient; despite all this, I will miss our obsolete method of registration.

I have to admit that my feelings about the old system are not just nostalgia. You see, I was one of those privileged people who was able to preregister. I was a monitor.

"What?" you say. "She's just disgruntled because her free ride has disappeared." This is partly true. For not quite two out of three years I have been here, I haven't had to worry about getting classes I needed. With my senior year approaching, I face a dwindling list of classes left to complete, and the possibility that my schedule will no longer fit my needs.

Even though I am upset by this prospect, I will miss registration in the gym for other reasons.

First of all, I know the old system was less than ideal. I remember stampeding through the locker room and then being herded behind a person holding up a sign with my brand on it while I waited for my registration packet.

I remember feeling like I was arriving at the market when we entered the gym. But as I washed through the revolving reality began to take hold. This was registration. Like it or not, I'd have to face a new system. 1 remember stampeding into dorms. I understand that CAR will be the most convenient system in the long run. But the reason I will miss gym registration most of all is because the personal touch is lost when computers are involved.

Letters

Curious

In reference to the review of the Kenny Loggins concert, our curiosity leads us to question whether or not your reporter was actually at the concert, and if so, what drugs was he taking? His first hallucination occurred when he falsely pointed out that Kenny opened powerfully with This Is It. Actually, he was singing I Believe in Love, and he saved This Is It for his second encore.

Another display of the author's incompetence was his inability to accurately describe the behavior of the audience. We realize that this is an agricultural school, but we do take offense to being referred to as a flock of sheep and a herd of Goats only knows what. Most of the time we all walked on two feet instead of four.

Next is his ineptitude to describe Kenny as a performer. Kenny Loggins is Kenny Loggins—an individual. Why does the writer find it necessary to make allusions to Andy Gibb, Mick Jagger, and Rod Stewart?

The climax (too pun intended) of the article occurred when the author stated that "in the middle of the song, Loggins dove onto the piano in an ' ejaculational manner, apparently trying to mount the keyboard. This was totally rude, inaccurate, and uncalled for. No one else that we talked to has perceived this action as having any sexual connotations.

Pigeonless day in big cities foreseen

LONDON (AP)—Could the day be coming when Trafalgar Square has no pigeons? Could be, bird experts say, and the reason is that a "horrifying" proportion of London's pigeon population is now waddling around toeless.

Pigeons are the latest victims of man's nasty habit of littering. Discarded cotton or nylon string can trap and cut a pigeon's tender toes and feet. "Everywhere that pigeons feed in inner London, one sees some nursing swollen and suppurring feet," wrote pigeon expert Derek Goodwin in the spring issue of Birds, a quarterly magazine published by the Royal Society for the Protection of Birds.

"Others have lost several toes, or even one or both feet," said Goodwin, an ornithologist at the British Natural History Museum.

"No pigeon ever appears able to cope with the hazards presented by tangles of thread, cotton, wool and nylon fishing line freely thrown down on stations, in gutters and in parks," Goodwin said.

Ten percent of London's pigeons have deformed feet, said Eric Sims, author of the book, "The Public Life of the Street Pigeon." The vast majority have missing toes, but some are lame and a few are even legless, he said.

"But does man really care about the pigeon?"

"Decidedly not," said Royal Society spokesman Chris Harbard.

"Pigeons really do have a public relations problem. People put them in the same category as stray dogs—they're a pest."

By Tom Kinsolving

Pigeons—those fat, feathery inhabitants characteristic of so many big cities—have now become such a problem in downtown San Luis Obispo that the city council has arranged with a Cal Poly student to try a new way of controlling their population—trap them.

Carl Green, an industrial technology major, is constructing two 4-by-4-foot, six-inch tall traps, which will be placed in selected problem areas in the city. Green has had another of his traps in use downtown for the past two years.

The traps, which operate through the use of one-way gates, can catch up to ten pigeons at a time. Green, who will check the cages once every night, plans to send the pigeons to the wild life organization, Predator Project, in Santa Cruz.

There they will be fed to the organization's 40 peregrine falcons, an endangered species that can only eat live game.

"I'm a person that's been a contributor to an environmental cause," said Green, who first began trapping birds at age 13.

The idea to use Green's trap to solve the pigeon overpopulation problem came at a San Luis Obispo city council meeting last February.

City council members discussed ways to reduce the burgeoning number of pigeons, such as sterilization.

Geoffrey Grote, administrative assistant to the city administrator said the pigeons have been plaguing downtown for the last few years with droppings, molting feathers and the threat of at least 60 diseases—including meningitis, which large groups of the birds can generate.

US now sure hostages OK

WASHINGTON (AP) — The State Department said Thursday it now has convincing evidence that all 50 Americans taken hostage in Tehran four months ago are alive and remain within the U.S. Embassy there.

Until now, the department had said it could not be certain the 50 Americans, taken hostage in the embassy on Nov. 4, were all alive or that some had not been taken elsewhere by their captors.

But a department official, declining to be identified, said Thursday...

ASI elections

Petitions will be available from April 10 at the information desk in the UC for those interested in running for ASI president, vice president and senate. Filing deadline for the spring election is April 17.

Jones from page 1

But Jones, in a position he's held for almost four years, said someone should have let ASI know during the decision making process his job might be on the line.

"It was a big surprise," said Jones. "When I was hired for the position they said that the state money would always be there."

Jones and Brown said alternate means of funding his position are being sought by the administration.

The information director said he hopes those alternate means are found long before June 30, when the current fiscal year ends, or else he'll be looking for employment elsewhere.

"I cannot afford to take a cut, and I am not willing to take a cut in pay," said Jones, a 13-year professional entertainment journalist.

Brown said that means the administration may be able to afford some personnel cuts, yet to be determined, of the $9,900 currently given.

Winfall tax bill OK'd

WASHINGTON (AP) - The House Thursday approved President Carter's proposed "windfall profits" tax after defeating a final attempt by Republicans to make the levy more acceptable to the oil industry.

The internal affairs assistant doubted ASI can cover any percentage loss of funds. That's because it is hamstrung between groups already getting money and a $20 limit on ASI fees from each student's registration payment, he said.

"The main point from a student's perspective, is that there was no consultation," said Meyers.

Dean Brown agreed: "There should have been more consultation."

But Brown stressed the move was part of an across-the-board effort by administrators to re-evaluate cost-effectiveness.

"It's not evaluating Doug Jones himself," concluded Brown.

Extortionist threatens Safeway

SAN DIEGO (AP) — Some shoppers returned their purchases and some stayed away, but police said Tuesday they had found no evidence of any other poisoned food at two Safeway stores where an extortionist demanding 60 diamonds left cyanide laced items on the shelves.

A spokesman for Safeway supermarkets said 46 San Diego-area stores were about normal, but clerks in several locations reported skimpy business.

"I don't think people should panic," said Deputy Police Chief Duke Nylan. "I know there is a lot of concern, but there is no indication that there is any other poisoned food on the shelf."

He said goods in both stores had been carefully checked, but he acknowledged the shelves could not be called "completely safe."

Jim and Caroline Murray dropped by the Pad & Beach store—where police found a jar of poisoned teriyaki sauce—to return fruit they had bought. He said, "I don't think people should panic," he said. "I know there is a lot of concern, but there is no indication that there is any other poisoned food on the shelf."

Police puzzled by Dallas Murder

DALLAS (AP) — Police searched a $200,000 home Tuesday gathering clues in the death of a woman whose nude, strangled body was found near a bedroom mirror bearing the words "Now we are even Don," printed in pale pink lipstick.

Attorney Don D. Martinson told police he found the body of his wife, Debra Martinson, 28, when he returned home from work Monday night.

Officers said she had apparently been dead for several hours. The Martinson's 15-month-old son was found in the baby bed in another room, crying. The child was not injured.

Mrs. Martinson wore only a watch, a wedding ring, and rollers in her hair, police said. Her clothes were found in a neat pile, starting with bones and bra, panty hose, panties, and skirt, leading from the bedroom door to the body.

Elvis autopsy used as evidence

MEMPHIS, Tenn. (AP) — A secret autopsy report on Elvis Presley is in the hands of a Shelby County Grand Jury investigating the prescription-writing practices of Dr. George Nichopoulos, the late rock star's physician.

In addition to receiving the report Monday, the grand jury heard testimony from Dr. Eric Edward Koch. "Life will go on and we will do whatever has to be done."

So commuters by the thousands walked, rode bicycles and skated to work. They pooled their cars and chartered buses, boats and airplanes to get to Manhattan.

While many of the city's larger companies, which had prepared for the emergency, said most workers were on the job, others saw their staffs depleted.

Koch said his operations office estimated, 25,000 rode bicycles to their jobs in Manhattan, another 30,000 walked and 10,000 to 12,000 arrived by boat.

The Jewish holiday of Yom Kippur and Easter school recess eased the impact, but officials warned "the crunch" would come Wednesday.

Reagan urges halt in negotitation

SHREVEPORT (AP) — Ronald Reagan said Tuesday that transfer of the American hostages in Tehran to the custody of the Iranian government would be "a step forward," but he added it may be time to halt negotiations with Iran.

"There does come a point where, you see, we've done all the talking that's going to be done. This is it," said the Republican campaign frontrunner.

"Ask if he thought the United States was at that point with Iran, Reagan replied: "I would think that after five months we are.""

Reagan criticized President Carter for not delivering an ultimatum to Iran earlier, but he said he would not comment on the current negotiations for fear of "interrupting the negotiations that might endanger the hostages.""
Organization started to aid affirmative action

BY SUSAN MEB

In an effort to coordinate and help implement Cal Poly's Affirmative Action program, a new organization, the Equal Opportunity Advisory Council, was recently formed.

Under the direction of chairwoman Pat Stewart, acting director for the Learning Assistance Center, the council will focus as an advisor to President Warren Baker on recruitment and goals for Cal Poly, as outlined by Affirmative Action.

Affirmative Action is a comprehensive results-oriented program designed to increase the employment of ethnic minorities, women, handicapped and other unprotected groups through active recruitment and to increase the representation of these groups at higher levels of responsibility.

According to Bob Timone, associate dean of students, the council was formed to coordinate these efforts.

"The council is not a grievance body for specific individual complaints," said Timone. "But rather, the council is interested in specific complaints that relate to the institution."

Pat Stewart agreed with Timone.

"We will be checking to see that the university as a whole is meeting its goals," she said.

The council is made up of two subcommittees: an employee Affirmative Action and a student Affirmative Action.

Since the student coordinator, Leonard Gonzalez, was only recently appointed, the student committee has yet to get underway.

One of the major areas the EDAC is working on is President Baker's goals and timetables for achieving a balanced faculty, professional and supportive staff. Each year in conjunction with the U.S. Department of Health and Welfare, Cal Poly submits a goal and timetable account of how many minorities, women and handicapped persons it should hire.

Presently, HEW is reviewing goals and timetables for this year. According to Smiley Wilkins, Affirmative Action Coordinator, a response should be received within the next few weeks.

Wilkins said the hiring percentage is based on national, state and county figures.

"The percentage of women and minorities needed is based on utilization analysis. The University of Colorado collects and provides data, approved by HEW, of the percentage of women and minorities in professional and faculty positions across the country," said Wilkins.

Cal Poly then compares its own percentages with the data from the University of Colorado. Based on those comparisons, the decision is made as to how many minorities and women should be hired.

Another goal of the council will be to change recruitment, said Stewart.

"The council will be looking to get some unrepresented groups to apply for jobs. We have to get some innovative ways to encourage people," she said.

Bob Timone is sure that Affirmative Action will outgrow itself.

"In time, it will be obsolete, we will do all that Affirmative Action wants naturally. But for now it's the means of deriving models, and getting the ball rolling," he said.

Stewart hopes to get the ball rolling in spring quarter.

"Spring will be a work time for us. We have a cultural and unifying group...and I think we can give President Baker some good input," she said.

Stewart is adamant that students will benefit from Affirmative Action.

Nixon makes appearance in comic strip

If you follow the adventures of the "Amazing Spider-Man," then you know that former President Richard M. Nixon has made a sudden and mysterious appearance in the comic strip.

He first showed up two Sundays ago, flanked by Secret Service men outside his New York apartment. Then, last Sunday, there he was again.

In his first appearance, the former president is recognized by the Kingpin of Spider-Man's roundabout who has just been paroled from prison.

"Big deal," sneers the arch villain, as he watches Nixon enter his apartment. "Long as he stays on his turf, I'll stay on mine."

Nixon's second appearance has him leaving the apartment. When he spots one of the Kingpin's functionaries he turns to a Secret Service man and says: "We've some unwanted characters in this neighborhood, gentlemen! I've seen mighty few legal flags lately."

In the next panel, Nixon is seen walking down the street, his hands clasped behind his back, in a characteristic pose.

"I don't feel we have perhaps we should have moved elsewhere," he says, over his shoulder. "I'll demonstrate democracy in action by mingling with the little people."

"Nixon is out of the strip, from here on," says John Romita. "It was supposed to be just a passing cameo, but he got in again last week, and the character has developed a little more."

 hiện N Kiss the sheriff and Stan Lee are the co-creators of the strip, which appears in more than 600 newspapers across the nation. Romita draws the panels and Lee writes the story line.

"It was just a gag," says Lee. "I don't feel we have the right to put real, living people in the stories without their consent."

Romita, contacted at his Marvel Comics studio in New York City, says they included the Nixon cameo because they felt the former president was a public figure.

"It gives the strip credibility," he says. "Milton Caniff used to do it all the time back in the 30's, with "Terry and the Pirates."
Graphics gets new press

Cal Poly relief printing students have one of the nation's pioneer press manufacturers to thank for the most recent equipment addition to their laboratory.

A new Kluge Automatic Foil Stamping and Embossing press is already in use in the graphic communications department in the graphic communications department in use. Henry Brandtjen Jr., president of Brandtjen and Kluge, Inc., formally presented the $32,000 press during a campus ceremony in December. He said Cal Poly was selected for the gift because its graphic communications department is noted as one of the finest educational programs of its kind in the nation.

"As far as we know, it is the only university-level program in the nation that teaches a special course in foil stamping, embossing and die cutting," Brandtjen added.

Joseph Truex, acting head of the department, emphasized the importance of the new press to the university and students in the relief printing specialties course.

"Since the Kluge press has become the graphics industry standard for foil stamping and embossing, the Brandtjen and Kluge gift means our students can be taught the techniques of die cutting, foil stamping and embossing on the same equipment they may use when they enter the job market."

Cal Poly’s wrestling squad ended a successful 1980 season on a sad note, placing a distant twelfth in the NCAA Division I Wrestling finals March 13 through 17.

Coach Vaughan Hitchcock had visions of his team cracking the top five after qualifying all ten wrestlers for the finals, but that vision was shattered the first day of competition when seven of 10 wrestlers were eliminated.

Fischer, after breezing to a 12-5 victory in the first round, was edged by number 10 ranked Randy Hoffman in the second round. Fischer hung on to take a pair of consolation wins, but bowed out to Jim Zenk of North Carolina in the consolation finals Sunday by a close 5-2 margin.

Barksdale earned a rare accolade by being awarded All-American status as a freshman after placing eighth in the 142 division. Barksdale avenged an early season loss to Mike Preminger of Humboldt State by pulling out a 8-6 win with a reversal in the last minute, but suffered a narrow loss to Appalachian State’s Hifiger and was pinned by Lehigh’s Dennis Redd.

While Fischer and Barksdale shined, a dark cloud of disappointment hung over the Mustang’s top seeds Scott Heaton and Rick Worel. The two Cal Poly seniors had hoped of seeing their college careers with individual titles under their belts, but neither lasted past the second round.

Fischer notched two early decisions with relative ease, but lost to Auburn’s Jamie Miklovich in the second round of the preliminaries. Worel was upset by Gary Chadwick of the Air Force in the first round and was eliminated when Chadwick lost his second bout.

Heaton and Worel were not the only Cal Poly wrestlers who fell before the second round, as seven of 10 wrestlers were shot down the first day.

The Mustangs placed 12th in the team standings with 18 points. This was the best team finish in Cal Poly history. The Mustangs won 13 matches, including a victory in the SCAA conference championships held in early February. Cal Poly has now produced a women’s swim team in Cal Poly history. The swim team finished the regular season undefeated, including a victory in the SCAA conference championships.

Though the Mustangs did not take home the big prize, Cal Poly set four school records during the past three years.

Heather Davis set new marks in her second year. Davis was seeded eleventh in the 100 breaststroke. Davis was elec­

Only four more points. Cal Poly’s women’s swim team needed only four more points to become AIAW Division II national champions. The Mustangs, who recorded 283 points, tied for second place with Cal State Northridge at the swimming and diving championships. Host Clarion State of Pennsylvania won the three day meet with 396 points.

The second place finish at nationals is the highest finish for a women’s team in Cal Poly history. The swim team finished the regular season undefeated, including a victory in the SCAA conference championships held in early February. Cal Poly has only produced a women’s swim team since the past three years.

Though the Mustangs did not take home the big prize, Cal Poly set four national records on its way to national recognition. Sophomore Heather Davis set new marks in her specialties, the 50 and 100-yard freestyle (1:45.01, 1:45.19), ninth in the 200-yard butterfly (2:12.28), and third in the 1,650-yard freestyle (17:37.31). All times set school records except the 400-yard IM.

Senior Traci Serpa placed third in the 50-yard freestyle (24.82), eighth in the 100-yard freestyle (44.86), and seventh in the 50-yard butterfly (27.48). Debbie Forehand, Bottom, Davis, and Jodi Jennison were also honored with All-American certificates.

Powerful Bruins sweep spikers

UCLA entered Saturday's contest with a 9-0 league record and a 21-2 mark overall, which fell short of last year's, when the Bruins tallied a perfect 22-0 record. UCLA lived up to its billing as top team in the CITAC this year, using a well-balanced offense and defense to dispatch the Mustangs 15-1, 10-10, and 15-8.

The Bruins' defense shone in the first game as Cal Poly's front line of Mark Booth, Thuan Putman, and Craig Cummings could not penetrate UCLA's front line. Sophomore Steve Gilman did much of the damage for the Bruins, blocking several slams. The only point the Mustangs scored in the game came on an illegal hit by the UCLA defense.

The UCLA offense meanwhile, kept the locals off balance by alternately slamming spikes and lobbing the ball over the Poly defense.

Cal Poly rebounded in the second game, as the Mustangs had to rally from a short point deficit late in the game to nip the Mustangs 15-14.

The Mustangs assumed an early 2-0 lead, thanks to

Craig Cummings digs out slam in UCLA game.

the efforts of hitters Booth and Lauren Strand, who dug out a couple of would-be kills and put two points on the board on a spike and a blocked shot.

The Bruins then settled down, capitalizing on several Cal Poly out-of-bounds shots to build an 8-4 lead. But then the polished UCLA team began committing mistakes of their own, as they drilled three shots out of the court and were called for creeping the center line. The Cal Poly defense stiffened, as several players dug out Bruin slams and setter Strand blocked.

However, the inexperience of the young Mustang volleyball squad began to surface when the Bruin hitters had problems finding the court. The Bruin offense also managed to turn itself around when setter Karch Kiraly recorded a spike and blocked a shot. The rejuvenated UCLA offense reeled off the next six points to clinch a victory.

The Bruins ran away with the third set, putting the Mustangs away 15-8.

The Bruins sailed to a 14-4 lead, but could not deliver the final blow to seal the win. Putman, Strand, and Booth kept Cal Poly alive with a trio of slams and a blocked shot to narrow the margin to six.

The ball exchanged hands four times before UCLA's Dave Saunders spiked one through the seam of the Mustang defense to clinch a bruin victory.

The Mustangs travel to

Los Angeles today to
tangle with A tough USC

squad. The local squad put up a hard battle against the Trojan in last week's match, as the Mustangs extended USC to five games before bowing out.

"Oregon State snubbed Cal Poly," Cal Poly head track and field coach Steve Miller didn’t mince words as he excused this week. He’d rather have Cal Poly head coach John Smith before him. "They competed extremely well, had several personal and school records, showed a lot of poise."

Miller said Cal Poly’s success was a "major role" in the outcome of the meet, Miller theorized.

Cal Poly won eight of the 18 events, while the Beavers outscored the Mustangs by 28 points, 93-65 on a wet, windy and cold day in Corvallis, Oregon.

"The Mustang’s poor showing in the Oregon meet was a turnaround from the previous weekend when four Cal Poly athletes notched first-place wins in the prestigious Martin Luther King Games."

One Cal Poly school record was set, and another Mustang qualified for the nationals in the Oregon meet. Shot putter Brian Faul extended his own meet record to 18.76 meters. Faul was in fourth place, with two others behind him in Thursday to add to her yard individual medley and placed seventh in the 100-yard race.

Davis showed a lot of poise. "Rather tall it like it was," she said.

Jimi Schanbel was the winner in the 1,500-meter run, clocked in 4:57.01, while teammate Jeff Small won the 800-meter run (1:53.82). Early world leader and Mary Bautista led a 1-4 Mustang sweep in the 5,000-meter race.

"Our processors are convinced they need to help shorten their lines of surplus. A 20 percent this year could have on consumer prices.

"Another problem for farmers in the closing of several canneries in California."

"Surplus tomatoes result in less profit"

SACRAMENTO (AP) -- There are too many canned tomato products available to stock markets, California farmers say, but the warehouse surplus will lower prices to California tomato farmers, including those in the San Joaquin Valley.

Farmers got about $64 a ton for canning tomatoes last year, but the best price so far this year is $50 a ton, compared with $5.80 a ton for the tomatoes, said Robert Holt of the California Tomato Growers Association.

"It's definitely a buyer's market," said lidie Mortensen, spokeswoman for the tomato industry public relations operation based in Modesto.

"People are ex-pected to be down by about 20 percent this year to help store the surplus. A grower's representative says cutting acreage now will help steady the industry's future.

"Our processors are determined to reduce profits for the coming year to a range of 5 million tons and if this is accomplished, we should be on the road to a more stable industry in the following years," said Fred Stewart, president of the grower association.

Stewart says California farmers could produce 10 million tons of tomatoes, but canning companies could only handle a maximum of 8 million tons.

"The meeting was a turnabout from the previous year. "We're not as successful in the King games," said Steve Oran, who attended the meeting with a breakdown of this year's track record.

The men's track team will travel to Fresno Saturday to compete in the Fresno State Invitational, while the girls' team will battle in the UC Berkeley Invitational.
