Sadat, three Americans killed in Egypt

The reviewing stand was lit and surrounded by armchairs and bloodyed dignitaries who reviewed the Army by the attack. It occurred shortly before 1 p.m. during a low flying jet flyby.

Vice President Hosni Mubarak announced a one-year state of emergency for October 7 and he also threw a TV address announcing the death of Sadat: "We are accustomed to these wounds and we believe in God's will and we will continue in the name of the spirit and soul of our leader and our constitution that we will abide by all treaties and commitments made."

Mubarak was named by the failed National Democratic Party as the candidate for president in about two months. In the interim, the government will be headed by speaker of parliament, Salem Abu Taleb. There were no outward signs of alarm in Cairo, other than deployment of anti-aircraft police and U.S. was considered a normal precaution. Islamic prayers were read on state radio and television and Cairo residents appeared calm.

In Washington, President Reagan said with the death of the world's closest friend, the world has lost a great statesman and mankind has lost a champion of peace. "In a world filled with hatred, he was a man of hope."

Faculty unions fight for CSUC bargaining rights

BY SHARON REZAK

A battle between two faculty unions is heating up as an election draws near. A recent decision handed down by the Public Employee Relations Board in Sacramento, however, set up the USC employees on collective bargaining representation at the university.

Until the election is held, the college and university workers have no formal representation and must lobby in the legislature. The battle is between United Professors of California and Congress of Faculty Associations, each wishing to be represented in collective bargaining in different ways.

The UPC argues all professional

BY MAURA THURMAN

Cal Poly, along with all other schools and universities, has progressed toward compliance with Title IX's provisions, Cal Poly's vice president for academic affairs said on Monday, the first day of National Title IX Awareness Week.

Howard West is charged with overseeing Cal Poly's administration of the statute banning sex discrimination in education and federally assisted programs. He said university officials have become "very aware" of Title IX since it became effective July 21, 1976.

West said Cal Poly compares favorably to other campuses in support and implementation of Title IX, despite the fact that a Department of Labor statement issued Sept. 9 upheld discrimination complaints of women faculty members. The women had declared that they were denied promotions because of their sex.

"The UPC obviously will win," said Eatough. "UPC is simply too far from most of its competitors to travel cheaply. Although there are no specific cutback plans yet, West said the sports program cannot grow and will probably "do some shrinking" in the future.

Poly: coming to terms with Title IX

Reactions to Assassination
SAN FRANCISCO (AP) -- Former Secretary of State Cyrus Vance, a friend of Egyptian Vice President Hosni Mubarak, said Tuesday he is confident the Middle East peace process will continue in the wake of the assassination of Anwar Sadat.

Interviewed by CBS-TV at San Francisco International Airport during a stopover en route to Singapore, Vance, who succeeded Sadat, will follow in Sadat's footsteps and remain aligned with the United States.

"I know him well. He is a friend," said Vance. "I've talked to him many, many times...And I'm confident he is and will remain a friend of ours."

Sadat died Tuesday when men in Egyptian army uniforms opened fire on the reviewing stand at a military parade in Cairo. Mubarak, in announcing the death, pledged that Egypt will continue Sadat's foreign and domestic policies.

Vance, who served in Jimmy Carter's cabinet during the formulation of the Camp David accords between Israel and Egypt, called Sadat's death Tuesday, "a loss...a tremendous loss almost impossible to calculate."

"Yet in terms of our friendship with Egypt, I'm confident that will continue with Mubarak...and others around him in the government."

Vance said the road to peace will be harder without Sadat "because he is so vital to the process. But I think the Egyptian people and the Israeli people both want to see the peace process go forward."

Vance called Sadat "a marvelous friend. Once you were his friend, you were his friend for life."

Where would you rather be learning?

A few facts about the Lloyds Bank California Management Development Program

One way or another, you're bound to continue learning after you've received your Bachelor's Degree. The question is how valuable your education will be, and how fast you'll be able to progress ahead upon what you learn. That's why Business and Finance majors should investigate the Lloyds Bank California Management Development Program.

Here's a graduate school that pays, both immediately and in the long run. You learn management on the job making decisions in one of California's major banks. Lloyds Bank pays you firmly on a clear path to management and teaches you what you need to know to succeed, step by step.

Our College Recruiter can give you the details. Learn yourself at a managerial desk, call your Placement Office to set up an interview, or call us at (408) 965-2400, or write U.L. 1655 Scoll Blvd., Santa Clara, CA 95050.

An equal opportunity employer

INTERVIEW DATE: October 7

Lloyds Bank California
700 Newport Center Drive, Newport Beach, California 92660

612 So. Flower Street Los Angeles, CA 90017 (213) 613-2906

OUTDOORS
Inside this week's Outdoors, reporter Robin Lewis recounts “birdwalk” on Montana de Oro shore.

Tale of 13 Poly students on a northern adventure

BY SHEERY HEATH
Staff Writer

What do you mean, camp on a sand spit and gut fish all summer? I laughed at the insanity of the idea when my roommate told me she was thinking of spending the summer working in Alaska. You'd never catch me doing that! Clean salmon! I don't even like salmon!

So why, one month later, did I find myself cramming in to a van with twelve other Cal Poly students heading north? Good question. Maybe it was for the adventure and challenge or for the people I'd meet. It could have been for the money or the personal growth.

Richard Naumu, a senior business major and organizer/leader of our little team said he wanted to work closely with a small group and give people a taste of what they will encounter if they go to different cultures as volunteer workers or missionaries. I wanted to create an environment that would encourage people to develop good relationships both with God and people.

So with various reasons and high hopes for the summer, the day after commencement last June, we were off to conquer “the Last Frontier.”

We'd heard tales about the Alaskan wilderness and the grandeur of the glaciated mountains, but none of us expected the beauty that awaited us when we reached our humble summer home, Homer, Alaska, population 2000 on a good day, was literally awesome. The infamous “Homer Spit” was a narrow, five-mile long arm of sand jutting straight out into an ocean bay. On one side of the bay were snow-covered mountains that looked like they belonged in Norway. On the opposite shore was a rolling bluff that could easily have been mistaken for Canoeville.

When we drove down the Spit for the first time, Brad Harper, a junior agriculture major said, “Look at all those poor people living in tents on the beach— I feel sorry for them.” Little did he realize the intense summer we were in for.

And join them we did. I don't mean we just set up our camp there on the sand. I mean we became official “Spit rats,” as the townpeople affectionately call the 250 fishery workers that invade their peaceful little community every summer.

At first, “we looked like the howdy doody gang, with our charge of the light brigade look,” said Harper. “But then we were transformed into the scum of the earth.”

It was amazing to have affluent tourists look down their noses at us. We were something less than people just because we wore ragged clothes and needed showers. “Wisconsin, child development graduate, laughed, “I used to judging another person on the basis of his or her appearance. Now I can relate to trasting him or her to live with them and worked with them—I was one.”

I loved it,” said Debi Gorsuch, a senior in child development. “We didn't have to worry about pretenses. We were dirty and grumpy and stripped down to who we were. It was necessary to have the freedom to play society's conformist games.

The break of the dawn, I have to admit there were times when a few luxuries, like electricity and running water, would have been nice too. As it was, we only had to wash our shirt of our little tent placed on the outskirts and all the running water our hearts could desire was just down the road at the main fishery on the Spit.

Needless to say, the fishery soon became our second home. We waited day after day to get hired and befriended people from all over the world. Then, after ten days, our whole group got hired.

“After waiting so long, I was so excited to hear my name called—it was like Xmas,” said Wisuri.

That began the hardest endurance test of any of our lives. For the next six solid weeks, we cleaned more fish than I imagined existed. We were spread out all down the “disassembly” line and support was never far when the sight of more fish hit the waste of our eyes. Some of us sorted the different species of salmon that came in off the boats, some butchered them, some gutted them, a few lucky souls washed them, some got to grade them according to quality and the rest got to put the finished fish on racks and take them to the giant freezers to await shipping.

We did everything we could to maintain our sanity during the long, monotonous shifts. We sang a lot (nobody could hear anything thanks to the roar of the machines), we thought and prayed even more, and most of all, we talked for hours with whomever was working beside us.

Clothed head to toe with rubber rain gear, we soon discovered the simple pleasures of fish flinging. When the strain got to be too much, the fish parts started flying every which way. We'd get coated with blood and guts and sprayed with cold water, but somehow (now I wonder how) we grew immune to it all. Brad Harper even discovered a new taste treat and ate raw fish hearts to shock people back to life.

After awhile, everything was coming up salmon. We smelled like fish, and dreamed we were surrounded by fish. I was afraid to look in a mirror for fear I'd see a fish staring back at me.

But we didn't have to eat the stuff, thank God. While all the rest of the fishery workers headed home to a can of beans or peanut butter and jelly sandwiches, we were blessed with the gourmet cooking of the only group member who didn't work in the factory. Beth Greene, a liberal studies gradaut, brought us lunch every day, did our laundry (brave girl!), bought $500 worth of groceries weekly, got our mail, did our banking, and even had dinner waiting for us when we dragged into camp each night.

Ah, the comforts of the Spit. But then in the end of July, the rain hit. It would pour down day and night, and on a few occasions the stormy tide almost washed away our whole camp. This change in the weather dampened our spirits and after working six long weeks, the whole group went on strike.

The Pictures. Above, The Salty Dawg Saloon, one of the oldest in Alaska, was only 200 yards from the students' campsite and a center of activity for many "Spit Rats." Below, the Homer Harbor housed many salmon and crab boats between runs to the fisheries.
Novice birdwatcher nestles in...

BY ROBIN LEWIS

I park my bike against a tree near the Hazard Canyon trailhead in Montana de Oro State Park. I'm supposed to meet a birdwalk group here for my Outdoor editor Ralph Thomas, but there's no one here. I'm never first anywhere so I'm immediately paranoid.

Okay, there's no walk. Ralph's got me out here in the mist and the fog at nine on a Saturday morning for nothing. Funny guy, that Ralph.

Then people begin to arrive. An older man and woman from Santa Maria who can play a whole game of bridge in their heads; kids and all; two UC Santa Barbara students in a bird class: a young woman from Los Osos; and another woman who admits she knows nothing about birds. I begin to feel better, now we can all go kill Ralph.

Then the guide arrives, with big binoculars, like an alligator, around his neck and three bird books in his pack. Steve Schubert has a masters in biology from Cal Poly, now student teaching in Arroyo Grande and giving birdwalks for the Morro Bay Natural History Museum.

He tells us he was once a marine biology major, then he took an ornithology class and the birds "converted" him. Birds? Converted by birds away from marine biology? Fish, lobsters, crabs and coral are infinitely more interesting than birds; birds are all the same. At least a marine biologist you might get to dive with Jacques Cousteau, be on television and have Rod Stirling say what a brave guy you are.

Immediately a brown creeper is spotted, our first bird, which I never see. As we head down Hazard Canyon toward the shore, I get a good look at an international subculture: birdwatchers, or "birders."

"There's a yellow warbler," Steve says, pointing.

Pelicans...are not without a grace all their own. Stand on a rock and watch a line of pelicans glide past you, each rising and falling one behind the other on the same air current, like a slow roller coaster.

The fog is not lifting, and when we reach the beach the mist is heavy drops. "Is this rain?" asks the older woman from Santa Maria. I give her my descending native-who-is-slightly-a-credited-at-the-funny-tourist look. "No, this is just fog. Sometimes it gets hard to tell."

"Oh, Thank you," she smiles.

I turn away, looking first at the sky and then at the drops on my arm. Is this rain? I wonder.

---

When you just got a "D" and a BLT...

It's only a grade. With a little luck (and maybe a tutor), you might even pass the class. In the meantime, do something right. Raise that sinking feeling with a sandwich and a cold glass of milk. Milk's the right answer to any food. So go ahead and reward yourself. Good of milk never fails. But of course you know that.

there's nothing like something with Milk.

This seal is your assurance of a real dairy food.
...with ‘birders’

The mist, however, has not discouraged the weekly play of the common Central Coast surfer, who is all over the place. We see some on the trail and more in the water.

We also see: chickadees, white-crowned and song sparrows, dowitchers, black and white terns, godwits, a black oyster catcher, cormorants, sandpipers, ring-billed gulls, Herring’s gulls, western gulls, willets, whimbrels and terns.

Now, get this, because it’s bizarre and may surprise you. They’re all different birds. Some are big, some are small; some brown, gray and chestnut-backed; some have short legs, long legs and yellow legs; and some have straight bills while others have curved bills. And some burst into beautiful feather patterns when they lift into flight.

It’s not like “all those brown birds you see at the beach.” Now, it’s “Hey, catch that oyster catcher.” Or “Looky, a yellow warbler.” Or “You damn dog, stop chasing those poor sandpipers.”

Not only that, but they don’t all live in the same habitat,” a tough word. It means “where they can live in comfort.” You don’t find a brown pelican looping through willow branches with a yellow warbler. Warblers are quick, small birds that would wrap a pelican around a tree in flight.

Pelicans, though, are not without a grace all their own. Stand on a rock and watch a line of pelicans glide past you, each rising and falling one behind the other on the same air current, like a slow roller coaster. You don’t get a headache.

The mist, however, has not discouraged the weekly play of the common Central Coast surfer, who is all over the place. We see some on the trail and more in the water.

It’s not like “all those brown birds you see at the beach.” Now, it’s “Hey, catch that oyster catcher.” Or “Looky, a yellow warbler.” Or “You damn dog, stop chasing those poor sandpipers.”

Not only that, but they don’t all live in the same habitat,” a tough word. It means “where they can live in comfort.” You don’t find a brown pelican looping through willow branches with a yellow warbler. Warblers are quick, small birds that would wrap a pelican around a tree in flight.

Pelicans, though, are not without a grace all their own. Stand on a rock and watch a line of pelicans glide past you, each rising and falling one behind the other on the same air current, like a slow roller coaster. You don’t get a headache.

Of the beach birds, like the sandpipers, gulls and plovers, the black oyster catcher is the best. He squats black against the rocks so you can’t see him. Then he turns his neon orange bill to the side and it’s like watching a light saber cut through the fog. PHOMMMMT- TTTTTT and James Earl Jones dubs in, “I’ve been waiting for you Oyster-One.”

I kick myself for not bringing binoculars. You can’t see the birds well. How can I suppose to tell that’s a whimbrel or a godwit if I can’t make out the bill? A whimbrel’s bill turns down in a curve. I borrow some for a minute.

Birds, I decide, are like kids at the beach. Sandpipers, small sandpipers, will follow a retreating wave all the way to the trough, stand there poking in the sand, eating whatever it is they eat, while keeping an eye on the water for the next wave. “Harry, watch the water,” one tells another. “But, I did it last time.” “Just do it, okay?” And so twenty bills dip into the sand. The water rises into another wave. Harry watches. “It’s almost here, guys, let’s go.” “Wait, just one more...”

Explore NCR’s world of San Diego opportunities

On-Campus Interviews:

Thursday Oct. 22nd

The Challenges
You’ll be involved in a broad range of stimulating software projects ranging from interactive Operating Systems to System Architecture and High-level Languages/Compilers.
You’ll lend support to worldwide marketing organizations in the proposal of state-of-the-art technical program management of complex systems for major customers.

The Environment
You will be working in a state-of-the-art environment, centered around research, design and development challenges.
You’ll live and work near the ideal setting of San Diego offering year-round outdoor recreational, cultural and educational opportunities.

NCR Complete Computer Systems
An Equal Opportunity Employer

BICYCLE BILL’S 445 Higuera SLO

BICYCLE BILL’S is offering a fantastic BACK TO SCHOOL DEAL on Bicycle Tune-ups. $15!!

For all your bicycle needs: Parts, accessories, come to Bicycle Bill’s.

Bicycle Bill’s also carries the prestige Raleigh and SR line of bicycles. And our regular prices are THEIR sale prices.

Bicycle Bill’s Will:
- spot true both wheels
- adjust gears, brakes
- tube chain, cable, derailleur
- adjust bottom bracket
(you get your bike back the next day)

BICYCLE BILL’S 445 Higuera SLO

That word describes the reaction of people who hear the sound & price of the new Denon 300 & 301 moving coil cartridges. Because the cartridge is the single most important part of your stereo system, you need the best. With the lowest tip mass of any cartridges in history, the Denon 300 & 301’s reveal subtle details you’ve never heard before. That means more music.

Couple that with these incredible prices and you have the beginning of a fantastic music system.

Alaskan adventure teaches Poly students lessons of life

From page 3
so hard for so long, we rea-
ly started wondering why
in the world we were pack-
ing there on an overgrown
road of mud.

"Walking down the road in
thermalia and a down
heated in the middle of a
rainstorm in July—when I
could have been laying out
on a sunny beach—and get-
ing back to camp to find
my sleeping bag and
clothes all soaked really
made me wonder," said
Terri Fortina, a sophomore
biology major.

By the end of salmon
season, we were ready to
hang up our rain gear for
wood. We were ready for a
since soft bed to sleep in.

But there was something
magical about that link,
town, those simple,
honest people. When we
packed up our camp, we
realized that we weren't
leaving this experience
behind. The hardships we
endured, the times spent
with special people, we'll
probably never see again.

The freedom we had to
learn about society,
ourselves and God—
they're not gone, not in
the least.

"Freedom's not so much
a point we get to," said
Harper. "It's a way of
traveling. What's next?"

BANK SHOTS, TRICK SHOTS
AND OTHER TABLE MANNERS.

by Steve Mizerak

I'm gonna teach you
couple things that'll 1) im-
press your friends, and 2) maybe
lose some friends.

All you need is good eyesight,
a little dexterity, and three essen-
tials: a pool table, pool cue, and
some Lite Beer from Miller.

CHEAP SHOTS

Here's a goodie. I call it the
"Cheap Shot." Place a ball on the
edge of the corner pocket. Then,
take a half-dollar and lean it
against the side rail at the other
end of the table. (If you don't have
a half-dollar, you can always write
home to your parents: they'd love
to hear from you.)

Tell your friends you're gonna
sink the ball in the corner, using
the half-dollar as a cue ball. It's not
hard. Hit the coin solidly on the
ball, just above the center, and it
will roll along the rail knocking
the ball in the pocket. But don't forget
to scout up the half-dollar. Be-
cause you're not supposed to
lose money doing trick shots—just win Lite Beers.

THE COIN TRICK

This one drives people nuts. Place
a ball on the head spot. With the chalk,
make a circle around it, approximately
8" in diameter. Then put a quarter or
half-dollar on top of the ball. (Yes, you
can use the same one from before, or
you can write home to your parents
again.) Place the cue ball behind
the ball line and have your friends try to
knock the coin out of the circle.

Chances are, they won't be able
to do this in a good time to work on
your Lite Beer and act smug.)

When you shoot, do one of two
things: hit the object ball head-on
with follow-through so the cue ball
knocks the coin out, or hit the cue
roll very, very slowly so the coin
rolls off the object ball.

TABLE MANNERS

Now for simple table etiquette.

After you've "hustled" your
friends, you gotta keep 'em. So do
what I call "Clearing the Table.
Simply offer to buy the next round
of Lite Beer. They'll all clear
the table fast and head for the bar (or
your room or apartment). Then,
once they all have Lite (just one
spice—you're not too rich, re-
tember), tell them with Lite in
hand and a smirk on your face
that your shots were no big deal—you
were just shown off.

LITE BEER FROM MILLER.
EVERYTHING YOU ALWAYS WANTED
IN A BEER. AND LESS.
Sadat’s death may have global effect on politics

BY JEFF LEVY

The death of Egyptian President Anwar Sadat Tuesday will have a wide range of import in world politics according to Joseph Weatherby, a Cold War political science professor.

Sadat’s death at the hand of assassins may cause a reversal of the Camp David accord, said Weatherby. The death of Sadat makes it more likely that the Israelis will not vacate the West Bank in April, when the accords dictate it, he said. They will probably ask for an extension of their possession of the West Bank.

Weatherby said he believes Israeli officials will discontinuance any negotiation with the Egyptians. The Israelis will think they are the only stable country left in the Middle East, he added.

According to Weatherby, it is possible that the United States is partially responsible for Sadat’s death. “He was being sold out by the United States,” he said. “He took a chance that we would continue to support him, and we lost it.”

Weatherby added that Sadat overstated the elections, and Carter was losing, said Weatherby. “And the hostage situation. The risk he lost was with us and with all the Arab nations.”

The other Arab nations never liked Sadat because of his dealings with the United States and Israel. Most of the Arab world thought Sadat was just a “hak of the U.S. and Israel.”

Weatherby pointed out. I thought he was a good man,” Weatherby stated. “He didn’t like him. I think he thought of Egypt first. He was more pragmatic than most other Arab national leaders.” He added that Sadat was “good for Egypt, but not for the Arab cause.”

Spokesmen for the Palestine Liberation Organization have expressed their disapproval over Sadat’s death. But Weatherby believes if this happens oil prices may go up. “Without the support of Egypt, the PLO does not stand a chance,” he said.

The SaNd adolescents will do no doubt be affected by the assassination, said Weatherby. “Spokesmen for the United States does not sell AWAC’s to Saudi Arabia, which is probably, the Saudis may start to sell their oil elsewhere, he said. Weatherby believes if this happens oil prices may go up. “Without the support of Egypt, the PLO does not stand a chance,” he said.

When the Saudis lose faith in the United States and other Western nations will be making their own deals in the area. This could lead to a breakdown in relations between the United States and other NATO countries, Weatherby noted.

Reagan: America has lost a close friend

From page 1

Reagan said the assassination was an act of “cruelty and infamy.” Today, the people of the United States join with the people of Egypt and all those who long for a better world in mourning the death of Anwar Sadat.”

In Jerusalem, Israeli Prime Minister Menachem Begin said he hoped the U.S.-sponsored peace process would continue “as President Sadat would want him to, and with all his heart. I have lost not only a partner in the peace process but also a friend.”

But hard-line Arabs reacted with joy, firing rifles in the air in Lebanon to celebrate the death of the man who signed the peace treaty with Israel. The Palestine Liberation Organization’s security chief, Abu Iyad, said he would “shake the hand of anyone who pulled the trigger.”

In Beirut, one caller told news agencies that the Independent Organisation for the Liberation of Egypt was responsible for the attack, but few knowledgeable people in Lebanon had heard of the group before.

Get a new slant on math.

"The Texas Instruments new TI-40 and TI-55-II calculators have angled displays for easy-to-see-answers."

The slanted display makes these calculators easier to use at arm's length—and that's just the beginning. The economical TI-40, with built-in functions like trig, stat, logs, roots, reciprocals and more, will help you through math and science courses—especially since it comes with the informative book, Understanding Calculator Math.

The book explains how to use the TI-40 to work through, and understand, common problems. If you're an advanced math or science major, you'll be more interested in the TI-55-II, which comes with the Calculator Decision-Making Sourcebook. The TI-55-II features 56-step programmability, multiple memories, scientific and statistical operations, conversion factors and much more—a total of 112 functions. An extremely powerful calculator, at an excellent price.

Both calculators have LCD displays, long battery life and fit right in your pocket. TI-40 and TI-55-II calculators. Two new slants on math from Texas Instruments. Look for them wherever calculators are sold."
Delta not ready; judge gets $208,000

CHICAGO (AP) - A retired judge and his wife complained that Delta wasn't ready when they were, and a jury awarded them $208,000 for being bumped from a flight — for the largest award ever made to airline passengers denied their seats.

A Circuit Court jury on Monday agreed with former Illinois Supreme Court Justice Thomas Kluczynski and his wife, Melania, that they suffered "humiliation, indignity and outrage" when they were told all seats were filled because of overbooking on their Delta Airlines flight to Florida on Feb. 19, 1976.

The award against the airline, whose advertising slogan is "Delta is ready when you are," was more than twice the amount requested in the lawsuit.

Delta said it would appeal the award, which the Civil Aeronautics Board says is only the second jury award for airline bumping. CAB guidelines currently require that airlines provide bumped passengers with an equivalent time for free within two hours of their planned departure time.

The Kluczynskis had been invited to job) Alberto-Culver Chairman Leonard Levin at his Florida farm to witness the birth of a horse.

Attorneys for Delta and Arrington Travel Center, the agency that obtained the reservations, said the couple was offered another flight scheduled two hours later, but chose not to accept.

Arrington was found not liable, but Delta was ordered to pay both husband and wife $100,000 in punitive damages and $4,000 compensatory damages.

"These people ruined their own weekend. They had alternate transportation that would have gotten them there two hours later," said Delta lawyer Cornelius Callahan.

"There is no question" that the "absurd" verdict will give rise to a whole host of suits for offended feelings, ruined weekends, and real and imagined social offenses. "The Kluczynskis expressed delight with the verdict. "As a citizen, I wanted to be heard," said the 78-year-old retired justice. "I wanted to give them a lesson."

Bill Jackson, a manager of public relations for Delta, said in Atlanta that the airline felt the punitive damages "in particular are improper because punitive damages are permitted only when the defendant's behavior is proven outrageous and irresponsible."

The case is only the second time a bumped passenger has been awarded damages by a court, according to James Weldon, legal assistant to the director of the CAB's Bureau of Compliance and Consumer Protection.

Consumer advocate Ralph Nader sued Allegheny Airlines in 1972 for bumping him off a flight from Washington. Nader was awarded $25,000 in punitive damages by a federal court. The award was eventually overturned and Nader decided not to pursue it further.

Parking fines hiked

Fines for illegally parked vehicles have increased by $3 over last quarter's fines. "The fines were too low and totally ineffective," Wayne Carmack, public safety investigator, explained. He said by raising the fines students might become more aware of where they park.

The new fines are as follows:

- $10 parking
- $8 Unauthorized parking
- $3 Obstructing walkway
- $5 Obstructing a roadway

The new fines went into effect the first day of the fall quarter. To avoid getting a ticket, students should buy a parking permit and park only in areas where parking is allowed. Permits for motorcycles cost $15. Both permits can be obtained from the state police in room 131E, Administration Building.

CAREER OPPORTUNITIES

BUSINESS MANAGEMENT

TRAINING PROGRAM
FOR GRADUATES IN ALL MAJORS

Do you like to achieve results by working through other people? Are you looking for a career where you can use your educational and talent in a business environment?

Are you an organized, aggressive self-starter, able to work at a fast pace under pressure? It so, we would like to meet with you.

Any major could qualify you for management training positions in the following areas:

Financial Division - accounting, accounts payable, credit, data processing, Operations Division - food service, expense accounts, distribution, purchasing, security, Personnel Division - personnel training.

Register now for interviews at the Placement Center or send your resume to Executive Training Program, Student Employment, Seventh and Hill Streets, Los Angeles, 90014.
The play of wide receiver Damone Johnson drew some praise from his coach. "I think that made some fine catches," Harper said. "I think the Mustangs have been looking for a win."

Nelson was intercepted twice by Fullerton free safety Rod Weber on two consecutive possessions. Both steals led to Titan touchdowns. While the defense gave up 192 total yards to Fullerton in the half, including a 47-yard reverse run for six points, Nelson was the Mustang's leading ground gainer for the third time this season with 68 yards in 10 carries. Back up tailback Jim Colvin picked up 82 yards in nine attempts.

The play of wide receiver Damone Johnson drew some praise from his coach. "I think that made some fine catches," Harper said. "I think the Mustangs have been looking for a win."

It's our birthday. So this is the time of year that we like to say "Thank you for your support." Our goal remains, "Dreaming to be worty of your high esteem." Only by maintaining our own high standards for service and products can we hope to achieve that. Your genuine appreciation of our efforts is our greatest reward.

So that it gets done right, let our highly competent shop staff mount, tune, or adjust your skis and bindings. New or old, you'll be glad you did. If you need new gear or clothing... come celebrate and take advantage of our

Cross country finishes seventh

The men's cross country team finished seventh among 27 teams at the Cal State San Diego Invitational Saturday.

The defending national champions and top ranked University of Texas, El Paso won the tournament, followed by Arizona State. There was only a 25 point difference between the fourth, fifth, sixth and seventh finishers.

Doug Avrit led all Poly runners finishing in 20th place with a time of 21:05 for the 10,000 meter course. Carmelo Rios finished with a time of 21:39, but was running unattached due to an academic disqualification received during the spring quarter. Andy Gonzalez and Mike Landshoff finished 40 and 41 respectively.

"I figured we would be higher," coach Manny Bautista added. "The difference was there were better clubs competing in the meet....I didn't even expect them to be there."

Athletes in Action, Jamin Tosa and the Aggie Running Club all finished in front of the Mustangs.

However, Bautista added, "We're right on schedule. We're looking toward November and the NCAA Regionals."

Women's soccer meeting

There will be an organizational meeting held for all Cal Poly women interested in playing intercollegiate soccer tonight, 8 o'clock, at 738 Grand Ave (Garfield Apartment, no. 12).

The meeting will be finished with a 10-7 record against such schools as UCLA, USC and San Diego State. The season finished with a 1-0 loss against and mid-field against Santa Clara.

Those who cannot be in attendance at the meeting tonight but would like to compete this season should contact Kathy Kennedy at 546-2882.

Polí grad student named rodeo coach

Ralph Randel, two-time regional steer wrestling champion and former team captain, has been named coach of the Cal Poly men's and women's rodeo teams for 1981-82.

Randel's appointment was announced by Dr. Howard Brown, dean of the School of Agriculture and Natural Resources. Randel will assume the duties of Dr. LeRoy Davis, rodeo team adviser the past three years, who is now acting head of the Agricultural Management Department.

Randel served as assistant coach to the 1980-81 men's rodeo team that finished second nationally in the National Intercollegiate Rodeo Association (NIRA) championships last June in Bozeman, Mont.

"I feel lucky to be able to have the opportunity and challenge to coach the teams at Cal Poly." Randel said. We have a great tradition here and this position enables me to combine my love of rodeo with teaching."

As coach, Randel will recruit and select members of the Cal Poly teams, supervise the rodeo arena operations and teach a rodeo class offered each year.

The class, featuring many guest lectures by famous Cal Poly rodeo alumni, offers instruction in both the individual rodeo events as well as the business aspects of running a rodeo team.

Randel has had extensive experience in both areas. In addition to coach, he was a collegiate competitor. He is a four-year member of the Professional Rodeo Cowboys Association (PRCA), an 18-year member of the National Intercollegiate Rodeo Association and former Region student representative to the NIRA. He has been active in staging the Poly Royal Rodeo, held annually in April at the university.

Candidates for Bachelors & Masters Degrees in Engineering, Business and Marketing

**YOU DON'T HAVE TO BE A DOCTOR OR A LAWYER to be part of the team that explores and conquers new frontiers in health care**

There are many exciting opportunities in the health care industry for individuals with non-medical degrees. Some of the most challenging careers are to be found with an industry leader - American Hospital Supply Corporation.

Through our long-standing philosophy of excellence, economy and innovation and an aggressive approach to management, marketing and sales, American has become one of the nation's largest and most successful corporations in the health care industry.

Our 28 divisions employ more than 30,000 individuals whose efforts have resulted in a product line of more than 136,000 items vital to the hospital, laboratory, medical specialties and international markets.

American has ongoing career opportunities available in the following areas: Engineering, Computer Science, Marketing, Manufacturing, Packaging, Mechanical, Industrial, Research and Development, Quality Assurance - Regulatory Affairs, Finance, Data Processing, Marketing and Sales.

To find out more about our company and these employment opportunities, please call 1-800-327-7799 or write to: Chris Hafer, Employment Representatives, P.O. Box 7005, San Luis Obispo, CA 93407. We are an equal opportunity employer m/f.

American Hospital Supply Corporation
Tinkering

When a person notices his or her wristwatch is not running well, he or she takes it down to the jewelry store to be repaired. That person does not simply throw it out the time piece unless it would cost more to repair it than to buy a new one.

Similarly, the Long Range Planning Committee of the Academic Senate has recently detected that Cal Poly's current quarter system was working properly. But instead of tinkering with that system to correct its problems, the committee is studying the possibility of tossing out the quarter system completely and adopting a semester plan.

The committee is justified in its claim that the present quarter plan is sorely in need of repair. Classrooms sit idle all summer and professors must often squeeze 20 weeks of facts into a short 10-week period. But these, and similar problems, can be solved by modifying the existing quarter system.

The committee contends the decreases in summer enrollment would be reduced by switching to a trimester system. With more classrooms filled, money wouldn't have to be wasted on custodial care for rooms rarely used. But Cal Poly would save more money, and energy, if wings of buildings—and perhaps entire buildings—were shut down during summer quarter when student population is low. The Long Range Planning Committee's argument that a semester system would more evenly distribute students over each session misses a vital point: most students don't want to be redistributed. Many want to take the summer off to find a temporary job or just relax.

A major fault of the university's quarter system is that sometimes professors try to cram too much material into too short a time period. Consequently, a student may only receive a superficial understanding of a detailed and important subject. But this is a curriculum problem, not a problem inherent in the quarter system itself. Each department faculty should examine its curriculum to decide which courses cannot be adequately taught in a 10-week span and expand those courses which don't pass this test from a quarter to a two, or even three quarter class.

The committee cites one advantage of the trimester system is that 5,000 more new students could be accepted into Cal Poly without changing the campus population. This slight of hand trick would be accomplished, the committee says, because most students would not want to go to school year round. Thus, they would take one session off each year to find a job or relax. But the student who is willing to miss a quarter of the school year might not be as willing to miss a third of it. Also, the number of absent students might not be uniform from semester to semester as hoped. Because there is less than one percent vacancy rate in San Luis Obispo, if the committee's assumptions prove wrong, there will be many homeless people.

But the main disadvantage of the trimester system, or any semester system, is that it would completely disrupt the curriculum. Previously required courses would be dropped, new ones would probably be added. Therefore, students who were hoping to graduate in another quarter might be in for quite a surprise.

The Academic Senate should be commended for studying ways to improve the current system and for bringing some of its problems to light. But the quarter system need not be dismantled. Many want to take the summer off to find a temporary job or relax. But the student who is willing to miss a quarter might be inadequately taught in a 10-week span and expand those courses which don't pass this test from a quarter to a two, or even three quarter class.

The Long Range Planning Committee's argument that a semester system would more evenly distribute students over each session misses a vital point: most students don't want to be redistributed. Many want to take the summer off to find a temporary job or relax. But the student who is willing to miss a quarter might be inadequately taught in a 10-week span and expand those courses which don't pass this test from a quarter to a two, or even three quarter class.

The committee cites one advantage of the trimester system is that 5,000 more new students could be accepted into Cal Poly without changing the campus population. This slight of hand trick would be accomplished, the committee says, because most students would not want to go to school year round. Thus, they would take one session off each year to find a job or relax. But the student who is willing to miss a quarter of the school year might not be as willing to miss a third of it. Also, the number of absent students might not be uniform from semester to semester as hoped. Because there is less than one percent vacancy rate in San Luis Obispo, if the committee's assumptions prove wrong, there will be many homeless people.
