Cal Poly to undergo facelift during next five years

BY TRACY JACKSON
Staff Writer

Fifteen changes in the Cal Poly Master Plan were approved by the Foundation Board of Directors during September which will add and delete building sites on the Cal Poly campus.

The revision conference, which was held Sept. 15 and 16, revised a previous approved Campus Master Plan made in 1975, which calculated facilities for 15,000 full-time students.

"The Campus Master Plan is a blueprint for the future. It's a fluid thing that cannot be set in cement," said Doug Gerard, executive dean of facilities planning. "We make changes in the plan about every five years, but the whole plan is never totally redone," he said.

The first seven revisions approved will add sites to the campus for the growing amount of students entering Cal Poly. To accommodate instructional needs, a site between Cranida and McPhee University will be built at the north west edge of the Poly campus, near the business building. This facility will compliment the already existing University Union in that it will hold student activity areas, study areas and some kind of food service facility, said Gerard.

Oil tankers rescue boat people

SAN FRANCISCO (AP)—An oil tanker rescued 55 Vietnamese refugees from a leaky, wooden boat off Vietnam and took them to Hong Kong, Standard Oil Co. of California said today.

One baby was hoisted onto the tanker by Carlos A. Hille, its skipper, and many adults were so weak they collapsed on deck after being pulled aboard by lifeguards, the company said.

The tanker operated the 17 adults and 18 children Monday in a 28-foot boat about 175 miles off the coast of Vietnam. The leaky boat was in danger of capsizing, and the "boat people" had been at sea for several days without food or water, Capt. Kurt V. Hansen told Standard Oil.

The tanker, bound from Singapore to Hong Kong with petroleum products, reached port at midnight Wednesday. The refugees were put ashore after arrangements were made by the U.S. State Department, the U.S. Consulate in Hong Kong and local authorities.

Standard Oil Tankers have picked up refugees in distress at sea five times in the past four years, said Dale Rany, a spokesman for Chevron U.S.A., a division of Standard Oil.

Oct. 1 set as last date for loan requests

Because many students are aware of the Oct. 1 deadline, the financial aid staff has been deluged with loan applications since the quarter began. Ryan estimated the daily intake of documents to be processed as 1,000, including copies of income sources and transcripts from other financial aid offices. They have received about 4,600 Guaranteed Student Loan applications since the quarter began.

"Actually, I'm confident we're going to get it all done," she said. "We get a few disgruntled students, but I think we pretty well meet the demand."

The federal government, however, cannot meet the demand for many subsidies. The government's bill for subsidizing the banks involved in the loan program is "in the billions," and they can't afford to keep it up, Ryan said.

"I simply can't see how we (the nation) can effect the desired savings in education without these cuts," she said. "I only hope we won't lose too many students.

Ryan said she expects to see more students with part-time employment and lighter unit loads, taking longer to complete their work.

"I hope this will teach students to borrow when they need to," Ryan said.

State workers receive interest

SACRAMENTO (AP)—About 200 state employees are entitled to interest averaging 500 pieces on the back pay they won last year, but must ask the Legislature for the money, a state appeals court ruled Thursday.

A unanimous three-member panel of the 3rd District Court of Appeal said the employees are morally entitled to $18 million in interest on the $407 million that the state kept until it was ordered to make retroactive payments last December.

But because Gov. Edmund Brown Jr. vetoed a bill that would have given the state employees interest payments, no money has been designated in the state treasury for the purpose, and new legislation will be needed, the court said.

But a spokesman for the California State Employees Association, Keith Hearst, said it might be difficult to get the Legislature and Brown to approve the money because of the state's dwindling money supply.

40 hostages seized in Paris

PARIS (AP)—Anti-terrorist police surrounded the Turkish Consulate in the center of Paris Thursday after a four-man Armenian suicide squad seized some 40 hostages, threatened to kill them and blow up the mission unless their demands were met, authorities said.

The commandos demanded Turkey free jailed Armenian political prisoners and fly them to France by 11 p.m. 2 p.m. PDT. They said if the demand was not met all the hostages "will be executed," and that if French forces intervened, the building "and all the people inside" will be blown up.

A Turkish Embassy spokesman said about 15 staff members and 25 visitors, including several women, remained hostage in the consulate.

Ambulances took three people from the consulate several hours after the siege began. One was reported by French radio to be a Turkish security guard killed in the takeover. Police said the others were a wounded Turkish vice consul and a wounded terrorist who demanded political asylum.

The terrorists, in messages dropped from the building and a statement distributed in Beirut, identified themselves as "military commanders" of the Armenian Secret Army for the Liberation of Armenia.

Charming pirates on the Melodrama shore

BY LORI ANDERSON  
Reviewer Editor

While typical of pirates would be out-
sealing the seven seas. "The Pirates of Penzance" have come aboard in Oceano and captivated the audience of the Great American Melodrama.

With this current production, the pro-
ducers of the Great American Melodrama have again put together a delightful combination of theatrical magic and historical charm. Combine this extraordinary perform-
ance with the unique atmosphere of the Melodrama, located on Hwy. I in Oceano, and an evening of enchantment is the result.

The good ol' days are not gone forever. Behind the big, red doors of the Great American Melodrama lies a small world of Gay Nineties entertainment. For those who have never experienced the Melodrama, a unique mood and spirit exists there, possessing allurements of all ages as they choose for the nomadic hero and boo and hiss at the nasty villain.

Singe-long songs and the vaudeville revue complete with harp shop quartet, short skits and silly jokes, round out an evening of pure enjoy-
ment.

"The Pirates of Penzance" carries on the tradition of pleasure that reigns at the unique establishment, but the two-
set comedy is different in one way. The production which debuted September I I and will run until October 14, I I, is a much boo-hiss regular. What this story lacks is a true villain. This is not, a criticism, for it is a sense of "duty" that plagues the hero Frederick.

When Frederick (Tarasa Findlay) is apprenticed to a band of pirates, Frederick, played by Matthew Lord, was con-
ducted into service when his nurse Ruth

"The Pirates of Penzance" have dropped anchor at the Great American Melodrama in Oceano. Pictured from left to right are cast members Terese Findlay, Matt Lord and Janet Ferre.

(Tarasa Findlay) was instructed to ap-
proximately him to become a pilot, but mistakenly appointed him to a band of pirates.

When he is released from service, Frederick, who actually abhors piracy, vows to extinguish his pirate comrades. He engages the aid of three cowardly policemen and they set about the task of

by Eric Lossy was bright and definitive, and made a charming heroine. All of the characters in "The Pirates of Penzance" made a diarmmgly handsome appearance and seductive air somewhat parallel to life basic characteristics and emo-
tional face in "Body Heat"- the ending comes as quite a surprise. It will suffice to say that it is the torment. Frederick who falls prey to a very cold and calculating woman, whose secret dreams have nothing to do with him or any other man.

General, William Hurt and Kathleen Turner do a slightly above average performance once they are allowed to move beyond their characterizations of two

younger girls, all of them daughters of a jolly, major-general.

Frederick and Mabel, one of the young girls fall in love, but through an unfortu-
tune turn of events, they are separated.

Ruth and the Pirate King (Steve Jones) have planned Fredericks birthday is on Leap Day, he has had on-
ly five birthdays and therefore, remains a pirate apprentice under contract until his 2 I st birthday. Honor and duty com-
oulded our hero, and he crosses the sea to discover and he once again joins the pirate clan.

The story winds down coming to a conclusion that is a delightful one, with wedding bells ringing for more than just one of the general's charming daughters.

Throughout the performance, fine
actors and actresses rose to the stage. Whether it be the brightly clad pirates-
band dancing a jig or the more graceful and florid dancing of the young maiden, routine after routine brought a warmness of applause from the audience.

Matthew Lord brought strength and realism to the role of Frederick. His young and innocent face qualified him for this vulnerable hero, who gathered many a sympathy and stole many a heart.

Janet Ferre, who played Mabel, had an especially notable performance and made a charming heroine. All of the characters in "The Pirates of Penzance" made a diarmmgly handsome appearance and seductive air somewhat parallel to life basic characteristics and emo-
tional face in "Body Heat"- the ending comes as quite a surprise. It will suffice to say that it is the torment. Frederick who falls prey to a very cold and calculating woman, whose secret dreams have nothing to do with him or any other man.

Eunice's use of foreshadowing in "Body Heat" is also of some merit. Certain scenes and innuendos are messages to the audience of what is to come, and also lend a sense of irony to the film. In "Body Heat", Eunice's Giants are always present in the foreground. Eunice is watching a building burn in town and he notes with disgust that the first scene in a series of outrageous, if not ridiculoos, love

B.J. Thomas will be performing in a "Concert Under the Stars" Saturday, Oct. 3, at 7:30 p.m. at the Central Coast Christian Academy in Arroyo Grande. The popular recording artist has just released a new In-concert album.

B.J. Thomas in concert

BY SHERRY HEATH

B.J. Thomas, a popular recording artist, will be giving a "Concert Under the Stars" Saturday, October 3, at 7:30 p.m. at the Central Coast Christian Academy in Arroyo Grande.

Thomas will perform as a benefit to raise funds for a Christian high school which the COCA plans to build on the concert site.

He has just released a new album titled "B.J. Thomas in Concert" which includes such popular songs as "Walkin' On A Cloud," "Raindrops Keep Falling On My Head," "Mighty Close of Joy" and "Nothing Could Be Better." He is also known for "I'm So Lonesome I Could Cry," "Don't Worry Daddy," "Anchors Aweigh Somebody Wrong Song" and "Hooked On A Feeling."

For a short time, Thomas left music to "upgrade his life, and rethink goals which turned out to be more like roadblocks than platoons." When he restarted entertainment, he was a born-again Christian.

"It has made a great difference in the direction my life has taken," says Thomas. "I'm not a Christian entertainer; I'm an entertainer who is a Christian. I definitely have the freedom to do any kind of music I want to," he says.

"Some people are confused as to what a Christian song is. What it isn't is a negative statement, but a positive one. I sing contemporary Christian songs because they have a positive and uplifting message," says Thomas.

Although Thomas is devoted to his music and his faith, he doesn't want people to think he's preaching. He explains that there's a line separating the style of performer that he is, and the view taken of the traditional Christian entertainer.

"I think there is a new breed of music and new breed of Christian to bridge the gap between the contemporary and traditional Christian performer. But today, Christian music is for real people, all people. Remember, Jesus came for the red and the blue people of the world, the ones that needed him most. People like us," he says.

Donations for the concert are $7.50 in advance, $10.00 at the gate, or $15.00 for limited reserved seating. Tickets are available at most area Christian bookstores.

Concertgoers are encouraged to bring a blanket or a lawn chair and to arrive early, as parking problems are expected in order to alleviate parking problems.
Suggestions for food and fun in SLO town

BY SHARON REZAK  
Staff Writer

School has only been in session five days, but the first weekend of the quarter is a welcome relief. It’s too early to go home and visit Mom and Dad, and homework hasn’t piled up yet. What is there to do in SLO-Town, especially if you’re a new student and unfamiliar with the best dining and entertainment places locally? Here is an “Entertainment Guide” for all age groups with places to satisfy every taste.

Spice’s Place at 670 Higuera (in the Creamery) offers more than just unique dishes at low prices—Spice provides a good time. Deep fried potato skins with a variety of toppings, saucers, and deep-fried ice cream are just a few of the specialties Spice presents with a fun, family atmosphere. For those over 21, Spice’s Place has Hasking-Robbins for variety with over 41 imported beers to choose from. Many of these beers cannot be found in local liquor stores. Spices invites beer drinkers to sample each of the 41 beers. When he succeeds drinking the new brew from around the world, he will receive an “I Drank Around the World at Spice’s Place” t-shirt, plus have his name inscribed on a plaque on the “Wall of Fame.”

Other spots include the popular Cigar Factory at 1772 Calls Joaquin providing dance music every night—a minimum live, sometimes recorded. This Sunday, the “Desedtation Jazz Ensemble” is slated to appear. The menu offers 58 different items with a price range of $2 to $11.

For music without dinner, try The Dark Room at 1027 Monterey. A bar that hosts live bands, The Dark Room has booked punk group “Pamite and the Zippheads” for this Friday and a Cal Poly student jazz fusion group “New Vintage” for this Saturday.

The popular Quintessence concert series is back and offers musical experiences from the classical to the contemporary in its fourth year at the Cal Poly Theatre. The series this year will include two instrumental groups and two solo recitals. Beginning the series Oct. 2, classical and jazz flutist Jim Walker, co-principal flutist with the Los Angeles Philharmonic Orchestra, will perform solo and accompanied by piano. The second solo concert Oct. 24, will offer classical works for the piano played by Philip Lorenz, an acclaimed international performer. Third in the series, on Feb. 27, will be the Annual Baroque Concert, featuring the Cal Poly Chamber Orchestra, led by Clifton Swanson. The third concert, on April 2, will bring the Kronos Quartet with David Kriebel of the San Francisco Symphony on the French horn and Ronald Rifkin on the harp.

The last concert in the series, on April 2, will bring the Kronos Quartet, with its eclectic musical blend of contemporary classic and new pieces such as “Bone-Fingered Back Rub” and “Rock-it.”

Quintessence series opens with performance of flutist

Flutist Jim Walker will be performing in the Cal Poly Theatre on Friday, Oct. 2 at 8 p.m. In addition to his solo performances, Walker, who is co-principal flutist with the Los Angeles Philharmonic Orchestra, will be accompanied by piano.

Eleven seats vacant on ASI Finance Committee

Applications for eleven positions open on the ASI Finance Committee are being accepted until 7 p.m. Monday, announced Gail Hammigan, committee chairman.

The committee is responsible for making budget recommendations to the Student Senate on several student programs, including those involving films, concerts, and intramurals, Hammigan said.

Applications may be picked up at the Finance Committee desk in the University Union, Room 217 A. They may be returned in the office or to the committee meeting 7 p.m. Monday in Room 220 of the union. New committee members will be elected to fill the remaining eleven positions at the Monday meeting, Hammigan said.

SUGGESTIONS FOR FOOD AND FUN IN SLO TOWN
Law officials sent packing as blockade dwindles

BY MICHAEL WINTERS
Staff Writer

While members of the Alliance deny that the Diablo blockade is on its last leg, sheriff's highway patrolmen and National Guardmen opposing the blockaders seem to think so.

All but a small contingent of the law enforcement officers were home Tuesday and Wednesday, calling their job done.

"There isn't even enough of them left here to play rugby," said one highway patrolman Tuesday as he kept watch over blockaders at the gate of the nuclear plant.

Five hundred fifty California National Guardmen went home Tuesday and Wednesday, along with 250 officers of the CHP. Sheriff's deputies from several California counties (including SLO) are leaving, leaving only about 200 highway patrolmen on duty at the site to aid San Luis Obispo County Sheriff's officers.

"Things are winding down," said Sgt. Robert Cole, a spokesman for the county sheriff's office.

Anyone up-new of activity at the plant could be met with assistance from nearby Santa Barbara County sheriffs, said Cole.

At a press conference Tuesday afternoon, officers of the CHP, the California National Guard and Sheriff George Whiting told reporters just how much the blockade had cost the taxpayers.

The county sheriff's office, said Whiting, spent $300,000. The same figure was cited by CHP commissioner Glendon B. Craig for expenses for his agency.

Lt. Gen. Frank J. Klotz, Jr., claimed a cost to the National Guard of $270,000.

Man survives steel bar through the head

LOS ANGELES AP—Michael Melnick is a medical marvel to his doctors, who cannot explain how he made a complete physical recovery after a steel bar was driven through his head in a construction accident.

"They tell me there's no room for the bar to fit," said Melnick, the 29-year-old carpenter from Reseda.

"But it did."

The doctors are puzzled that there was no major damage to Melnick's eye, brain, spinal column or key arteries when the rod pierced his head at the base of his neck and came out his back.

The accident occurred seven months ago when Melnick fell 10 feet through the second floor of a house under construction in Malibu. When he landed and tried to pull his head up, he found he couldn't.

That's when Melnick realized that his head was impaled on a steel reinforcing bar, five-eighths of an inch thick. Six inches of the rough-surfaced bar was protruding from his face.

As his father, Alexander, also a carpenter, and other workers tried to make him comfortable until medical help arrived, Melnick said he was "sure I was going to die."

He went into shock as he grabbed at loose objects near his head and was rushed to an ambulance at the nearby Zuma Beach. He was under anesthetic as he was airlifted by a Coast Guard helicopter to Westlake Community Hospital where his head was x-rayed to find the bar embedded in his brain, spinal column or key arteries.

"We co-counsaled each other so we wouldn't flip out," said Melnick's father, Alexander, a member of a blockading affinity group. She plans to join others late this week in what they hope will be a second protest.

Correctional officers at the jail were friendly, however, according to D'Port.

"I think it got to their hearts," a guard said. "They realized that their head was under anesthetic as they were being examined.

"I think it got to their hearts."

The guards—"we started calling them guardians," she said. "I think they realized how ridiculous it was, too. They knew we weren't criminals."

"We co-connnected each other so we wouldn't flip out."
\[ 15 \text{ revisions in Cal Poly Master Plan scheduled} \]

From page 1

A move for the Foundation administration was also approved in the Master Plan revisions. The current administrative offices are housed in the University Union and will be relocated to a central administrative structure separate from the University Union, said Gerard. The site designated for this move will be by the Welding Building, across from the new Faculty Office Building, he added.

The last three areas for revision are areas which directly affect students—these were altered because of past student complaints. Revision is planned for Crandall Gym, which will be removed. A new facility will also be added between the present Physical Education Department Building and the Health Center. This move will cost approximately $2 million, also funded through non-state sources, according to Gerard.

A site for a residence hall recreation area has been added to the Master Plan to provide more recreation facilities for the 2,800 on-campus resident students. The facility will include barbecue pits, basketball and volleyball courts and will be located behind Sierra Madre and Yosemite dorms, he said.

Gerard said one of the biggest complaints by students attending Cal Poly was the lack of parking areas which the board hopes to alleviate. Two multilevel parking structures costing $2.5 million will be built on the already existing parking areas behind the Cal Poly Theatre and across from the Robert E. Kennedy Library H-1 area, Gerard said.

The Board of Directors also felt the need to remove some existing structures due to their inefficiency and increasing campus population. Deleted will be a classroom structure on the south section of the campus, President Baker's present conference center, located behind the president's house, and Crandall Gymnasium, deleted for the new Physical Education facility, he said.

Also designated for deletion was the Farm Machinery Building, which will be moved closer to the agriculture units, and the Student Services Hillcrest Facility which will be moved to the Student Services Building complex on College Avenue. The Hillcrest Facility has been used for the temporary Student Services administrative of-

People walk protests test license

From page 1

Although the march was originally aimed at only 50 people, a total of 170 people attended the People's Walk in Pismo Beach area. The march was also attended by prominent figures in the community to participate in the walk.

The People's Walk will begin at 10 a.m. on Sunday at Front Street in Avila Beach and will continue to the Diablo Canyon gate and back. The march is expected to last for three hours.

Welcome Students from...
Protesters describe arrests, term in jail

From page 7

"There were a lot of gawkers people supporting us...that wasn't the 1600 arrests," DiPeri said. Both students, however, said they have seen little involvement of the part of Poly students.

"I don't know how concerned the students are. I see a lot of apathy in the students around me," DiPeri said. She and Cavalier blame Poly students' lack of concern on the college's emphasis toward technology and careers. Most Poly students do not consider themselves local or get involved in local concerns, they said.

"I know the Abalone Alliance didn't even bother with Poly after a while," Cavalier said. "They kind of gave up on Poly."

In addition to the affinity group of Poly faculty and staff, members of Campus Hunger Coalition and the Ecology Action Club were involved in the blockade, DiPeri said.

"I don't see how with any conscience they (PG and E) would allow that risky fuel loading process with that many people—police and blockaders—on site," said Cavalier. He and DiPeri hope the continued presence of blockaders will prevent PG and E from beginning the low power testing even though they have received a license to do so.

"I think people believe that if they got in close enough, the NRC would require PG and E to do another security check before firing up," said DiPeri. "As close as I get to the plant, I really think a terrorist can get that close...Now effective is it like security plant going to be keeping violent people out of there, let alone non-violent?"

Kathy DiPeri and Gary Cavalier reflect upon their experiences as blockaders. Both were critical of the lack of involvement of most of their fellow Cal Poly students in the Diablo issue.

ART SUPPLIES!

We at graham's, have a complete line of artistic supplies for every need, plus custom matting and framing.

HP operates on
the premise that people
should enjoy getting up
in the morning.

When you go to a job that's built around your skills and interests, it hardly feels like work. That's the way it is at HP.

Here we put the emphasis on the individual, finding out what you want to do rather than simply telling you what we need. And you get to participate in a significant project right off the bat, rather than waiting years to reach a "responsible" position.

Quality people equal quality products.

That makes sense. And it has certainly proved itself at HP. We've grown to have more than 200 offices and plants around the world. That means we need a lot of excellent people to fill diverse, challenging jobs in our various divisions, making computers, components, and instruments for engineering, science, medicine and business.

But even with our size and steady growth, the importance of the individual has not diminished in the least. This personal concern is summed up in a simple term: the HP Way.

It covers everything from flexible work hours (HP was one of the first companies to let you pick your own schedule) to our Management by Objective. This basically involves setting a goal and giving you the responsibility for getting there, in the way you think is best.

To keep things on a human scale, we decentralize everything we can. Whether you're in R&D, field sales, manufacturing, administration or service, you'll be working in a small group.

You get all the other benefits, too.

Basically, you're not as at the mercy of a large environment. So we offer excellent pay and benefits, additional courses and help maintaining your education; the opportunity to work in some of the most pleasant parts of America and the world, and a genuine chance to grow in careers that will be a significant challenge to your imagination. (For example, HP is the only company that has made a large-scale commitment to Silicon-On-Sapphire IC Technology. When we see an idea, we go for it.)

A chart to go by (or not to go by).
To get a better idea of the opportunities here, you might want to check out this job chart.
Then check with the college placement office. We'll be on campus the week of Oct. 5-9 to talk with you about pos-

HEWLETT

Keyes graduates

Mustang cross country teams deep with talent despite losses

BY TOM CONLON

Sports Editor

The loss of a three-time All-American runner would be enough to deflate the hopes of any cross country team, especially the Cal Poly women's team who have to contend with such NCAA-Division I powerhouse as U.C. Berkeley, Stanford and defending national champion North Carolina State. But Mustang coach Lance Harter has taken the graduation of Maggie Keyes in stride and remains optimistic about the chances of this year's squad.

"We feel we have a better team than last year...we have more depth," Harter said. The coach explained that not having one individual standout on a team with as much talent as the Mustangs can actually be an advantage.

"There is no established pecking order on this team," he said, which means competition among the women for the number one spot should produce a better overall team performance.

This will be the first year the NCAA sponsors a women's cross country program—Cal Poly is a Division I team, said Harter. "Financially, we are Division II but with the caliber of athletes we have been fortunate to have here, competitively we're Division I." The Mustangs' schedule would seem to back his claim.

Harter has everything back, except Keyes, from last year's sixteenth, nationally ranked team. Defending Division II 11,000 meter champion, Ellen Kramer, figures to lead the way followed closely by several strong runners: Irene Crowley, Carol Glasson, Amy Harper, Jennifer Jameson, Lisa Strange and Janice Kelley.

Men's Team

Since men's cross country and track coach Steve Miller left, for the promise of Kansas during the summer, Harter has been putting double time, coaching both the men's and women's cross country teams. "It's an emergency situation. This is the first and last time," he said.

Harter noted that a disproportionate amount of attention has been given to Miller's departure. "Miller left but the team is still here. It was created by him but there are many new faces," he said.

However, the team will be led by a couple of familiar faces: seniors Carmen Rios, defending Division II cross country champion and All-American Doug Averit.

Craig: Poly offers more than football

BY MARIA CASAS

Jasperman and Heron, two differently named dorms, are home to some of Cal Poly's finest athletes. The two dorms are located on the far reaches of campus, at the end of the path to Cal Poly. One hopes that key movement of the nearby San Adraaa Fauk will not result in Jasperman and Heron crumbling to the ground.

Upon entering Jasperman, one is subjected to the traditional dorm activity: screaming, a ringing telephone, people running after one another, and laughing.

But behind one door, momentarily secluded from all the noise, sits a friendly and out-going young man who has been offered the Mustang football team aside from carrying the ball.

Fullback Danny Craig, a junior from San Jose, is ecstatic as a one-year-old baby learning to walk when he talks about playing football and living in the jock dorms.

"I enjoy sports. I enjoy the Cal Poly program," said Craig.

Craig’s dimly lit room has two wooden dressers, and a cedar wall which Craig and his roommates built.

"It's a pull together type of situation," said Craig. "We respect the philosophy because we are finding out about ourselves."

Living in the jock dorms with other athlete's helps for Craig some of his fondest moments.

With a smile from ear to ear, Craig retells a bachelor party they held for a fellow teammate at the Veta Hall.

"There was a lot of food and beer," said Craig. "It got out of hand. We got kicked out of the Veta Hall. It was crazy but so fun. We crashed two or three parties later that night. It was definitely an experience."

Craig said the dorms are mello right now but in the winter and spring quarters they go crazy. You discipline yourself, budget your time, and go to the library to study during those crazy times.

Aside from football, Craig also enjoys baseball. In high school he had a .400 batting average, but declared he could not excel in both sports so he pursued football. But he still remains a baseball fan, watching the Dodgers being his favorite team.

"The baseball strike was one of the worst things," said Craig. "It took away from the sport. Too much money was involved. After the strike I lost interest so I didn’t follow the game as much. Hopefully next season will be different."

Craig aims to apply his knowledge of physical fitness, he has acquired through his recreation administration major, to begin a corporate fitness program. This would involve directing or setting up a fitness program for a company's employees.

"People under stress because of their jobs may just need a physical fitness program to relieve them," said Craig. "And I like working with people in the physical fitness aspect."

Outdoors sports also hold a great interest for Craig. Camping at Mount Lassen with friends and skiing at Lake Tahoe are among his favorites.

"Time does fly quickly, as Poly has to return to Cal Poly a month before school opens to begin fall week."

"You have to put yourself on a different level for two weeks," said Craig. A typical bell week day would begin at 8 a.m. and end around 6:30 p.m. with football being the talk of the whole day.

One could say that football is a full time job plus overtime during the season. About 40 hours a week are devoted in preparing for a game. This preparation involves knowing your job and doing it in harmony with your team and knowing everything about the opposition there is to know.

If this isn't enough to keep Craig and other athlete's busy, they still have to maintain a full time student status.

"A lot of teachers are nervous and think jocks get all the breaks," said Craig. "It's not like that. We work hard in school."

As the season progresses, Craig and other athlete's find themselves on a different level.

So as the season progresses, Craig and other athlete's find themselves on a different level. It's a pull together type of situation. "I want to be here," said Craig...

"It's a pull together type of situation," said Craig. "We respect the philosophy because we are finding out about ourselves."

Craig agrees that the jock dorms have trouble in bed shape but the athlete's fix them up the best they can.

CRAIG! POLY OFFERS MORE THAN FOOTBALL

PRESBYTERIAN B B Q

WELCOMING NEW & RETURNING STUDENTS

THIS SUNDAY - 5:00 PM

AT THE PRESBYTERIAN CHURCH, MARSH, MORRO, AND MORRO 

DAYTIME GARDEN 

2 chairs • table • umbrella

SHOPPING SPREE

SUPER BLUE TAG POTTING SOIL

FOR ALL POTTED PLANTS

ON PREMIUM QUALITY

$1.00 OFF

no limit

Landscapes Plants-SAVE 20-50%

TREES, NATIVES, PERENNIALS, DAYLILIES

DAYSIE, SCOTCH BROOM, JUNIPERS,

CANNAY LILLIES, AND MORE

GARDENIA - 1.00

WIN !!

$300.00

SHOPPING SPREE

WICKER PATIO SET

2 chairs • table • umbrella

GRILL • BURNER

RAILROAD SQUARE SLO

OPEN DAILY 10-5:30
Opinion

Scrap the MX

Its construction would require 40 percent of the United States' total cement production for three years. It would require the displacement of more dirt than it took to build the Panama Canal, not to mention the building of some 10,000 miles of roads—one fourth the entire mileage of the Interstate Highway System.

The U.S. Office of Management and Budget estimates it would cost $66 billion, some $250 for every man, woman and child in America.

Those are just a few of the striking facts behind the proposed MX missile system, the most expensive public works project in the nation's history.

There is little argument among proponents and opponents that the MX's costs, both in dollars and cost to the environment, will defy the imagination. And unfortunately, the MX, if built, will fail to achieve its intended purpose: Protecting the U.S. from nuclear attack in the 1980's and 90's.

MX proponents argue, with justification, that our nation's 1,000 land based minuteman missiles (ICBM's) have become vulnerable to a surprise attack from the Soviet Union because their location is fixed, making them easy targets for Soviet ICBM's.

They argue that the MX system would solve this problem, as its 200 planned missiles would be moved on underground roads amongst a system of 4,600 shelters, each a mile square. Because each missile could be located in one of 25 shelters, the Soviets would never know their exact location, supposedly making them invulnerable to attack.

Sadly, the MX plan is based on the assumption that the Soviets would make no response to the MX. If the Soviet Union decided it was to be able to knock out all our MX's, as it could our 1,000 present Minutemen, it would have to deploy another 4,600 nuclear warheads for its missiles. Would the Soviets be willing and able to do so? The answer, from former CIA director Rumsfeld Turner, is a resounding no.

Of course, Turner points out, the United States would not stand idly by to that threat. It would probably deploy more MX's and build more shelters. The Soviets would then probably build more warheads for its missiles, at a much lower cost than for the United States to keep deploying MX's. Where would it all stop?

The United States, however, could defend the MX's with an anti-ballistic missile system, but at the expense of the successful 1972 ABM Treaty. Even then, it would cost the Soviets far less to deploy more warheads than for the United States to build an ABM system.

Does this mean we are hopelessly vulnerable to a Soviet attack? Fortunately, says Turner, we are not. There are a number of excellent alternatives to the MX, all of which are effective and less costly, not to mention less costly.

The most viable solution would be to place our ICBMs in a diverse mix of systems, deploying them onboard ships, on aircraft and on large, road mobile trucks.

President Reagan will be facing a decision on the future of the MX in the coming weeks. The president says he is committed to strengthening our national security and balancing the federal budget. He could take a big step toward realizing both goals by scrapping the MX.

Letters

Parental decision

Editor:

The baby?_The parents? Which is more important? This is surely the most important question of today and one worth pondering.

I believe the baby is our most precious gift. He is a living being, independent of the parents, and has the right to life. It is the parents' duty to rear, care for and protect this living being.

Editor: Do you have a question to this effect? If so, please send it to this editor, and I believe it will be answered in full.

Screw loose

Editor:

This is in response to the letter written by Robert Lee, the founder of the Genetic Right to Life Movement. The guy obviously has a screw loose! Doesn't he realize that many of the world's problems are because of overpopulation? The results of a ban on all methods of contraception would be disastrous. There are already too many teenage pregnancies and unwanted children. Why doesn't Mr. Lee take interest in the babies who are forced to live in silt and staves? That is where the greatest problem lies: none of the prolife fanatics seem to care what happens to the babies after birth.

It infuriates me to hear someone, especially a male, trying to tell us how and when to reproduce. If these people are against contraception and abortion, fine, they don't have to partake, but they have no right to try to pass their morals off as laws on us. A woman has a right to choose.

Cheryl Harris

Mustang Daily Policy

The policy of the Mustang Daily regarding letters and submitted material is as follows:

1. Material should be submitted to the Mustang Daily office in Graphic Arts building 228, 9 a.m. to 5 p.m. weekdays or by mail to Editor, Mustang Daily, GR228, Cal Poly, San Luis Obispo, CA 93407. Letters must include the writer's name and social security number.

2. Letters will be held for at least 3 days. Responses may not be published.

3. Letters should not exceed 150 words.

4. Letters will be edited for clarity, style, and length. All submissions must include the writer's name and will be subject to identification.

5. The Mustang Daily reserves the right to edit or reject any letters.

6. The Mustang Daily will not print advertisements.

The Mustang Daily encourages reader comments on news stories, opinion pieces, editorials, etc. But please, do so in a respectful manner.

Press releases should be submitted as early as possible to the news editor in the appropriate form. All releases should include a phone number and name where further information may be obtained.
