Creek's recovery 'may take years'

Survey outlines student views on improving UU

**BY KARIN RICH**
Staff Writer

Improvements will be made to the University Union as the result of a student survey conducted by the University Union Board of Governors.

The intent of the survey, according to Jeff Gee, chairman of the UUBG, was to "basically get in touch with the university community." The surveys were distributed and collected at the Union's information desk and Activities Planning Center between March 10 and March 17. The board had a return of 441, a figure Gee referred to as "exceptional" since the surveys were administered "over-the-counter."

The survey polled individuals to find out how often the Union is used, and what areas are most frequented. The poll revealed that the majority visit the Union because of the bookstore and the food, and Gee said that he would like to see the Union's "parking" area expanded as well.

The survey also solicited complaints and ideas for improvements. Comments were varied and ranged from wanting "more studying... and activity areas" to "less weirdos sitting and staring at the walls." An equal number of people wanted the music turned down as those who wanted it louder.

Many mentioned the poor lighting conditions both inside and outside the Union as a major area of concern. Gee said the board has approved the purchase of new lamps for the plaza and the outside stairs. The board's next project, he said, will be improving the lighting in some of the Union's indoor areas.

According to Gee, there is a good possibility for scheduled programs to take place in the San Luis and Bishop Lounges, which are the large studying areas on the second floor. "There will be some moans and groans, and loud complaints," he said, but he said he believes if handled properly, the rooms could be used for meetings and lectures on an infrequent basis.

Gee said there were also numerous complaints about the heating/cooling system, but little can be done to help. Each room was installed with its own thermostat; so it could be heated or cooled as needed, but the system hasn't been working that way. Gee said that in this case, "something that is supposed to be working, isn't."

The lack of space for more studying and activity areas led to the possibility of adding a third floor to the Union. The complex was originally designed to accommodate a third floor in the future, but only if the fee was raised between $5 and 10. The majority of those polled gave no response.

Gee estimated the cost would be around $2 million, enough to cover the project for an increase in the Union fee. "Money is tight right now," he said, "we'll just have to wait and see." Twenty-four percent said they would be in favor of adding a third floor, but only if the fee was raised between 85 and 10. An equal 24 percent were not in favor of the idea at all. The majority of those polled gave no response.

The addition of the third floor would mean room for some of the student suggested activities, like a TV room, a music room, a record store and a pizza parlor. "We'll do it," said Gee.

Gee said the survey was a successful method of "getting in touch" with the students, and that it can be the start of a new UUBG. "As many avenues of communication with the university community should be explored as possible," he added.

"My hopes are a little better now for the fish," he added. Please see page 4.

San Luis Creek may take as long as seven years—possibly longer—to recover from an oil spill which occurred on April 7, says one Cal Poly biology professor.

"The problem is the fish going to sea this year have been killed—there will be no run this year," Richard Krejsa told Mustang Daily during a recent interview.

"Three to five years from now, there will be no fish coming back from this year to spawn, and the cycle will continue."

The lampreys were especially hurt by the spill, Krejsa said, because of their complex and unusual life cycle. The fish spend four to five years of their seven-year life span in the sand of the creek bottom. The oil penetrated the sand and killed the younger fish, as well as the free-swimming older lampreys.

"Therefore it will take four to five years to replace them, the lampreys," Krejsa said.

Professor Tom Richards, also of Cal Poly, expressed concern over the methods used to retract the oil from the creek.

"I think maybe getting the oil out did more harm than leaving it alone," Richards asserted.

The California Conservation Corps used a high-pressured hose to sweep and churn the creek bottom, which housed trapped oil globules. This oil was then sucked up from the surface.

Krejsa said he too would normally have opposed the procedure, because it is primarily used to dredge out and kill streams.

"But in this case, all life was already dead," he claimed.

"My hopes are a little better now for the fish," he added. Please see page 4.

**ASl officers-Candidate sees need for many ASl improvements**

**BY MARY McAllister**

A need for improved communication between students and administrators and greater ASI executive staff efficiency motivated Dennis Hawk to run for ASI president.

Hawk, a junior business administration major from Simi Valley, says he will stress student issues and political participation in his bid for the ASI's highest office.

Some of the issues he addresses are on-campus banking, an improved CAR procedure, greater campus-city relations and more parking facilities.

Hawk said he hopes to initiate on-campus banking with automated tellers, like acash register branch of a local bank.

"Local banks have expressed interest in this idea and other campuses such as San Diego State have this service," he said. "It is congested downtown and with our high student population and extensive lab time it is often difficult to get to.

"I think this idea is very much needed on campus and I hope to start this very quickly," he said. Please see page 4.

IRA: Bobby Sands near death  
BELFAST, Northern Ireland (AP) - Catholic rioters hurled gasoline bombs at the police and British troops Wednesday in support of Bobby Sands, the jailed IRA guerrilla reported so emaciated by 60 days of fasting that he was granted leave to keep his bones from breaking through his skin.

The rioters set fire to a tobacco factory and furniture warehouse but freemen extinguished the flames and security forces dispersed the mob with plastic bullets. There was no immediate report of injuries in the clash in north Belfast.

Sands, recently selected to British Parliament, is in prison on 8 weapons possession conviction. He is on hunger strike in a bid to force the British government to grant jailed Irish Republican Army guerrillas that would give them political status.

Press Association, British news agency, said Pope John Paul II's personal emissary, the Rev. John Hagen, was with Sands for a second time in a hospital wing at the Maze Prison in an effort to get him to call off his hunger strike. But confirmation was not immediately available.

Magee visited Sands at the Maze for one hour Tues­

day night to return to the prison Wednesday after

meeting with Britain's top minister in Northern

Ireland, Secretary of State Humphrey Atkins, who
told him Britain would not grant Sands' demands.

Sinn Fein, the IRA's political wing, said Sands, who

has twice received the last rites of the Roman Catholic
took, was "extremely weak." and could die "at any

moment.

Meanwhile, civil defense committees sprung up in

both Protestant and Catholic areas of this British

union capital and mapped emergency plans for first-

aid stations and evacuation centers should Sands die

and widespread violence break out.

Yorksripe Ripper' pleads guilty

LONDON (AP) - Truck driver Peter Sutcliffe admitted

Wednesday he is the Yorkshire Ripper, killer of 13

women and namesake of one of history's most

mysterious and brutal serial murders.

Sutcliffe pleaded guilty of manslaughter, guilty of

murder of 11 others, and guilty of assaults and

Sutcliffe is to stand trial before a jury in the Old

Bailey next Tuesday.

Meanwhile, the Bard's name, Sutcliffe, 34, showed no emotion during

Wednesday's reading of the charges against him, glanc­
ing only briefly at his wife. Some, as he left the dock

flanked by four prison officers.

Sutcliffe's defense attorney, Ravin, 34, showed no emotion during

Wednesday's reading of the charges against him, glanc­
ing only briefly at his wife. Some, as he left the dock

flanked by four prison officers.

Several dozen marching arm-in-arm down the middle of

rush hour Saturday, several of the city's most

terminal problems were resurrected.

One 4 percent gain in the index of leading

indicators - the biggest increase in almost 11 months

since Oct. 1978 - added to signs that the economy was

slowly-heading up.

The Commerce Department, which computes the in­
dex, considers price increases in raw materials - including oil and gas - an ominous omen despite Reagan's contention that the economy urgently

needs the proposals he is asking Congress to approve.

"Economic uncertainty continues to mount," the department said.

"Weak domestic demand remains unaccompanied by sustained improvement in the world trade environment. If the United States does not manage to increase its exports, it will be that much more difficult to succeed in curbing inflation.

"'We can not rely on forces abroad to achieve the necessary inflation curtailment. The United States must do more.

"'We are not going into bankruptcy," White warned in an interview this week in The Boston Globe. "This city will be technically bankrupt by July 1st if nothing is done. Bankruptcy ... From Camelot to

Singing telegrams: more than a jingle

BY RUSS SPENCER
Staff Writer

Delivering singing telegrams. It’s not exactly a nine-to-five job.

And to Kathy Dorris, a former Cal Poly student who opened the Penguin Fantasy Singing Telegram service in San Luis Obispo just two weeks ago, it’s really not even a job at all. To her, it’s “just a lot of fun.”

Dorris began delivering singing telegrams in Fresno a year ago, after spending a year working as a barmaid in England. Before that, she had spent two years attending Cuesta College and three years was a P.E. major at Cal Poly. Only a few units away from receiving her bachelor’s degree, she says, “I know I’ll go back someday, but now I’m in no hurry.”

The Penguin Singing Telegram Service offers more than just the traditional birthday or Christmas jingle sung by a man in a bellhop outfit. Dorris has costumes and songs “for every kind of occasion you can imagine.”

She developed the various characters and wrote the songs she uses herself. She now has 20 different songs, and a variety of characters ranging from Superman to a stripping nurse.

“We do everything from birthdays to thank you,” she says. “There’s even a no-rejection song, if someone just wants to embarrass or surprise someone.”

Dorris acts out all of the female characters herself. The most popular of her characters is “Kitty the Can-Can Girl,” she says. Dorris describes Kitty as a girl “straight from Dodge City, who is chasing the man who forgot to leave her a tip.”

She will also dress in a black tuxedo top with a leotard bottom, a “Fluffy the French Maid” outfit, and a frumpy nurse outfit, which she later strips out of to reveal a “Wonderful Woman” costume underneath.

The male characters are played by her boyfriend Dave Little, her brother-in-law Bob Little, and a variety of other characters Dorris sometimes “borrows” from the male chorus at the Civic Center. “Prince Charming” character is the most popular, Dorris says. “Prince Charming” is looking for the girl who gave him his first kiss when he was a frog, she says. He will kiss the girl’s hand around in a style “bordering on gay.”

Dorris also sings many telegrams dealing with the successes, and sometimes failures, of love. She remembers one time when she had to sing a marriage proposal. “A girl called up and said, ‘I want to propose, can you sing it for me?’” she says. Once, she says, she had to tell a man that his wife was pregnant. “He was in shock, in a big way, we’ll do it. Instead of just sending flowers, why not have them be delivered and be remembered?”

Dorris says that she was embarrassed only once in all of her singing telegram deliveries. She was singing as one of Santa’s helpers in a crowded restaurant when her red velvet skirt fell off. “I just finished the song and ran out, trying to hold it up the skirt,” she says.

The telegram delivery is often “suggestive,” but in a funny way, Dorris says. “I’ve had men run out of the room, hide under tables or run into bathrooms,” she says. “Sometimes I literally have to chase them.”

The embarrassment that comes with receiving a singing telegram is hard to avoid. Dorris says. She has heard of “people will go to any length to embarrass a loved one.”

Dorris says that she was embarrassed only once in all of her singing telegram deliveries. She was singing as one of Santa’s helpers in a crowded restaurant when her red velvet skirt fell off. “I just finished the song and ran out, trying to hold it up the skirt,” she says.

The telegram delivery is often “suggestive,” but in a funny way, Dorris says.

The trademark of the Penguin Fantasy Singing Telegram service is the gift of a Hawaiian lei when the telegram is delivered. The lei is accompanied by a phrase such as, “This is the last lei you’ll get from me,” or, “What would a birthday be without a birthday lei.” Dorris says she would leave the lei on in certain circumstances.

“I was in a church. I’d just say congratulations and leave it at that.”

If a customer wants something “obnoxious,” Dorris says that she can bend the act, but that it all depends on the setting. “Sure we can have a girl for a bachelor party, but will she take her clothes off? No. It’s a classy act.”

Still, Dorris says that the acts aren’t restrictive in any way. “I’ve been doing this for a few years now, I can remember. I love performing, but not in the classical sense.”

Two Cal Poly engineer- ing students have been awarded scholarships made possible by Pacific Gas & Electric Co.

Jay A. Madden of Rosemead and John D. Randolph of Yuba City were selected for the $2,750 Career College Scholarships after having been interviewed in San Francisco by PG&E representatives.

As scholarship recipients, Madden and Randolph will participate in the company’s employment program during the summers of 1981 and 1982, according to Dr. Robert G. Valpey, dean of the School of Engineering and Technology, who announced the awards.

Valpey said that, in addition to providing funds to cover educational expenses, the program provides valuable experience in areas related to the students’ career objectives.

Recovery of creek's ecosystem could take years

From page 1

"In the past, if an accident occurred, the fish digging nests in a previously poisoned area would be dropping eggs into oily water, which would kill the eggs. It's hard to predict, but they next year's fish may have a free sail." Krejsa said he believes Fish and Game estimates of 18,000 fish killed are far too low, because of a similar accident 14 years ago which resulted in 50,000 being killed.

In 1969, three kills occurred in eight days—a striking coincidence to the recent chain of events, Krejsa reported. First, a truck dumped about 5,000 gallons of diesel fuel into the creek, about the same place a pesticide truck overturned earlier that month. Then Greyhound began using a new detergent to wash their buses. Krejsa said. What they thought was a sewer drain was a storm drain leading directly into the creek—50,000 fish including 5,000 steelhead were killed.

Soon afterward, the sewage treatment plant overflowed, dumping more than a million gallons of raw sewage into lower San Luis Creek. The three accidents resulted in a complete kill, Krejsa said: "This year, on Wednesday, April 1, a flatbed trailer with a tractor overturned in the creek, about the same place a pesticide truck overturned earlier that month.

Hawk stresses issues

From page 1

"I don't agree with (Alex) Madonna on very main things, but I don't think he should be made a scapegoat for this," Krejsa said he doesn't feel the creek should be restocked right away because the fish may have no source of food.

"If anyone is in need, the money should go for a study of the long-term effects the oil and pesticide accidents will have on the creek—how long it will take to re-establish the aquatic ecosystem."

Foundation cuts milk price

Foundation Food Services dropped its price on the one-third quart carton of Cal Poly milk from 45 cents to 35 cents when it was discovered that dorm vending machines were selling the milk at a lower price than campus food facilities.

The interhall council brought a complaint to the Foundation at the end of winter quarter that milk was being sold for 10 cents less in dorm vending machines than at campus food services.

"It's our policy to always have uniform pricing across campus, so when it was brought to our attention that a private vendor was selling the carton of milk for 10 cents less than we were, we immediately dropped our price to match theirs," said Mike Voth, food operations manager.

The Cal Poly dairy sells all one-third quart cartons of milk to retailers at 18 cents per carton. "It's up to them to decide what profit they want to make," said Jim Bruns, dairy manager.

All campus food prices are set by the Food Service committee, according to Voth, who said they "try to maintain a policy of consistent food pricing.

Focus on Blood Drive

Blood Drive Chumash Auditorium

Faculty, staff, students, and immediate family members are invited to donate to the campus blood account. The drive is sponsored by the Alpha Upsilon, Cal Poly Waves Club, Kappa Delta, Student Health Services, Accounting Council, and the student Health Center. The campus blood account is available to all faculty, staff, students and immediate family members.

Due to the interest in the drive, "GIVE BLOOD" will be held on Thursday, April 30th from 9am-2pm in the Student Health Services. Please stop by and donate to your favorite cause and help save a life! "Ask about our Mini-Valais!"

HUG seminar seeks to free persons of inhibitions

BY TOM KINSOLVING
Special to the Daily

It was a sunny Sunday afternoon at the final session of what had been an indeed emotional experience. Nearly 50 young men and women, almost all strangers two years before, stood in a circle with arms around each other. Each one of them took a minute to tell the group about a week's trip out of town. A sense of warmth and unique togetherness was the mood.

It was the climax of another Human Understanding and Growth (HUG) retreat, which took place April 10-12. Held every quarter in the beautiful, rustic environment of Camp Pinecrest, just outside Cambria, HUG is more than just an exercise in interpersonal communication.

Started over ten years ago with a grant provided by a California oil company, HUG was initiated as a workshop to examine and improve leadership skills at various California universities. It quickly evolved into a permanent committee at Cal Poly and the HUG retreat at Camp Pinecrest became a quarterly event.

"I describe it as a series of scrambles on leadership," says Sam Spoden, a Poly student affairs officer. "This also includes workshops on values, team work and motivation." Spoden is the faculty adviser to the HUG committee. He attributes the fellowship enjoyed in HUG to the natural reaction of the participants who work together for the first time under gradually emotional circumstances. "What you put in, you get out," she adds.

Dietetics major Heidi Lewin has been a member of the HUG committee since last November. She remembers her first retreat.

"I had a real good feeling," she said. "Just a sense of group and really good interactions between each other." Lewin says being a "presenter" (one of the six group and really good interactions between each -

She attributes the fellowship enjoyed in HUG to the perception about what lies beyond the fâcades that people carry around with them.

"I was one of the most well-spent weekends I can remember," said Paul Anderson, an architecture major. "I had a chance to be open.

In the spirit of HUG, the cultural advisory council was formed a year ago, with the hope of having a weekend workshop on cultural norms and sensitivities. This weekend, the very first "Cultural Workshop" will be held at Camp Pinecrest. Devised by Sam Spoden, the retreat will feature five personal insights from the counseling center, who will serve as presenters.

The weekend isn't just about uncovering secrets. It's about allowing individuals to learn about each other and to learn the existing differences and similarities of people throughout the world.

"I see this as a chance to look at myself," said Spoden. "It's a chance to just learn more about them." She may purchase the $7.50 tickets for the cultural workshop at the University Union box office. An orientation meeting will be held in UC 220 at 11:00 a.m.

Horse packing

ASI Outings will sponsor a three-day horse packing trip to Kennedy Meadows in the Sierras east of Bakersfield. The trip, which will take place over the Memorial Day weekend on May 22-25, costs $100.

Recreation club

The Recreation administration club is having a night out at the Graduate for "Grad Burgers." All recreation admin majors are invited to go on May 4, at 5:30 p.m.

ASI films

ASI Films will be showing two movies this weekend. "Fame" will be shown Friday, May 1, at 7 p.m. and 10 p.m. in Chumash Agriculture 193, with a cost of $1. The Birds will be shown Saturday, May 2, at the Circle Theatre, with a cost of 25 cents. Seat reservations will be made at the phithestre behind Poly-Theatre at dark (and it's free!)

Craft instructors

The U.C. Craft Center is seeking new employees, in-structors and supervisors for summer through fall quarters. Those interested should apply in the Activities Planning Center.

Delta Sigma Tau Dance

The Delta Sigma Tau sorority is sponsoring a dance Saturday May 2, from 9 p.m. to 1 a.m. in the Mustang Lounge. The cost is $8.50.

AMA meeting

The American Marketing Association will have their first meeting Tuesday May 5, at 11 a.m. in room 203 of the business building.

ASI Outings will sponsor a horse packing trip to Kennedy
Meadows in the Sierras east of Bakersfield. The trip, which will take place over the Memorial Day weekend on May 22-25, costs $100.

Poly drops two on road

If the Cal Poly women's softball team does not make the AIAW Western Regional tournament next weekend, it has no one to blame but itself.

The Mustangs only have four games left on the schedule to determine their own post-season fate as they close out the regular season this weekend at home in double headers with visiting Chapman College on Friday and Cal State Dominguez Hills on Saturday.

Cal Poly, 17-20 overall, did not help matters at all Tuesday as it was swept by host Fresno State, 2-0, 2-1.

"We just didn't hit in the first game and we had a couple of mental mistakes in the second game," said Poly coach Kim Graham. "We had the lead in the second game, but a couple of bad calls allowed Fresno to score a run and that won the game for them."

The most important goal right now for Poly is to finish above the .500 mark and a clean four-game sweep this weekend is the only solution.

Poly climbed on top in the second game as Lorene Yoshihara doubled, moved to third on a Liz Fierle ground ball and scored on a two-out single by Lin Majors.

Friday's action begins at 2 p.m. and Saturday's at 1 p.m.

Poly standouts picked in NFL draft

Three Cal Poly football standouts have been selected in the annual National Football League college player draft.

Offensive lineman Mike Daum, running back Louis Jackson and wide receiver Robbie Martin were all selected by the seventh round of the 12-round draft.

The first to go was Martin, the reigning NCAA Division II national championship most valuable player, in the fourth round to the Pittsburgh Steelers.

Martin led Poly last season in receiving with 55 catches for 1,118 yards and 12 touchdowns. Martin finished his collegiate career with 2,610 yards receiving, a new school record, and 22 touchdowns.

Both Jackson and Daum were picked in the seventh round.

Louis Jackson averaged 5.0 yards a carry during the regular season. Jackson will be suiting up with the New York Giants this summer.

One of the main reasons for Jackson's rushing success was tackle Daum. The Miami Dolphins drafted the 6-6, 250-pound senior from Camp LeJeune, N.C.

Getting Married?

If you can't find the wedding ring that's exactly right for you, let us make it! We've been helping couples design their own wedding rings for over eight years. Your wedding ring should be very special too. After all, it's the most personal piece of jewelry you'll ever own.
Women seek first SCAA crown

BY VERN AHRENDSEN
Sports Editor

There has been a mad scramble of sorts this week in the northeast corner of the country as several high schools are building but no one is won-
dered about the number of them.

A dozen students have been working overtime this week and the number of the building and Grove City busily putting the finishing touches to their year's representative to the Northwest Human Powered Vehicle Championship that will run this weekend in Pomona.

The three-wheeled bike, named with the pin 'Phoenix' by its designers, is nearing completion and represents a three-year culmination of experience, bad luck, disappointments and hard-earned triumph.

"For the first time in three years, we have had a bike riding six months before the usual deadline," said an elated but tired bike coordinator Steve Blair. "There has simply been no time on our parts this year.

This year, last the two years the bike crew has been faced with a last-minute attempt to complete the bike but no one is over-concerned about it.

"Basically, all that is left to this year's bike is the finishing touches, the painting of the frame and the figuring of the riders," Blair said. "It seems like we have been pushed at the end but the crew has worked right through with fine-tuning minor details so that when we were faced with just trying to get the bike 75 percent completed.

Despite mechanical failure, lack of personnel and last-minute petition, the bike has made its way through the year. In the process of throwing away last year's bike two days before it was finished by experimenting with a process to design a more efficient (faster) three-wheeled three-wheeled bike.

While the team didn't get the chance to analyze the results until after last year's race.

The most important find-
ing from last year's bike was a system for designing the best fairing configuration for a given frame.

For a full weekend a group of engineers launched 10-pound, 6-foot models down the 14-mile Engineering Field at the rate of 5 mph and evaluated the rate of deceleration.

From those experiences came interesting findings and applied that to the design," he said. "We now have in our minds that we have to design properly. If we are able to know at any one time, it is because we worked to work out that the right design for the bike.

A project of this magnitude is only as good as its design and building crew and Blair is quick to mention those deserving of credit.

John and Kevin Bockman were two key figures in the design and figuring of the bike. Kevin developed all of the software and programs for the tests and John worked with Mark Youman to develop the launching mechanism for the tests.

"Andy Tao, the project manager, has been the key to pulling this whole project together. And, of course, the bike crew's most important member has been Andrew Douglas," said Blair.

"Douglas is everybody's hero," said Blair. "He has been tremendous," in his description of the project's energy that he would have brought out in a last-minute call.

We have complimented each other well this year. He took the fall quarter off and when he came back he headed back into the program. The way it has turned out is that when I am down and out, Andy pick me up with his excitement."

Another person has been Steve Blair of Matrix in Grover City. We have built the fairing but it was Bill's supervision and experience that allowed us to build a frame as advanced as we ever could have built by himself. He has been the best of the bike crew help. That include Greg Orr, Paul Lake, Ken Deeming, Felix Short, Bill Carr, Mark Jackson, Toby Sladkoph, Joe O'Baain, George Lewis, Bill Daley, Wanya, Mark Sullivan and Wayne Ross.

The Cal Poly women's track team will seek its first Southern California Athletic Association championship this weekend head-to-head with perennial champion Cal State Northridge and Cal State Los Angeles.

The Mustangs, coach Lance Hartner, will be looking to improve on last year's runner-up finish to current and past three-time national champion Northridge.

"The conference meet is just another meet for us," said coach Hartner. "We finished second last year but we are now finally coming into our own."

The only meet that is important for Hartner's Mustangs is the AIAW Division II national meet in two weeks, but the conference meet is shaping up to be a mini-national championship of its own. "Traditionally, Northridge and Cal State L.A. are both very formidable. Northridge is the defensive three-time national champion and Cal State L.A. is currently the No. 3 team in the nation," he said.

"The conference meet, and the national meet that may follow, is shaping up to be a challenge between the sprinting strength of Northridge and Los Angeles and the distance strength of Poly. Poly has at least one runner in the top three in each running event from the 400 meters on up to the 10,000. But, the whole meet might be decided by the results of the heptathlon."

"The seven-event competition begins Friday with Poly's Chris Dubois matched up against Natasha Smith of Northridge.

"The conference title and maybe even the national title could boil down to the battle in the heptathlon," said Hartter. "Whatever is more consistent and does better will win and I am putting my money on Chris.

Dubois, a sophomore physical education major, is in her second year of competition at Poly and, according to Hartner, her training is right on schedule.

Other key matchups in the Northridge's Alicei Sweeney and Poly's Laura Held in the 400 intermediate hurdles. Los Angeles' Alison Aren from Sweden will be a key runner in that event. All three have been running around the 62.5 mark. Aren has run a 50.8 before and Sweeney turned in a 60.8 last year in high school.

The 400-meter run will feature three more standouts. Northridge's Lori White, Jackie Pusey from San Luis Obispo who now hails from Los Angeles and Poly's Liz Douglas will be in a dogfight. Pusey was an Olympic Trials in the 300 last year with a time of 32.9 and is outstanding quarter-miler.

Two of the premier 10,000-meter runners will square off on Saturday at Beth Milowskii of Northridge and Liz Strangio of Poly meet head-on.

Before the sprinters and the long distance, Poly and Northridge went head-to-head on the track. Eileen Kramer moved into the top spot in the 1,500 meter rankings last week with a 4:26.9 timing and is still three full seconds off of her best.

Spritzer Eloise Mallory is coming back into form after a strain in the top of her foot and Douglas, Esther Scherzinger and Krista Altyne, according to Hartter, have been awesome in interval workouts and are ready for the big races.

RENTALS-SALES-SERVICE
Censuring Diablo

San Luis Obispo has finally made the big time. This week, television crews from the popular CBS news magazine show "60 Minutes" began filming for an upcoming segment on the Diablo Canyon controversy.

However, it seems the show will proceed without comment from the company in charge of the plant—Pacific Gas and Electric. "60 Minutes" asked the plant officials if they would be interviewed, and the officials replied with a list of terms that had to be met before they would consent.

PG&E requested that the interviewers take place only if "60 Minutes" gave two to three minutes of unedited replay time for each major point in the program. The utility also requested that it be able to film concurrently what "60 Minutes" was filming.

Unfortunately, these conditions were such that the "60 Minutes" producer decided to refrain from using the officials at all. PG&E is interviewing.

This is regrettable. Without the other half of such a news story, it is impossible to see the whole picture clearly. A balanced view of the problem will not be possible.

Also, it is regrettable that PG&E feels compelled to protect itself so thoroughly from the "60 Minutes" reporters. It can be looked at from both angles. Either you can believe that it makes sense to have those people look like the epitome of conning yellow journalism, people who will twist a story around to represent their own views, or it makes PG&E people look like they have something to hide—something so terrible that they cannot face the press.

Nevertheless, it is the consensus of the Mustang Daily editorial board that PG&E should have taken the risk and talked to the "60 Minutes" people. Even if the program cast them in a bad light, they still would have been there, representing the other half.

No matter what "60 Minutes" is or is not, it informs the public, and its journalists are respected throughout the industry. They would not portray what was not true. They show both sides whenever they can, and their refusal of the company's conditions this week shows that they were holding fast to one of the important cardinal rules of journalism—not to bow to any form of censorship.

Because a news story is organized in a kind of censorship, "60 Minutes," understandably, could not bow to the controls wanted by PG&E. It is PG&E that will lose from backing down—not just because it shows that they fear how they will be portrayed, but because those who watch the Diablo Canyon segment on "60 Minutes" will not be able to hear the whole story.

Letters

Make editorials more balanced

Editor: The letter dated April 28 from Kevin Gregory to the editor brings up a good point. It would seem reasonable to re­head the Opinion column as "Mustang Daily Editorial Board Editorial." After all, the board is not necessarily a reflection of the student body nor for that matter of the Journalism Department either. Nor, just a select group of students.

Let's review though, a current sector of the public, and its journalists are respected throughout the nation to separate the little half of such a news story, the other half. This is regrettable. Without the other half of such a news story, it is impossible to see the whole picture clearly. A balanced view of the problem will not be possible.

It would seem the Editorial Board is staffed with "over zealous liberals" afraid to back off from a belief in a large all encompassing government that can cover every aspect of the U.S. citizens' rights. A government that can guarantee every right all the time is no longer a catalyst for social and business development and civil liberties but a government that will control each member's life.

In conclusion, I have two comments.

One, why don't the authors of the Opinion column sign their editorials as the rest of us do, and be responsible for their views, and two, it would be refreshing to see a more balanced political/social Opinion column than the current one being published.

Mark Newland

Duck Book: a political revival?

BY JIM WITTY

Contrary to mainstream belief, the United States is not on the upswing. We are not as a nation coming to grips with our problems and experiencing a resurgence of pragmatism in government as the establishment controlled media would have us believe.

Rather, we have reached the eleventh hour according to Robert White, the world's foremost airport runway cleaner.

What, you may ask, makes a professional runway cleaner qualified to vent his opinions in a tabloid such as this? Simple. The bottom line is ducks.

You see, Robert White is one duck loving runway cleaner who isn't satisfied with the status quo. He has developed a scheme to rid our Republic of those seemingly omnipotent internationalists who have consistently debased our economy, purloined our earnings, and sold us down that misguided river that is socialism.

The Duck Book is a product of White's incredibly fertile business mind. Convinced that a genuine free press is merely a will-o-the-wisp in this country, White assembled a generous group of the highest paid writers on freedom and economics in the nation to separate the wheat from the chaff.

These included such notables as Howard Ruff, Edward Orr, James Blan­che, and Dr. Gary North. Most of the Duck Book's contributing authors are eminent authors of today's newsletter publishers. The core—ten dollars for a lifetime subscription of 80 to 100 of the writer's finest works several times a year.

In White's own words, "The Duck Book is the start of a network of inform­ed citizens, no longer limited by the views and biases of the mass media, no longer ignorant of the real world."

Utilizing a pyramid type distribution strategy, White's latest press run of 8 million copies surpassed even Playboy magazine's circulation.

But that's not all. The Duck Book is merely an appetizer for White's most ambitious plan yet. With his calculated $300 million proceeds from the Duck Book and with its massive circulation, Bob White believes he can turn things around in Washington.

Beginning with his vehement denun­ciation of Rockefeller's Council on Foreign Relations and the Trilateral Commission in his publication and en­doning with a complete catharsis of Con­gress, White's zealous script has already achieved partial fruition.

According to White, in 1982 we will see a confluence of complex bubble fourmen with a predominant con­stituency of dedicated ducklings. But his denouement comes in 1984. The elec­tion of a completely independent pres­i­dent, loyal only to the capitalist system with $200 million behind him/her broken down into $10 units is Robert White's dream.

Will an amateur journalist named Robert White emerge as the amalgamating force and spokesman of the "Silent Majority?" This remains to be seen. Meanwhile, Bob White is selling freedom in 10 increments... Exponentially.

Subscriptions available c/o Robert White Inc., P.O. Box 1928 Cocoa, Florida 32922.

Author James Witty is a junior jour­nalism major and Mustang Daily staff writer.
