NRC suspends Diablo’s test license

BY DAVE BRACKNEY
Editorial Assistant

The Nuclear Regulatory Commission announced this day its decision to suspend the low power testing license for Pacific Gas and Electric’s Diablo Canyon power plant until a report on the plant’s seismic safety is completed.

The NRC voted 4-1 in favor of the suspension, with Thomas Roberts, President Reagan’s most recent appointee to the commission, dissenting.

The announcement came at 4:30 p.m. EST, hours after a congressional subcommittee hearing at which new questions were raised about the safety of nuclear power. The commission had tentatively voted Monday to suspend the plant’s license.

Although the vote was not unanimous, all five commissioners agreed PG and E should not be allowed to load fuel at Diablo until a new consultant completes an audit of the plant’s seismic safety design. Such a consultant would be hired by PG and E with approval from the NRC.

Jim Hanshaw, public affairs officer for the NRC, said the license will remain suspended indefinitely, “until such an audit is completed to the satisfaction of the commissioners.”

“Congressmen critical of NRC actions

BY MIKE CARROLL
Managing Editor

Congressmen voiced their criticism of the nuclear industry Thursday in Washington, D.C., as hearings on the adequacy of the Nuclear Regulatory Commission’s inspection programs were begun by a subcommittee of the House of Representatives.

The hearings, begun by the House Subcommittee on Energy and the Environment, occurred on the same day the NRC voted 4-1 to suspend PG and E’s low-power license for Diablo Canyon—pending a seismic review of the nuclear facility.

Three Democratic congressmen—including Rep. Leon Panetta of Carmel Valley—criticized the NRC’s decision to allow PG and E to select the auditor who will inspect the design problems at the power plant.

Joyce Howerton of the Abalone Alliance said she tried to get the NRC to name makers of the nuclear power plant as they were implemented in this country.

“Before the NRC announcement was made, Commissioner Peter A. Bradford said: “There are a number of things fundamentally wrong with the nuclear power program as we’ve implemented it in this country.”

—NRC Commissioner Peter A. Bradford

Budget limits may cause demise of seven sports

BY MARK ARABITT

Seven Cal Poly intercollegiate athletic teams may be dropped from the 1982-83 schedule because of budget restrictions, according to Cal Poly’s athletic director.

In a thorough analysis of the Intercollegiate Athletic Program submitted to University President Warren Baker, Associate Executive Vice President, Howard West, and Acting Director of Athletics, Dick Howerton, recommended the following teams be dropped: women’s swimming and tennis and men’s swimming, soccer, volleyball, waterpolo and tennis. Howerton and West also recommended that a number of adjustments be made in the remaining programs. These adjustments would primarily be the reduction and/or elimination of scholarship assistance.

“Projected available funds for 1982-1983 will not cover the continuation of the existing Intercollegiate Athletic Program,” explained Athletic Director Dick Howerton. “I would much rather not drop any existing program, but some changes will have to be made.”

$10,000 savings

The proposed cutbacks, according to Howerton, would save an estimated $10,000 or approximately 13 percent of the total athletic budget. The largest savings would occur in women’s swimming where an estimated $4,500 could be realized. Howerton, however, added that these figures represent only ASI subsidies to the athletic programs. The total dollar amount which would be needed to run the programs effectively would be much greater.

Howerton further cited other non-financial benefits of the proposed cuts. He pointed out the cuts would strike a balance in regards to competition in each quarter and also the number of sports offered for men and women. Another possible result Howerton expressed was that facility usage by athletic teams would be minimized. And lastly, Howerton revealed that usage of overburdened state and university transportation vehicles would also be minimized.

Senate endorses "Z" Lab petition

BY JAN MUNRO

"Z" Lab may be gone from the Cal Poly campus, but it remains in the minds of many students, including members of the Student Senate, who decided Wednesday night to endorse a petition signed by over 500 architecture students protesting the lab’s destruction.

According to Leo Marmol, a third-year architecture student, the signatures represent one third of the students in the School of Architecture and Environmental Design.

"We feel that this makes a dramatic statement," he told the Senate members during their meeting’s Open Forum, "and that the interest and concern over this incident is still alive.

The "Z" Lab, a dilapidated military structure formally located in Poly Grove, had, until July 16, been preserved by the School of Architecture. Plans to move and renovate the building were approved during the Student Senate meeting on Sept. 26, when the building was bulldozed by a local construction company.

State faces $2 billion '83 deficit

Growth doesn't slow recession

Washington (AP) — The economy grew rather than shrank this summer, as first reported, the government said Thursday. Nevertheless, economists said there are certain the nation is a recession.

Revising preliminary figures that had indicated a downturn, the Commerce Department said in a new report that inflation-adjusted gross national product rose at an annual rate of 0.6 percent in the July-September quarter.

Commerce's preliminary report last month said "real GNP"—the value of all the goods and services the nation produces—had dropped at an annual rate of 0.6 percent in the third quarter after declining at a rate of 1.1 percent in the spring quarter.

The transformation of a decline into a gain was due almost entirely to a buildup in inventories, a clearly recessionary trend indicating that manufacturers were having trouble selling their goods.

In other words, U.S. businesses were still turning out new products and materials in the July-September quarter, and all that production counted in the GNP total. But sales are already slipping and have now slipped much more, according to other government reports.

If sales continue, as separate reports indicate they will, companies are bound to cut back production and lay off workers—as many already are doing—until their inventory stockpiles diminish, economists said.

Before adjustment for inflation, the gross national product rose to an annual rate of $2.06 trillion in the third quarter, the new report said. Measured in 1972 dollars, for inflation, GNP rose to an annual rate of $1.51 trillion.

The inflation-adjusted figure, $46 billion higher than first estimated, included a $37 billion upward revision in inventory buildup to $2.37 billion. The over-all figure would have shown a slightly declining economy in the quarter. All of the figures are adjusted for normal seasonal variations in output.

Commerce Secretary Malcolm Baldrige, who, like President Reagan, had earlier declared the arrival of a recession, cited the inventory buildup as evidence the third-quarter revision "does not materially change the economic picture."

Schmidt to push for arms pact

Bonn, West Germany (AP) — When Soviet President Leonid I. Brezhnev arrives Sunday on a four-day visit, the West Germans will urge him to accept President Reagan's call for reduction of nuclear missiles in Europe.

Chancellor Helmut Schmidt said he will use the visit—Brezhnev's first to the West since he and former President Carter signed the SALT II accord—to press the Kremlin leader to go along with Reagan's offer for a large deployment of U.S. missiles in return for dismantling Soviet rockets aimed at Western Europe.

West Germans hope Brezhnev's visit will give him a first-hand view of Kremlin reaction to the plan, made by Reagan on Oct. 21.

Initial Soviet reaction was negative. The official news agency Tass denounced the offer as "propaganda in its purest form" and a "back-door" attempt to tip the balance of strategic power in Europe in the West's favor.

Reagan on Wednesday disclosed that the offer will be made when U.S.-Soviet negotiators begin talks Nov. 30 in Geneva, Switzerland, on restricting nuclear weapons growth in Europe. Reagan said the United States will offer to stay a NATO plan to deploy 572 medium-range cruise and Pershing 2 missiles in Western Europe if the Soviets reduce their arsenal of 250-290, 804 and 555 nuclear rockets.

Schmidt has come under fire by church and disarma

Bonn (AP) — A state fiscal commission Thursday to end this year $10 million in the black.

By June, the commission believes the state will have made and two tax-cutting initiatives pass next year.

"If slow sales continue, as separate reports indicate they will, companies are bound to cut back production and lay off workers—as many already are doing—until their inventory stockpiles diminish, economists said.

Before adjustment for inflation, the gross national product rose to an annual rate of $2.06 trillion in the third quarter, the new report said. Measured in 1972 dollars, for inflation, GNP rose to an annual rate of $1.51 trillion.

The inflation-adjusted figure, $46 billion higher than first estimated, included a $37 billion upward revision in inventory buildup to $2.37 billion. The over-all figure would have shown a slightly declining economy in the quarter. All of the figures are adjusted for normal seasonal variations in output.

Commerce Secretary Malcolm Baldrige, who, like President Reagan, had earlier declared the arrival of a recession, cited the inventory buildup as evidence the third-quarter revision "does not materially change the economic picture."

‘Embarcadero Fugue’ lacks fine tuning

BY CYNTHIA BARAKATT

Any aspiring playwrights who attended the world premiere of “Embarcadero Fugue” last weekend in the Cal Poly Theatre should have learned a valuable lesson—new plays, like new cars, need to be finely tuned before they are put up for public inspection.

Unfortunately for writer Thom Strelch and director Michael Nallhan, “Embarcadero Fugue” lacked the polish and refinement that enable a play to survive in the public domain.

Strelch, a Cal Poly computer science graduate, had some good ideas that came across in the play. His characters were exaggerated, but gave the audience more than a glimpse of the mild madness in all of us. His theme of the human need to escape from what seems to be the absurd world and get into even more absurd illusions of notoriety/crooks well through the characters and their crazy schemes.

But despite the strength of the ideas and the potential for success, “Embarcadero Fugue” became confusing and flat midway through the first act and did not pick up again until the end.

The play is set on the roof of the Embarcadero Hotel in Bakersfield, California on July 4, 1976 and involves four characters: Dee Dee Goyert, played by Julie Harders; a housewife determined to become a sniper; Patrick Henderson, a former oil rigger, played by Stephen Henderson; and Harpers; a group of rock stars.

Other top hits from 9 of the group’s 11 albums. 

The second act picked up where the first one left off. But the end came, as somewhat of a surprise, adding a more serious dimension to the characters that was suspected to be missing. That Iris and Cuss could be together at the end of the first act and seemed to be making their escape was somewhat predictable, and when Peever quietly jumped from the roof, leaving for an adventure, his housewife presumed dead, one can feel for the sensitive, realistic character Harpers wanted to depict.

“Embarcadero Fugue” is a play with potential. Like a car, it has the necessary parts, but needs overhaul before it can run in top form.

‘Queen’ of the rock world releases Greatest Hits

BY SHARON REZAK

Thirteen of the rock group Queen’s best-selling and most popular singles spanning the group’s 10-year career appear on a new album, “Queen Greatest Hits.”

A special 14th song, never before released, is also included in the album, which is a collaboration of Queen and rock star David Bowie entitled “Under Pressure.”

Recorded this past September in Switzerland, “Under Pressure” marks the first time Queen has ever collaborated on a project with any other artist. In fact, the four Queen members composed all of their material individually. For David Bowie, the new release is the first time he has co-composed, co-performed and co-produced with another artist.

It is a successful effort. The song itself is unmistakably Queen, with a heavy bass and theatrical sound, while a distinctive saxophone voice joins lead singer Freddie Mercury in the lead vocals.

A Queen describes “Under Pressure” as an “old-fashioned, modern song” but the lyrics could become a theme for any struggling college student.

“It’s the theme of love... What this world is about

Satisfaction—great rock sound

Pray tomorrow—gets me higher—

Pressure to be the absurd realness in life

Bowie was invited by Mercury to sit in on a recording session. Playing old songs together, the four Queen members and Bowie worked on a few new ideas and came up with “Under Pressure.”

The rest of the album is filled with full, lush and intricate quality of old and new Queen hits.

Dance: Expression of Ideas and Emotion

BY LORI ANDERSON

Dance artist Wendy Rogers and her five-member dance company will step up stage tonight in the first presentation of the Cal Poly Vintage Performance Series.

Rogers will bring to the Cal Poly Theatre a unique and original dance style and flair. Rogers choreographed the three performances, which will also feature her costume and set designs, as well as select musical scores.

The six-member team, with Rogers inclusive, is comprised of Betsey Escam, Lisa McGovern, Carol Murata and Arlene Brechtel and Vielich-Arango. The group will perform three dances—"Moonlight Serenade," "Terrestrial Dust" and "Evidence of Dancing," each featuring "dance with technical excellence through a full range of movement from formal pose to fransic blast."

While the pieces are complicated, they can be played at the same time, Rogers said. When announcing a dance, the choreographer said, "I don't have just one at a time."

Dancing operates on many levels. What it means Rogers and its range and involvement as a kinetic experience.

"I like there to be layers—kind of ambivalence," said Rogers. "I'm Revere but because I value an dance participation and involvement."

"It also interests me," she said. "I wish we could say that the audience doesn't know why.

'Time Bandits': a visual extravaganza

BY LORI ANDERSON

The six dwarves in "Time Bandits" may have stolen parts of history, but when it comes to the movie itself, it's the visual and special effects that steal the show.

From costume and character designs of the Ogre and the Evil Genius to the set design of Napoleon's castle complete with golden treasures and the Mona Lisa, "Time Bandits" presents visual effects of extraordinary power and imagination.

Producer-director Terry Gilliam and executive producers George Harrison and Denis O'Brien have really outdone themselves in background, prop and costume design. Fine detail, authentically believable as well as unbelievable visuals and a sense of modern magic combine to make this performance captivating and the audience doesn't know why.

"Time Bandits" resembles a fairy tale history lesson—one that promises pure entertainment in a world far from education and seriousness.

starts its march to the Mission Plaza, where a 30 foot Christmas tree of lights is lit by the city, the Mission, rings its bells and a community sing-along is held, according to Bob Corcoran, administrator of the Downtown Business Improvement Area, commonly known as the BIA.

The BIA is spending about $10,000 this year for special events, decorations and general advertising making San Luis Obispo the Christmas City," he said. Part of the tradition is the annual "Christmas in the Plaza," on Dec. 5 and 6, from 10 a.m. to 5 p.m. both days.

According to Joan Ponzan, in charge of Mission Plaza

The best Christmas gift is giving of yourself

For those with limited funds and transportation, the campus Craft Center’s annual Christmas sale is ideal.

Located in the University Utdet, the Center hosts a crafts sale on Dec. 3 and 4, from 10 a.m. to 6 p.m. both days, geared to the student wallet. Items for sale have been judged by Craft Center personnel for quality; "Only nice, hand-made things, nothing mass-produced is accepted," said Laura Mathiesen, chair of the Center.

Crafts for sale this year range from needlework and plants to stained glass and jewelry. "We have a very wide range, but ceramics are probably the most popular, to make and buy," said Mathiesen. Only 33 craftspeople were accepted, due to space limitations, but "it was a tough decision who to refuse, there were so many good quality entries," she said.

This is one of the last raisers for the Center, so after the craftsperson sets a price, the Center adds 20 percent plus sales tax. But because the items are judged to the student budget and judged for quality, Mathiesen said, they feel they are given a better price; in stores; in price—stores have much more than a 20 percent markup—"and quality—there may be better quality, since they are judged." The Center will accept cash and checks with an AFS card, but not credit cards.

The official opening of the Christmas shopping season will be on Nov. 27, with Santa Claus arriving by fire truck at Santa’s House downtown in the Mission Plaza and by Conestoga-type wagon at the Holiday House in Madonna Plaza.

In Madonna Plaza his arrival will be greeted by carolers, kids, and costumed characters from Star Wars, and Alice in Wonderland as well as VIPs from the media and city government. That evening, at 8 p.m., the grand lighting ceremony, including a 40 foot fire truck at Santa’s House downtown in the Mission Plaza.

Although the Christmas season starts the same day, Dec. 7, according to Eric Wandel, the Plaza’s promotions coordinator, "This is the night until 9 p.m. starting Dec. 7.

Christmas story, as well as in the commercial campaigns. Which gift the media... All the latest gadgets, fashions, games, and appliances are advertised in glittering gold, with prices to match. For those of us tightening our belts just to be able to send Christmas cards at 20 cents a stamp, a non-materialistic view of giving may help ease the financial strain.

Giving of yourself is one way out of commercialism that adds a personal flavor to your gift. It also lends self-satisfaction, for in giving the gift you receive. Giving of yourself can mean giving your time, energy, or talent as a present.

Think of the person to whom you want to give a gift and pinpoint the thing he or she hates most to do. Then offer your services in that area.

For example, Dad may like a clean car but he hates to vacuum, wash, wax, and change oil. The son or daughter who offers to do that two or three times would surely bring a smile to his face.

Other gift ideas for Dad might be to clean out the garage or attic, mow the lawn all of next summer, or paint the room he never seems to have enough time for.

For the Mom who slaves in the kitchen every day, cooking Christmas or New Year’s dinner and cleaning up afterwards, might be a real treat. Another task Mom might like to code is polishing the silver.

Other gift ideas for Mom include washing the dishes and doing the laundry for a week, month, or all of next summer. Cleaning the bathroom, vacuuming, or grocery shopping may be a better relief gift to other Moms.

Married brothers, sisters, or friends may need a free baby sitter or house guard while they are gone on vacation. Or they might enjoy having a slave for a day or weekend.

If the person in question has a talent for some kind which can serve as a source of gift ideas, whether it is sewing, cooking, writing, painting, or mechanical ability, your talent can become a valuable gift.
THE NEW “MEDFLY GAME” HAS EVERYONE BUZZING

In the 1930's the crisis was the depression and the game that made fun of it was Monopoly. In 1961 the crisis was the Mediterranean Fruit Fly, and the game is the MEDFLY GAME.

Basically the question is this: Can Gov. Jerry Brown save California agriculture? Can he get the bugs out of his White House plans? You'll have to buy the game to find out! Loaded with pitfalla, politicians, and facts about California agriculture and lifestyle, you won't be able to put it down!

Ripping the wrapping—it's the contents that count

BY TOM JOHNSON

Everyone on earth, at least to a small degree, is an artist.

Some people are painters—taking an image by brush and color and sculpturing it on a piece of canvas. Some build replicas of the Eiffel Tower out of toothpicks and a little glue. Some are artists on a more basic level, constructing the skyscrapers which serve as visual tribute to this country's technology.

Like the six billion or so other souls huddled on this dirty tennis ball commonly called the earth, I am an artist. But my medium is not watercolors, toothpicks or even steel girders. My artistic expertise is in gift wrapping.

Let me qualify that last remark. My skill doesn't lie in actually wrapping a gift so beautifully you wouldn't even think to open it. Even a novice drugstore gift wrapper would look like Pablo Picasso next to me. I, No, I have become the perfect gift wrapping methodologist: I create an acceptably displayed present with a minimum amount of work.

Last year I decided to get my gift wrapping out of the way for Christmas on Monday, four days before the yuletide holiday. Masak was over and Johnny Carson wouldn't be fumbling through his Tonight Show monologue for another hour and a half. I reasoned this would be the perfect time to work some of my present-wrapping magic.

As I am a man of few words, I shan't wax lyrical of the technique, I just set the wrapping task on display. I saw a shaft of light fighting its way through the crack in the door of my parent's bedroom. The slightly ajar door meant that my mom was not wrapping a gift for her brother or me. My mom is not one to toil at the task of wrapping, I have learned to lock the door and move the chest of drawers against it, either my brother or I will inherit it.

My mom's style of wrapping is the opposite of mine. She doesn't concern herself over each present as if she hopes it will be placed in the Louvre art museum on display. I have an almost neurotic concern over how pretty her gifts look. This is because, I suspect, she doesn't share my mom's concern over how each present's end somewhere in the vicinity of the center. Then grasp at least seven or eight more pieces of tape and further secure the paper. The end, if properly done, will probably look like the aftermath of Hiroshima preserved under a sheet of adhesive.

After you have repeated this drama on the other end of the gift, you now want to fill out a name tag so Aunt Martha doesn't accidentally get your gift. Then maybe a candle, a card or a little ribbon is added. And a little pressure is applied by the mere act of tying the bow.

After I put the bow on the gift, I saw my mom still meticulously wrapping a gift for her brother. After the gift is in place, you still need to worry about whether the presents I bought were not just right.

I am concerned that the gifts I wrapped—"a fraction of the time it takes me to tear and put the paper together, for Christmas gifts," as I often tell my mom—will not be the center of interest when the gifts are opened. Aesthetically, I feel the gift's presentation is more important than the contents, and I would never dream of impressing the guests with something as unimportant as the outside looks like, it is what's inside that counts.

To wrap the gift, first you must hold the exposed edge of the wrapping paper firmly between your thumb and your index finger. Keeping the palm of your right hand parallel to the ground, move that hand to the right until you strike the paper roll. Push out two or three feet then push the present firmly in the center. Contrary to what my mom says, it does not take a math magician with a master's in calculus to figure out how much paper to roll out. An eyelash estimation will do just fine.

When you think you are at a point where the paper can adequately cover the package, begin to cut the paper. You do not have to draw an exact line or hold a perfect crease as even someone with below average coordination like me (failed both cutting with scissors and slipping in kindergarten) can cut wrapping paper within ten degrees of being straight. But even if you do make a bad or two gap exists. Not to worry. This dilemma need not cause you to throw the miscut paper out entirely or do what my mom sometimes does and cut out a strip of paper to the exact dimensions of the gap to hide the mistake. This is a waste of time, paper, and more importantly, money. All that needs to be done is to tape down the two edges of the paper to the present and make sure the side with the gap always faces the floor.

Because you must firmly tape down both edges of the paper there should be no exposed gap, the importance of having an ample stockpile of Scotch tape is thus underscored. To tape edge properly to the gift's box, first put your left thumb firmly on the paper on the left side of the gap. With your fingers, clutch the tape dispenser. Pull out at least five pieces of tape one after another. Do not reach for one until you have slaided the previous piece onto the gift.

Don't be cute and try to pull out a piece of tape on each finger of the right hand for ready use. They will invariably stick to each other, your hands, your dog Spot, and whatever else is within a ten-foot radius of yourself. One at a time is the proper way. When you finish taping the left edge of wrapping paper to the gift, you should not be, in my suggestion of space which does not sit under a double layer of adhesive.

Repeat the process on the paper edge to the right side of the gap.

After you have taped down the two sides comes the part of the wrapping process which separates the perfectionist from the methodologist—wrapping out of the war for Christmas. Usually I would have a pair of paper humps resembling rabbit ears sticking out at you. Gently fold the top of the two rabbit ears. Then with the skill and touch of a gifted surgeon, grab everything at the end facing you and cram it toward the center. Quickly pull off as many pieces of tape as humbly possible and slap them on the present's end somewhere in the center. Then grasp at least seven or eight more pieces of tape and further secure the paper. The end, if properly done, will probably look like the aftermath of Hiroshima preserved under a sheet of adhesive.

After you have repeated this drama on the other end of the gift, you now want to fill out a name tag so Aunt Martha doesn't accidentally get your gift. Then maybe a candle, a card or a little ribbon is added. And a little pressure is applied by the mere act of tying the bow.

I wrapped the remaining gifts and looked at my watch which read 11:30. Just in time for the Tonight Show. I peered into my parent's bedroom and saw my mom still meticulously wrapping gifts and fretting that no one would like the presents I bought for them. So I took everyone exactly what they asked for, I did not share mine, and everyone worried about whether the presents I bought were not just right.
Tasty treats extra ingredient for holiday happiness

BY "SUSAN" REZAR and "BETTY" THOMAS
Food writers

Delectable goodies are a perfect way to appease any holiday appetite and make great Christmas gifts for someone special. These have been taste-tested in the kitchens of The Mustang Daily and received the "MD" stamp of approval. They were chosen for their festive appearance, their yummy taste, and their holiday tradition. They are sure to put a smile on any Scrooge's face!

This gingerbread recipe will make any cookie monster happy.

Gingerbread Men

1 1/2 cups boiling water
1 1/2 cups butter
3 cups unsifted all-purpose flour
1 teaspoon baking soda
1 teaspoon cinnamon
1 teaspoon ginger
1/2 teaspoon ground cloves
2 cups molasses
3/4 cup sugar
3/4 cup molasses
1 egg
2 tablespoons baking powder
2 teaspoons cream of tartar
1/2 teaspoon salt

In large mixer bowl, pour boiling water over butter. Beat until well mixed. Add egg, sugar and molasses and beat until just blended. Wrap and chill dough for 2 hours.

Preheat oven to 375-F. Roll dough to 1/4-inch thickness and cut with a gingerbread man cookie cutter. Place cookies on greased cookie sheets 1-inch apart. Bake 8 to 10 minutes. Cool and decorate. Makes about 24 1/2-inch cookies.

Icing to Decorate Gingerbread Men

3 egg whites
1 teaspoon cream of tartar
1/2 teaspoon cream of tartar
1/4 cup sugar

In large mixer bowl with mixer at high speed, beat egg whites and cream of tartar until frothy. Add sugar and continue beating 5 to 7 minutes until smooth and thick or until a knife drawn through icing leaves a clean-cut path. Place in container with tight-fitting lid until ready to use. Can be kept up to 2 weeks in refrigerator. Makes about 8 cups.

The Keep icing covered with damp cloth when working to prevent drying and crusting on top. In small bowls, mix with desired food colors.

Candy Cane cookies have a tasty peppermint flavor and will get any cook a kiss under the mistletoe.

Candy Cane Cookies

1/4 cup butter
1/4 cup shortening
1 cup powdered sugar
1 egg
1 teaspoon vanilla extract
1 teaspoon peppermint extract
2 1/2 cups flour
2 teaspoon salt
2 teaspoon red food coloring

Topping: 1/4 cup crushed peppermint candy
1/4 cup sugar
1 egg white.

Cream butter, shortening, sugar and egg until fluffy. Add gradually to creamed mixture and beat until combined. Divide dough in half. Add food coloring to one half. Wrap each half in waxed paper; refrigerate at least one hour.

Preheat oven to 375-F. Roll dough to 1/4-inch thickness and cut with a gingerbread man cookie cutter. Place cookies on greased cookie sheets 1-inch apart. Bake 8 to 10 minutes. Cool and decorate. Makes 3 dozen candy canes.
Poly exposed to Mexican culture

BY DEBRA KAYE

There was music and dance Thursday in the University Union Plaza to celebrate the anniversary of the Mexican Revolution of 1910.

Hosted by Poly's Mecha Club, part of a statewide high school and college organization, the event was meant to expose Poly's student body to Chicanos' history and culture.

"We want people to accept the Chicanos' image—low riders, etc.—because, though many still dress just like in the movie "Zoot Suit," we are going to college and joining the system, too; we're not just gangs shooting each other," said Daniel Rios, president of the Poly club.

"Just look at the numbers; Poly has done the least for minorities. The number of blacks at Poly is the lowest in the state college system; something is wrong," Rios said.

Ambrosio Lopez of the Education Department spoke briefly during the ceremonies, relating the events of 1910 to today.

"Many Mexican-Americans came to the United States during the Revolution; fully one-third of the state is now Hispanic," he said. Events such as the celebration help "sensitize the student body, many of whom come from small communities without ethnic groups, to the ethnic student on campus. The university environment is excellent for this, before they get out in the working world where they'll need to work together," he said.

"And while we're joining the system, we don't want to lose our identity," said Rios. "Mecha is to encourage Chicanos to higher education, without melting in like the Europeans did, losing their culture. Education is the barrier is bad; where I came from, there were no college prep classes and technical school was the only advanced education encouraged," said Rios.

Events during the well-attended University hour included a marimba band and ballet folklorico group from Righetti High School in Santa Maria. The various musical and dance pieces were introduced by the director, Ricardo Oalvadon, who explained their significance in Mexican culture and the Revolution.
'Z' Lab petition protests communication lapses

The demolition contract was authorized by Douglas Gerard, Executive Dean of Facilities Planning, who said that the structure was in the way of the proposed construction of the Engineering South building and an extension of California Boulevard.

Gerard also said that the slowed appearance of the structure made it an eyewaste.

No use is the School of Architecture was informed of the demolition.

The Student Senate also decided to send an enforced petition to President Warren Baker. The petition states in part that: "The communication between Cal Poly’s administration and the School of Architecture and Environmental Design was insufficient in deciding the destiny of 'Z' Lab."

The petition had been presented to the Senate for review at their Nov. 4 meeting by Mark Lowarian, a graduate student in the School of Architecture. Lowarian said that the destruction of the 'Z' lab was a loss of badly needed space for architecture students, and that the construction of the Engineering South building would not begin for another two years.

Also investigating the "Z" Lab incident is Mike Maeks, a microbiology junior and "concerned student." At the Wednesday meeting he presented a chronology of the events leading to the decision to demolish the lab, using information from a collection of letters, memos, and minutes of meetings.

Maeks told the Senate that a lesson should be learned from the "Z" Lab incident, and recommended a revision of the Campus Administrative Manual under its provisions for the use of facilities and surplus property to facilitate student and faculty input into decisions like the one regarding the "Z" Lab.

Masks also said that a lesson should be learned from the "Z" Lab incident, and recommended a revision of the Campus Administrative Manual under its provisions for the use of facilities and surplus property to facilitate student and faculty input into decisions like the one regarding the "Z" Lab.

Jogging may not be your sport, but this classic example of "sporting" is definitely a winner! Of course, it’s machine washable, in navy and tan with contrasting stripes on collar, pockets and sleeves.

- Soft bulk orion stretch sock in 10 fashion colors. One size fits all. Embroidered alligator logo applique. $4.50
- Engineered of pure cotton to breathe and stretch with you. Ribbed collar and cuffs to stay neat and its extra-long shirttail keeps it in one position when you change yours. Fashion colors: M-L-XL. $24

Cotton canvas kit with top grain leather trim and lining. Embroidered alligator logo applique. Navy, brown or tan. $22

Styted in shetland wool blend for added warmth and comfort. Easy wearing and easy caring. Fashion colors in M-L-XL. $37.50

Izod Lacoste gifts for men

Comfortable stretch belts in either solid or stripe color combinations. Leather trim. The perfect companion to Izod's knit shirts. $14

Unique leather and canvas/leather trim key fobs make great little stocking stuffers. Gold metal frame. $5

RILEYS UNIVERSITY SQUARE
Collective bargaining and faculty unions such as the United Professional Teachers of California and the Congress of Faculty Associations may be beneficial for some CSUC employees, but not for everyone, according to John Connely, Education Department head and director of Libraries.

Connely argued the no-agent perspective in theirexistence of faculty members on the issue of collective bargaining. Elections will be held on this issue.

Connely stipulated that although unions are mandated to lose at this time not to vote for any agency. He said that the best unions and collective bargaining will not solve faculty concerns, and that this is a decision to the California State University and Colleges system.

Citing various studies on other systems that use collective bargaining, Connely said that he found only moderate increases in faculty salaries, more paperwork and more time spent in union meetings, rather than devoting more time to teaching.

"There will be a lot more money for employees, regardless of collective bargaining," said Connely. "Increases in salary would lead to losses in other parts of the system. If we want a balanced system, this collective bargaining is a negative." He also raised questions to the unions, such as where will the money be to pay for higher salaries come from? Describing the entire CSUC budget as money in a pot, Connely said just as if faculty salary needs are met, other programs in the education system would lose money and therefore suffer. He added that not every student with system-wide budget cuts stemming from the federal and state governments, Connely said it is not likely the state would eagerly kick in pay increases for higher education faculty.

"It is not going to be any easier to get money out of the state right now," he warned. Connely also said collective bargaining could lead to a strained or adversarial relationship between the unions and the administration or Chancellor's office. Meetings between these two groups would turn into confrontations of faculty unions demanding more from their bosses, rather than "pleasant talks" as Connely described the present situation.

Connely also said collective bargaining could lead to a strained or adversarial relationship between the unions and the administration or Chancellor's office. Meetings between these two groups would turn into confrontations of faculty unions demanding more from their bosses, rather than "pleasant talks" as Connely described the present situation.

The no-agent representative pointed out administrative costs would rise due to collective bargaining, adding that Chancellor Glenn S. Dumke said the same thing a few days ago. In a Los Angeles Times interview on Nov. 16, Dumke said if unionism comes about, "it will greatly increase our expenses in terms of the costliness of the process and also our staffing and legal requirements.

Connely said that if unions come about, the organization will become egalitarian and would want the same things for every CSUC employee. Some people might not be happy with this, he said.

"What is best for some may not be for everyone," the speaker said. "The thrust of faculty strikes is there with collective bargaining and some of us don't even want to be near the potential of a strike."

Connely said the present system of the Chancellor articulating the needs of the faculty to the Board of Trustees is not without its problems, but picking either of the two unions is not the answer for CSUC faculty.

Confidence vote

Palladino said the commission has not yet decided whether a new public hearing will be required in order for A.S.I.'s low-key proposal to be reinstated. Palladino, however, insisted that in general, he was confident about the future of nuclear power. He stressed that errors have been caught—and lessons learned—from quality assurance programs.

NRC members testify at House subcommittee

From page 1

At the hearings in Washington, congressmen warned NRC members that their credibility, as well as that of the nuclear industry in general, were being tested due to the Carew and Biology incidents discovered at Diablo and other U.S. nuclear power plants.

NRC Chairman Name Palladino testified at the hearing that although PG and E would hire the auditor for the seismic review, the NRC would still have to approve the choice for the work to be accepted.

Gov. Brown hails NRC ruling

From page 1

The actual money for higher salaries comes from the state's budget. The PG and E spokesman in San Francisco called the NRC decision "very remarkable and very sobering."

A track record of carelessness in inspecting the plant's seismic safety. "I don't believe that's the case because we've complied with the NRC on all matters that the NRC has asked for," Gov. Edmund G. Brown, speaking in San Francisco. The NRC decision was described as "very remarkable and very sobering."

An outspoken opponent of the Diablo facility, Brown said he wants an independent audit of the plant. Free of influence from the NRC and E on the NRC, the program would be a lot of student contact in next month's election.

Minor sports may get the ax

From page 1

But according to ASI Executive Liaison, Ken Raasch, the proposed cuts are not only a result of lack of funds.

"The actual money saved would be minimal. Most of the ax would be very minimal. Most of the teams which are suffering the most this year and also the people of California I'll have no stone unturned.

An inquisitor said from Quails Lake in San Francisco, called the NRC decision "very remarkable and very sobering."

The Annual Audit for Fiscal Year 1980-81 for the California Polytechnic State University Foundation has now been completed. Copies for public information are available in the Foundation Executive Director's office, Fisher Science Hall 290, and the Campus Library.
Mustangs charge Matadors in finale

Mustang football mentor Joe Harper's perfect mark of never having a losing season in his 13 years at Cal Poly, appears to be secure as Poly 4-0 takes on Cal State Northridge in the season finale Saturday. Kickoff time is slated for 7:30 p.m. in the Matador's North Campus Stadium.

Northridge has lost four out of their last five games including a 17-13 defeat at the hands of pitiful Portland State in their most recent contest. Ranked No. 9 among Division II schools after the fifth week of the season, it's been all downhill for the Matadors since then, while Cal Poly has been headed in the opposite direction.

They're (Cal Poly) a team which is progressing very well since the start of the season," Mustang head coach Tom Kedde said, "and we're looking forward to playing them."

The Mustangs' 17-6 loss last Saturday to Division I-AA power Boise State was their first in four games—also their first road game since Oct. 3. "We (Northridge) got to play them at home and we know this is the last game of the season and our last chance to win this year," Kedde added.

If past games are any indication of how the Matadors will fare on Saturday, Northridge's home field advantage should have little affect on the outcome. In the 20 game series between the two schools, dating back to 1981, Poly has won all but two games and has a 13- game winning streak going against the Matadors which includes a 35-6 thrashing last year.

Another obstacle in the way of a Matador victory is the loss of quarterback Don Morris, who holds the school record for the most pass attempts, completions and yards gained in the air in a single season. The 5-10, 175-pound senior quarterback went out of the third quarter of the Portland State game with a strained knee and is a questionable starter for Saturday's game.

As usual Harper has nothing but praise for the Mustangs' upcoming opponent. "Northridge is a terribly important game for us because it means the opportunity for a winning season," he said. "This is the best Northridge team that has been around for a long time. They've been ranked nationally, threw the ball well and saw sound defensively," he said.

Completing a season in which he started every game at quarterback, Lloyd Nelson will once again be at the helm of Poly offense when the Mustangs take field in the first quarter. Sophomore reserve Tracy Miller will most likely see action in the second and fourth quarters.

Senior tailback Jim Colvin became the team's leading ground gainer with his second straight 100- yard performance against Boise. In eight games, Colvin has gained 543 yards on 111 carries for a 4.9 average. Freshman Brian Burrell is not far behind with 464 yards on 103 attempts. Junior fullback Dan Craig will not be available for duty, having separated his shoulder in the Portland state game.

In the receiving department, tight-end Brooks Wise leads the way with 16 receptions.

On defense, linebacker Steve Booker leads the team in tackles with 69 (29 solo), linebacker Marvin "Big Ray" Jackson and defensive backs Gerald Purify and Gene Leslie pace the team in interceptions with three apiece.

Arguello to defend title

LAS VEGAS, Nev. (AP) - After going 14 rounds before knocking out Ray "Boom Boom" Mancini less than seven weeks ago, World Boxing Council lightweight champion Alexis Arguello figured it was time for a vacation before making his next title defense.

Instead, the Nicaraguan native barely had a chance to catch his breath before promoters matched him for a fight against once-beaten Roberto Ellinodo, in what will be Arguello's 18th career title defense.

"I wanted to take a 10-day vacation with my wife, but they called and asked us to fight," the soft-spoken Arguello said. "But this is my job and I have to make the money. There is plenty of time for other things later."

When you need $65 fast, you find out who your friends are.
POLIOSTI TO DEFEND CCAA TITLE

Cal Poly will be defending its 1980 California Collegiate Athletic Association water polo title when the Mustangs take to the water today and Saturday at the conference championship tournament at UC Riverside.

The Mustangs are at least as good as they were the last time they were here, said Haffarkamp. "We just played over our heads some this year."

The Mustangs struggled through regular season play with a 7-10 record, but according to Haffarkamp the team was "just starting to really gel at the end of the season."

"We're starting to come together as a team," he said. "I'm sure we'll get the best performance out of each player."

UC San Diego is the tournament favorite. With an 18-6 season record, San Diego lost to top-ranked UC Santa Barbara in the conference final.

IRIVNE OR A J"I ONAL

Irvine may win by one goal while they thrashed CCAA contender Riverside 18-6.

Opinion

Diablo's last rites

It's been a long and winding road, as a former Beatle might say, for the Diablo Canyon nuclear power plant. That road, however, may have come to a dead end. The Nuclear Regulatory Commission's moves during the past two days to revoke Diablo's low-power testing license have turned the anti-nuclear movement's idealistic dream into a tangible reality: Diablo Canyon may never go on line.

The Washington Post reported Wednesday the NRC had tentatively decided to suspend Diablo's low-power license pending a review of the safety facility. This report was confirmed Thursday when the NRC voted 4-1 to suspend the license. All the commissioners agreed fuel should not be loaded until the review is completed.

Although the implication is that the suspension of the low-power license will be a temporary measure, it is more likely that the NRC is finally beginning to respond to a society that now recognizes the moral indefensibility and the technological obsolescence of the nuclear power industry. Add to that the slapshod construction, the design errors and the plant's proximity just 2.5 miles from an active earthquake fault and the result is a nuclear time bomb that threatens the biological future of the Central Coast.

It now appears the NRC will now not allow that fuse to be lit. We, along with others who are concerned about the proliferation and destructive potential of nuclear technology, commend the NRC for the moral responsibility of its actions.

The suspension of Diablo's license will be, indeed, the first such action taken by the NRC against any nuclear power plant, according to commission representatives.

There are many special people who deserve recognition for helping to make such a significant action possible:

—Gov. Edmund G. Brown Jr., long-time opponent of Diablo, who provided a review of the problems at the plant. His opinions obviously had a strong effect on the NRC's decision.

—Members of the Abalone Alliance, Mothers for Peace, the Alliance for Survival and others who have unceasingly fought the bureaucratic and economic power of Pacific Gas and Electric, both in the courts and in the hearing room.

—The 1,600 non-violent blockaders who last September demonstrated the power of the human spirit to triumph over economic greed, the nuclear establishment and, in some cases, police brutality.

The history of Diablo has not been all bad, however. For 13 years, the power plant served as a quasi-public works project for thousands of workers. In turn, to dismantle the plant and recycle its parts to serve safe, energy-efficient forms of power generation will mean jobs for many more workers.

It is our sincerest hope that the NRC's actions will create a need for filling those jobs.

Mustang Daily policy

Letters and press releases may be submitted to the Mustang Daily by bringing them to the Daily office in Room 228 of the Graphic Arts building, or by sending them to: Editor, Mustang Daily, GRC 228, Cal Poly, San Luis Obispo, CA 93407. Letters must be typed and include writers' signature and phone number.

Editors reserve the right to edit letters for length and style, and to use editorial treatment. Letters should be kept as short as possible.

The Mustang Daily encourages readers' opinions, criticisms and comments on news stories and editorials. To ensure that letters will be considered for the next edition, they should be submitted to the Daily office by 10 a.m.

Press releases should be submitted to the Daily at least a week before they should be run. All releases must include phone numbers and names of the people or organizations involved, in case further information is needed.

All unsolicited editorials reflect the majority view of the Mustang Daily Editorial Board. The board consists of Editor Tom Johnson, Managing Editor Mike Carroll and Editorial Assistants Cynthia Barakat and David Brackney.

Students Association's bulletin board in University Union, which reveals the torture and crimes of the Islamic Republic of Iran, have been torn up.

Therefore we (Iranian Students Association) appeal to all international human rights organisations and all freedom-loving people to bear the voice of the Iranian people who are guilty only of fighting for democracy, social justice and human dignity.

The following are but a few examples of physical and psychological harassment of girls done on the streets and/or in the regime's dungeons, by official thugs and/or by the Iranian revolution.

1. Executing teenagers: There have been reports of the execution of girls as young as 13. According to Iranian public prosecutor, Ayatollah Mohammad Gholm, explaining Islamic justice in an official interview, the execution of a 9-year-old girl is justified because this is considered the age of puberty for girls and thus a 9-year-old girl is considered a responsible adult! He said: "there is no difference for us between a nine-year-old girl and a 60-year-old man."

2. Executing pregnant women: Such as the case of the 8-month pregnant woman who was executed by firing squad.

3. Undressing girls on the street, in front of the public, beating and injuring them barbarically.

No doubt there are further crimes, untold and unrecorded, being committed every day and night.

Letters

Public supports Israel

Editor:

Of course there is an Israeli lobby, Professor George; that was not the point of my letter (in response to Dr. Anderson's comments to Mustang Daily), neither stated nor implied.

The point is that the American public has been the source of congressional support for Israel. The influence of the Israeli lobby cannot account for the breadth of that support over the past years. The President, through his own lobbying on behalf of the industrial giants who stand to gain from the AWACS sale, subverted the Senate. He is planning to do it again, with the proposed satellite sale to an Arab consortium that includes Libya and the PLO. If Professor George, you are correct, then we have only the Israeli lobby and a few of American Jews and Jewish organizations to thank for the perversion of U.S. policy and betrayal of a friend.

I am hopeful that our Senators will not close their ears to the public this time too.

The Last Word:

Iranian torture

The heroic people of Iran have not forgotten the memory of the torture on the Shah's regime, and it wasn't long ago that the people stormed in and captured the dreadful torture chambers of Evin—one of the most notorious jails in Tehran—when to the disbelief they realized that the regime of Khomeini has revived torture again.

The people who assumed the torture chambers with the tools and devices would be converted into museums, were soon to realize their mistakes. Khomeini's regime, while drawing the constitution, was under pressure by the masses, who for years had suffered under the tortures of Shah's regime. But the public prosecutor, Ajmatoollah Mohamad Gilani, explaining Islamic justice, was forced to include an article regarding the prohibition of torture. But the article was passed very obscurely. The "assembly of experts" (Majlis) formulated this article as follows:

"Any type of torture for the purpose of extracting information and confession is prohibited."

The twist in this article is that only torture for the purpose of extracting information or confession is prohibited while torturing for any other purpose or reason has been left open. Thus, under the pretext of religious punishment (haggging), providing daily the means by which any type of torture and mistreatment of the prisoners could be freely exercised. This is just one of the articles of the reactionary constitution of Khomeini's regime.

According to Amnesty International, there are 18,000 political prisoners in Iran, and they are constantly in great danger of execution.

Neither the Khomeini regime nor its supporters in this campus can tolerate any opposition. For example, all documents and papers of the Iranian Students Association's bulletin board in University Union, which reveals the torture and crimes of the Islamic Republic of Iran, have been torn up.

Therefore we (Iranian Students Association) appeal to all international human rights organisations and all freedom-loving people to bear the voice of the Iranian people who are guilty only of fighting for democracy, social justice and human dignity.

The following are but a few examples of physical and psychological harassment of girls done on the streets and/or in the regime's dungeons, by official thugs and/or by the Iranian revolution.
