NRC may revoke Diablo test license

BY DAVE BRACKNEY
Editorial Assistant

The Nuclear Regulatory Commission has tentatively decided to suspend the power-issuing license of Pacific Gas and Electric's Diablo Canyon power plant, the Washington Post reported Wednesday.

The NRC held a closed meeting Wednesday afternoon in Washington to discuss possible sanctions it could take against the plant, but no decision will be made before today at the earliest.

The meeting followed a report in the Post that it had tentatively decided at a closed session Monday to suspend the facilities license until a new PG and E hired consultant completes an audit of its seismic safety design.

PG and E spokesperson Joseph Pouc хозard said commission rules would allow for such a suspension at the closed session, but he would not discuss the commission's action Monday or speculate on it Wednesday's meeting.

In calling for a suspension, commission inspectors would be overruling recommendations from their own staff, which has opted for an informal agreement under which PG and E would not load fuel at the $2.3 billion plant without the commission's staff approval.

Wait and see

Meanwhile, PG and E spokesman Greg Prueitt said the utility had made no reaction to the news because "we're waiting to see what happens." Prueitt said the utility did not feel a suspension would accomplish anything, due to PG and E's agreement not to load the plant without commission's approval.

As of June 1981, Prueitt said, each additional day the plant's opening is postponed costs the utility about $500,000. This figure fluctuates with the stock and bond markets, as well as the cost of buying electricity from other utilities, he explained.

The Post quoted an NRC source Wednesday as saying "a track record of carelessness" was emerging from Diablo Canyon that the commission could not ignore.

Sue Brown, public affairs officer for PG and E, conceded that "human errors" have been made in planning the plant's seismic safety design, but asserted that such errors do not amount to a track record.

"We're doing our best to correct those errors," Brown added. Loading of fuel was suspended at the plant in late September, when a PG and E engineer discovered a flaw in its seismic design that had been overlooked during an earlier inspection.

Further investigations turned up several more design flaws. NRC officials said the flaws resulted from PG and E's using informal conversations, rather than writing, to communicate information to design consultants.

Fine considered

In addition to a license suspension, the NRC could still levy a fine against PG and E for not following NRC quality control standards. Commission staff members have considered a fine of $125,000.

The Diablo plant's seismic design flaws and NRC inspections are to be the topic Thursday of a hearing before the House Interior Committee's Subcommittee on Energy and the Environment.

It's official: trustees approve student fee increase

BY TWYLA THOMAS

Budget cutting actions taken by the California State University and Colleges System Board of Trustees Wednesday will result in higher registration fees and student enrollment reductions next fall.

Due to the trustees' actions, a full-time student will be paying $179 for fall quarter fees, and $173 for winter and spring quarters. Amounts to be paid by part-time students are not presently available.

Trustees back chancellor

According to Louis Messner, CSUC Chief of Budget Planning and Administration, "The board endorsed the plan submitted by the chancellor as a means for coping with the overall reduction of the 5 percent."

The board accepted each of Chancellor Glenn R. Dumke's four proposals dealing with the systemwide 5 percent budget reductions for the 1982-83 fiscal year. The reductions amount to $69.8 million.

Dumke's proposals include eliminating $1.6 million from program changes proposals, $4.8 million from program maintenance, and $2.2 million from funds that would have accommodated expected enrollment increase for next year.

This enrollment reduction proposal means 5,157 students will be denied access to the CSUC system next year.

The bulk of the budget cuts will be reimbursed by student fee increases, which will generate $41 million. For full-time students, this represents a $170 increase over this year's fees, and comes on top of a $46 emergency fee increase ordered by the board Nov. 5.

$525 total fees

For Cal Poly students, the increase brings the total of registration fee to $535 for the academic year. With registration fees totaling $535 this year, the increase for next year represents $199.

Gusty winds trash trees and barn roof

BY KAREN GRAVES

Strong winds felled several trees and literally blew the roof off a Cal Poly barn, leaving most of the campus' outer core without electricity for an hour Wednesday evening.

Jim Champion of the National Weather Service bureau in Santa Maria, estimated San Luis Obispo had experienced 35 mph winds with gusts of 50 mph.

The loss of electricity resulted when a roof blew off a hay storage barn at the Dairy Unit, knocking an electric feeder line out of service, said Ed Naretto, director of Plant Operations. The roof of the Beef Pavilion was also damaged.

"The whole outside core was affected," said Naretto. All of the agriculture units on the outer core of the campus will be without electricity for several more hours.

Please see page 3

WINTER FEES ARE

$120.25 (more than 6)

$110.25 (six units)

Jim Long, aeronautical engineering major, signs his CAR form check above a sign which offers the grim reminder that registration fees have again risen.
Soviets denounce U.S. tactics

MOSCOW (AP) — The Soviet Union accused President Reagan of trying to achieve U.S. military superiority “through the back door” with his proposed deployment to reduce U.S. and Soviet nuclear missiles in Europe.

Denouncing Reagan’s speech in Washington as “propaganda,” the official Tass news agency claimed the U.S. president was only “pretending” to denounce deployment of new U.S. medium-range nuclear missiles, in order to influence European public opinion.

The Soviet cited completely fantastic data, in the balance of forces on an order of six-to-one, in spite of irrefutable facts which confirm the existence of Europe of approximate balance on these arms between NATO and the USSR,” asserted the Tass report, read on Soviet television’s main evening news program.

Reagan offered to retreat from a NATO decision to station 595 Pershing II and cruise missiles in Western Europe if Moscow agrees to pull back its own SS-20s and other medium-range missiles, already stationed in Western Russia and aimed at Western Europe.

Soviet and American negotiators are to sit down in Geneva, Switzerland, Nov. 30 to discuss limiting theater nuclear forces.

Milk tested after students fall ill

LOS ANGELES (AP) — Health officials are testing chocolate milk from schools in Los Angeles and Orange counties after more than 500 students reported nausea and vomiting within hours of eating milk supplied by Alta-Dena Dairy.

Milk tested after students fall ill

LO S A N G E L E S (A P ) — Health officials are testing chocolate milk from schools in Los Angeles and Orange counties after more than 500 students reported nausea and vomiting within hours of eating milk supplied by Alta-Dena Dairy.

Officials aren’t ruling out other sources of food poisoning, but the milk supplied by Alta-Dena Dairy outside Los Angeles is the common denominator in every illness, said Los Angeles County Health Director Dr. Shirley Fannin.

Preliminary tests revealed no bacterial contamination, but more detailed analysis is continuing in both counties and at the state health department, officials said.

Los Angeles County’s first two incidents occurred Nov. 4 and continued through Tuesday, involving about 80 students in three private and six public elementary schools which Ms. Fannin wouldn’t identify.

In Orange County, 24 students at Charles L. McComber Intermediate School in Buena Park District became ill Friday and Monday, assistant principal Shirley Aurich said.

About five students fell sick within one to four hours after eating but recovered within a day.

Outcry against Justice Mosk

SACRAMENTO (AP) — Minority and women’s groups called Wednesday for a state investigation of state Supreme Court Justice Stanley Mosk, who has proposed legislation to ban preferential treatment for minorities.

“We believe Judge Mosk’s actions represent a serious breakdown in judicial behavior which threatens the independence of the court and public confidence in that institution,” George Dean, president of the Sacramento Urban League and the California Council of Urban League, said at a Capitol news conference.

“Justice Mosk is appealing to a narrow self-interest, blinded to injustices that still exist in our society,” said Shireen Miles of the Sacramento chapter of the National Organization for Women.

Mosk, the court’s most prominent opponent of preferential treatment for minorities and women, last month took the highly unusual step of drafting a proposed state constitutional amendment that would ban affirmative action in government hiring and public university admissions.

He submitted his proposal to a state Senate committee, saying he was “normally sensitive to the separation of powers,” but was acting because of “excesses adopted, in recent years in the name of affirmative action.”

GOP gets redistricting on ballot

LOS ANGELES (AP) — California Republicans, turning in petitions with more than 900,000 names, claimed victory Wednesday in their campaign to gain Republican reapportionment plans for the Legislature and the state’s congressional delegation on the ballot.

The overwhelming response is an eloquent statement of the people’s disgust over the Democratic gerrymandering, GOP state chairman Tino del Junco said at a press conference at the Los Angeles County register of voters office.

“I have absolutely no doubt that the people of California will vote these plans down when they appear on the ballot next June. Democratic leaders could not be reached immediately for comment.

Good morsels for Reagan

WASHINGTON (AP) — Staking out his claim as a man of peace, President Reagan laid before the world Wednesday a four-step plan for shal­lowing nuclear weapons and pulling back troops in Europe, challenging the Soviet Union to “share our commitment to arms reduction.

“With Soviet agreement, we could together substantially reduce the dreadful threat of nuclear war which hangs over the people of Europe,” the president said. “This, like the first footstep on the moon would be a giant step for mankind.”

Reagan offered to cancel U.S. deployment of medium-range nuclear missiles in Europe if the Soviets would dismantle the 600 missiles it now has trained on European targets. He called, too, for slashes in conventional forces and pulling back U.S. and Soviet nuclear weaponry so the superpowers aim at one another.

And last, he asked new efforts to guarantee nuclear war will never erupt through “understanding or miscalculation.”

But Moscow quickly rejected the president’s initiative as propaganda designed to cloak an American miscalculation.

While Tass used those words, another Soviet news agency, Novosti, said Khrushchev acceptance would “actually mean the Soviet Union’s unilateral disarmament.”

Reagan’s speech to the National Press Club was designed to smooth relations with America’s allies in Europe and to counter the growing peace movement abroad.

GOP gets redistricting on ballot

WASHINGTON (AP) — A precedent-setting action, a San Francisco Superior Court judge Wednesday ordered the Unification Church to release a New Zealand woman whose family claims she is being held against her will.

Anna-Lyn Hall and her mother, Lena Hall, who say that Mary-Lee Hall, 22, is being held against her will in New York by Rev. Sun Myung Moon’s Unification Church. McCabe said the church would appeal the order.

Reagan presents four-step plan

SAN FRANCISCO (AP) — In a precedent-setting action, a San Francisco Superior Court judge Wednesday ordered the Unification Church to release a New Zealand woman whose family claims she is being held against her will.

Anna-Lyn Hall and her mother, Lena Hall, who say that Mary-Lee Hall, 22, is being held against her will in New York by Rev. Sun Myung Moon’s Unification Church. McCabe said the church would appeal the order.
Residents are left in the dark for hour

From page 1

campus as well as the Aero Hanger, Public Safety Office, Plant Operations and the North Mountain Residence Halls were without electricity from about 7 to 8:30 a.m. Wednesday.

A portable generator had to be brought in from Santa Maria to provide electricity for the Dairy Unit, which was hardest hit by the winds. The generator was operating by 12:30 p.m. Wednesday and Naretto expected permanent service to be restored to the unit late Wednesday afternoon.

“We were quite fortunate,” said Eugene Starkey, Dairy Science Department Head regarding the damages. “We could have killed animals and there could have been students in the way.”

Starkey estimated that damages to the Dairy Unit would total at least $100,000.

Several trees on campus lost limbs and branches as a result of the strong winds, said Naretto. Some of the fallen branches hit cars, causing minor damages.

The university has an insurance policy that covers damages in parking lots, said James Landreth, director of business affairs, but he is uncertain whether the insurance policy will cover these damages. There are other alternatives available, however, to reimburse individuals for such damages, Landreth said, and he encourages individuals whose cars have been damaged to contact the Business Affairs office.

At top, Spencer removes a stump from a tree which fell and damaged the truck shown. Terry Tackitt assists. Above, roofing from a hay barn was torn off in the high winds Wednesday. It flew like a kite over the show barn in the background undamaged, but crushed a corral fence. At left, Paul Gordon repairs power lines destroyed by the barn roof.

THE CLOTHING BROKER

(In the Creamery)

‘NEVER PAY RETAIL AGAIN!’

The Clothing Broker has the finest names in jeans and sports wear at 30% to 60% below suggested retail prices. These prices are on everything in the store—every day! The Clothing Broker is a factory direct outlet selling top-quality, famous name apparel at rock bottom prices.

Galtere

Hours 11 am-11 pm

570 Higuera — SLO
The California State University at 544-8437 or John in time is 8:16 a.m. Registration is $2. Contact loop starting from the Farm City Day. The agriculture and natural resources department and Toastmasters invite you to come and participate in Farm City Day in Madonna Plaza all day on Saturday, Nov. 21. Children, students, and friends are all welcome to come and experience it. Learn more about your rights as a consumer, too.

Football Championships Men’s, women’s, open league and residence halls will play the intramural touch football championships on Saturday, Nov. 21 from 11 a.m. to 4 p.m. on the upper track football field behind the tennis courts. Come and cheer for your team!

Sorority Dance The Ivy Pledge Club of Alpha Kappa Alpha invites you to groove with them on Friday, Nov. 20 in the Mustang Lounge. Come and support the new pledges of Alpha Kappa Alpha, for only $1.50. The dancing begins at 10 p.m.

Car Wash Delta Sigma Theta Sorority is putting on a car wash on Saturday, Nov. 21 from 11 a.m. to 3 p.m. at the Chevron Station on California and Taft. Come one, come all and get all the “bad weather” washed off your car. The cost is $1 per car, $2 per van.

The next meeting of the Dietetics Club will be an “Italian Feast”—a pollock where members are asked to bring an Italian dish. The feast takes place tonight at 7 p.m. in Mustang Lounge. Come and get to know the new members.

Booster’s Run The Black and Gold Boosters of San Luis Obispo High School are sponsoring five and 10 kilometer runs through downtown San Luis Obispo, on Sunday, Nov. 22. The run begins at Mustang Park at 10 a.m. The entrance fee is $3. T-shirts to every entrant and 33 turkeys will be given to winners. Free beer and beverages after the run. Pick up entry forms at KEDO, Sandy’s liquor, and Grist’s lounges.

Flower and Bake Sale The Social Sciences Student Association is sponsoring a flower and bake sale fund raiser today in front of the library and the U.L. plaza from 10 a.m. to 1 p.m. Come and treat yourself to something good and support Alpha Kappa Alpha.

The Cal Poly Winter Car Wash will sponsor an autograph in the library parking lot on Sunday, Nov. 22. Registration of cars will be from 11 a.m. to 4 p.m. in Engineering East, Room 103.

The Annual Audit for Fiscal Year 1980-81 for the California Polytechnic State University Foundation has now been completed. Copies for public information are available in the Foundation Executive Director’s office, Fisher Science Hall 290, and the Campus Library.

The Institute of Electrical and Electronic Engineers is selling radios, meters, and other devices and new electronic devices. The sale will continue from 9 a.m. to 4 p.m. today in Engineering East, Room 103.

The Association of Environmental Professionals will meet today at 11 a.m. in Agriculture, Room 214. There will be a three member panel discussing job opportunities in the environmental field.

The Association of Environmental Professionals will have a car wash on Sunday, Nov. 22 from 11 a.m. to 4 p.m. at the Shell station on the corner of Monterey and Santa Rosa. The cost is $1 for cars and $2 for trucks and vans. All baked goods will be sold.

The Association of Environmental Professionals will have a car wash on November 22 from 11 a.m. to 4 p.m. at the Shell station on the corner of Monterey and Santa Rosa. The cost is $1 for cars and $2 for trucks and vans. All baked goods will be sold.
Disabled student office moves to new location

What good is a student service when no one knows where it's available?

"Not much," says Disabled Student Services Coordinator Harriet Clendenen.

We're still here to serve students with temporary and permanent disabilities. We're just in a different room now," she said.

The DSS office is presently located next door to Mustang Lounge in Room 118A of the University Union.

Before the move at the start of fall quarter, DSS occupied UU 105 across from El Corral Bookstore for five years. Additional office space was the primary reason for the move, which was part of a four-way room trade on the Union's first floor, Clendenen said.

"When the space across from the Craft Center became available, we all put in our bids for it," she said, referring to several offices in the Union in need of more room for their facilities.

Space allocation

The University Union Board of Governors decides which group gets which space in the Union, and in the past has made such decisions on a case-by-case basis, she said.

Unable to make it to the other side of the campus on crutches? Call a tram. Can't take notes left-handed? Borrow a recorder.

For those who are not yet aware, Disabled Student Services is not only for permanently disabled students. Students with temporary disabilities are also eligible for assistance. Temporarily disabled refers to students restricted because of broken bones, temporary loss of hearing, hospitalization or other impairments.

Counseling, special parking permits, on-campus transit mobility assistance, notetakers, tape recorders, wheelchairs, modifying instructors and crutches are among the services provided by DSS to Cal Poly Students.

DSS is coordinated by Harriet Clendenen, who was named Cal Poly's Outstanding Staff Member by ASI for 1981. Clendenen said, "Not all students are aware of the services available to them."

She said, "The purpose of DSS is to assure that all University resources are available for all individuals with either permanent or temporary disabilities."

According to Clendenen, approximately 300 temporarily incapacitated students made use of DSS last year.

"We are a support system," said Clendenen. "We are here to provide support services for all students when they need us."

Located in the University Union, Room 112E, the DSS office is open from 7:30 a.m. until 5 p.m. The telephone number is 546-1298. Information may also be obtained from the Health Center.

Services offered to disabled

Journalism major John Hitchcock, who suffered torn ligaments while playing football, found help through the Disabled Student Services.
DECEMBER GRADUATES

MARTIN MARIETTA'S VANDENBERG OPERATION HAS IMMEDIATE REQUIREMENTS FOR DECEMBER GRADUATING ENGINEERS IN THE FOLLOWING AREAS:

• ELECTRONIC ENGINEERING
• ELECTRICAL ENGINEERING
• MECHANICAL ENGINEERING
• AEROSPACE ENGINEERING
• CIVIL ENGINEERING
• ENGINEERING TECHNOLOGY
• ENGINEERING COMPUTER SCIENCE

IN ADDITION WE HAVE OPPORTUNITIES AVAILABLE FOR:

• FINANCE AND ACCOUNTING MAJORS
• MANAGEMENT INFORMATION SYSTEMS
• HUMAN RESOURCE MANAGEMENT GRADUATES

Martin Marietta Aerospace offers December graduates a quick career start and an exciting future at Vandenberg AFB in California. We need graduating engineers to start work in December, as we begin a rapid expansion of our Space Shuttle and Missile X programs.

If you're interested in an immediate challenge and a great opportunity, there are three things you should know about Martin Marietta Aerospace:

1. Our organizational structure gives you unusual flexibility in determining your career path.
2. Martin Marietta will provide you with a stimulating environment through challenging assignments.
3. And finally, we want to talk to YOU. Sign-up today for on-campus interviews at your career placement office. Arrange to talk to us and we'll give you more information about Martin Marietta Aerospace at Vandenberg AFB and its opportunities.

SEE OUR REPRESENTATIVE ON CAMPUS NOVEMBER 20

If unable to arrange for an interview at this time please send your resume to: Martin Marietta Aerospace, College Relations, Attn: Richard Ristine, P.O. Box 1681, Vandenberg AFB, California 93437.

Student union delegation held

BY MAURA THURMAN

Delegates from student union staffs in three states met over the weekend at Cal Poly to discuss meeting the needs of changing student bodies in the wake of diminishing funds for student facilities. Activities Planning Center Assistant Stephanie Nelson said 200 delegates from colleges and universities in California, Nevada, and Hawaii spent Friday, Saturday and Sunday attending workshops and making personal contacts which will add them in their increasingly complex jobs.

"The state is drying up with money, and student associations are drying up with money," Nelson said. "But we can do it together and share ideas of how to deal with things."

The delegates represented private as well as public campuses including the University of California, community colleges and the California State University and Colleges system.

On some campuses, Nelson said, very little money is available for student activities. At other universities, such as Stanford, student union funds are "virtually limitless."

At all campuses, more students are using union facilities for study, meetings and relaxation. In addition, students now display a greater range of age, ethnic backgrounds and interests.

Delegates paid $80 each for the annual event. Workshops focused on activities like fund-raising, personal selection, activities for non-traditional students and public relations.

Nelson, who coordinated the conference, said the event was almost entirely student-planned and operated for the first time. She said it was successful in giving students knowledge and confidence to tackle problems facing student union management.

"Busy, full-time students are on campus a lot, and have limited time for relaxation," she said. "Proximity is important, and because the union is on campus, it should serve as many students as possible."

Design art leader to lecture at Poly

"Build Arts/Built Art: A National Perspective on the Design and Planning of Spaces and Places for the Arts" is the title of a presentation to be given at Cal Poly by Michael Pittas, director of the Design Arts Program for the National Endowment for the Arts.

Scheduled as part of a guest lecturer series sponsored by the University's Architecture Department, the talk will take place in the Gallery (Room 106) of the Architecture and Environmental Design Building at 8 p.m. on Monday, Nov. 23. Admission will be free to all who are interested.

As director of the NEA Design Arts Program, Pittas is charged with promoting excellence in the design arts. Among the most recent achievements of the program have been the signing of a Presidential Executive Order on design, initiation and funding of a national public television series on design, publication of several monographs on graphic design and publication of Design Arts Magazine as a result of a new National Grant Recognition Program.

Also an adjunct associate professor with the Graduate School of Design of Harvard University, Pittas initiated the Urban Design Implementation Strategies Lecture Series, which is now a required course for students of the school. He continues to conduct this course along with a course on case studies in urban design.

Profs detail significance of Mexican Revolution

Editor's note: Printed is a historical account of the Mexican Revolution which began Nov. 20, 1910 and what impact Rhoda Studies chairman David Ranches and Mexican Department professor-elect Daniel Lopez consider the revolution has on life in the United States. The anniversary of the Mexican Revolution will be commemorated today in a U.C. Press Show to be jointed by the ASI Recreations and Touraments and MCCA.

BY AMBRODIO LOPEZ and DAVID SANCHEZ

Special to Daily

The Mexican Revolution of 1910 is one of the most significant social movements in modern times. Although the conditions for a revolution are often lost in a variety of ways, the result of a system's inadequacies, many still feel that the presidency of Porfirio Diaz, a dictator in power several times, was totally responsible.

For thirty-four years he provided a stable, strong dictatorship. He built railroads, telegraphs, and unified the country. He also developed Mexico's natural resources, but simultaneously and much of the country to foreigners who exploited the oil, mines, and farms. During his reign special interest groups redefined the indigenous population of Mexico to a position of passage and confirmed their land. Those who tried to defend their land were brutally crushed.

The leading country of the world at a 1000 year period, composed about 90 percent of the land, while 65 percent of the rural population was landless. Thus, conditions were ripe for revolution.

Francisco Madero, a wealthy "crisol" (Spanish born in the United States, born Gonzalez) in 1909 was entitled "The Presidential Succession of 1910." In this book as called for the popular election of the Vice President. Since the Dictator Diaz had been in office since 1876, he felt that the people should at least be able to choose their Vice President. This book made him a national celebrity.

He was determined and ignored the wishes of the majority of Mexicans, appointed Ramos Corral as Vice President. This man was one of the most hated men in Mexico and was well known for sending the Yaqui Indians into slavery. Many rationalised that Diaz selected Corral because he thought that this would assassinate him for fear of making Corral president.

Madero was an ardent revolutionist. One of his more popular statements given during the 1910 presidential elections was "The Mexican does not want bread, he wants liberty to eat bread." In 1910, an anti-revolutionist convention nominated Madero for the presidency. Madero's candidacy was finally taken seriously by Diaz. But, after Diaz realized the popular widespread support for Madero, he had him killed. The eighty-year-old Diaz manipulated the vote, "the election and revolts began to spring up throughout Mexico. But Madero made two forced Porfirio Diaz to resign the presidency and Bea Madero was elected President in 1911.

Sixteen months later in February of 1913 a coup engineered by Victoriano Huerta removed Madero from office, and shortly later he is assassinated. Huerta seized control.

Two weeks after the coup another revolutionary movement begins in the North of Mexico and spreads quickly throughout the country. Military led by Venustiano Carranza, Alvaro Obregón, Francisco Madero, Francisco "Puebla" Villas and many men bearing a return of a Díaz-type government, nomally defeat Victoriano Huerta. In the South, Emiliano Zapata battled against Huerta, but frequently stated that he was a separatist movement, unaccompanied with efforts by the constitutionalists: Carranza ran on the States, but he had to recognize the government of Huerta. In August 1914, a provisional government was established and backed by Carranza, but by late November they began to fight against the south. By May 1917, the Treaty of Ciudad Juárez, the "Constitutionalists," remained in power. The political scene in the North and Zapata in the South continued their military rebellions until 1920 and 1919 respectively.

The theme of the U.S. Revolution of 1776 and the Mexican Revolution of 1910 was the overthrow of a political system without fundamentally changing the economic or social structures of these countries. The Mexican Revolution of 1910 not only was quite different from that of its United States counterparts, but for the first time the Mexican people realized that they were not represented in the government.

The 1910 revolution had a significant impact on the United States. To begin, social chaos in Mexico sparked internal and external migration. Most adult Hispanics living today in the United States have a Mexican relative who emigrated to the United States as a result of the 1910 Revolution in Mexico.

Secondly, because the United States had earlier limited significantly Asian immigration and in 1924 placed immigration quotas on eastern and southern Europeans, a vital labor reservoir was jeopardized. A new pool of workers was required and Mexicans would fill this need.

Thirdly, agribusiness concerns of the United States have always been influenced in the areas of state and federal legislation, which often addresses the issue of immigration, like the Mexican Revolution and the 1924 immigration restrictions allowing Mexican labor to enter the United States during World War I and the Bracero Program (1942-1964) are examples of governments attempting to solve their social, political, and economic problems.

Finally, many of the immigrants who came to the United States as a result of the Revolution of 1910 felt that their residency would only be temporary. Consequently, they maintained and promoted those aspects of Mexican culture that reinforced their Mexican identity, which resulted in a delaying and/or absences of their assimilation into the mainstream of Anglo-American life.

If we as citizens of the United States truly seek peace and harmony in our society, then we must make every effort to understand the multicultural nature of our society. Part of this understanding involves an awareness of the great events in the history of a people. The Mexican Revolution, although a sad and tragic episode, is an important time in the lives of many Americans, and we are pleased to share this historical event that is an important part of our culture.

"A revolution is not always a source of evil and tears, just as fire does not always produce devastation.

Luis Cabrera (1927)

"This country, with its institutions, belongs to the people who live in it. Whenever they shall grow weary of the existing government, they can exercise their constitutional right to disband it, or their revolutionary right to overthrow it."

Abraham Lincon

High risk of injury in bicycle accidents, police say

BY MARK ARRABIT
Staff Writer

Nearly a quarter of all accident-related injuries last year involved a bicycle, but exercising caution while riding can reduce the likelihood of an accident, according to the San Luis Obispo Police Department.

According to the police department, 7 percent of all reported accidents involved bicycles. In terms of accident-related injuries, however, bicycle accidents accounted for 23.4 percent of the total. What these statistics reflect is that a bicyclist involved in an accident is very likely to be injured.

"What people seem to forget," pointed out San Luis Obispo police officer Peter E. Hubbard, "is that if you get into a wreck on a bike, you are going to lose."

According to officer Hubbard, though, there are several steps that a bicyclist should take which would greatly reduce the likelihood of an accident.

"The first step which should be taken is to obey all traffic laws. A lot of accidents could be avoided if bicycle riders just obeyed the traffic laws," explained Hubbard. "In particular, bicyclists should always ride with the traffic. An operator of a motor vehicle often times isn't looking for a bicycle traveling the wrong way and an accident occurs.

Along with obeying all traffic laws, Hubbard felt that a bicyclist should learn to ride "defensively." A cyclist should avoid any undue risks and be aware of other traffic at all times. This is particularly at night. "A bicyclist rider at night is often hard to see," stated Hubbard. "Don't take for granted that just because you can see the car, the car can see you."

Another important preventive factor Hubbard expressed was to maintain your bike properly. Make sure that all you equipment is operating correctly. Are the wheels true? Do the brakes work well? Are the tires worn out?

While obeying traffic laws, riding defensively, and maintaining your bicycle will definitely reduce accidents, unfortunately they will not eliminate the possibility of accidents. For this reason bicycle safety equipment is also critical.

"A lot of accident-related injuries last year involved a bicycle, but exercising caution while riding can reduce the likelihood of an accident. In particular, bicyclists should always ride with the traffic. An operator of a motor vehicle often times isn't looking for a bicycle traveling the wrong way and an accident occurs.

Along with obeying all traffic laws, Hubbard felt that a bicyclist should learn to ride "defensively." A cyclist should avoid any undue risks and be aware of other traffic at all times. This is particularly at night. "A bicyclist rider at night is often hard to see," stated Hubbard. "Don't take for granted that just because you can see the car, the car can see you."

Another important preventive factor Hubbard expressed was to maintain your bike properly. Make sure that all your equipment is operating correctly. Are the wheels true? Do the brakes work well? Are the tires worn out?

While obeying traffic laws, riding defensively, and maintaining your bicycle will definitely reduce accidents, unfortunately they will not eliminate the possibility of accidents. For this reason bicycle safety equipment is also critical.

"I would rather have a helmet and not need it than need a helmet and not have it."

Senate wants change in administrative manual

The Executive Committee of the Academic Senate said Tuesday it wants the Campus Administrative Manual amended to read that the Academic Senate is included in the decision-making process in the enrollment issue.

According to Jim Conway, chair of the Budget Committee of the Academic Senate, said whenever policy decisions are made about enrollment quotas and long-range enrollment guidelines, the Executive Committee is consulted but CAM does not read as such.

The establishment of enrollment targets is the responsibility of the school deans. Vice President of Academic Affairs, Hazel Jones, President Warren Baker and the Academic Senate.

The proposal was recently sent in memorandum form to Jones and Baker for their decision. The decision is awaiting Baker's return at the end of the week, said Jones.

Three Guys Foreign Automotive

GRAND OPENING
November 21, 1981, 9 a.m.-5 p.m.
3285 S. Higuera Street
The public is invited to attend and enjoy Auto Shows, Free Hot Dogs, Refreshments and Live Music (from 12:00-5:00 p.m)
MANY DOOR PRIZES
REGISTER EARLY
We've moved to 3285 S. HIGUERA STREET
New Facility — Expert Mechanics — Plenty of Parking

SPECIALS

VW BUG BRAKE SPECIAL
64.88
We will replace all brake shoes and turn all four drums.

VW BUG MAINTENANCE
34.88
Includes: parts and labor: valve, brake & clutch adjustment, air cleaner replacement, spark plugs replaced, timing & dwell adjustment, engine oil, filter, air filter & battery

High risk of injury in bicycle accidents, police say
Pro ranks a possibility for Mustangs midfielder

BY TOM CONLON
Must-Walter

Soccer season may have ended for Cal Poly last Saturday with a 3-1 win over the Central Coast All-Stars, but, according to coach Wolfgang Gartner, one Mustang senior could have a bright future in the American pro ranks.

Rich ten Bosch delighted Mustang fans and frustrated opponents for four years with both his offensive and defensive skills. And now, with his Poly career behind him, the left-footed halfback is uncertain who he'll play for next or even if his plans include soccer on a regular basis.

"I don't know if I'll play in the future," he said. "...playing for Athletes in Action is a Christian organisation made up of ex-collegiate athletes is one of my future goals." As for turning pro, ten Bosch said it would be nice, but he considers it a remote possibility.

Gartner, however, has a different opinion of ten Bosch's abilities, and although he may never play for pay Gartner thinks his midfielder is definitely pro material.

"He (ten Bosch) is one of the best collegiate players I have seen," Gartner said. "He could play pro soccer for any team in the country."

Gartner, a one-time pro himself, explained that in the relatively young American league a player's excellence on the field does not necessarily ensure him a place on a roster. The old USA: it's not what you know but who you know, would accurately describe some team's recruiting methods, Gartner said.

What sets ten Bosch apart from other college players? "Great technical ability, a good conception of open spaces on the field and fantastic ball control," replied Gartner.

While ten Bosch may not be in a scorer's position, he finished the season with three goals, not including two in the All-Star game, and he makes his presence on the field known with stifling defensive play and passes with the accuracy of a young Terry Bradshaw.

"I'm not so much into scoring goals as I'm into passing and distributing the ball, playing offense and defense," the senior agriculture engineering major said.

The 1981 season was a disappointing one for Cal Poly and for ten Bosch in particular. The Mustangs finished with an 8-10 record and ten Bosch dislocated his shoulder in the second game of the season, forcing him to play 10 games with a protective cast.

Despite their struggles, the team was never lacking unity. "The team is like a family," said ten Bosch, "I know it sounds kind of corny, but it's true."

Lunch on the Mediterranean today.

In a lunch rail set your course for the Mediterranean. A Mediterranean Cafe serves delicious foods from all around the world. An inexpensive lunch or dinner in our casual, cafe atmosphere will give you a taste bed the new directions you're looking for. And, if you're in a hurry, call ahead and we'll make sure you spend your time eating – not waiting.

Lunch: 11:00 - 2:00 Monday thru Thursday 11:00 - 5:00 Friday Dinner: 5:00 - 9:00 Monday thru Saturday Catering: Anytime. Your Place or Ours

MEDITERRANEAN CAFE
3717 Lodi Lane, San Luis Obispo, 544-5262
With their interregae game behind them Cal Poly's matmen will travel Oklahoma today to open regular season play against the Sooners.

SQUAW VALLEY, Calif. (AP)—Major Sierra ski resorts, which always pray they will have enough snow to open by Thanksgiving, announced the start of early opera-
tions this weekend, thanks to a chain of snowstorms that flailed the mountains for more than a week.

In the Central Sierra, Squaw, Valley, which got more than 10 inches of new snow at higher elevations Tuesday, said it will open Friday with six-to-eight chair lifts on two inches of pack, plus the gondolas and the tram.

Advertising irresponsibility

Editor:
I found the "MURDER at Tortilla Flats" ad in the Nov. 17 Mustang Daily, highly offensive and very irresponsible.

The racial overtones and implications made by words such as vigilante, effigy, mob and Klansmen and the content in which they were used caused unpleasant feelings and direct association with the fear and violence the Klu Klux Klan represents.

How Tortilla Flats chooses to advertise to the public is their business, but the Mustang Daily has a responsibility for its advertisements and the relations that exist between its customers and readers. It was very unprofessional, irresponsible and insensitive on the part of the Mustang Daily to publish such an ad. It is possible that the Mustang Daily tolerates or approves of this type of advertising.

By displaying this ad, is it the intent of the Mustang Daily to offend the Black readers? If so, we will brace ourselves for ads containing swastikas, large crosses and Hitler to offend our Jewish readers. Perhaps we will see ads containing Pollock jigsaw, Italian jokers or Cowboys shouting "the only good Indian is a dead Indian." This would certainly offend our readers.

Don Hickies were the editor for your advertisement department, the readers would expect such remarks from him.

But he is not.

The question I have is, what responsibility does the Mustang Daily have for contents of its advertisements?

Maurice Murphy

Blind faith

Editor:
Stanley, Stanley, Stanley, you surprise me! I guess you didn't learn very much at your public relations training for pro-voices. Your arguments (Mustang Daily, Nov. 17, 1981) aren't even good ones. They had a ring to them reminiscent of "how I learned to stop worrying and love the bomb."

Since you only mentioned "nuclear power" once in your letter, and the rest of the time referred to "nuclear waste," "nuclear devices," "the atom," "anti-nuclear," "nuclear devices," I am assuming that you wish us to embrace the whole nuclear technology. Never mind that between the United States and Soviet Union there are enough megatons to destroy the world about 12 times over. You say "as if any legislation or politics we could banish the atom from this world."

You are absolutely right—what other hope is there in a "civilized" society for life to continue on this planet except to convince the leaders of the world that we, the people, don't want to live, and perhaps die, with this threat. I'm talking about the people of the world—not just Americans, but Russians, Europeans, and all the rest—people, who feel, and breathe, and hurt, and bleed, and love—and who want to retain some control over their own destiny.

And you contend that we are burying our heads in the sand? On the contrary, the ones who are avoiding reality are those who are putting blind faith in FG and EN, the NRC, military leaders and purveyors of weapons systems, and all the others who have an ax to grind.

Sharon Stetiff

Opinion

Nuclear sensitivity

President Reagan finally demonstrated Wednesday that his foreign policy does have a good measure of foresight and common sense. By proposing that the United States and Soviet Union eliminate all medium-range nuclear missiles from Europe, he has at last shown his sensitivity to the people of Europe, who have lived under the shadow of a would-be nuclear war for the last 35 years.

Reagan's proposal is an important, sensible step in the direction of meaningful arms control. In the past, his administration had sought to build up its nuclear arsenal in Europe to put the United States in a "position of strength" before engaging in meaningful talks with the Soviets.

Our allies have feared, however, that such a buildup would only provoke a Soviet retaliation, and a new arms race. Thus, while the United States' increased military strength in Europe has run into opposition and caused divisiveness. Perhaps Reagan saw the light of this last month, when over half a million Western Europeans protested against the planned U.S. deployment of medium-range missiles on their soil.

Europeans aren't the only ones who stand to gain from the Reagan proposal. The U.S. economy would also reap the financial benefits. Since the new Reagan tax cuts will reduce government revenues by over $700 billion by 1984, military spending cuts will become inevitable to make up for this deficit—especially after the full impact of cutbacks in domestic programs felt.

The proposal will also, in fact, strengthen the United States' position when it discusses arms reduction with the Soviets. It is a sign that Reagan is acting in good faith toward reducing arms in Europe. It will also make it more difficult for the Soviets to concentrate on splitting the United States from its European allies.

Accordingly, strategic, diplomatic, political and economic concerns all argue the wisdom of Reagan's decision.

A sound, equitable, arms treaty won't be reached overnight. Many students will be priced out of college expenses from increased registration fees. By increasing our tuition fees for next fiscal year. Ouch.

Okay, it hurts; especially when Brown already advanced fees by $100 for the last student's spring. This can least afford it—in the checkbook.

Every body loves a surprise. Glenn Dickey, associate director, Col Poly, San Luis Obispo, CA
