Students tell problems experienced by disabled

BY REENIE CASHMAN

Cal Poly students came together Tuesday to learn more about the abilities and interests of the disabled on Disabled Student Awareness Day. Activities included a question-and-answer session at 11 a.m. in the University Union by ASI Vice President Mike Carr, which included a simultaneous translation for the deaf.

Five persons with disabilities ranging from epilepsy to hearing impairments were asked questions concerning various problems they may encounter as a result of their disabilities. Ralph Council, who is blind, was asked by Carr whether students should ask Council if he needs help getting around campus.

"We very much appreciate people asking. The best thing to say is 'May I help you? or 'Are you lost?' I also need them to tell me where to walk with specific landmarks," said Council.

Rick Stensby, a deaf student, played two years of varsity football for Cal Poly. He was asked how he hears signals during the game.

"Most of the time, I watch the football from the moment it's snapped, then I just keep watching it closely," he said.

Stensby also explained that most deaf people are able to read between 30 and 40 percent of words which are spoken simply by watching the speaker's lips.

When asked how people can help and protect an epileptic during a seizure, Ellen Cox, an epileptic, explained the importance of not putting anything in the individual's mouth. She stressed the two most important points, protecting the epileptic's head and turning them on their side carefully.

Cox also explained different causes of epilepsy which include auto accidents, injuries to the brain, high fevers and strokes. Displays in the University Union included adaptive equipment, special clothing, blind orienteering, wheelchair sports and braille writers. A film festival featuring movies from the Department of Rehabilitation was also conducted.

A group of students who spent the entire day in wheelchairs was another activity of Disabled Students Awareness Day.

Mike Carr participated in this experiment and explained that one of his biggest difficulties was transporting himself from the Business building to the UU. He said he received help from another student, but even with two people it was difficult.

Gail Hammigan, ASI Controller also participated.

"It was a very difficult experience. The worst part is trying to go in a door and realizing what a relief it is to see a handing button which releases the door!" she said.

The entire program was a salute to the United Nations declaration of 1981 as International Year of Disabled Persons.

Fall housing shortage 'the worst in seven years'

BY MARK ARRABIT Staff Writer

"Hello,"

"Yes. I'm calling about the three bedroom apartment for rent you have advertised in the paper."

"I'm sorry, I've already rented it."

To those who have searched for off-camp housing, that dialogue is all too familiar. And according to Cal Poly's off-campus housing director, Walt Lambert, this fall the situation was extremely tight.

"It was the worst. I've seen it in the last seven years," stated Lambert. "The first two weeks of the quarter we literally had fifteen to twenty students waiting in the office five to eight hours a day for the next rental listing. And when a new listing did become available, at most it would last ten minutes."

Similar stories of rental shortages were reported by other private placement agencies throughout the San Luis Obispo area. And the listings in the Telegram Tribune were also far below normal levels for September.

When asked what the causes of this fall's rental crisis were, Lambert answered, "No one really knows for sure. Increased enrollments and the inflow of people during the blockade of Diablo could have had an impact. And the increase in local governmental 'red tape' concerning renting could also be a factor. Most people, however, generally agree that the current high interest rates are definitely contributing to the rental shortage."

Economically unfeasible

"Given current interest rates and rents," he went on to explain, "contractors are finding it economically unfeasible to build new rental units. The rent printable form. Poly Royal will be April 23 and 24, 1982."

Senate to discuss extra funds

Finance Committee recommendations on how the ASI budget surplus will be spent will be discussed at the Student Senate meeting at 7 p.m. in University Union 220.

Budget proposals to be presented to the Senate include a salary increase for ASI officers, an increase in travel reserves and the purchase of a mat for the Concerts Committee.

A $2,000 increase in travel funds for ASI officers and $3,800 in salary increases for ASI officers have been proposed by the Finance Committee. ASI President Dennis Hawk recommended these salaries to the Finance Committee. He said in a memo to the committee the current salaries of ASI president and vice-president are below average for universities in the California State University and Colleges system.

The ASI President now receives $145 per month and the vice president receives $130 per month, while the ASI controller does not receive a salary. If the proposed increase is adopted, the ASI president's salary would be increased to $205 per month, the vice president's salary would be $170 per month, and the ASI controller would receive a salary of $180 per month.

A request for $7,826 for the Cal Poly Marching Band is also included in the recommendations to be discussed at the Senate meeting. This request includes the purchase of four saxophones at $1,500 each and travel expenses for the band's trip to Cal State Northridge in November.

The Concert Committee needs a new mat to cover the gym floor during concerts. Please see page 4

Haitian refugees drowned

HILLSBORO INLET, Fla. (AP)—Thirty-three Haitian refugees drowned early Monday after their leaky, 25-foot wooden sailboat broke up in rough surf less than a half-mile from shore, the U.S. Coast Guard said. The 14 others aboard the boat survived. It was the worst such incident since heavy influxes of Caribbean refugees began arriving by boat more than three years ago.

Petty Officer Darryl Gale said all the bodies washed ashore, and a search by helicopters and boats was suspended shortly before noon.

"You come as close. Half of them made it, half of them didn't. It's so sad," said Dan Hynes, a police sergeant in this town 35 miles north of Miami.

By midmorning, the dead—their near-naked bodies twisted into odd, positions by the fierce waves that dumped them ashore—littered the beach along with ship debris, including the broken mast. The partially submerged ship's frame washed to within 50 feet of shore.

The dead included 19 men and 14 women, including three who were pregnant. All were described as "young adults" by authorities at the Broward County morgue.

FTC head threat to consumer

Several leading consumer activists said Tuesday that there will be a flood of false advertising and shoddy products if the government adopts proposals by the new head of the Federal Trade Commission for less regulation of industry.

"It's horrifying," said Karen Burstein, chairman of the New York State Consumer Protection Board.

Rhoda H. Karpatskin, executive director of Consumers Union, the product-testing organization, said policies advocated by James C. Miller would move the country "back into the age of Let the buyer beware," or maybe even, "Let the buyer be milled."

Solidarity plans national strike

WARSAW, Poland (AP)—Solidarity defiantly went ahead with plans for a one-hour, nationwide strike Wednesday over food shortages and other problems.

The Polish Communist Party's Central Committee and the Soviet-led Warsaw Pact were reported preparing separate meetings.

The Hungarian news agency MTI said the Warsaw Pact defense ministers would meet soon in Budapest, the Central Committee would meet just hours after the strike, the biggest since a four-hour national walkout March 27.

The Hungarian news agency MTI said the Warsaw Pact defense ministers would meet soon in Budapest, Hungary. MTI did not give a date but there have been fears of Soviet intervention in Poland ever since solidarity was created 14 months ago as the first union free of party control in the Soviet bloc.

Reagan pushes arms sale plan

WASHINGTON (AP)—With a dismal Senate vote just two days away, President Reagan launched an all-out blitz on the opposition Monday in a bid to rescue his $5.5 billion arms sale to Saudi Arabia.

Before the day was over, he had picked up one vote and the opposition had gained none.

Reagan called seven senators to his office Monday—five declared opponents and two who were undecided—and aides said he might talk to a dozen other Senators before the showdown Wednesday afternoon.

He is trying to overcome opposition to the sale of AWACS radar planes and F-15 jet fighter weaponry, a plan already rejected by the House by a 301-111 vote.

Sen. Patrick Leahy, D-Vt., who also had been undecided, took to the Senate floor even as the White House meetings were in progress to say he will vote against the sale.

Arrest linked to Brink's robbery

NEW YORK (AP)—A suspected terrorist linked to last week's $1.6 million Brink's robbery was arrested today when FBI agents and local police raided a Mississippi farmhouse, authorities said.

U.S. Attorney John Martin said Cynthia Priscilla Boston, 33, was arrested in Gallman, Miss., following an investigation that traced her and a male companion from the New York area to New Orleans and then to Mississippi.

 Authorities here unsealed a federal magistrate's complaint detailing the search for the couple.

John Kelly, special agent in charge of the Jackson FBI office, said Miss Boston was arrested without incident about 6 a.m. She was arraigned later before U.S. Magistrate John R. Counties III in Jackson and set to return to the Jackson City Jail.

He said the raid was carried out by agents from Jackson and New York, assisted by the Highway Patrol and Copiah County sheriff's office.

Counts set bond at $500,000 and scheduled a Nov. 5 hearing on a request by defense attorneys that the case be moved to the federal court for the Southern District of New York.

Southern Port Traders invites you to discover all the color and adventure of the Old World trade routes in the area's largest collection of hand crafted clothing and exotic cargo.

From October 31st. to November 8 we will open our doors and, there you will find rare prices and discounts up to 50% off. We are open every day until 8pm.

Discuss your career with someone who really knows what growth means.

The Computer Automation Campus Representative who will visit your school soon shares in our dynamic 14-year history. Computer Automation was founded on an idea—our versatile minicomputer—and the dedication of a few adventurous graduates. Since then, the computers we built have become a range of successful products and the company has grown to international size.

But we've never forgotten how we got this far. Individual innovation and dedication is still rewarded at CA. And so our growth goes on and on. We have ongoing need for new graduates in the following areas:

• Electronics
• Computer Science
• Design Engineering

• Career Development
• Training Program is a 15 Month career program which offers interested graduates a unique opportunity to learn various aspects of our business from the ground up.

You are invited to meet the Campus Representative who will visit your school soon on Monday, November 9th. For more information, see your Placement Office.

"MARCO, DA BOAT IS IN, MONI!"

"Marco Polo could not believe his eyes, after all these years the treasures from the New World were finally home."
Above, Ranger Terry Brann rides Charlie through Montana de Oro meadow; below center and right, Brann cleans horse's hoof and tightens down saddle before mounting up.

With nearly ten thousand acres and fifty miles of horse and hiking trails, Montana de Oro State Park presents a problem in easy upkeep. It stretches four-and-a-half miles from sand, through woods to chaparral, down canyons and over mountain peaks. Patrol of its boundaries and trails on foot would take ten days to two weeks, explained Terry Brann, park ranger. "But, it only takes three days on a horse," he said. Brann cares for the park's two horses, Chip and Charlie, in addition to going on patrol. He lives near the "OK Corral" inside the park to keep an eye on the animals. "With a car you can put it away at night and forget about it," he said, "you can't do that with a horse."

The patrol is rarely used for rescue purposes, said Brann because few people become lost or get hurt on the trail. The patrol does carry two first aid kits, for man and horse, the horse's, including a plastic tube to be inserted in the horse's nose in case it is bitten there by a rattle snake. Because a horse cannot breathe through its mouth the tube allows it to continue breathing. "Hopefully, you get it in there fast enough," said Brann.

Boundary fence and marker checks, trail status checks and fire lookout are the patrol's areas of concern. Brann is assisted by the civilian volunteer Coast Mounted Assistance, made up of volunteer horse owners, who each patrol the park one day a month.

The park horses must be trained, said Brann, "just to walk, not run," to keep trail obstacles and behave in a crowd situation, while "getting popcorn stuffed up its nose."

"All they know how to do when we get them is run," Brann said.

Three other park rangers who have shown an interest in the patrol are now being trained by Brann to ride and care for the horses. When they are finished, said Brann, they will be confident enough to be sent out on patrol knowing they can handle the horse and the job.

"We're not interested in the finer points of equestrianism," he said, but in being sure the job is done safely.
If your midterms on Melville, and your minds on meatloaf...

It's the same old story: you're studying Literature and the only hero you can think of is a sandwich. C'mon—give yourself a break.

Sometimes the only way to refresh your memory and your bod is with food and a tall, cold glass of milk. Really. It's easier to face the Great White Whale when you're armed. Milk and a snack does it.

there's nothing like something with Milk.

Washington opposes to compensation bill

WASHINGTON (AP) - The Reagan administration said Tuesday it opposes a bill to compensate persons exposed to fallout from nuclear testing in Nevada from 1951 to 1963.

Lt. Gen. Harry Griffith, head of the Defense Nuclear Agency, said the bill would impose "an enormous cost burden" even though the government believes the average increased exposure to radiation due to the blasts was slight. There might be sites of fatal cancer cases caused by exposure to fallout from the tests, he said.

Griffith said that of some 175,000 residents of Utah, Nevada and Arizona who were downwind from the test site, the normal number of cancer deaths—had there been no testing—would be 20,000 to 35,000.

"The increased risk to the downwind residents, therefore, is very slight," Griffith testified before the Senate Labor Committee. "We are not opposed to compensation for individuals who may have legitimate claims," he said.

The committee chairman, Sen. Orrin Hatch, R-Utah, sponsor of the compensation bill, angrily accused the administration of caring more about saving money than assuring justice is done for victims of the fallout.

"I'm beginning to think that the administration is against anything that costs money," said Hatch, who has been a strong supporter of President Reagan's budget-cutting economic program.

The Finance Committee has postponed debate on how to spend the remaining $92,000 of the surplus until their next meeting. Proposals to be discussed at that time include a $25,000 allotment for the proposed Aquatic Center at Lopez Lake. The proposed center is estimated to cost between $50,000 and $90,000, and would include facilities for Cal Poly classes in water related activities such as sailing and kayaking.

About one third of the $97,583 budget surplus will be spent on mandatory expenses, which include payments of debt incurred during the 1980-81 year and a salary increase for Student Activities Information Director Doug Jones, according to Finance Committee reports.

Students feel housing crunch

From page 1

Lambert also blames high interest rates for an increase in the number of people who are having to rent. Currently in the Santa Clarita area approximately 60 percent of the population rents. And Lambert forecasts that percentage will grow.

"Very few people earn enough to pay off current mortgage rates," expressed Lambert. "The net result is that more people are being forced to rent."

So with high interest rates increasing the number of people who are renting and also restricting the building of new units, Lambert perceives a clear message for students. "Start looking early."

"Students should start checking with the Off-Campus Housing Office in March and April for fall housing," stressed Lambert. "Prior to that period we just don't know what's available, simply because landlords do not know what vacancies they will have."

Wage bonuses for swing shift custodians delayed

BY MICHAEL WINTERS

As custodian BenJIs goes about his nocturnal duties, he may be wondering

whether those in the swing shift should be awarded a wage bonus.

The reason for the mix-up, said Financial Services Manager Anthony B. Flores, is that payroll documents sent to the State Controller’s Office in Sacramento were lost. Photocopies of the documents have now been sent, and the August checks should be forthcoming.

Flores, however, said he was not aware of the problem until Friday.

It’s still a current problem,” he said, and would not merit his personal attention until Friday.

For employment in Southern California

THE LONG BEACH NAVAL SHIPYARD has civil service opportunities for:

■ Mechanical Engineers ■ Naval Architects ■ Industrial Engineers

■ Civil Engineers ■ Electrical/Electronic Engineers

THE LONG BEACH NAVAL SHIPYARD is looking for graduating engineers who:

■ Are creative in engineering analysis to improve cost efficiency

■ Can adapt to multi-engineering problems with state of the art requirements

■ Are self-motivating

Senate to decide allocation of ASI surplus funds

From page 1
the gym floor during practice because its present- mat does not meet fire safety specifications, said Craig Waldman, Concert Committee Chairman. The finance Committee has recommended that $8,500 of the budget surplus be used to purchase a new mat.

The Finance Committee recommendations suggest $2,655 be given to the Student Recreation Board for student polls and mail surveys. Another proposal suggests an expenditure of $4,606 for the ASI Times in the Mustang Daily. Another Finance Committee recommendation asks for $2,505 to pay for the increase in dues to the California State Student Association. The CSSA increased their dues last year after the 1981-82 budget was approved and these funds will help pay for the increase, according to an ASI source. The $2,505 will also help to pay for an extra position in the CSSA Sacramento office. The Finance Committee has postponed debate on how to spend the remaining $80,000 of the surplus until their next meeting. Proposals to be discussed at that time include a $25,000 allotment for a proposed Aquatic Center at Lopes Lake. The proposed center is estimated to cost between $80,000 and $90,000, and would include facilities for Cal Poly classes in water related activities such as sailing and kayaking.

Wage bonuses for swing shift custodians delayed

BY MICHAEL WINTERS

Wage bonuses for Cal Poly custodians who work the swing shift have been delayed or held up completely for the last two months, and efforts to find a reason have proved frustrating.

State bureaucrats, however, said that mix-ups are being ironed out and the checks are on the way.

Swing shift custodians, those who work from 4 p.m. to 2:30 a.m. daily, receive an extra check, or differential, each month. They earn an average of 23 cents per hour more than day workers, and their differential checks amount to about $40 per month, said Dan McCready, supervisor of the swing shift.

Custodians are paid their regular check in the first week of each month for the previous month’s work. Their differential comes later. How much later is now a matter of some confusion.

Several years ago, said McCready, differentials would come between the 10th and 15th day of each month. Over the years, the date has been pushed back. Now the differential checks arrive during the third or fourth week of the month.

The September differential checks finally arrived at the campus payroll office Oct. 20, said officials. The checks were distributed to workers Oct. 22, but were dated Oct. 15, said McCready.

The main cause of why getting the swing shift differential, however, is the August stike— it has yet to arrive.

The reason for the mix-up, said Financial Services Manager Anthony B. Flores, is that payroll documents sent to the State Controller’s Office in Sacramento were lost.

Photoscopies of the documents now have been sent, and the August checks should be forthcoming.

Flores, however, said he was not aware of the problem until Friday.

“ ‘It’s still a current problem,’ he said, and would not merit his personal attention until it had gone on for 60 or 90 days.

McCready could not remember a delay of over a month for three or four years, however. And the problem seemed more than routine to him and fellow workers.

‘The only thing,’ says Flores, ‘is that payroll problems that become severe enough can be dealt with by his office in cooperation with a special liaison officer in Sacramento.’

The State Controller’s Office in Sacramento was lost. Flores said payroll problems are being frustrated by the situation: “It’s like talking to Zeus,” she said. ‘Nobody is really accountable. I’ve worked as a custodian and I know these checks can make a difference if you depend on them.”

McCready told of custodians, some from as far away as Santa Maria, arriving for work early several days during the week of Oct. 19 in hopes of getting their differentials and being able to cash them during business hours.

Flores said payroll problems that become severe enough can be dealt with by his office in cooperation with a special liaison officer in Sacramento.

As custodian Benji goes about his nocturnal duties, he may be wondering when he will again receive his overtime wages for working swing shift. Other custodians, too, will not receive compensation for swing shift work.
LOS ANGELES (AP) -

Representative Leon E. Panetta (D-
San Francisco) called a recommendation by
the U.S. Forest Service to permit oil and
gas leasing in the designated coastal
wilderness areas of the Los Padres Na-
tional Forest a "basic reversal of the na-	ion's policy of balancing energy pro-
faction with the protection of vital
natural resources."

"While oil and gas development is
discovery underway in parts of Los
Padres," Panetta said, "the necessary
balance has been maintained in those
areas. While such development should
continue if it does not endanger the
other uses of the forest, it is clear that
exploration in federally protected
wilderness areas could destroy that
delicate balance."

Panetta was reacting to a decision by
the Forest Service to take the first stop
required for companies to be permitted
to explore within those areas for mineral
resources. The Forest Service has
recommended to the Bureau of Land
Management that all 257 applications
for leasing within the Los Padres forest
be approved.

Of those 257, Panetta's objections
were aimed at the 14 applications for
leases within designated or proposed
wilderness areas; tracts set aside by
federal law as special environmental
preserves.

Student firefighter John King (above) demonstrates what can happen if the wrong type of extinguisher is used to put out a fire. Fire Captain CwmDon Johnson shows Foundation Food workers how to use an extinguisher.

Chief explains fire control

BY SANDRA GARY
Staff Writer

The Cal Poly fire chief explained how to use four types of fire extinguishers in a presentation to the Foundation Food Service staff Oct. 14.

Cal Poly Fire Chief Carmen Johnson demonstrated the extinguishers by setting fires in a protected area behind the fire station. Participation was encouraged while Johnson gave instructions to the staff members.

The four types of extinguishers demonstrated have different uses. The dry chemical extinguisher is the most common type of the 3,000 extinguishers used on campus, Johnson said. The extinguisher sprays a dry chemical and is used on three categories of fires. It is used for type A, which are ordinary combustion fires (cloth, wood); type B, liquid fires (gas, oil); and type C, electrical fires.

The second type of extinguisher demonstrated sprays pressurized water and is only used for ordinary combustion fires.

The carbon dioxide extinguisher is being phased out, Johnson said. It is too heavy for easy use, with a normal weight of over 40 pounds. This type of extinguisher cools the fire by spraying cold carbon dioxide. Its use is limited to liquid and electrical fires.

Taking the place of the carbon dioxide extinguisher is the new halon extinguisher. Halon is a chemical and is used to put out all three types of fires. It works by removing oxygen from the air.

"This halon extinguisher will put out a fire quicker than any of the other three," Johnson said.

Until the halon gas is refined, however, the extinguisher cannot be used around food, Johnson said.

Johnson warned of the possible hazard involved when fire extinguishers are misused.

"There was a prank played in a dorm," he said. "Some students discharged a halon extinguisher under a girl's door. She heard the noise and managed to get out. She fainted in the hall. Had she not heard it, we would have had a fatality on our hands."

"Do what you have to do, then leave," he said.

Johnson recommended that everyone keep a five-pound fire extinguisher in their kitchen and garage. Those with metal heads are better because they are refillable.

Apartheid still rules over justice in South Africa

Editor's note: Author Thomas C. Kenealy, to address "An African Journal" in the United States about the current situation in South Africa, was detained by the authorities. He writes the following note to the Daily:

Is there anything he'd like to add the commissioneer asks politely. No nothing, absolutely nothing, the accused answers and shakles his head defiantly. The man behind the bench efficiently finishes his notes and then pronounces sentence: Rand 100-1010 in U.S. currency or 100 days. The tall, lean black man seems unperturbed. His turns and leaves the court room to pay his fine.

Wellingtom Ntibatla, 35, is one of 18 accused sentenced in 40 minutes on this sunny Cape Town October morning, an ordinary case That depends on how you look at it. Today's proceedings are no different at all for the Langa Commissioner's Court just outside Cape Town. What is extraordinary, however, is that it is 1977-78 and still apartheid laws are still strictly enforced. Ntibatla has broken two of these laws most of those laws most of his fellow accused. He was found to be illegally, that is without a permit in the declared-white Mother City for more than 72 hours, and he neglected to carry his pass. So for this year over 8,000 such violations have appeared at Langa. Young men like Ntibatla keep coming into the Cape with the good hope of finding work—work they can't find in the homelands. Young mothers bring their sick children to the superior city hospitals—where they'll only have to pay the token amount of 50 cents. Young wives come to visit their husbands—breed-winners—only to find them often living with other women after months of forced separation.

The court views little if any of this as a mitigating factor of endless talks about working for work isn't considered an excuse but rather an aggravation of the matter. According to South African laws, black South Africans are to be treated as illegal aliens if they have no permits, akin to Mexicans in California as the Foreign Minister R.F. "Pa" Botha pointed out in Parliament recently. Eighteen cases is well below the daily average of 43 this year. Maybe for that reason he is willing to make an exception and talk to this reporter. We normally don't talk to the press since we are almost always misquoted," he explains.

Van Wyk refers to an incident he remembers very well because it caused a storm of protest in the liberal English-speaking community of Cape Town. He says he even got a letter from a relative in Canada who told him about the affair in their newspaper. What happened was that after a number of police raids the Langa and his highest superior, Minister Piet Koornhof, badly tarnished because of his handling of the notorious Nyanga squatters—had to promise that the matter be investigated. In the meantime, Fourie's place is once again in front of the bench rather than behind it.

Bicycle Bill's is offering a fantastic BACK TO SCHOOL DEAL on Bicycle Tune-ups. A $25 value for only $15!!

Avantek's Next First... Will It Be Yours?

Avantek's unprecedented 15-year record of growth and state-of-the-art technological achievements stand as a testimonial to our success. We have introduced many new products since our inception in 1965, including more than 20 industry "firsts" in the microwave and tele-communications markets. With an average growth of 30% per year, we are moving aggressively toward becoming a $100 million company but there is a lot more to be accomplished.

If you are about to complete your B.S. or M.S. in Electronics Engineering or an MBA with a technical undergraduate degree, we would like you to share in our success by considering the opportunities in Product Design, Product Development and Marketing.

The other quotations were recorded by Dana Ractliffe in the court-one-a-week since about 1977. Mrs. Ractliffi is a member of the women's organization "Black Box" which was born in 1969 and which is committed to "universal. classless, and a just society for all." It also tries to keep the public informed.

"For lots of South Africans it's a lot easier to know what's going on. You can actually sed a totally normal life in in an ab-normal society that way," says Ractliffe. "The terrify-

ble thing is that you get used to anything. Everything..."  (continues)

"Spook the Nuke" set for Diablo Oct. 31

Goblins and goblins of all stripes are heartily invited to "Spook the Nuke," that Haunted House on the Holist Fault at All Hallows' Eve, Saturday, Oct. 31.

Presented by the Cal Poly Concerned Faculty and Staff, this halloween extravaganza is open to all students and the general public are encouraged to gather at noon on the beach at Avila.

From there, the gathering will proceed to the gates of PG and its immaterial faculty to exercise its domain on Diablo.

Although it's a "come as you are" affair, participants can certainly be encouraged in the design of an appropriate costume fitting to the occasion.

Scientists claim Colombus beaten out

SAN DIEGO (AP) - The Chinese may have sail-

ed to what today is the United States at least 2,000 years before Christopher Columbus, two U.S. historians say.

After studying 11 large stones found off Southern California six years ago, Professor James R. Morarity III and Larry J. Pierson said Monday the rocks "certainly" came off a Chinese ship that may have been wrecked as recently as 500 years ago. "It could be from 500

The purpose of this festive gathering will be to scare the hell out of the goblins occupying the plant.

The Concerned Cal Poly Faculty and Staff is a con-

sortium of university employees dedicated to the end of Diablo Canyon, the haunted house on the Holist Fault.

Darrell Bennett, a registered pharmacist at the Cal Poly Student Health Center, is one of the newest members of The California State University and College Student Health Advisory Committee.

Bennett was appointed to a two-year term on the committee by CSUC Chancellor Glenn S. Dumke.

Established in 1977, the 10-member group advises the chancellor and his staff on matters pertaining to student health: develops proposals for the revision of system-wide student health policies; and evaluates campus student health care programs to en-

sure their quality.

Bennett earned his bachelor's degree in phar-

macy at the University of Arizona, and spent three years as a pharmacist at San Luis Obispo County General Hospital before joining the Student Health Center staff at Cal Poly in 1971.

He is a member of several health center com-

mittees and author of several pamphlets on personal health and health care.

NOTICE

The annual audits for the Associated Students, Inc. including the University Union, for Fiscal Year 1980-81 have now been completed.

Copies for public information are available at the Campus Library, Activities Planning Center, UU217, ASI Officer's Office, UU202.
Freshman tailback leads Poly rushers

BY VALERIE BRICKMAN

"Leading the Mustangs in rushing, freshman running back Brian Burrell has made a big name for himself early in his Cal Poly football career."

Looking down the road, offensive backfield coach, Dave Green said he can see Burrell as one of the finest ball players ever to play at Poly.

"Burrall has played more than any other freshman here and he is a big asset to the team," coach Green said.

In the 36-20 rout of UC Davis last Saturday, Burrell had 179 yards on 17 carries for a 10.5 average per carry. The 19-year-old backman also completed his rushing yards to the offensive line.

"They were outstanding in the blocking, bleeding well and making terrific holes for us," added Burrell.

Philbrick Dave Trutcheon and Don Craig, known to most on the football field as "the screen and the gander" were complimented by Burrall as working well together in the last game to help him gain his yards.

"There was excellent fumbled blocking by wide receivers Steve Mitchell, Chet Smith, Noel Lederman and Dee Jay" Damon Johnson," added Burrell.

According to Green, Burrall is very coachable.

"He works hard and does almost asked of him, is durable and dependable. He came from a good high school program," said Green.

Being the son of a Pro Wes football coach, Burrall started playing football in the Southern California area at the age of 11.

Attending Bishop Amat High School in La Puente, he was on the football and track teams where he was selected to the All-Cal Gabriel Valley and All- Angeles Conference teams in both sports.

"The team is more confident, we are a young team and we are coming together now," said Burrall. "We know how to win now as it won't be that hard to win in the future games.

For season total, the 186-pounder has accumulated 379 yards rushing on 74 carries for a 5.1 average per carry.

Speed record attempt ends in crash

The attempt by a group of Cal Poly students to establish a new land speed record for human powered vehicles was stopped by an accident that damaged the "Phoenix," the students' vehicle, on Saturday, Oct. 24, at Vandenberg Air Force Base.

Apparent cause of the accident was the failure of the rear wheel on the vehicle as it completed a 68.8 mph practice run just prior to two scheduled record attempts on the main runway of the huge Air Force installation.

Jan Russell and Butch Sinton, riders of Phoenix, during the record attempt, had just completed an easy run on the 300-meter course and were slowing the 14.6-foot-long, three-wheeled cycle when it veered off course, turned over, and skidded along the runway on its top. The vehicle's streamlined body sustained major damage. Russell suffered minor abrasions.

Ken Doering, a member of the Cal Poly Human Powered Vehicle Project, said an in-depth study of the damage and both audio and videotapes of what occurred have already begun. Although firm plans are yet to be completed, Doering expects the student team to develop a new body for the vehicle; add reasons/efforts to beat the present world record of 62.9 mph for HPVs.
Mustang midfielder Tom Harvey (right) engages In an aerial battle with a Cal State Los Angeles defender. Harvey may have won the battle but Poly lost the war, 4-1.

Cal State Los Angeles spoiled the Cal Poly soccer team's chances for their first California Collegiate Athletic Association title Saturday night, with a 4-1 victory over the spirited Mustangs.

"We played a much more skilled team than we are," Mustang coach Wolfgang Gartner said. "We tried to make up with enthusiasm and spirit what we lacked in skill but it wasn't enough to beat this team."

For the first 40 minutes of the contest Cal Poly's emotional-style of play seemed to be paying off as the Mustangs appeared to be headed for an upset, in what Gartner called their biggest game of the season.

With five minutes gone in the first half, forward Curtis Apsey caught up with a long Ilich Ten Bosch pass and chipped it over the outstretched arms of CSLA goalie Laurence Draeluck. The shell-shocked Draeluck had already managed to save a couple of vicious shots on goal before Apsey opted for finesse.

"Defensively, we were controlling the ball more...LA State was moving the ball nicely but couldn't penetrate," said Gartner.

The turning point in the game came when Mustang defender Trevor Rodd was whistled for a hand foul in the Poly penalty box. Gartner vehemently protested the call, following the official across the field voicing his displeasure—but to no avail. The subsequent penalty kick resulted in the Golden Eagles' first score.

Penalty kicks are usually awarded only when a player flagrantly violates the rules to obstruct an opponent's easy chance at a goal. Vasquez scored again in the second half to put the game well out of the Mustangs' reach.

"With as good a team as they are they would have been very hard to come back, LA State and San Jose are the two best teams we've played," Gartner said.

Eagle midfielder Rodrigo Amador scored the final goal of the game with a remarkable scissors kick which rocketed the ball pass Poly goalie Randy Smith.

Mustang title hopes are now but a memory as they fall to 2-2 in the CCAA overall and the Golden Eagles seem to have a lock on the title with a 3-0 CCAA mark. CSLA is 14-1 overall and ranked No. 3 in Division II.

"Our next aim is to have a winning season," Gartner added.

Cal Poly will travel to Palos Verdes Monday night for a major challenge against one of the nation's top-ranked teams, the University of Connec­
ticu­, 8-5, earlier in the season.

Opinion

Plan ahead

The unexpected $97,783 revenue surplus from the 1980-81 ASI budget gives the Student Senate a rare chance to look beyond short-term wants to try to satisfy long-term student needs.

The revenue surplus enables the Student Senate to concern itself with establishing programs which provide an important service to a large portion of the student population and also kick money back into the ASI coffers.

The savings breakdown proposal adopted by the Finance Committee Monday (which will be considered by the Student Senate tonight) makes an honest effort to limit funding only to those student generated projects which will bring long-term benefits to the campus. Unfortunately, $60,000 of the almost $100,000 available to the ASI, will be spent on patchwork to mend temporary budgetary holes.

The Finance Committee wisely passed a proposal by ASI President Dennis Hawk to authorize an extra 10-cent student increase in dues paid to the California State Student Association to pay for an extra position at the CSSA legislative office in Sacramento. The CSSA needs to become a more powerful and effective lobby so state legislators will keep their hands off the California State University and Colleges System budget and look elsewhere for savings.

Similarly, the Finance Committee should be commended for allocating $2,666 to the Student Relations Board so it can conduct mail surveys and campus polls to determine what needs are presently being met on this campus.

But while the work of the CSSA and Student Relations Board may provide a long-term benefit to Cal Poly students, as would the Aquatic Center, voting the Cal Poly Marching Band funds for housing and meals for its trip to Cal State Northridge and giving the ASI president and vice president more than a 100 percent raise will not.

The Mustang Daily Editorial Board is not suggesting that the Student Senate ignore requests by clubs and organizations to bail them out. Nor are we implying that these short-term needs are not important. We are simply saying that the 1980-81 revenue surplus should be reserved for projects which both benefit a large portion of the campus and become self-supporting and important immediate needs will be met through the existing ASI contingency fund and other financial avenues.

The Student Senate should take a hard look at the Finance Committee’s proposal on how to allocate the previous year’s revenues and only approve those items designed to benefit most of the student body and make a return on their investment. The money left over should be placed in a special project fund for the Student Senate to study how it could best be used.

The unexpected surplus in revenues affords the Student Senate the opportunity to do long-range financial planning rather than nickel and dime budgeting where money is allocated to organizations to meet temporary needs.

We urge them to take advantage of this opportunity.

Letters

Deep six

Editor: Stanley Pryga should ‘deep six’ his head.

In regard to his letter of Oct. 20, I would like to clear up any misconceptions readers may have gleaned from his predominantly belligerent viewpoint against the Oct. 15 letter by Bill Weinburg (“Direct Action”).

First, Pryga claims the Diablo blockade was not successful. Once again, we are fed the hogwash of the WARP interpretation of success. The blockade was not a failure. It generated worldwide recognition of a nuclear power plant which is about to go into operation 2.5 miles from an active fault at a nuclear power facility. The blockade demonstrated that concern exists throughout the United States and abroad for the safety of San Luis Obispo County present and future residents.

Certainly the object of the blockade was to stop the plant from operating. The plant has not yet been fired up, and anti-nuclear activists have not yet been defeated in their goal.

Second, Pryga cites the lack of area resident participation in the Blockade as evidence of “misinformed support for the anti-nukes.” This is ABSOLUTELY FALSE. A survey conducted by KABC-TV in Los Angeles found a majority of San Luis Obispo County residents oppose the operation of Diablo Canyon Nuclear Power Plant. In addition, over 10,000 residents participated in the first and second People’s Walks Sept. 20 and 27 to demonstrate their opposition to the plant and nuclear power.

Pryga also discounts the Peace Village put forth by Weinburg as “irrelevant.” It is not. Similar actions have proved extremely successful in Western Germany, as pointed out by Weinburg. The idea is spreading and take-over actions are currently planned in England and France.

Weinburg’s suggestion is realistic. There is no alternative but to “take the law into our own hands” as Pryga so unorigionally puts it. All legal avenues have been attempted. It is time to stop the insanity and unnecessary of nuclear power in our country and throughout the world.

Rose Ann Wentz

Distorted allegations

Editor: “Distortion is the word to describe Krean’s allegations in the Mustang Daily of the 11st of October. Distortion and misdirection are others.

The effective safety services of the community responded properly to the threats made by the ‘below Alliance and others, individually and collectively.’ It was not Diablo but rather any group or individual could trespass, threaten a life and limb, disturb the lawful conduct of business. Nor can the public financial burden occasioned by the exigencies of the event be represented as a subsidy of Diablo. It was, however, a needless expense to the taxpayer; an expense improperly chargeable to the non-chargeable types who participated in and supported the outrageous event. No, those using the blockaders have the right targets.

And, while we are on targets—Krean’s charge that Diablo will be a prime target because it will become a part of the nuclear weapons arsenal is also preposterous distortion. Diablo’s design is simply not suited for efficient production of weapons grade nuclear materials.

As for Conen—there is no country in the world, bar none, that has given more to the alleviation of poverty, hunger and injustices than has the U.S. And we listen. But we also wait, vainly, for our Russian friends (or any other) to match us in our gifts of food, technology, expertise and talent for peace.

Stanley A. Pryga

Mustang Daily
