**School of Business is accredited**

Economics professor Dr. Tim Kersten was re-elected by acclamation to a second term as chairman of the Cal Poly academic senate Tuesday.

In elections held during the regular meeting, the senate also elected physics professor Ron Brown as vice-chairman and speech professor Harry Sharp as secretary.

The School of Business was re-elected to two-year terms, senate officers serve for one year. Vice-chairman elect Brown is currently serving his second term as a senator from the School of Business. While senators are elected to two-year terms, senate officers serve for one year.

Chair Kärsten re-elected

Economics professor Dr. Tim Kersten was re-elected by acclamation to a second term as chairman of the Cal Poly academic senate Tuesday. In elections held during the regular meeting, the senate also elected physics professor Ron Brown as vice-chairman and speech professor Harry Sharp as secretary.

All were elected by acclamation, or by general approval of the senate without opposition. Kersten is currently serving his second term as a senator from the School of Business. While senators are elected to two-year terms, senate officers serve for one year.

Vice-chairman elect Brown is currently chairman of the instruction committee of the senate. He is serving his second term as a senator for the School of Science and Math. Sharp is also serving his second term as the department head representative from the School of Communication Arts and Humanities.

The new officers will be installed at the May 26 senate meeting.

Assuming the role of vice-chairman, Brown will replace environmental engineering professor Rod Reif. Sharp will replace natural resources and management professor John Harris as secretary.

**Chair Kärsten re-elected**

Brown nominates state justice

SACRAMENTO (AP) — Appeals Court Justice Otto Kaus was nominated today to fill a second vacancy on the seven-member court. Administration Chief of Staff Gray Davis refused to explain how soon that appointment would be made except that it would be "very soon."

"Otto Kaus represents the finest in legal scholarship," the Democratic governor said in a statement. "His great experience and the profound respect which he enjoys will add to the stature of our Supreme Court."

The appointment won immediate praise from liberals and some conservatives as well.

Executive Director Bruce White, a liberal black Democrat from San Francisco, described Kaus as "a scholar of the first order" and predicted Kaus "will probably be one of the persons that'll be charged with the responsibility of bridging the gap between conservatives and liberals that now exists on the court."

Ramona Ripston, executive director of the American Civil Liberties Union of Southern California, said the ACLU "knows Otto Kaus to be a very fine jurist, and I think it's an excellent appointment, but it was a good appointment," added White.

Assembly Speaker Willie Brown, a liberal black Democrat from San Francisco, described Kaus as "a scholar of the first order" and predicted Kaus "will probably be one of the persons that'll be charged with the responsibility of bridging the gap between conservatives and liberals that now exists on the court."

Youthful enthusiasm for the judicial smoothness, but his decisions will be primarily Los Angeles—-----

pointment "a finesse job."

Executive Director Steven White of the powerful ACLU "knows Otto Kaus to be a very fine jurist, and I think it's an excellent appointment, but it was a good appointment," added White.

"Out of Kaus you'll get all the outer decorum of judicial smoothness, but his decisions will be primarily Los Angeles."

"Some of law enforcement might have wished for a more conservative appointment, but it was a good appointment," added White.

"I heard a roar and then when it crashed the windows and the building collapsed."

"It was just terrible. If anyone survived it would be a miracle," said A.E. Appleby, police communications officer at the Frederick state police barracks.

The Pentagon said the jet was based at Wright Patterson Air Force Base in Dayton, Ohio, where it was assigned to the 4500 Test wing.

The Air Force said the jet was carrying sophisticated radar equipment, classified documents and equipment used to track missiles and satellites. It was on a test flight and left the base early Wednesday morning.

The area in central Frederick County was sealed off by state police barracks.

Local radio stations were asked to broadcast state police requests that residents who found documents from the aircraft turn them in to the local authorities, according to Jane English of WZTY-FM in Frederick.

"It was just terrible. If anyone survived it would be a miracle," said Helen Green, on whose farm the plane crashed.

"I heard a roar and then when it crashed the windows shook," added Arabella Boone, who lives across the road from the site.

Economics club studies alternatives to tuition

BY VICKI WIGGINTON
Staff Writer

With a $2 fee increase, Cal Poly could take over student-loan interest payments now made by the government. Foundation-built and operated dormitories or houses, located on campus, could provide housing for professors and income for students. Replacing off-campus laborers with student labor could save the school money and provide needed income for students.

Ideas such as these are now being studied by the Cal Poly Economics Club in a project looking for alternatives to tuition. Philip Parker, Economics Club president and coordinator of the project, said the group's goal is to suggest possible solutions for the financial hardships many students will face if a tuition or major fee increase is imposed. A study done by one member of the group revealed that tuition, if state subsidy was abolished, would amount to $8,772 per student per year.

Under-represented students, defined by Parker as those who are economically disadvantaged, could face severe financial hardships if asked to spend so much to attend Cal Poly, said Parker. With the current moves by Reagan to limit government spending, the loss of government-paid interest on student loans and a need for increased fees or tuition are a real possibility.

The study, which will be completed in June, was funded by a grant from the chancellor's office. It suggests innovations, then studies them on three levels. The suggestions are looked at for political, fiscal and institutional/legal feasibility. Parker said some innovations are feasible on all three levels, and these are recommended by the group for further study and implementation.

One such innovation suggests a way Cal Poly could take over the interest payments on guaranteed student loans, if the federal government stops its support of such a program. Parker said a $2 addition to quarterly registration fees, minor in comparison to a tuition, could generate approximately $100,000 per year. This money could be used to pay the interest on loans for students at Poly. Parker said any student could reap the benefits of such a program, but added the loans would probably have to be based on need. "But that's what our project's about," he said.

Parker said this kind of program would have a good chance of implementation at Cal Poly. "I think if you put it rationally to them incidentally they would go for it," he said. He said the recently passed fee increase at Poly was actually minor, and he didn't understand the fuss made over it. Parker added local bank officials have been approached about the idea, and he said "they would eat it up."

Another suggestion made in the study is the replacing of outside laborers on campus with students. Parker said many jobs on campus held by non-student workers could be handled just as well by students. This would save the school money, Parker said, and would help subsidize the students' education.

Another suggestion made in the study, one that could bring revenue to Cal Poly, is to provide on-campus housing for professors. Foundation-built houses or condominiums, on school property, could provide competitively-priced housing for professors, as well as income for students involved in their management.

Prof's business book printed

A member of Cal Poly's management department faculty is the author of a book in corporate operations that has just been published by a Columbus, Ohio, firm.

Titled "Corporate Strategy and Planning," the book by Dr. Rolf E. Rogers was released recently by Grid Publishing Inc., which specializes in books for the fields of business and management.

Dr. Rogers, a member of the Cal Poly faculty since 1975, said the purpose of the new volume is to provide students, managers, and planners with a systematic approach to corporate strategy formulation, analysis, and planning.

Designed for courses in strategy, planning, decision making, and business policy, it emphasizes the importance of strategy and planning in the management process through use of an integrative analysis of the factors involved in strategy development and planning.

The book uses case studies at the end of its chapters to demonstrate proposed, consistent approaches to the analysis of complex situations.

Story Theatre: retelling fables even adults need

BY LORI ANDERSON  
Staff Writer

Nora Kariya doesn't have a split personality. Yet, within the span of a couple of hours, she can be an aggressive peasant wife, a feminine prima donna, a graceful cat, a strong-willed old woman and a fun-loving flirt.

Nora Kariya doesn't have a split personality—what she does have is a part in "Story Theatre."

"Story Theatre" is the latest Cal Poly theater production, staged to reveal ten different children's tales and approximately 70 imaginative characters.

Director Michael Malkin and his eight-member cast are working to bring to life the characters and the fairy tales. Paul Sills' adaptations of Aesop and the Brothers Grimm children's tales retold for adults.

"We all need leprechauns and children's stories," said Malkin. "Story Theatre" brings these fantasies to life in a way that will not embarrass them.

"In these (fable) stories there are real things—real feelings, real fears, real emotions."

"Children's stories are adult dreams," he said. "We all need leprechauns and children's stories," said Malkin. "Story Theatre" brings these fantasies to life in a way that will not embarrass them.

"Malkin said "In them (the stories) there are real things—real feelings, real fears, real emotions."

"Children's stories are adult dreams," he said. "Everyone wants to be Cinderella. It's not just something that happens to children."

For both the director and the actors the play is a difficult one. "The problem of rehearsing is that everyone wants to be a Cinderella, or Prince Charming, without knowing what that means," said Malkin.

Steve Zunich, one of the six Cal Poly students in the play, said he finds the production "aggravating" because he must play many characters with deep contrasting emotions.

"Children's stories are adult dreams," Michael Malkin said. "Everyone wants to be Cinderella. It's not just something that happens to children."

"The problem of rehearsing is that everyone wants to be a Cinderella or Prince Charming without knowing what that means."

He recognized his and the seven other cast members' responsibility of bringing these feelings across to the audience.

Zunich said his characters include a psychotic killer, a cowardly rooster and a con artist, each requiring very different emotions.

For each part, Zunich said he has to get himself "into a different frame of mind."

Zunich said he uses past incidents to draw emotions for the present.

"You have to remember the things that get you in that mood in a short period of time," he said.

When he plays the cowardly rooster, Zunich said, "I think about how I try not to act scared when I am scared."

In "Story Theatre," overall Zunich said the entire production is different than a set play. "Story Theatre" is a presentation of the Speech Communication Department and the School of Communication Arts and Humanities.

Tickets are on sale for $3 at the Theater Box Office, Osoos Records and the ticket office in the U.U. "Story Theatre" is a presentation of the Speech Communication Department and the School of Communicative Arts and Humanities.

‘Selections 81’:
Fusion of glass, talent

BY JIM MAYER

The artists whose work is on display in the University Union Gallery see into what the rest of the world looks right through—glass.

The 65-piece exhibit is "Selections 81," the product of a competition open to professional and student craftsmen from seven western states. The medium is glass, but techniques of the artist—and consequently their art—are as varied as the title "Selections" might imply.

The contest produced four general winners that brought $200 awards. The entries were juried by Dick Marquis, a glass artist and assistant professor of art at the University of California at Los Angeles. The four winners are part of the exhibit that will run through May 31 and is sponsored by the ASI Fine Arts Committee and the Cal Poly art department.

The exhibit includes the work of two Cal Poly graduates, Will Carlson’s "Canalino" and Ralph Johnson’s "Lump Bowl." But the organization behind Selections is mostly the work of George Jerich, a Cal Poly Art instructor and Poly’s resident glass expert.

"It’s a kind of glass," he said, admitting that for the five years he has been at Poly he has been trying to get the content and exhibit to solidify.

To reassure, Mr. Jerich, "Selections 81" reflects the effort. It doesn’t take a glass expert to see the work of the artists started with basically the same raw material—glass melted to 2,500 degrees Fahrenheit, the consistency of honey. And then the artists took off in 360—well alright, 65—different directions.

The four awards winners on display are good examples, as Jerich explained.

The title of Peet Robinson’s "Joined Sections" understimates the technical expertise that was required for the fusion. "Joined Sections," is a bowl of two colors of glass that was made from two firey bubbles of glass.

The glass is melted overnight in a furnace. The artist uses a hollow tube to extract the 2,200-degree glass—just right for "off-hand" or hand protection, Jerich said.

When the glass cools to about 1,400 degrees the glass is tenderly blown into bubbles. "Joined Sections" required that the ends of these bubbles be cut off and fused—one bubble a milky white and the other a shade of violet.

"It’s a constant struggle of consistency," Jerich said, between viscosity (the resistance to flow and liquidity) and the ability to flow.

The bowl, with its swirling, perfectly round, currents, looks like the glass is still in its fluid state.

"Joach maintains it is, ‘It’s just cooled to a temperature where it will keep its shape.’ Eventually, he said, gravity will make all glass sag.

The actual technique it takes to make a piece like this is only an hour, he said, "but it takes years of experience to build up a piece like this."

Another award winner, "McCloud series #2," by Michael Nourot of Benicia, California was created through the same fusion technique. The result, however, takes another shape.

Nourot rolled the cooling glass jar in chips of glass, which partially softened, to create a membrane-like effect.

Sunburst Slab Hang glider, best price. Must be picked up pronto.

Cal Poly art instructor George Jerich said art works of glass, like the ones in the exhibit, are in a fluid state, cooled just enough to hold their shape.

Heart disease can cheating you out of the best years of your life.
SEOPEMORS/JUNIORS: GUARANTEED PILOT TRAINING

Apply for an aviation position with the Navy right now, and if selected, you will be guaranteed flight training upon graduation. You will receive the complete initial phase of training. You will receive a guaranteed salary, an excellent benefits package, extensive paid travel, 30 days paid vacation, and rapid promotions.

Stowe's proposal sought to have the trustees set a limit on the number of times a student may withdraw from classes without evidence of the reason for withdrawing after the third week.

President Kersten said he would be interested in learning more about the implications of the resolution by the General Education Committee, which was made after the proposed resolution was discussed at a previous meeting.

The proposed resolution authorizing the drafting committee to ask the CSUC Board of Trustees to develop a policy for student access to the University of California's general education requirements was heard at a previous meeting.

Budget proposal termed 'crueI hoax'

From page 1

While it's true that we have worked so long for affirmative action programs to be removed. "The question is: Does an institution take up another name," he said.

Locke said he sees this cut no more as serious than past ones because of the current political atmosphere in the Reagan Administration. "I would be shocked to think so many minority Republicans seriously," he added. Locke said that instead of introducing conflict people should plan together to best address the needs of California residents even at the time of this budget cuts.

It is likely that we can probably gather our resources in such a way that we can see what some of the important programs would not be measured in terms of money but by how much we can spend this significant social programs.

Lacrosse club picks up fourth and fifth wins

The Cal Poly lacrosse club picked up its fourth and fifth wins of the year without a loss as it dumped both Cal State Long Beach and Occidental.

Poly attacker Kurt Jensen set to 10 games and drew quarter as Schlavin and at the end of the first net season on Friday put Poly on top 4-0.

Poly opened up a 6-0 lead at the end of the first quarter as Schlavin and Naslund both scored. Poly picked up right where it left off in the second quarter as Naslund took a break away and rammed it though the nets followed by goals by Eric Ramsey and Mathis to make the tally 9-0.

Jensen scored his last two goals of the game before the first half ended and before Long Beach could do anything on the scoreboard to make the halftime score 11-1.

Poly's final score came at the end of the third quarter as Naslund fed Poelstra on a cutting pattern. Long Beach cut into the Poly score with two goals in the third quarter and three in the fourth for the 1-4 decision.

The Mustang defense was heavily penalized as 14 men were sent in the penalty box but Poly only gave up two goals in 13 minutes of man-up play. The defense was led by goalie Scott Graham, Rick Brower, Phil Albert, Mark Frill and Mike Brown.

Nielsen came back the next day and took the Poly offense by the reins as he scored four goals pacing Poly in a 7-4 triumph. Nielsen added two assists to Schlavin and Poelstra to figure in six of Poly's seven goals.

The final goal came as Ramsey fed Merry on a breakaway.

The defense once again powered the win with stiff opposition. In five games, the Poly defense has allowed a total of 16 goals for an average of 3.2 a game. The offense, on the other hand, has racked up 50 goals to sail along at a 10 goal per game clip.

The Poly stickmen will face off in the state Northridge at the San Luis Tennis Club in Avila Beach.

The Mustangs slipped to 2-5 in the Southern California Athletic Association as they were defeated by visiting U.C. Santa Barbara, 9-0.

Michelle Archuleta was the only Mustang to force a set to 10 games and drew Beth Rushing to a 6-4 decision in the singles match. Archuleta and Kristin Jakobsen for 10 games in the doubles match with Rushing and Lynne Ramsey to win two of three set defeat.

The Mustang might have one match left after Friday's 2 p.m. meeting with Northridge as a rain out with Irvine might have been made up.

Two Mustangs will continue play after the regular season closes. Renee Wegandt and Sheila Foley have both earned the right to compete in the Western Regionals at Cal State Los Angeles on May 14-16.

POLY WOMEN CLOSE OUT NET SEASON ON FRIDAY

The Cal Poly women's tennis team will close the regular season campaign this Friday as it hosts Northridge at the San Luis Tennis Club in Avila Beach.

The Mustangs slipped to 2-5 in the Southern California Athletic Association as they were defeated by visiting U.C. Santa Barbara, 9-0.

Michelle Archuleta was the only Mustang to force a set to 10 games and drew Beth Rushing to a 6-4 decision in the singles match. Archuleta and Kristin Jakobsen for 10 games in the doubles match with Rushing and Lynne Ramsey to win two of three set defeat.

The Mustang might have one match left after Friday's 2 p.m. meeting with Northridge as a rain out with Irvine might have been made up.

Two Mustangs will continue play after the regular season closes. Renee Wegandt and Sheila Foley have both earned the right to compete in the Western Regionals at Cal State Los Angeles on May 14-16.

Sports

Team nabs second

The Cal Poly men's rodeo team finished second behind Hartnell in National Intercollegiate Rodeo Association action at Pomona.

Joe Ferrero picked up an individual win in the bareback bronc riding and Tom Iwanick led a trio of Poly place winners in the steer wrestling.

Robin Risaola claimed a Benefit run scheduled

A Lite Royal Run has been scheduled for May 17 in San Luis Obispo.

A 5- and 10-kilometer course will open to entrants in four age divisions and will begin and end at Meadow Park. 2333 Meadow.

The benefit run is co-sponsored by the Miller Brewing Company and Phi Kappa Phi Fraternity with entry fees set at $5 in advance and $6 on the day of the event. Lite Royal shirts will be given away to the first 500 entrants.

The proceeds from the event will benefit the Special Olympics. For more information, call Phi Kappa Phi at 543-9652.

Dispute may draw in NCAA

MORGANTOWN, W.Va. (AP) - A California official says if San Jose State cannot reach a settlement with West Virginia University over the breaking of two football contracts the National Collegiate Athletic Association should enter into the dispute.

WVU broke the contracts with San Jose State last December, citing the increased costs of keeping the commitments. San Jose has asked for $100,000 in damages, a figure West Virginia officials contend is "unrealistic."

But Gordon Zane, a deputy California attorney general, said the NCAA should be involved if San Jose State decides it cannot reach a fair settlement and chooses to file a law suit against WVU.

"Why? Because both institutions are members of the NCAA and a decision in this case could be a reflection of the toughness of future contracts between conferences," Zane told the Morgantown Dominion Post.
Editor:
I find it humorous that the candidates are saying that the money is there to be had. I have talked to many of the candidates and they all say that they can keep the tuition at a reasonable level. But if this is true, then why aren't we seeing any changes in the tuition system? It seems to me that the candidates are just using this as an excuse to keep the tuition at a higher level.

As chair of Student Relations, I want to see changes in the way that the tuition is set. I want to see a more transparent process where the students have a say in how much tuition is charged. I believe that the students should have a voice in this process and that their opinions should be heard.

Letters
Uninformed candidates

Editor
I think it is important for students to understand the importance of communicating with each other. We need to be able to reach out to each other and discuss the issues that we are facing. It is only through open communication that we can begin to find solutions to the problems that we are facing.

Letters
The tuition crunch

Editor:
Last Friday's letter to the editor "Is tuition on the horizon?" has raised some concerns about the funding of our education system. It is important for us to understand the challenges that we are facing and to work towards finding solutions that will benefit all students.

A dangerous image

BY KIM BOGARD
San Luis Obispo really is safe as we think it is...

San Luis Obispo has always maintain­ed the image of being a conservative town with a low crime rate. I feel this image is getting in the way of reducing our crime even further.

According to the SLO Police Depart­ment, the area around Cal Poly has the highest crime rate in the city. This is logical since it is the most densely populated area in the city, but the prob­lem is that the residents rarely hear of crimes that are committed.

Not too long ago, there was a stabbing in an apartment just off Foothill Blvd.—did the incident receive much coverage?

Are the victims not reporting the crimes? Is the police department trying to keep the stories quiet? Do the newspapers not consider them newsweath?
