With the services of Swift Aire Lines gone from San Luis Obispo, Wings West and Imperial Airlines have taken over control of local air service. However, their business has been grounded by high prices and small aircraft.

Fewer flying with SLO airlines.

BY SHAWN TURNER
Staff Writer

Airplanes are too small and airline ticket prices are too high.

Those are just two reasons why fewer people fly with the airlines serving San Luis Obispo than they did a month ago, local travel agency employees said.

The drop in the number of airline customers came after Swift Aire Lines, the largest commercial airline serving the county, stopped operations in mid-September and left San Luis Obispo County Airport.

That airline, said Swift Aire representatives, was crippled by the Professional Air Traffic Controllers Organization strike and was forced to close.

After Swift Aire left, two airlines picked up its business—Wings West Airlines, which opened a local office before Swift Aire pulled out, and Imperial Airlines, a Carlsbad-based company that opened a San Luis Obispo office Sept. 28, 10 days after Swift Aire left.

An Imperial employee said his airline offers flights to airports in San Diego, Carlsbad, Ontario and Orange County, in addition to Los Angeles. But both airlines use smaller planes than Swift Aire did, and Imperial, which does not yet offer discount rates, has a slight drop in the number of airline customers flying with those companies.

"There's been a drop in business because flying is so expensive," said Alexandra Mertz, manager of San Luis Travel in San Luis Obispo. She said a round trip fare to Los Angeles on Imperial is $130.

"People are still flying," said Mertz, "but at those prices more are driving to L.A. if it's not too much trouble for them.

"Right now, with Mertz. "It is expensive," she said, "but if people want to fly bad enough, they are willing to pay the price.

Senate to revise constitution

BY SHARON REZAK
Staff Writer

The Academic Senate has proposed revisions to update its constitution. Academic Senate Chairman Tim Kersten said the revisions are necessary for the growth and improvement of the Senate.

The constitution works like the United States Constitution, except it governs faculty members.

Kersten said many sections of the current Constitution are not applicable anymore, and need to be cut out. The document was written in 1978.

For example, the current preamble states that the constitution governs only the Academic Senate, not the entire faculty. Kersten said this wording inhibits academic freedom for all faculty members—that any faculty member should be able to make proposals and inquiries and have freedom of speech, not just senate members, as this constitution implies.

The current constitution also divides the Senate into four areas: an Academic Senate, a Staff Senate, a Coordinating Committee, and a Joint Assembly. According to Kersten, three of these areas do not exist at the present.

"I've been here for the Senate 10 years and I've never even heard of the Coordinating Committee, the Joint Assembly or the Staff Senate," said Kersten. "It's unnecessary to have them written in the constitution."

The newly proposed draft deletes the three non-existent committees and rewords the preamble to establish senate and an assembly to establish governance for the general faculty.

In the current version, the Academic Senate and its responsibilities are listed first, but in the proposed draft, the general faculty and their rights and responsibilities are listed first.

The draft will be voted on Wednesday by the Constitution and Bylaws Committee of the Senate. If the new version is approved, the entire faculty will then vote on the referendum, possibly in a month, according to Kersten.

"If we don't get approval, we'll keep revising the changes until we get approval from everyone," said Kersten. "The revisions will make for a more effective structure of Cal Poly faculty's voice," he added.

After the constitution's framework is changed, the constitutional bylaws will be worked on for modification, according to the Senate chairman.

Kersten also said he feels these proposed modifications will allow the whole faculty a more major role in decision-making, rather than retaining the heavy administration influence, as in the past.
New stamps for sale Tuesday

WASHINGTON (AP) — The Postal Service is putting 8.3 billion 20-cent stamps on sale Tuesday although first-class postal rates don't go up to that level until Nov. 1.

In its announcement Monday, the Postal Service asked consumers to buy stamps before Nov. 1 to avoid lines at post offices.

Instead of having 20 cents on them, the new stamps bear the letter "O." This is the third time the Postal Service has issued a stamp without a denomination because the stamps were printed before the Postal Service knew how much rate increases would be.

The brown-and-white stamps also say they are only for domestic mail. This is because foreign postal agencies complained about mail from the United States that did not have prices.

The mail agency will issue a commemorative stamp without a denomination printed on it. The stamp honoring James Hoban, an Irish immigrant who designed the White House, will go on sale Wednesday and will be worth 20 cents.

Medfly spray areas extended

LOS GATOS, Calif. (AP) — Another 50 square miles in the San Francisco Bay area will be sprayed with malathion to prevent new infestations of the Mediterranean fruit fly, officials said Monday.

Medfly project spokesman Bill Pope announced that the southwestern portion of Alameda County would be sprayed because of concern over a female medfly found there Oct. 8.

Pope also said a fly found Sunday in West Covina in Southern California was fertile. The fly was found in an orange tree about one-quarter mile east of an area that has been sprayed for the past seven weeks.

Additional spraying will start Wednesday night over a 27-square-mile area of West Covina and Baldwin Park. Pope said. He noted that more than 800 square miles are now being sprayed throughout California.

Meanwhile, Fresno County entomologist Norman Smith told a Fresno State University symposium he believes the fly remains a critical threat to the agriculturally rich San Joaquin Valley, heart of the state's $14 billion farm industry.

Smith said that Fresno County might be able to avoid a lasting infestation because of its cold winters and hot summers.

Eagrasnay officers

CAIRO, Egypt (AP) — The Egyptian government, in a new move, quo the Soviet-based tossean fundamentalist movement blamed for Anwar Sadat's assassination, announced Monday it had purged 18 officers from the army because of their "fanatical tendencies.

The action was reported on the eve of a national referendum that is all but certain to endorse Hifid Mubarak as successor to President Sadat, whose chief nằmdlers was alleged to be a Moslem fanatic army lieutenant.

Egypt's defense minister, meanwhile, reported that all four alleged killers survived—contrary to previous government statements that one was slain—and that the accused policemen have weakened from a coma and told "the whole story."

The minister, Lt. Gen. Abdul Halim Abu Ghazaleh, disclosed in an interview with The Associated Press that it took security forces five hours to track down one of the alleged assassins after last Tuesday's blood bath at a surburban Cairo parade ground.

Continental pilots take cut

LOS ANGELES (AP) — Continental Airline's 1,680 pilots have agreed to take a 10 percent pay cut retroactive to Oct. 1, to help the company's economic recovery program, the company announced Monday.

"The company and the pilots have agreed to review the company's financial situation early next year and determine at that time whether it's necessary to have a pilot's wage freeze for the year," said company spokesman Jack Gregory.

"In the face of a loss of nearly $88 million in the second quarter of 1981, the pilots thus became the first union-represented group in the company to agree to a pay cut," Gregory said.

Continental's President and Chief Executive Officer George Ward said he believes he can have the airline "in the black" by the end of 1982.

"The pilots get the problem and agreed to help us...in keeping the airline afloat," Ward said in a statement released by Gregory.

Israelis decide to honor treaty

JERUSALEM (AP) — After some hesitation, Israel has decided to plunge ahead with its peace with Egypt. But problems remain, particularly the issue of Palestinian autonomy, that will take more than goodwill to resolve.

Prime Minister Menachem Begin's Cabinet on Sunday reached a roster unanimous decision to carry out its treaty obligations with Egypt, barring any new unexpected shock.

The key commitment is the scheduled withdrawal next April from the Sinai Peninsula, which will leave Israel's southern flank shorn of its protective buffer zone.

"It is very clear that we have to go on with the peace process even without Sadat—as if Sadat were still alive," said Deputy Prime Minister Simcha Eshkol.

The Egyptian leader's assassination shook Israel, whose people have long been apprehensive about giving back territory in return for a promise of external peace that could easily be broken, especially once the last Israeli left the Sinai.

Brown cites more budget cuts

SAN DIEGO (AP) — Gov. Edmund Brown Jr. warned Monday of "serious fiscal problems brought on by the current economic downturn and by uncontrollable increases in state spending."

"In addition to the $460 million in state cuts which I ordered last week, we face more than $1 billion in cuts in federal propery programs," said Brown.

The state's cutbacks will mean a temporary stop to all capital construction projects, 20 percent reduction in public school building construction, he said, while fewer federal funds will mean 35,300 people will lose some welfare benefits or be cut from the rolls and 77,000 people leaving military service will lose unemployment benefits.

The cuts, he said, also will mean $3,000 fewer rented hospital units, the closing of two California Conservation Corps projects, loss of 200 jobs in the corps and the loss of 32,000 entry-level jobs in public service directed to assisting the poor and minorities in funding permanent employment.

Brown, in prepared remarks to the City Club of San Diego, called on Californians to "tighten our belts."

"But these problems are manageable and can be handled with the cooperation of all levels of government and the general public who will be affected," he asserted.
Band marches on

Photos by Lori Ortiz

The Cal Poly Marching Band, dubbed the "Pride of the Pacific," may be seen in performance at Mustang home football games. Band members practice three to four times a week to make their half-time shows come alive. Above, band members march down to Mustang Stadium. Left, a practice session on the football field. Below, many hours of hard work pays off during the weekend's half-time performance.
WHAT COULD THE ARMY POSSIBLY OFFER A BRILLIANT PERSON LIKE YOU?

Drop your guard for a minute. Even though you're in college right now, there are many aspects of the Army that you might find very attractive.

Maybe even irresistible.

See for yourself:

MED SCHOOL, ON US
You read it right. The Army's Health Professions Scholarship Program pays your necessary tuition, books, lab fees, even microscope rental during medical school.

Plus a monthly stipend that works out to about $6,000 a year.

After you've accepted into medical school, you can be accepted into our program. Then you're commissioned and you go through school as a Second Lieutenant in the Army Reserve.

The hook? Very simple. After you graduate, you give the Army a year as a doctor for every year the Army gave you as a med student, with a minimum obligation of three years service.

INTERNSHIP, RESIDENCY & CASH BONUSES
Besides scholarships to medical school, the Army also offers AMA-approved first-year postgraduate internship and residency training programs.

Such training adds no further obligation to the scholarship participant. But any Civilian Graduate Medical Education sponsored by the Army gives you a one-year obligation for every year of sponsorship, with a minimum obligation of two years service.

But you get a $9,000 annual bonus every year you're paying back medical school or postgraduate training.

So you not only get your medical education paid for, you get extra pay while you're paying it back. Not a bad deal.

A GREAT PLACE TO BE A NURSE
The rich tradition of Army Nursing is one of excellence, dedication, even heroism. And it's a challenge to live up to.

Today, an Army Nurse is the epitome of professionalism, regarded as a critical member of the Army Medical Team.

A BSN degree is required. And the clinical spectrum is almost impossible to match with active duty in civilian practice.

And, since you'll be an Army Officer, you'll receive more respect and authority than most of your civilian counterparts. You'll also enjoy travel opportunities, officer's pay and officer's privileges.

Army Nursing offers educational opportunities that are second to none. As an Army Nurse, you could be selected for graduate degree programs at civilian universities.

ADVANCED NURSING COURSE, TUITION-FREE
You get tuition, pay and living allowances. You can also take Nurse Practitioner courses and courses in many clinical specialties. All on the Army's dime.

While these programs do not cost you any money, most of them do incur an additional service obligation.

A CHANCE TO PRACTICE LAW
If you're about to get your law degree and are admitted to the bar, you should consider a commission in the Judge Advocate General Corps. Because in the Army you get to practice law right from the start.

While your classmates are still doing other lawyers' research and other lawyers' briefs, you could have your own cases, your own clients, in effect, your own practice.

Plus you'll have the pay, prestige and privileges of being an Officer in the United States Army.

With a chance to travel and make the most of what you've worked so hard to become. A real, practicing lawyer. Be an Army Lawyer.

ROTC SCHOLARSHIPS
Though you're too late for a 4-year scholarship, there are 1-, 2-, and even 1-year scholarships available.

They include tuition, books, and lab fees. Plus $100 a month living allowance. Naturally they're very competitive. Because besides helping you towards your degree, an ROTC scholarship helps you towards the gold bars of an Army Officer.

Stop by the ROTC office on campus and ask about details.

UP TO $100 A MONTH
You can combine service in the Army Reserve or National Guard with Army ROTC and get between $7,000 and $14,000 while you're still in school.

It's called the Simultaneous Membership Program. You get $50 a month as an Advanced Army ROTC Cadet and an additional $70 a month (sargent's pay) as an Army Reserve.

When you graduate, you'll be commissioned as a Second Lieutenant,

but not necessarily assigned to active duty. Find out about it.

A BONUS FOR PERFORMING WORK
You can get a $1,500 bonus just for enlisting in some Army Reserve units. Or up to $4,000 in educational benefits.

You also get paid for your Reserve duty. It comes out to about $1,100 a month for a weekend a month and two weeks annual training.

And now we have a special program to help you fit the Army Reserve around your school schedule. It's worth a look.

A SECOND CHANCE AT COLLEGE
Some may find college to be the right place at the wrong time for a variety of reasons. The Army can help them, too.

A few years in the Army can help them get money for tuition and the maturity to use it wisely.

The Army has a program in which money saved for college is matched two-for-one by the government. Then, if one qualifies, a generous bonus is added to that.

So 2 years of service can get you up to $15,200 for college. 3 and 4 years up to $20,100. In addition, bonuses up to $5,000 are available for 4-year enrollments in selected skills.

Add in the experience and maturity gained, and the Army can send an individual back to college a richer person in more ways than one.

We hope these Army opportunities have intrigued you as well as surprised you. Because there is indeed a lot the Army can offer a bright person like you.

For more information, send the coupon.

An Imperial Airlines plane takes off from San Luis Obispo Airport. Imperial is one of the airlines filling the vacuum created by Swift Aire's withdrawal from SLO.

Student protests Coffee House move

From page 1

Members of the board debated whether the benefits of the Coffee House outweigh the inconvenience to displaced students. The board's decision allows the Special Events Committee to use San Luis Lounge five or six Thursdays during the quarter.

"The library tends to be a lot noisier... I enjoy it here because it's more quiet," said Brian Feigenbaum, an architecture student questioned in San Luis Lounge.

"There's no way I'm going to fight that," said Hirr, who set up a table outside the lounge and collected 160 signatures over a period of seven hours. He stopped after being told he could only collect signatures if he were a member of a campus group or if he moved to the flower speech area.

"If I wasn't here, I doubt anyone would be here," said Hirr, who was not accompanied at the meeting by any of the petitioners. "There's no way I'm going to fight it on my own. I don't have time to try to keep the fight up (alone)."

"I know a lot of people who signed it...They would rather have the study area," said Arnold, who had not known the Board presented a petitioners would decide the matter that day. "I wish it (the petition) would do some good. I didn't realize there was no point in signing it after all," she said.

Library director to assist research program

Dr. David B. Walsh, director of the university over 600 candidates from throughout the nation. Dr. Walsh took part in a two-week seminar designed to prepare himself to serve as consultant to academic libraries around the nation that need advice on problems in such areas as staff relations, management review, collection analysis, and public service.

Chosen from a pool of directors, the university over 600 candidates from throughout the nation. Dr. Walsh took part in a two-week seminar designed to prepare himself to serve as consultant to academic libraries around the nation that need advice on problems in such areas as staff relations, management review, collection analysis, and public service.
Newspage

Teach-in: CASAS, the Iranian Students Association, and the Campus Hunger Coalition are sponsoring three events related to Central America during the week of Oct. 15. Among the programs will be slide shows on Guatemala and Nicaragua, as well as a film on the current revolution in Guatemala. For information on times and locations, call Dennis at 541-0049. Gary at 544-0031, or the Iranian Student Association at 544-0031.

ASI Film
ASI Films will present "Nine to Five" on Wednesday, Oct. 14 at 7 and 9:30 p.m. Tickets are $1.

Greek Show
Cal Poly Greeks will have a chance to come together and demonstrate their talent in a show to be held in Chumash Auditorium at 7 p.m. Oct. 17. There will be a dance. Admission is $4 for the show, $3 for the dance.

Jack-o-lanterns time!
The crops club will be sponsoripng a pumpkin carving contest Thursday, Oct. 29, during Activity Hour in the Ag Patio. All clubs in the school should participate in the contest to be able to compete. Any pumpkin can be purchased from any club member for $1.

Dietetics meeting
Joann Sokreta will be guest speaker at the next Dietetics Club meeting, Thursday, Oct. 15 at 3 p.m. in the Home Ec. Living Room. Sokreta is a Cal Poly graduate, and she will discuss "New Developments in Diagisteries."

Waffles of a parade
Participants are being sought for the Whaling Days Parade to be held in San Simon, Nov. 7. Those wishing to enter a unit, boat, car or anything else should contact: Dr. Bonnie Francisco, P.O. Box 1654, Cambria, Ca. Phone 927-4581 or 927-4116. Entry deadline is Oct. 15.

Car wash
Ete Koppa, an honors student for IGEL, majoring in having a "Halloween" car wash Oct. 31 from 10 a.m. to 2 p.m. Advance tickets are $6. Seated at the car wash will be the guest speaker.

Water polo meeting
Cal Poly Women's Water Polo is in its second year and looking for new players. No previous experience is necessary, but good swimming ability is helpful. Tryouts are at the indoor swimming pool every Wednesday at 7:30 p.m.

Be a pen pal!
If you'd like to receive mail on a more regular basis, try Pan Pals. Share your interests and exchange views and opinions withimated at the California Home Colony. For more information, contact Joann in UU 119A or call 544-1396.

Sign Language Club
A sign language club is forming. For more information, contact the Disabled Students Office at 544-0030 or Jacob Calvet at 544-7009.

RESUME OF A PROSPECTIVE EMPLOYER

APPLICANT: Standard Oil of California

ADDRESS: 225 Bush Street
San Francisco, California 94104

Attn: Coordinating Professional Employment

OBJECTIVE: Hire the best minds we can find, give them room to breathe, and see where they go.

A FEW HIGHLIGHTS FROM OUR 100 YEARS OF EXPERIENCE:

1863. Fred Taylor, using something called a cable drill, reaches the hard-won depth of 560 feet. Rock goes way to oil.

1909. The first of the modern hydcracking processes, development of Social research, is commercialized, providing an economic response to fuel demands for the next 20 years.

1967. Social researchers come up with a naphtha reforming process called Hulsforming, which increases gasoline production capacity to unleased gasoline.

1978. With construction and installation directed by Social engineers, the largest refinery in history is settled in the turbulent North Atlantic. The central platform is 1/2 the height of the Great Pyramid, and the largest man-made object ever moved.

1982. We don't know what the breakthroughs will be this year, but we've committed $2.8 billion to making sure there are some.

Having an external affair?

External Affairs — How does it affect you as a student? 

Joe Johnson and Jeff Arambel

External Affairs is an ASI staff area which covers a wide range of activities. Johnson is the ASI's representative to city government, local, civic and business concerns, other local governments, as well as to state and federal representatives. His objective is to interact with the people who impact the ASI.

Johnson felt both projects were successful and that the Chamber of Commerce, news media and the ASI together in an effort to open lines of communication among these separate groups.

Another goal of External Affairs is to investigate the possibility of forming a private foundation which would solicit funds for on-campus organizations experiencing financial difficulties. This foundation would not compete with the Cal Poly administration in securing these funds. Working closely with Johnson is Jeff Arambel, Greek Relations Assistant. The ASI Greek Relations position is in its first year at Cal Poly, and affects more than 900 students in the Creek community.

Upcoming issues concerning Arambel and Greek Affairs include the possibility of purchasing parking permits for students (while the general price per fare took a 40% increase) and holding the first ASI/Commerce, news media, and the ASI together in an effort to open lines of communication among these separate groups. Johnson felt both projects were successful and that the latter "started a new positive era in community relations."

One of the concerns that may of us have this year is the rising cost of our education. You have probably noticed the increase in the amount of registration fees you are paying this year, and you're probably asking — Where are these increases going? There are two areas within your registration fees that have been increased. First, there is a 45.50 per-year increase in Student Services Fees (SSF) and second, an increase of $6 in your Associated Students, Inc. fee. Within these two categories, you now pay $250.50 and 53%, respectively for the 1981-82 academic year.

The SSF covers the Health Center, Placement Center, Counseling Center, Testing Center, Housing, Financial Aid Administration, Activities Planning Center, and half of the Dean of Students office. The increase in the SSF did not go to expand services, but rather, it was used to fill a gap in the CSUC budget. This presents two interesting rhetorical questions: 1) Could our money find its way into new programs, or current programs being maintained? and 2) What should we expect next year, seeing that the state is in a worsening fiscal climate?

Your ASI fee provides services to the nearly 400 campus organizations, along with free legal services, a voice in Sacramento, and high-quality programs. As a student, you pay $45.50 per-year for activities, programs, and special events. This increase in the SSF did not go to expand services, but rather, it was used to fill a gap in the CSUC budget. This presents two interesting rhetorical questions: 1) Could our money find its way into new programs, or current programs being maintained? and 2) What should we expect next year, seeing that the state is in a worsening fiscal climate?

We are holding the line on ASI fees for the next few years, but we always need student input to make the best informed decisions we can on how your money is to be spent.

Cal Poly Rodeo Club

Hey, it’s rodeo time!

Cal Poly Rodeo Club is sponsoring a full rodeo this year, November 6th and 7th at Cal Poly. For anyone looking for company on those cold, dark nights, tickets would be available from the Union, the Library, or wherever you may be.

One simple phone call could bring you the security of a trained escort ready to take you anywhere on campus. Escorts will be equipped with flashlights, and easy to identify in distinguishable jackets. They will be stationed regularly in the Library and the Union, or available elsewhere by phone. The escort will be provided at no cost, and will be available weekdays until midnight.

So, what do you think? We are here to serve you, and looking for your input. Do you think it’s a worthwhile project? Would you take advantage of it? If you have a minute or two, drop us a line and tell us how we can help.

Thanks for your ideas.
Numerous students responding to CIA advertising

BY JUDY LUTZ

Due to a technical error in the Mustang Daily of Oct. 8 which made the following illegible, it is reprinted here.

CIA advertising in college newspapers is generating a "good response," according to the Southern California recruiter who placed an ad in the Mustang Daily of Oct. 6.

Issac William Walker of the CIA's Lavandera Office said the agency has advertised nationwide in student newspapers for several years. UCLA, USC and Cal Tech are among the Los Angeles area colleges which run CIA ads in their student papers each semester, he noted.

"We prefer to do it through a media attached to an academic institution," Walker said, adding that the agency would be unlikely to place an ad in a Russian language major at a technologically oriented college such as Cal Poly.

Employees educated in technological fields are more likely to be stationed in Washington, D.C., Walker said, while those in business concentrations could conceivably be employed overseas. He added that the CIA's computer use is second only to that of the National Security Agency.

The CIA's employment practices are very similar to those of large corporations or other government agencies, Walker stressed. "Women and minorities are encouraged to apply," he states the ad, which closes the CIA as an equal opportunity employer.

"Not only equal opportunity, but affirmative action, too," said Walker, referring to the agency's effort to hire more than the percentage of minorities required by federal guidelines. He said 17.7 percent of its professional employees are women.

The CIA prefers to interview student applicants three or four months before graduation, following the interview with a written investigation, he said. This is similar to the methods of other government or such corporations as TRW, Walker pointed out.

"We wouldn't want anyone to graduate and then remain unemployed while the CIA is investigating the student's background," Walker said, adding that the applicant still might not be hired because the agency's rigid standards require issuance exams in addition to the applicant's degree.

Demanding requirements "Our requirements are very demanding... You absolutely must be a U.S. citizen. You must be mobile and flexible," said the recruiter, adding that the intelligence work begins work in Washington, D.C., and there is no "local" employment.

Like other large organizations, the CIA has a variety of divisions for all types of employees. Doctors, lawyers, secretaries and computer programmers are among the unknown employees of the national spy agency.

"We prefer the individual write rather than phone in," was Walker's explanation for the lack of a phone number in the ad.

Mistakes send utility to NRC

From page 1

Through the blueprint era, some of the pipes in Unit 1 were overbraced, others underbraced. The changes in modifications to the underbraced pipes will discourage the problem of fatigue.

"Physically take from eight days to two weeks, at PG and E," a company official said. "It's going to go through the political channels, the NRC, will probably take another six months until the end of the month," said George Sarkanis, director of plant engineering.

"The repair coat should be minimal, but you can't here a help but feel a little bit concerned," said Sarkanis, a member of the general reaction team.

"We are looking forward to regaining the people's confidence and producing commercial electricity in the safest way possible."
Cal Poly finished a disappointing 4th in the second annual Cal Poly Water Polo Invitational Tournament over the weekend.

On Saturday the Mustangs sunk Cal Maritime, 12-3, and Pomona Pitzer, 11-7, but on Sunday it was Poly's turn to suffer defeat as the potatoes dropped an 8-9 decision to Whittier College and were beaten by Fresno State, 18-8.

UC San Diego took top honors with a perfect 4-0 record in the double elimination tournament. San Diego's wins came against Loyola Marymount, 18-4, San Francisco State (17-4), Fresno State (4-7), and Whittier in the final game (11-8).

Fresno State finished in third place with a 3-1 record, San Francisco came in 5th with a 1-3 mark, followed by Pomona-Pitzer in 6th, Cal Maritime in 7th, and Loyola Marymount in 8th.

Dave Doting was the only Mustang to be named to the All-Tournament team—Poly All-Americans Bernie Birnbaum and Bill Cadwallader were not named to the team. Birnbaum was recovering from the stomach flu and Cadwallader was playing with a severely strained thumb.

The Mustangs travel to Vallejo this weekend to compete in the Cal Maritime Invitational.
Cal Poly unveiled two new offensive weapons Saturday night in a fourth quarter drive that included a dwindling number of Mustang fans and beat the Santa Clara Broncos, 21-17.

For three quarters the horse race went pretty much as expected—dull as could be. The Mustangs, now 2-3 on the season, missed two scoring opportunities when Tom Vessella's 36 yard field goal attempt sliced wide left and fullback Dan Craig fumbled on the Bronco one yard line with Santa Clara recovering in the end zone for a touchback.

Down 17-0 with 1:10 left the Mustangs scoring machine of defensive back Gerald Purity and insideback Marvin Jackson went into action.

Purity intercepted a Steve Villa pass on the Bronco 39 yard line and raced untouched for the Mustangs first score. Leading 17-0 in the fourth quarter and faced with a third and one situation the Mustangs found themselves in a tough spot.

Leading 17-6 in the fourth quarter and faced with a third and one situation the Bronco pass call was highly questionable, or so Mustang head coach Joe Harper put it, "an invitation to disaster."

Santa Clara further extended the invitation when they fumbled the ensuing kickoff on the nine yard line with Mustang Gene Underwood coming up with the loose ball.

The offense wanted three plays before the Mustangs scored and beat the Santa Clara Broncos, 21-17.

Loyd Nelson hit Steve Mitchell with a six yard touchdown pass. Since Vessella missed the previous point after kick, Harper decided to go for two. Nelson on a roll-out option elected to run and barely snuck into the end zone after taking a heavy hit on the goal line.

The Broncos managed to handle the kickoff this time but they would have been better off with the Poly offense on the field. After three unsuccessful running plays Santa Clara was forced to punt.

"We knew they had a tight line (on passing formation)," Mustang defensive line coach Gordon Shaw said. "We thought we could rush someone from the outside to block one but we weren't quick enough."

Instead of relying on quickness Shaw decided to go for strength with the fourth quarter punt. Jackson bust through the middle to block Jeff Cerfel's punt and send it bouncing into the end zone. He then completed the play by falling on the ball to give Poly the lead and the game.

Although he wasn't exactly pleased with the "form" of his team's victory, Harper was overjoyed with the outcome. "Whatever it takes to win," he said. "We needed this one really badly."

The Mustangs will take on UC Davis in Mustang Stadium this Saturday, 7:30 p.m.

The Mustangs split soccer weekend

The Mustang soccer team split a two-game weekend road trip with a 6-0 loss to Cal State Northridge and a 2-0 victory against Cal State Dominguez Hills.

In the Northridge game, the Mustangs fell behind early, again, and were down 5-0 at halftime. The fast break offense of Poly failed to come up with their third come from behind win as Northridge poured it on, scoring three more goals in the second half.

"We were equal in capability unfortunately the score didn't reflect that," Mustang coach Wolfgang Gartner said. "We looked a little flat."

The Mustangs wasted no time in recovering from their shut out defeat as they came back on Sunday to play "a solid game" against Dominguez Hills.

For the first time this season, the Mustangs took the lead in the first half on goal by the team's leading scorer, Brett Rosenhall. Rosenthal scored again in the second half after receiving an assist from Doug Sherr. Reserve forward Michael Moore came up with his second goal in three games by dribbling around five players and firing in a shot.

Gartner singled out the play of Alex Croizer and Trevor Rodd as outstanding performances.

Both contests were California Collegiate Athletic Association league games. Cal Poly is now 5-1 in league play. They will face UC Santa Barbara Los Angeles this Sunday.

"If we win that one we win the league," Gartner said.

A's-Yanks; Expos-LA

It's a dream matchup—the Oakland A's and their fiery manager, Tony La Russa, going head-to-head against Billy Martin and his version of "Billyball," against his former team, the New York Yankees, with their volatile owner, George Steinbrenner, and their "Mr. October," Reggie Jackson, in the American League Championship series.

Los Angeles, a veteran of playoff games Montreal in the opener of the National League Championship series Tuesday with the Expos' pitching in better shape at the start of best-of-5 set.

Spiders take off after two wins

The Cal Poly women's volleyball team will take its high win streak on the road after two big wins at home.

The Mustangs, under coach Mike Wilton, improved their overall record to 10-4 with two wins over Pepperdine, 15-7, 15-8, 15-4 and No. 9-ranked Pacific, 15-12, 15-6, 15-11. Poly now sits its eyes on the toughest three weeks of its regular season schedule.

The Mustangs are faced with four of their next five dual matches on the road against top-ranked Santa Barbara, USC, Cal State Northridge and Fresno State. The home date on the schedule this month is an Oct. 24 date with San Jose State.

The two weekend wins, coupled with a Santa Barbara loss to Pacific on Friday, 14-16, 14-16, 18-17, could improve Poly's current No. 9 ranking.

Poly waded the Waves of Pepperdine into a three-game blitz to open its short two-game homestand. Junior transfer Wendy Hooper tapped the Mustangs in kills with 13 in 18 attempts. Senior Sherr Walker followed with 12-21.

The Mustangs held off a vicious assault by Pacific on Saturday and rallied for the four-game win. The Tigers were flying high from their upset over Santa Barbara on Friday and they carried that intensity into the first game with Poly. Pacific kept right on rolling into the second as it jumped out to a quick 2-0 lead but Poly rallied for seven unanswered points. Poly took the best of outside hitter Sandy Aughinbaugh as Hooper, the big bomber in the middle, dented the floor boards with four key kills. Poly kept the momentum going and staked itself to a 14-8 edge before the Tigers came roaring back.

In the third game, it was all Cal Poly. The Mustangs led by scores of 11-4 and 13-6 as they iced the game. In game four, however, Pacific gave Poly all it could handle. The game was tied at four-all, five-all, seven-all, and at 10-all before Poly rolled five unanswered points on spikes from Aughinbaug, Hooper and Terri Purling.

Aughinbaugh, with her constant peppering from the outside, led Poly with 26 kills in 56 attempts. Hooper followed with 14 kills in 31 tries and Walker nailed 13 kills.

Even though coach Wilton has lost two-year starter Chris Cohen because of stress fractures in both legs, he might have found a way to fill the void. He received outstanding performances from reserves Monica Park and Cindy Wilton used Park along the backcourt and she responded with a game-high 14 defensive saves and then Purling at the net and she too responded well with a game-high attack percentage (.429).

The Mustangs have a single game scheduled this Saturday at 7:30 p.m. with the road trip to Santa Barbara looming the following Friday night.

Opinion

Senseless destruction

Usually, when university administrators plan to alter the physical make-up of Cal Poly, much planning is done, cost estimates are made and interested parties are consulted. Administrators, however, abandoned these basic procedures last month when they decided to destroy the Architecture "Z" Lab in Poly Grove.

The lab had been the subject of a senior project planned by three architecture students, who last year completed a plan in restoring the dilapidated structure. The dean of the School of Architecture, Doug Gerard, however, set aside thousands of dollars worth of materials for the lab. Dean George Hasslein also obtained funds in case the lab had to be relocated to make room for the proposed Engineering South Building.

Although the School of Architecture kept administration officials informed about its designs on the "Z" Lab, most instructors were not told. In a Sept. 25 meeting between President Warren Baker and Executive Dean of Facilities Doug Gerard sealed the fate of the aging structure. On the following Saturday morning, a private contractor bulldozed the building.

We believe this senseless destruction was an affront to all campus organizations interested in revitalizing the "Z" Lab. Moreover, the reasons for the action given by Gerard, who authorized the demolition, are hardly compelling.

Gerard indicated the lab stood on the site of the proposed Engineering South Building, and was thus in the way. Engineering South, however, is still largely in the planning stages; indeed, even if all the procedural steps occurred on schedule, the actual construction of the building couldn't begin until 1983. Furthermore, there is no guarantee that the state will fund the $10 million structure.

Clearly, there was no pressing reason for the "Z" Lab to be destroyed at this particular time. And if the lab eventually did impede the construction of Engineering South, it could easily have been relocated on the campus' less crowded outer core. (The lab was relocated once before when it stood on the site of the Robert E. Kennedy Library.)

The reasons for approving the demolition was that he had heard rumors about "characters" and transients hanging around the lab. Yet "characters" may also be seen hanging around the University Union—should we destroy the union as well?

We also fail to understand why the School of Architecture, the Student Senate, interested students and the Campus Planning Committee were not consulted about the possible relocation of the lab. And why was the demolition done in such a covert manner?

Cal Poly administrators have a lot of explaining to do.

Daily policy

Letters and press releases may be submitted to the Mustang Daily by bringing them to the Daily office in Room 228 of the Graphic Arts Building, or by sending them to: Editor, Mustang Daily, GRC 228, Cal Poly, San Luis Obispo, CA 93407. Letters must include writers' signatures and phone number.

Editors reserve the right to edit letters for length and style, and to omit libelous statements. Letters should be kept under 300 words.

The Mustang Daily encourages readers' opinions, criticism and comments on news stories and Editorials. To ensure that letters will be considered for the next edition, they should be submitted to the Daily office by 10 a.m.

Press releases should be submitted to the Daily at least a week before they should be run. All releases must include phone numbers and names of the people or organizations involved, in case further information is needed.

All unsigned editorials reflect the majority view of the Mustang Daily Editorial Board. The board consists of Editor Tom Johnson, Managing Editor Mike Carroll and Editorial Assistants Cynthia Barakatt and David Brackney.

Letters

Editor:

I am writing to protest the announced destruction of the "Z" Lab on the morning of Sept. 26. The "Z" Lab had previously stood on the site of the new library until it was moved to a storage site next to Poly Grove. Plans had been made by the School of Architecture for relocating the structure. Preliminary drawings had been made, funds found for moving it to a new location, and extensive negotiations had been made concerning its future use, up to and including the purchase of materials for its renovation.

A full set of contingencies had been outlined for the structure's disposition, up to and including the salvaging of lumber and other materials in case demolition proved unavoidable due to lack of a proper site. However, none of the people involved in the project were notified prior to the demolition, which was self-imposed on a Saturday morning when no one was around. The fact that the "Z" Lab's destruction involved the services of a professional demolition firm, a caterpillar track, skid loader, and several flat-bed dump trucks implies the letting of a contract and a process of approval by individuals in the Cal Poly administration.

The students, faculty, and administration of Cal Poly would all be well served by a complete and thorough investigation of this incident to determine the party or parties responsible for it, and to find out what steps are being taken to prevent similar incidents in the future.

Mike Mossa, Senior

Abstain from food

Editor:

I am writing in response to David Strom's letter in the Oct. 8 edition of the Mustang Daily. Mr. Strom states that we should not kill living organisms for food, but eat only synthetic foods made from oils. Mr. Strom and I disagree on this point. If one avoids eating organic foods because one is destroying all possibilities for the consumed organism to evolve into an intelligent life form, by the same token one must abstain from all synthetic foods made from oils. Oils are composed of many elements, including dead and decomposed animals.

Knowing this, how can one set a synthetic food where there is part of a living organism in it? This organism might not have died of natural causes, but could have been killed in the prime of its life.

Mike Mossa

Editor:

I am writing in response to Catherine E. Aaron's letter, I feel it's time that someone should wake her up and remind her that San Luis Obispo is not a Los Angeles area beach community (Thank God). Just because Ms. Aaron has led a "do-your-own-thing" lifestyle, she shouldn't feel that San Luis Obispo should change just for her.

I am also outraged that she should take it upon herself to tell us that we are "so blindly set in our ways," and that we suffer from "close-mindedness and refuse to try new and different things." How dare she tell us how to live our lives. Most of us came to San Luis Obispo to get away from the fast-paced life of the city. Maybe it's a good thing Ms. Aaron came here. It sounds like the I.A. Air has affected her mind.

RCFR does a good job of representing all areas of music, and if Ms. Aaron doesn't like what she is listening to, one is stopping her from changing stations on her radio.

Michael J. Johnson
