Plus/minus grading policy approved

BY MAURA THURMAN
Staff Writer

Alpha Upsilon fraternity failed to meet several use permit conditions and smooth relations with its neighbors, the San Luis Obispo City Planning Commission determined Wednesday.

Commissioners therefore voted unanimously to consider amending or revoking the permit at a hearing to be held on Jan. 13, 1982.

Several improvements at the fraternity's property at 1334 Palm St. were finished by the Oct. 31 deadline as mandated by the City Council in May.

Nuclear war

Prof's 'think the unthinkable'

BY SHARON REZAK
Staff Writer

The Reagan Administration's policy on the arms race has the nation's leaders in defense and foreign affairs believing that nuclear war with the Soviet Union is thinkable, winnable and survivable, according to four Cal Poly professors who spoke Thursday on the topic.

The Arms Race Comes Home was the subject of a presentation was part of a nationwide program put on by 6000 U.C. campuses throughout the nation. The teach-in presented to students and faculty on the dangers and threat of nuclear weapons and war. 'The human race is very resilient,' said Rostow. "It is really the board's responsibility to complete redistricting in a reasonable fashion," Kupper said, but the prospect of a special election seemed something he had "a very hard time with.

County Clerk Cooney has estimated that a special election would cost $500,000.

Registration fee revised

Because of an executive order from the Chancellor's Office, registration fees have been raised for Winter Quarter.

The new fee levels for Winter Quarter are $120.25 for students taking more than 6 units and $110.25 for students taking 6 units or less. The registration fees published in the Winter Quarter Class Schedule are inaccurate because of the fee changes.

All payments for Winter Quarter registration should be for one of the revised amounts. Payments should be made either with the University Cashier in Room 131-E of the Administration Building, in the CAR drop box at the same location, or through the mail. Students who have already submitted their CAR forms should make their additional $5 payment at the University Cashier.

The deadline for submission of CAR forms and fee payments is Nov. 17 at 4:30 p.m.

United States' strategic thinking in the advent of a nuclear war with the Soviet Union, and the dangers of the arms race.

The four speakers, Carl Lutrin, political science; David Hafendar, physics, Ed Ward, city and regional planning; and Richard Kranzdorf, political science, spoke separately on different aspects of nuclear arms but all agreed that nuclear and military superiority for either side is meaningless.

"The number of bombs is meaningless," said Ward. "It is meaningless to say we can out-produce the other side, and we can only wipe out 8 times--nobody wins in nuclear war.

Ward also said leaders of both the United States and the Soviet Union think achieving military superiority provides working toward peace. A power battle is going on between the United States and the Soviet Union, he said, in which neither side will listen or give in to the other because each side feels vulnerable to the other.

Referring repeatedly to a Sept. 28 Los Angeles Times expose on the Reagan Administration's opinion on the arms race, Ward quoted the Reagan-appointed director of the Arms Control and Disarmament Commission, Eugene Rostow, who was asked if either country could survive the event of nuclear exchange between the United States and Russia.

"The human race is very resilient," said Rostow. "Japan, after all, not only survived, but flourished after the nuclear attack."

City and regional planning professor Ed Ward called the concept of military superiority 'meaningless' as he spoke during the nuclear arms teach-in in UU 220 yesterday morning.
Polish students boycott class

WARSAW, Poland (AP) — More than 100,000 Polish university students boycotted classes Thursday but a major strike by 150,000 workers in Zielona Gora province appeared near an end.

During a day of widespread labor unrest, the independent Solidarity announced it would meet with government officials next week to start negotiations on the Polish crisis.

Although new strikes by bus drivers and newspaper vendors started Thursday, Polish Radio announced that more than 150,000 striking workers in Zielona Gora province had heeded an appeal from Solidarity to end a regional strike that started Oct. 22.

Solidarity leaders in Zielona Gora agreed to return on Friday after receiving assurances that government officials next week would start negotiations on the Polish crisis.

U.S. diplomat escapes attack

PARIS (AP) — The top U.S. official in France ducked an assassin's bullets Thursday, crouching behind his car as a bearded gunman in a black leather jacket emptied a seven-shot pistol at him in a posh residential area near the Eiffel Tower.

The official, Christian Chapman, charged affairs at the U.S. Embassy, was not hit. The gunman escaped and no group claimed responsibility.

But Secretary of State Alexander M. Haig Jr. said in Washington that he thought left-wing MoscowKhadrat could have been behind the shooting.

Police said the gunman, "who looked Middle Eastern," shot at Chapman, 60, as he walked to his car from his apartment.

The Foreign Ministry said Chapman recently reported he had been threatened, but that he had not accepted an offer of police protection.

Columbia orbits the earth again

CAPE CANAVERAL, Fla. (AP) — Columbia, a ship of Earth born for work in space, catapulted back into the heavens Thursday, momentarily flooding a blue Florida sky with light to rival the sun.

The shuttle settled easily into orbit 187 miles high, and as astronaut Richard Truly tinkered with problems, he dropped his business-like manner and told Mission Control: "You aren't believing this, but this is fun."

Columbia's second blastoff, a spectacular event after a plague of pre-launch delays, made history. Never before had a ship of any flag tasted space a second time.

Commander Joe Engle and pilot Truly, military test pilots who had scored space flight a combined 31 years as NASA astronauts, were matter-of-fact. As their ship accelerated to its 17,400 mph speed, Engle allowed, "Very smooth." The early hours of flight were less than smooth, however, as the crew worked with Mission Control to solve a number of technical problems.

Nuclear arms discussed at teach-in

WASHINGTON (AP) — David A. Stockman, architect of President Reagan's budget-cutting proposals, offered his resignation Thursday for saying that Reaganomics might not work, and said the president "asked me to stay on the team."

Stockman told a news conference he offered his resignation to Reagan "because my poor judgment and loose talk did him and his program a serious disservice."

He spent 45 minutes conferring with Reagan amid the political uproar over his published acknowledgment of skepticism about the administration budget and tax cut program.

"At the end of the meeting, the president asked me to stay on the team," Stockman said. 

Legislative action

Kraenzel told about a bill which is in the making in the California legislature that could call a halt to the production and testing of nuclear weapons. According to Kraenzel, the bill is in final wording stages and could be introduced in the government "hopefuly" by next November.

Hofmeister explained the effects of a one megaton nuclear blast as a city using San Luis Obispo as an example. He quickly pointed out the Central Coast is not a prime target for the Soviets. From the initial blast, Hofmeister said, 500 mph winds would prevail up to three miles out from the dropping point of the bomb and there would be a 9 percent death rate in this area. There would be third degree burns on the remaining population up to six miles out, and all buildings and houses would be flattened in a range of four miles from the bomb drop. Second degree burns would be felt up to 8 1/2 miles from the center of the blast. Hofmeister said.

Graduates discussed at teach-in

The new wave musical group The Romantics played for an hour to an enthusiastic audience Wednesday night at the Graduate. In a concert co-sponsored by radio station KZOZ, the band consisting of Jimmy Marinos, Wally Palmar, Rick Cole and Mike Skill pleased a rousing Central Coast audience.

**Drifters come to Chumash**

There is something about quality that doesn't have to shout to get notice. Wednesday evening the Cache Valley Drifters showed they can rightfully claim such status in the world of popular music.

The Drifters, as their fans know them, played an 80-minute set for over 360 people as part of the weekly ASI Coffee House in Chumash Auditorium. That the time seemed all too short points up the fact that they made ample use of every second, and left the audience crying for more.

The Drifters' success—two albums with a third on the way, and a full calendar of engagements—is anomalous in these days of mediocre overnight sensations that rise and fall by the dozen. Their style is eclectic, their instrumentation largely traditional. Lee is joined by San- ta Barbarans Cyrus Clarke on guitar, David West, guitar and Bill Griffin, mandolin.

"We're really more swing than bluegrass," said West. After almost ten years of working together, however, the band has developed its own hybrid sound derived from traditional American music.

"Our local point," West said, "is to the whole American heritage of traditional music." The role as musicologist is as important as that of musician, he added. "We are here to educate as well as entertain. We don't look for just a nice novelty, but also examples of the good layman's philosophy contained in much folk music."

If it's education, it's absolutely harmless. The group warmed up Wednesday night with a little bluegrass number, but soon were into original material of various styles. Clarke's new "Bar- bedoo" adds the Drifter's two bits to the current calypso revival. "Go Out and Have Myself a Ball," an original by Griffin, borrows from the gypsy swing of the 1940s dance bands.

A truly moving hymn to man's meaning in terms of life, work, and the land, it draws a living image of the bays and foggy coastline of New England and the men who fish them. One can feel the chill and smell the salt.

"We're easy," said West, as the band returned for a two-song encore after only brief applause. "Roly Poly" started it off at the insistence of a vocal minority in the audience, and they wrapped it up with a Memorial Day "Star Spangled Banner."

Warming up for the Drifters were Scott Wilson and Chris Smith, regulars at the Coffee House. The guitar duo played a predictable selection of borrowed material from such artists as Stephen Stills, Pure Prairie League and America. Notable originals included Smith's "Happens Every Day," a catchy samoa-oriented number.

The Drifters will be on the road in the northwest in the coming months, covering more miles—Lee's Toyota pickup reads 39,000 on the odometer when he bought it two years ago. Now it's at 111,000.

Asked what road the music might be taking, West could only say it is an evolution. "Playing and listening, it's a continuing education," he said.

Rockihnroll: it's heading south to Poly on Nov, 22

Bay area rocker Greg Kihn and his energetic band are heading south on Sunday, Nov. 22, for an encore performance at 8 p.m. in Cal Poly’s main gym.

The band introduced its rock ‘n’ roll sound to a Cal Poly audience in October 1980 and won the approval of Central Coast fans. This year’s concert, which will open to those 17 years of age and over, will lend off with “The Great Buildings.”

Advance tickets—available at all Cheap Thrills locations, Boo Boo Records in San Luis Obispo and the University Union Ticket Office—are $6.50 for students and $8 for the general public. Door tickets are a dollar more.

The band scored its first top-ten AM hit with “The Breakup Song,” which is subtitled “They Don’t W rite ‘em Like They Used To.” The song became a rage for fans and $8 for the general public. Door tickets are a dollar more.

The band scored its first top-ten AM hit with “The Breakup Song,” which is subtitled “They Don’t W rite ‘em Like They Used To.” The song became a rage for fans and students and $8 for the general public. Door tickets are a dollar more.

Kihn, who moved from Baltimore to Berkeley in 1974, formed his own band after meeting bass player Steve Wright and drummer Larry Lynch. Kihn’s guitar and vocals, together with the talents of Lynch and Wright, were joined by Dave Carpender on lead guitar and background vocals, along with Gary Phillips on keyboard and bass.

Band members say they have managed to avoid merchandising themselves in order to achieve suc­ cess. As Kihn says, “That’s not the point of rock ‘n’ roll. The point is the expression of some kind of honest communication. That’s the point my band’s been trying to achieve all these years.”

Greg Kihn and the Great Buildings show is being sponsored by the Concert Committee of Cal Poly’s Associated Students Inc.

From left to right: Larry Lynch, Dave Carpender, Steve Wright, Gary Phillips and Greg Kihn.

Wendy Rogers and her dance company will reveal their artistic movements at Poly on Nov. 20.

BY SHARON REZAK
Staff Writer

Wendy Rogers is that rare kind of artist who is questioning yet soft and sen­sitive all at once. Her portraits of the world’s most dedicated peace­makers hang from the walls in the Galerie of the University Union. “From Lincoln to Len­non” (or rather, “Lincoln to Sadat”) is the title of the display of fine art by Dan Piel. With tiny, colorful edgewise strokes, patiently painted floor­length images of some of the world’s leaders of peace who were assassinated and their noble deeds.

The artwork is displayed in order of how the men lived and died. Lincoln’s image is barely ascertainable, with a minimum amount of color and a rather faded look to the face of the man. In this progression, the col­ors and faces become more noticeable until vivid reds and stark vibrancy draw the viewer to the haunting paintings. The canvases the men painted on progressively become more tattered and spattered with red paint and small holes become more frequent and higher on the face. This con­veys a more intense feeling towards the disturbing violence, while the memory of those recently killed remains stronger.

Finally, right next to the portrait of Anwar Sadat, an unmistakable image that is mostly bright red with small blue holes, is a nameless person—“who will be more” the painting seems to say.

The theme of the display might be “History Repeats Itself,” so much of the men painted were all assassinated in the middle of their workings for peace.

One almost startling portrait is that of another well­known peace­maker—Jesus Christ. Set apart from the others, this painting is larger and brighter with red paint or tatters. Christ’s image is not faded or as soft as the others. With a ray of light shining down from the top of His head, the Jesus portrait seems to fill the viewer with hope and promise that death is not a permanent and lasting entity, and that working for peace is not done in vain. The Lin.

Please see page 5.

Coming to Poly: ‘language of movement’

The choreographic excellence of the Wendy Rogers Dance Company will be exhibited during a single per­formance on Friday, Nov. 20, at 8 p.m. in the Cal Poly Theatre.

The public is invited to join the five-member dance company for an evening of high-energy, spirited movement as it stages the second in a series of five fine arts programs. The series is presented by the Fine Arts Committee of the Associated Students Inc.

Ticket sales may be purchased in advance at the Cal Poly Theatre Box Office at $7.50 for general admis­sion and $5 for students.

“Movements impressionist” and artist-director Wendy Rogers has danced with several female ex­perimentionalists in New York, developing a strong, earthy style that led to the formation of her own company in Berkeley in 1978.

Since then, Rogers and her company have served the public a repertory of modern dance pieces that attempt to communicate the “intergalaxies of life through the language of movement.”

In a review of her 1980 work “Living Rooms,” the Oakland Tribune described the performance as a “carefully worked excursion into aspects of our daily lives.”

Rogers’ previous works, “Terminal Chanille” and “Terminal Dust,” also reflect bold social statements in a vigorous, athletically graceful style that caused the New York Times critic to write, “Her perfor­mance show both the influence of her years in the city and suggest that Miss Rogers has a very per­ sonal, if low-keyed choreographic voice that is well worth listening to.”

American know-how is alive and well... and creating career opportunities every day at Rockwell International.

The Space Shuttle orbiter and main engine.
Valves for the largest gas transmission project in North America.
Axles for half of America's heavy-duty truck fleet.
Digital color weather radar.

Behind every one of these advanced technology projects... American know-how at Rockwell International.

We've made it our policy to work at the leading edge of technology. In our four main business areas—Aerospace, Electronics (Commercial and Defense), Automotive, General Industries—we create technologies in everything from supersonic aircraft and million-mile truck axles to sophisticated offset printing presses and avionics for the next generation of airliners.

That's American know-how at its best. And to keep it growing, we need America's best engineers and scientists... capable of developing, applying and innovatively managing technology for many of the world's unprecedented challenges.

And that means unprecedented opportunities for you.

We provide everything you'd expect from a leading high-technology company: a package of benefits including in-house education as well as tuition reimbursement, company-paid insurance, health care, and much more.

We'll soon be on campuses all over America to recruit engineering graduates for hundreds of positions we have available. We're looking for Electrical, Mechanical, Industrial, Aerospace, Civil and Chemical Engineers, plus Computer Science, Physics and Chemistry graduates.

Check your Campus Placement Office for details on Rockwell International career opportunities and their locations.

American know-how is alive and well at Rockwell International. And you can help us keep it that way for the future.
Survey reveals religious views of Poly students

BY NANCY LEWIS

Old Poly students have strong religious beliefs, as indicated by the results of a survey revealed.

Questionnaires were handed out around campus Tuesday showing that most Poly students believe in a Supreme Being, while 9 percent believe in God or Jesus Christ.

The questionnaires contained nine questions asking students about their religious beliefs.

Nineteen percent of those students surveyed believe in a Supreme Being while 13 percent of those students believe in God or Jesus Christ.

God is less accepted, as only 89 percent of those students polled believe in either God or Jesus Christ, while 8 percent either weren't sure or didn't respond.

Even fewer students believe in Christ as the son of God. Eight percent of the surveyed students believe Christ is the son of God, while 13 percent do not. Four percent did not vote.

Eighty-five percent believe in Jesus Christ as Savior, while 13 percent don't believe and 2 percent abstained.

Most students attend some sort of service at a church or a synagogue while 87 percent attend and 14 percent have no attendance.

Of those who do attend, the survey showed 45 percent of the students attend services regularly, while only 16 percent go occasionally.

The questionnaire asked students about their denomination or religion they considered themselves to be. The largest response was Catholic, with 29 percent.

Twenty percent considered themselves Christian, 13 percent considered themselves Baptist and 6 percent Methodists.

Another question asked students if they considered themselves to be born again. Thirty-one percent said yes, 62 percent said no, with 5 percent not voting.

Most Poly students have not rebelled against their religious beliefs with some sort of rebellion. Seventy-seven percent said they had not rebelled against their religion. Seven percent felt they had, but 6 percent felt they had not.

And, until recently, 5 percent felt they had, but 11 percent said they had not.

The simplest design for the survey was several classes picked randomly, with a diverse range of majors. One hundred and twenty students were surveyed between the ages of 17 and 30 years.

BY SANDRA GARY

Meeting the spiritual needs of students is the ideal of a myriad of religious organizations registered by Cal Poly's Activities Planning Center.

Religious groups recognized as legitimate campus groups range from popular Protestant denominations to little-known meditation followers.

The most popular religious organizations in terms of membership on campus according to Andre Baldwin, clerical assistant in the Activities Planning Center, are Campus Crusade For Christ (100 members), Navigators (90 members), and Inter-Varsity (50 members) - all considered Inter-Varsity Christian Fellowship, Newman Catholic Fellowship, and Baptist Student Union.

These groups use rooms for meetings or activities while other religious groups use space in specific buildings.

Campus Crusade for Christ, according to Baldwin, is the largest of the five largest religious organizations on campus.

Campus Crusade for Christ was founded in 1899 and continues to have a presence at Cal Poly. The group meets three times a week to share their faith and in their obedience to Jesus Christ. The third thing is giving students an awareness of the world around us and its spiritual and physical needs. We also want them to be aware of how God would challenge us to meet those needs. Our emphasis is outreach on campus, but we also challenge the students to reach out into the world. This may not be right away, but when they graduate, Chin said.

Inter-Varsity Christian Fellowship is another popular Protestant group. They meet three times a week to share their faith, challenge us to meet those needs. Our emphasis is outreach on campus, but we also challenge the students to reach out into the world. This may not be right away, but when they graduate, Chin said.

Inter-Varsity is the oldest of the five largest religious groups that meet the needs of Poly students.

The Vineyard: 1,000 students make it their church

By Sherry Heath

The gymnasium is full of people wearing anything from cut-offs to three-piece suits. The basketball hoops are down, but the people didn’t come to do that. Their favorite team, a bearded man in a guitar strums up the microphone, and says, “Hallo up there, the bleachers, and thank you for music begins.

But this isn’t a concert. It’s a Sunday morning and this is the Vineyard. We’re in Christian Fellowship’s lobby of 1200 people, most of whom are Cal Poly students, and the guitar-playing-in-the-pastor, Jack Little.

The 27-year-old Little laughts, "If you were at one of our meetings and you asked the 17-18-year-old Granada, and other religious and spiritual organizations we are a love relationship with love. Living."

"You can’t do things in our church, the way you do things in the world, the greatest thing is love," he said. "We want to love, God and people, but never put it into action," he added. "It’s our prayer that we would put something we put into practice."

"See there’s a tendency for Christians to get so cushioned with the Christian atmosphere that they never reach the students of many diverse faiths and denominations. Their memberships range in size from over 160 to fewer than 20."

Cal Poly religious groups

In addition to these groups, there are countless more opportunities for spiritual understanding and growth available through churches and temples throughout San Luis Obispo. Listed below are Cal Poly’s religious organizations and their contact persons.

Grading resolution approved by academic senate

From page 1

students who might make use of CLEP.

CLEP is a general standardized examination that is used nationwide to test a student's knowledge in certain subjects and general areas of knowledge. According to Hass Jones, vice president of Academic Affairs, the CLEP isn't very good because "they test the facts instead of the student's thinking ability or the student's ability to think." Many of the questions are vague or multiple choice.

Academic questions and student's rights questions were raised about the resolution at Tuesday's meeting. The committee feels the CLEP doesn't challenge a student's intellectual capacity, according to Reginald Chinbaugh, who is on the faculty of the university.

IF CLEP is denied, the question that arises is what other alternatives do the students have to challenge an exam? Opponents of the resolution feel there is a risk of ideocracy among the different professors in local challenge exams because students might be expected to cover different levels of knowledge in the subject area.

Research Aid

The Academic Senate also discussed whether to recommend that money be appropriated specifically for an automated retrieval system in the University's future budget.

Fraternity fails to meet permit standards

From page 1

Commission director Sylvia Drucker said the petition, which was signed by 18 neighbors, charged that Alpha Upsilon creates parking problems and excessive noise. It also noted that during fraternity parties, people have vomited and urinated on sidewalks, streets and private property.

Party policy

A "party operating policy" has since been formulated and distributed to neighbors. Michelle said, which includes provisions for neighborhood patrols by fraternity members during social events to pick up debris and ensure orderly conduct.

The policy also listed hours when outdoor stereo speakers would be moved indoors, and limited the number of guests at parties.

Michael also presented a letter to the commission from five people who wished to have their names removed from the petition.

"They didn't know what they were signing," he said. "Their complaints have been addressed and they are satisfied."

Pay Potashin and Amy Holbrook, who live across the street from Alpha Upsilon, said there has been a positive turn in the neighborhood-fraternity relationship.

Short on patience

"Marty and his brother are attempting to have a courteous relationship with the neighbors," Holbrook said. "In patience getting a little short."

Neighbors are concerned that they will have no recourse against the group if the use permit is approved unconditionally. Holbrook said, and most would prefer the planning commission to provide for periodic reviews.

Commissioner Randal Bullock said he considers Alpha Upsilon's neighbor-relations problems to be "synonymous with fraternities." Drucker agreed, saying that although the faces change with each appearance of Alpha Upsilon before the commission, the complaints remain the same.

Unconventional worship at Vineyard

From page 7

share God's love, forgiveness and accep-

tance.

"Jesus came to bring what was broken and to all-n broken," he said. "Our goals are the same to tell what we see and hear Jesus doing now. You don't have to tackle people on campus and hit them over the head with a Bible."

Little said, "I love college students' energy because they're doors and not set in their ways. They're in a hard gener-
tion, though, coming from TM, drugs, intellectualism, and sex, to psychiatrists, and boom."

"But a lot have found out that there's nothing wrong with coming to know God because you don't have to be religious and get into religious traps to receive Christ's love," he said.

"But I just want to give all that I have and all that I am to God and then relate to people my experience, my life, with Jesus," he said. "I share what's that's life to me, not just a bunch of words."

"And I hope I never stop hearing, 'there's a lot of love here,'" he added.

Fellowship needs spur religious groups

From page 7

church religious groups. A chapter began at Cal Poly in 1947 with the efforts of Dr. Robert C. Duthie, current head of the computers department.

Thus was the success of Inter-Varsity stems from the fact that it was beginning it has always been a student-moved effort.

The Baptist Student Union and Newman Catholic Fellowship have closer ties to religious denominations than the other groups. However, Newman groups maintain open boundaries to all students who wish to participate. BUU is sponsored by the Southern Baptist Convention which began the ministry in 1914.

The group meets during college hour in Agricultural Building, Room 522.

Newman Catholic Fellowship is affiliated with the Roman Catholic Church. The group meets Wednesday nights at 7:30 in Graphic Arts Room 107 for a Bible study or to hear a priest lecture, married couples pursue questions, or a fellow student speak.

Newman fellowships include black jacks, retorts, roller skating, and concerts. They also believe in Fellowship is the Church, and they feel the Church is the Body of Christ.

Perhaps the meaning of the word Catholic sums up the beliefs of the five largest religious organizations on campus. Catholic means universal. The origin of these groups was perhaps stated best by Kimball.

"Jesus started it."

The automated retrieval system is used by faculty for obtaining bibliographical information for research projects. The cost of this system is a problem which affects faculty research at Cal Poly, according to the Faculty Library Committee of the Academic Senate.

Last year such library in the California State University and College systems could spend only $5,000 of its state-supported budget on automated retrieval systems. This eliminated subsidised faculty use of the bibliographic retrieval system at Cal Poly and greatly reduced in-house searching.

The committee feels money should be appropriated for the automated retrieval system because it is a major element in future faculty development and research at Cal Poly.

A decision will be made at the next Academic Senate meeting whether money should be appropriated out of the future budget, according to Timothy Barnes, chair of the Faculty Library Committee.

Mustang Daily

Friday, November 13, 1981

By Manuel Luz
Spikers are smashing in showdown with UCSB

The Cal Poly women's volleyball team ruined the end to a perfect plot Wednesday night by coming back from only a one-game deficit to defeat UC Santa Barbara (10-15, 15-7, 15-10, 15-8) for the second time this season.

Billed as Showdown II because of Poly's stunning come-from-behind win over the Gauchos two weeks ago, the match may have been a fitting sequel for the 1,200 Mustang partisans on hand in the gym. However, it was not a highly suspenseful game.

Unable to penetrate Santa Barbara's blocks with any consistency in the first game, Poly went down to defeat.

"We're always a little tentative coming out of the blocks," Mustang coach Mike Wilton said. "...that's not a good habit, but it's nice to know we have the capability to come back."

Wilton said prior to the game that it would be difficult for his team to repeat the kind of comeback they had in the first match and he didn't want them to fall behind early again.

In the second game, the women seemed to have taken heed of Wilton's advice as they overcame a couple of early serving errors to take the lead, for good at 4-3. Mustang outside hitter Sandy Aughinbaugh put the game away with two thunderous spikes after the Gauchos had rallied to 9-7.

The Gauchos took early leads in both the third and fourth games but failed to hold the momentum. The front line play of Aughinbaugh, Sherm Walker, Wendy Hooper and Tina Taylor continually frustrated a highly regarded and taller Gaacho line.

Please see page 11.
Mature players asset for women

BY VALERIE BRICKMAN

The ingredients include a two-time All American, five matured sophomores, three junior college transfers and four freshmen—the finished product—the 1961-1962 Mustangs women's basketball team.

The team shows some signs of maturity, it is difficult to tell how much until they are in a game situation," said Head Coach Marilyn McNeil. "They have been doing well in practice, but I don't know what will happen when they are under pressure," she added.

The team, which was made up of seven freshmen last year, starts a tough schedule as they face six Division I schools in their Cal Poly Classic Invitational Tournament to be held on Nov. 19, 20 and 21.

Leading up to this year will be senior Laura Bushing, the two-time All American who finished last year's season averaging 21 points per game. The 5-11 guard holds the record for the most points scored in a game, as she tallied 57 points in the Nevada Reno game last year.

Another top returner for the Mustangs will be junior Carolyn Crandall. The 5-10 forward averaged 6.8 points per game and had a 4.7 rebound average.

"Carolyn is the heart of the team," said assistant coach Darla Wilson. "She is the strongest player and the hardest worker on the team," added McNeil.

Rising up and showing their experience, sophomores Kathy Fergus (6-10), Sherri Ross (6-8) and Nancy House (6-4) should be tough competitors for the Mustangs.

Coach McNeil summed up these players by saying: "Kathy is becoming a floor leader. Sherri is an extremely capable player and we are looking for big things from Nancy."

Junior Terri MacDonald (6-10) and Kelly Ulrick (6-7) complete the list of returners.

"It is unusual for us to have junior college transfers on our team, but we will need them," said McNeil.

"Rose Ross should be a tough and aggressive player for us," McNeil said.

The 5-10 Ross was selected as best defensive and most valuable player while competing on the basketball team at College of the Redwoods in Eureka.

Another returning player will be Junior Tina Waddell, a 5-7 guard who comes to Poly from Grossmont Junior College. Tina Wright, a 5-7 junior from Calibre College in Apple, will be playing guard for the Mustangs.

This year the team has only four freshem, led by Karla Haggard (6-0) and Kathy (6-10)," McNeil said. "The Mustangs send 18 points a game, the 5-10 Smalley was the most valuable player during her senior year at Right­

Rounding out the members on the 1961-1962 roster are Carolyn Citron (5-8), Alice Walker (5-8) and Gay Withers (6-6).

MUSTANG COACH HONORED

MUSTANG midfielder Alex Crozier move in for the steal against Sac State. Crozier will hopefully boost a crippled Poly offense when the Mustangs host the C.C. All-Stars, Saturday at 7:30 p.m.

Poly beats CSB; host All-Stars

The Cal Poly soccer team may be without the forward tandem of Bret Rosenthal and Curtis Apsey but they were headed in the right direction Wednesday night as they beat Cal State Bakersfield, 2-0.

Rosenthal and Apsey, the team's leading scorers; both suffered leg injuries in recent games. Mustang coach Wolfgang Gartner said his team is definitely lacking without the duo. "We can't replace Rosenthal," he said, before his only remaining seasoned forward, Apsey, was sidelined with a pulled thigh muscle.

Despite the disadvantage the Mustangs rolled over Bakersfield, for the second time this season. Two first half goals by Tom Harvey and Alex Crozier accounted for the Mustangs score. Not very impressive considering Poly beat Bakersfield 6-0 in their first meeting. But Gartner was not dissatisfied with his team's performance, especially their ball control.

The Bakersfield game closes out the regular season for the Mustangs, who finish the year with a disappointing 5-10 overall mark and 3-2 California Collegiate Athletic Association record—good enough for second place. Bakersfield finished within their 1981 schedule with a perfect record—no wins.

The Mustangs will play the Central Coast All-Stars Saturday night at 7:30 p.m. in the Mustang Stadium. It will be a fund-raiser for the Cal Poly soccer program which is in danger of falling victim to the budget ax, according to Gartner.

The All-Stars are comprised of the best players in the San Luis Obispo and Santa Maria adult leagues and a few of the top high school players in the area.

The 1981 scoring summary for the Mustangs is as follows: Rosenthal (13), Apsey (9), Crozier (4), Richard Buscher (1), Doug Shaw (1), and Jon Becker (1).
Ten years ago the Pentagon Papers were published by the New York Times, unveiling the behind-the-scenes story of the Vietnam War and government efforts to mislead the public about those dark years in American history. Today we have another “secret history” unfolding—only this time it concerns the true story of Reaganomics.

The source of the story is none other than David Stockman, the director of the Office of Management and Budget. He said in the December issue of Atlantic Monthly that the Reagan budget cut plan was actually a disguised version of the traditional Republican “trickle down” theory that favors tax cuts for the rich. (This is the idea that if the rich get richer, perhaps the trickle will “trickle down” through the lower levels of the economy—or put more simply, what’s good for General Motors is good for everyone.)

Stockman, who apparently believed he was talking “off the record” to Washington Post columnist William Greider said the Reagan plan of cutting taxes across the board was simply a smokescreen for lowering income tax rates for the wealthy. “The ‘trickle down’ theory is,” Stockman is quoted as saying, “was always a Trojan horse to bring down the top rate.”

The magazine article said, “While it was winning in the political arena, the plan was losing on Wall Street,” which of course has been on a decline.

Stockman also had some interesting things to say about the defense budget, charging that it was out of control and was “blatant inefficiency, poor deployment of manpower,contracting idiocy,” and so on.

And many Democrats who have long been opposed to Reaganomics are now entitled to a few “I told you so’s. Sen. Gary Hart has, for one, charged that the article represented “one of the most cynical pieces of performance by a public official perhaps since the Vietnam era.”

Indeed, the revelations prove what many progressive economists have been saying all along—namely, that Reaganomics is nothing more than a politically expedi ent subterfuge to aid the rich and increase defense industry profits. The lower echelons of society, meanwhile, get stuck with inflation, unemployment and high interest rates.

Now that we now know the true purpose of the president’s budget cut, Reaganomics and the trickle down theory may now be put in their proper place: economics textbooks, under the “tried and failed” section.

**Driving menace**

Editor: On the morning of Oct. 21, I was stopped at the light at the intersection of Boulevard and Mill Street, traveling toward Cal Poly. One young man on a moped and two on bicycles went right through the red light beside me, as if there were no signal there.

I am still shaking with anger and frustration, because I am afraid that someday I may be the unsuspecting participant in a tragic accident involving the moped and the bicycle or the Cal Poly student on a bicycle or moped.

Are you aware of the ripple effects such accidents have? Aside from the death or injury, perhaps permanent disability to the cyclist, the impact on the driver in the other vehicle can be devastating. First the grief of having been involved in such a tragedy, then the sorrow felt for the other family, the anguish of one’s own family. These are closely followed by the police investigation, insurance investigations, possible lawsuits, loss of time from work and lasting emotional trauma.

Because you choose not to obey traffic laws, and refuse to consider the possible effects on other drivers, you may be the victim and perpetrator of such an act. Drunk drivers are considered a menace because they are driving without the full use of their reflexes and judgment. I feel you are just as much of a menace.

**Surplus explanation**

There has been considerable concern expressed over the ASI’s current surplus of $97,500 discovered at the conclusion of the 1980-81 academic year. I wish to address the reason for such a surplus, and to attempt to explain to the Cal Poly student body how such a windfall came about.

A combination of sources contributed to the surplus funds, such as interest earned on our reserves from the preceding year, an overenrollment of 700 students, and some organizations over-income and under-expenditure.

Last year, the ASI had $42,000 in prior year savings that was not spent. This extra income came from interest and additional over-income and underexpenditure groups. $25,000 came from interest on reserve accounts which the ASI, with the university, pools to invest at high interest rates for short terms. Since interest rates soared last year, it increased the amount of interest income generated over our predicted budget.

Enrollment accounted for $24,000. Cal Poly admitted 700 students beyond those admitted the year previous. Cal Poly is the only impacted university in the 19-campus system, and these additional students contributed substantially to our surplus.

Surplus organizations like Week of Welcome and Poly Royal, normally break even. Last year, both groups made a profit. Other groups such as Concerts Committee and Speakers Forum spent under their allowed subsidy and contributed substantially to the ASI treasury because of excellent and successful programming.

Two important points must be addressed: there is no way for the ASI accountants to predict such a surplus in light of a variable economic climate; and this income could very well have gone down the way of debt, thus ensuring a static level.

Second, we foresee this surplus as a singular event. Interest rates are moving down, overenrollment cannot be depended upon, and the success of programming cannot be predicted. We cannot be positive of any outcomes, so we try to budget as best we can.

I trust I have addressed the concerns over the surplus in a candid manner as possible, and hope I have answered your questions.

If you wish additional information about the finances of the ASI, please don’t hesitate to come see me at your convenience. My phone number is 546-1291, or drop by the ASI Officers’ Office, located in Room 217A of the University Union.

Thank you.

Author Dennis Hauck is a senior business major and ASI president.

**Fed representation**

Editor: I am writing about the outrageously high interest rates which are set by the Federal Reserve System. Why are the rates so high? The Federal Reserve Banks of the U.S. are run by bankers. The Fed is composed of 15 separate branches with 12 bankers sitting on the board of each one. There are no representatives from the public. I suspect that greedy bankers are the reason for high interest rates. How do we keep an eye on these bankers? Let us have people from different professions or work in the Fed as board members.

There is a precedent. In California there is a Real Estate Advisory Commission which works with the Real Estate Commissioner. There are 10 people on the board, four of which are from the public. Why not have at least five public people serve on the board of each Fed?

Another problem with the Fed is that each branch may act independently from the rest, but this does not happen.

For example, the New York branch sets the rates and all the other branches follow suit. The inappropriateness of this situation is evident in Miami. Here, the Fed is sitting on millions of dollars brought in from some local citizens in the drug running business. This branch has bucks—but why’s the prime rate for the area lower?

If the public can send representatives to the Fed and if the 12 branches serve the needs of each region then a framework of practical economics will follow.

Mark Skinner

**Daily policy**

Editors reserve the right to edit letters for length, style, and to delete obscenities. Letters should be kept as short as possible. Inordinate length will not be printed.

The Mustang Daily encourages readers' opinions, criticisms and comments on news stories and editorials.
