Higher education received a break Friday when Gov. Edmund G. Brown, Jr. unveiled his proposed state budget for 1982-83, eliminating 2.5 percent from college budgets instead of the expected 5 percent.

The California State University System will be expected to cut $25 million from increases student fees.

Next year Cal Poly students will have an extra $55 added on their registration fees, considerably less than the $216 increase previously expected.

According to D. Dale Hanson, CSU Vice Chancellor of Business Affairs, the $2 million cut from the base budget includes eliminating funds that were allocated to programs for maintenance and change proposals. These programs include areas like the Learning Assistance Program, Instructional Support, and Library Development.

"Hanson in his report didn't have the programs. The budget is directed primarily to reduce the fee impact for students, not increasing quality of the programs," said Hanson.

Because the student fee increase was lower, Brown originally asked for, he did not include a financial aid relief fund program for needy students, said Hanson. A relief fund of $10 million would have been instituted had the fee increase been higher.

Brown also budgeted for an enrollment increase of 1,050 students, up from the 1981-82 total of 236,850, said Hanson. This doesn't serve the enrollment demand adequately, he added.

"It is not improvement, it is not as much as we have alarmed, but it is an improvement over what the $50 million cut would have eliminated."

Hanner said Brown's budget must go to the state legislature before it becomes final. According to the Associated Press, Gov. Brown said there was a "strong likelihood" the legislature would approve his proposals.

In order to deal with the impact of the fee increase, CSU Chancellor Glenn S. Dumke appointed a 14-member task force on fees and financial aid.

Hanner, who is chairman of the task force, said the group made suggestions to Dumke under the assumption that $50 million would have to be cut.

"The report (to Dumke) was based on this assumption, but the general philosophy will be useful to the chancellor even though the ground rules are changed," said Hanner.

Among the task force's major recommendations were to institute a different fee structure. Under this plan, those who attend school part-time (5.9 units or less) would pay a lower fee than full-time students. Dumke is unsure if this will be implemented.

"Most of the trustees and most of the staff is glad that the amount of student fees hasn't been increased," said Hanner, who regrets that programs had to be cut.

The third draft of the Disaster Preparedness Plan lists how to cope with chemical spills, earthquakes, bomb threats, floods, snipers, civil disorder, severe winds and other potential emergencies. The "operational plan," for each emergency, including an accident at the Diablo Canyon nuclear power plant, consists of two to four pages stating purpose, background and a "concept of operation." The more complete sections give instructions for the various Public Safety personnel involved in the emergency.

"I feel at this point that we are prepared for emergencies and naturally it's a lot more work before we're done," said Brug, adding the handling of chemical spills at Poly in the past year has proven problems that the plan workable. He said President Baker has declared the document operational.

"We are concentrating not just on Diablo but on any type of emergency," he added.

20-mile requirement

The state requires the county to provide an emergency response plan for a 20-mile radius of Diablo. The county Office of Emergency Services is helping write the Standard Operating Procedures for every city, school district and emergency or county agency which must be included in the plan, said AI Fonzi, county emergency services coordinator.

Brown holds CSU cuts to 2.5 percent

Poly Diaster Plan reviewed by campus officials

BY JUDY LUTZ

Cal Poly's Disaster Preparedness Plan is incomplete yet operational, but the university has no Standard Operating Procedures to coordinate with the county plan in case of an accident at Diablo Canyon, according to Public Safety officials.

The red-covered 124-page administrative document was distributed Nov. 19 to department heads, deans and section heads with a cover letter from President Baker requesting suggestions for changes by the end of January. At the same time, the plan was submitted for review to the Public Safety Advisory Committee, which is composed of staff, faculty and student representatives.

It is available to look at...and we solicit any feedback from anybody that can help make it a better plan," said Public Safety Director Richard Brug. Two copies of the plan were recently placed in the public documents section of the library.

The American Civil Liberties Union victory over the creationists has caused many to conclude creation science is dead, but the question is still alive with Cal Poly teachers such as Edward Ernst, the Education Department and Dennis Beck, advisor to the Campus Crusade.

"America is deeply rooted in the Judeo-Christian tradition and any movement such as the San Diego Institute of Creation Research will keep the question alive," said Ernst. "Religion is just as important to man's surviving as science."

Court sees difference

The federal court, however, took a different view, saying the Arkansas creationism law violated the constitutional separation of church and state. U.S. District Judge William Overton ruled the law advanced religion in violation of the First Amendment, saying:

"The argument that creation from nothing does not involve a supernatural deity has no evidentiary or rational support."

Ernst contends that the judge showed his bias by merely parroting the ACLU briefs. "The ACLU spent $2 million more on this single case than any other in its history," he said.

Both Ernst and Beck agree Attorney General Steve Clark's lack of sufficient preparation contributed to the defeat. Also, 140 Defense attorneys were applauded by science organizations all over the country. Ernst believes the American Association of School Boards is not ready to put the case to rest.

"Many school board members think there is a place for both the creationism movement and Darwinism," he said.

Dennis Beck maintains the court did not interpret the Constitution the way it was written.

"The First Amendment just means there can be no state religion, but the court and the ACLU interpret it as meaning no religious ideas or thoughts in the government," he asserted.

Theory vs. fact

According to Beck, the real issue is that evolution is being presented to children as fact, not theory.

"Evolution is taught as truth, and the scientists don't admit there are still many inconsistencies in the theory," Beck said.

Creationists point out not one missing link has ever been found to support Darwin's theory of the fittest, but this is not mentioned in class rooms.

"I am a Christian and I was trained in science," said Beck. "I was taught..."
Icy storm kills 32, hits Dixie

BY THE ASSOCIATED PRESS

An ice storm that has killed at least 32 people pushed southward Monday, sending temperatures plummeting to lows across Dixie. In the north a new blizzard wallaped Buffalo, N.Y., with 20 inches of snow.

Several people, mostly elderly, froze to death in their homes.

Schools and factories were closed in many cities from Chicago, where Sunday's temperature of minus 20 was an all-time record, to Atlanta, where Monday's minus 8 was the coldest since 1899.

Travellers were stranded across parts of Indiana, Ohio and Pennsylvania as the eastern two-thirds of the nation remained coated in one of the most severe cold waves of the century.

Many highways across the Midwest were impassable with snow and drifts. Scattered power outages were reported in several states as generating facilities became overloaded and lines snapped in the cold and wind.

Augusta, Ga., set an all-time record at minus 2 and readings of 5 below were posted in northeastern facilities became overloaded and lines snapped in the outages were reported in several states as generating facilities became overloaded and lines snapped in the cold and wind.

Pensacola, Fl., recording an 8. The 16 at Houston was read in northeastern facilities became overloaded and lines snapped in the outages were reported in several states as generating facilities became overloaded and lines snapped in the cold and wind.

A temperature to record lows across Dixie. In the north a new blizzard wallaped Buffalo, N.Y., with 20 inches of snow.

Paul Lynde, 55, dies at home

BEVERLY HILLS, Calif. (AP) - Comedian Paul Lynde, whose one-liner wisecracks and infectious smile helped make "Hollywood Squares" one of TV's longest-running game shows, has died of an apparent stroke. He was 55.

Lynde's body was found in his bed in his Beverly Hills, Calif., home early Saturday morning by a manager who had expected the actor at a birthday party and became worried when he didn't arrive. Dr. R. David said. They broke through a side window at Lynde's house, he said. David said he may have been dead since Saturday.

" Everybody around here in shock," said David. "Everybody loved him. He was prolific, he was funny. He was contradictory. He was brilliant. He was everything that comedians are, but he sure loved his fans."

Calf. storm costs $280 million

SAN FRANCISCO (AP) - Some of the victims carried snapshots of their crushed homes and broken furniture. Others brought nothing but a sad description of how everything they owned was destroyed in last week's devastating floods and mudslides.

Hours before the five federal disaster assistance centers set up around the San Francisco Bay area opened Monday afternoon, the victims began to line up and wait for help. The intensive storm Jan. 3 through 5 dumped more than a foot of rain on a 250-mile area north and south of San Francisco and caused an estimated $280 million in damage.

The death toll from the storm was reduced from 29 to 20 Monday after a Marin County coroner's ruling that Charlotte Irwin, 86, of San Anselmo died of causes unrelated to the storm.

The wait continued at Ben Lomond in Santa Cruz County, where rescue workers were stalled in their search for at least five more bodies believed to be buried in the mud and debris of eight fallen houses.

"The search has been suspended and there's no telling when it might resume," said Sgt. Bruce Simpson of the county Sheriff's Department. "We had to stop digging Saturday night because the land is very unstable."

Digging was stopped when geologists said the land around Love Creek was still moving.

Haitian forces repel invaders

PORT-AU-PRINCE, Haiti (AP) - Haiti says its security forces and the inhabitants of Tortuga island chased off a handful of armed invaders over the weekend, but an exile in Miami claimed Monday that the "invasion" was far from over.

The government said Sunday that it had driven the invaders from the island, located about 15 miles off the north shore of this impoverished Caribbean nation.

Reliable sources said four to eight men landed on Tortuga on Saturday, although several had been killed or captured. The government announced "just a propaganda statement."

Interviewed in Miami, Biambi said he lost contact with the invasion party Sunday night, but he dismissed the government's claim that the invaders had been defeated. He said the Haitians only learned of the invasion Saturday afternoon and couldn't have crushed it so quickly.

Biambi said he did not know the whereabouts of the invasion's leader, Bernard Sansaricq, a 37-year-old service station operator from Florida. Sansaricq, himself an exile, had mustered 36 supporters in the British Turks and Caicos islands at the southern end of the Bahamas chain, about 100 miles north of Haiti.

Life in the capital was tranquil Monday, and few people appeared to be aware of the purported invasion.

Creation issue bothers teachers

From page 1

...evolution was truth all my life until one biology professor remarked that there were other theories of creation. He was a real scientist because he had real objectivity. Most scientists have stopped looking at the evidence for and against evolution, and now think of it as the only truth, said Beck. They believe in evolution with an almost religious fervor."

Wendell Lamar, a science teacher in California, says that evolution is "a subject that is a problem for many teachers. I think the meaning of evolution has been twisted and turned into a lot of different things."

EE & Computer Science Graduates

Today, in San Diego, NCR means new large-scale computer systems and concepts.

If you welcome the stimulation inherent in creating a new generation of medium and large-scale mainframe computer systems, consider NCR Engineering & Manufacturing in San Diego. We are an organization that is dedicated to NCR facilities and programs and we want to attract an engineering staff that is showing the way in systems architecture. Virtual systems. Multiprocessing. Data base management. Firmware. PASCAL-based OS language. VLSI technology. Upward path engineering in short, everything that creates Total System capabilities for business needs of the 80's and beyond.

Something else you'll like. Although our products and California height facilities are large-scale, you'll work in small, highly visible teams that offer uncommon program diversity. There is easy multidiscipline communication, movement between projects, and wider career path options. In a word, you will find exposure and an exciting environment.

Poly Matmen blank Augustana, edge Arizona

Above: Augustana grappler Mike Speak finds he can't fight what he can't

By VALERIE BRICKMAN

While blanking the Augustana Vikings Thursday night 27-0, the Cal Poly wrestling team rallied from behind to defeat Arizona State 16-15 Friday night in an action-packed match held in the Cal Poly main gym. Augustana College of Illona Falls, South Dakota was no challenge for coach Vaughan Hitchcock's Division I grapplers.

All of the Mustangs won in their individual matches, but three scored extra points for the team. Freshman Howard Lawson, wrestling at 187 pounds, pinned Viking, Dave Kampaata with 15 seconds left in the first period awarding the team with six points.

At 118 pounds, Al Gutierrez had complete control of his bout, slowing away Craig Sanders 16-4 and giving Cal Poly five team points.

Jose Montiano, top returner for Hitchcock was also awarded five team points as he trounced John Dehais in the 175 decision.

Other victories for Poly were: Sean Shea at 158 pounds, 14-4; Mike Bartus at 164 lbs., 14-7; Jeff Barksdale at 142 lbs., 9-6; Pat O'Donnell at 156 lbs., 7-5; John Nolan at 177 lbs., 7-2; Joe Elinsky at 190 lbs., 9-6; and heavyweight Josh Washington, 7-1.

The Arizona State Sundevils proved to be some competition for the Mustangs as Cal Poly fell behind 7-18 with three matches to go.

Cal Poly started off the night on a good note with Gutierrez gaining the upper hand, or body, in his bout, winning 12-2 and giving the Mustangs four team points.

"All's win was the key victory. He made the point that won," said an elated Hitchcock after the match. The next three weights fell victim to the Sundevils, but it was 142 pounder Chris Cain, after a night off, who brought the Mustangs back with his easily won bout (7-2) over Sundevil Otis Calvin.

Again losing the next three matches, Poly's comeback was left to the three heavier weights.

"I felt we had a good chance in the top weights," said Hitchcock.

Dale Ambler, wrestling at 177 pounds for the Mustangs, hadn't competed since he won his division in the Sundevil tournament before the holidays.

"I was wrestling cautiously because I knew we had to get the win," said Ambler after his victory.

Cautious he was, winning 5-1 and giving the team three points, only five behind the Sundevils.

After a slow first period, 180-pounder Elinsky scored a couple take downs and escapes to eventually win with a score of 14-6, also giving the team three points.

Now down by only two points, heavyweight Washington had to win in order for the team to claim the victory.

Washington didn't let his team or the fans down, while wresting what Hitchcock termed "a beautiful match as he kept his poise," winning a 5-1 decision.

The Mustangs are now 8-3 in dual matches and still bs.

The Cal Poly women's basketball team took a split on the road over the weekend, beating Fresno State 68-64 and losing to UC Santa Barbara 93-68.

Chevia Rose led Mustang scoring in the Fresno game with 24 points, while Laura Bushan scored 27 points in the Santa Barbara contest.

"I was wrestling cautiously because I knew we had to get the win," said Ambler after his victory.

Cautious he was, winning 5-1 and giving the team three points, only five behind the Sundevils.

The Mustangs are now 8-3 in dual matches and still bs.
Several Cal Poly students have resolved that in 1982 their habits will change, their lives will be altered and their goals will be reached.

John Viti, an 18-year-old math major, planned to spend less money. However, he said that his goal has not been kept, especially after spending $132 on books.

Basil Herrera, 22, an aeronautical engineering major, said he wants to make it by next year. Herrera, 211 pounds, said "it would probably take a Mac truck going 60 mph down Cuesta Grade" to keep him from making it to 1983.

Business major Dorothy Peters said, "I'm not going to be verbally abused anymore." Peters, 22, added that so far she has straightened out a few people.

Jack Butler, 18-year-old math major, said, "I'm not going to play pool so much, and I'm going to apply myself more in all areas-including studies. So far Butler is keeping his resolutions.

Business major Shari Woosley and industrial engineering major Elizabeth Loush, both freshmen, said their resolution was to go on a diet. Lately they have not kept their promise "because of too much temptation: like McDonald's and the Yogurt Shops," they said as they walked away with two bags of groceries.

Kristen Spencer, a 20-year-old math major, is determined to find a better science method, which she says assumes there can be change. Biology Professor William Stansfield has a similar view. "The belief that something can come from nothing is not science, but religion," he said.

For the idea of the creationist theory being taught in public schools, Houlgate said, "it will just enforce the dogma. With no facts to confirm or disprove, it cannot be taught as a scientific theory."

As for the idea of the creationist theory being taught in public schools, Houlgate said, "it will just enforce the dogma. With no facts to confirm or disprove, it cannot be taught as a scientific theory."

Science vs. philosophy

Stansfield said he thinks there might be a place for creationism in the public school system, "but it shouldn't be taught in biology classes because it is a philosophy, not a science. Teaching it as science would only add confusion." However, teaching creationism outside science classes would be almost impossible, since very few high schools have philosophy courses and creationism would probably end up in biology classes anyway, Stansfield said. For this reason he is against a creationism law for secondary schools.

"Creationism taught at the college level would be much more appropriate because we have a much wider choice of classes here," said Stansfield.

What the outcome of this court decision will be for the future of education is not altogether clear. As Stansfield said: "Evolution is not anti-religion, but no science can talk of God; it can neither confirm nor deny. Science can only investigate natural laws through such fields as try chemistry and physics."

But according to Ernst and many others the controversy will never die.

"The issue will not be resolved by a single court decision. Everyone thought the dispute ended with the Scopes Trial, but the question will not rest as long as we live in a country where injustice is tolerated," he insisted.

Creationism concerns faculty

From page 2

Leges proves there is room for both science and religion.

"The university needs to show its fault," Beck add.

"We need an open market so the students can see that evolution isn't the only idea around."

Growing movement

Although creationism is a growing movement on campuses all over the nation, there are those who agree with Judge Overton's ruling, such as Philosophy Department Head Laurence Houlgate.

Houlgate said he believes the creationists are confusing science with dogma, and there are different approaches to teaching either. He explained a dogmatic statement as one put forth as the absolute truth. "It is a statement of belief beyond all possibility of improvement or correction," he said. "Science, ideally, should be the only form of knowledge that is regarded as the possible truth, but is open to change, while dogma is always seen as the absolute truth."

There is no empirical evidence for God, only authoritative belief. When teachers speak of evolution they back it up with evidence because it is only a hypothesis, and not fact.

"The question of evidence has little or no importance to a creationist. Only defense is the biblical, but evolution stands on the basis of evidence," said Houlgate.

"Creation is lack of evidence is what is disputed the judge."

According to Houlgate, the attitude of absolute belief in divine creation is exactly opposite to the scientific method, which he says assumes there can be change. Biology Professor William Stansfield has a similar view. "The belief that something can come from nothing is not science, but religion," he said.

For the idea of the creationist theory being taught in public schools, Houlgate said, "it will just enforce the dogma. With no facts to confirm or disprove, it cannot be taught as a scientific theory."

Updated: Fred Moore, a reporter for the San Luis Obispo County Sun, writes that the Student Relations Board is looking for interested students to fill a number of positions. The board is responsible for planning and conducting student activities, including student government and student organization affairs. The board is composed of three members, each representing a different area of the student population. The positions include positions for a Coordinator, a Media Coordinator, and a Communications Coordinator. The Coordinator is responsible for planning and conducting student activities, including student government and student organization affairs. The Media Coordinator is responsible for coordinating the student media and public relations efforts. The Communications Coordinator is responsible for coordinating the student communications efforts. The board meets weekly to discuss new activities, plan events, and coordinate the efforts of the student organizations. The board is open to all interested students, and the positions are open to any student who meets the requirements. The board is currently recruiting for new members, and students interested in joining should contact the Student Affairs Office at 546-1405.
C A U IV

B A S jS E piALL* Team reps must attend the manager's meeting, Jan 12, 6:00 pm, Sierra Madre lounge. No late entries. Games are played Sun-Thurs evenings and Sat day. Sign-up in UU104

TENNIS TOURN. R O U N D ROBIN Entry deadline: Fri, Jan 15, 12:00 Noon, UU 104. Play begins Monday evening, January 18. All the courts will be reserved.

RACQUETBALL The entry deadline is Fri, Jan 15, 12:00 Noon, UU 104. Play begins Mon and will continue for 6 weeks until the play-offs. Beginning to advanced divisions.

FLOOR HOCKEY A team representative must be sent to the manager's meeting, Mon, Jan 18 at 6:00 pm in Rm 201, Science North. Officials meeting to follow.

HANDBALL Entries must be in by Fri, Jan 22, 12:00 Noon in UU 104. Play will begin on Monday, Jan 25 and will be organized into leagues. Court priority is assured.

INDOOR SOCCER* Entries taken at a manager's meeting, Mon, Jan 25, 6:00 pm in Rm 201 of Science North. Officials meeting to follow for all participants. Both are mandatory.

VOLLEYBALL entry deadline is Fri, Jan 29, 12:00 Noon in UU 104. Play will be held weekday evenings beginning February 2nd. This is a doubles event.

WRESTLING A collegiate-style meet will be held Mon-Thurs, Mar 1-4. Entry deadline is Mon, Mar 1, 12:00 Noon the day of the meet. Weight class is 120, 130... and HW.

TUG-OF-WAR Enter your 6 person teams, 11:00 am, Feb 16, on lower fields. Preliminary battles are at 11:00 am, Feb 16, in front of Main Gym, Feb 18, 11:00am.

*Denotes Nominal Fee Charged.

BADMINTON Entry deadline is Fri, Feb 19, UU 104. Play will be held Mon-Wed, Feb 22-24, in the Main Gym. Bring your racquet or one will be provided for you.

SWIM MEET Entry deadlines are Fri, Feb 19 in UU 104 for all individuals. Meets will be held Sat-Sun, Feb 27 and 28, in the Crandall Gym Pool.

WRIST Entry deadline is Fri, WRESTLING April 2, 12:00 Noon, UU 104. The event will be held on Saturday, April 3rd. Call the Intramurals Office for any questions.

JAZZ EXERCISE Every Thursday from 12:00 Noon, to 1:00 a class will be held in the Wrestling Room of the Main Gym. All are invited and no fees or registration is required.

TUG-OF-WAR CO-ED Enter your 6 person team by 12:00 Noon, Fri, Feb 12 in UU 104. Prelim tugs are at 11:00 am, Feb 16 on the lower fields. Final tugs will be Thurs, Feb 18, at 11:00.

CRIBBAGE CO-ED Entry deadline for this double elimination tournament is Jan 15, 12:00. Play will begin January 19. Address all questions to the Intramural Office.

VOLLEYBALL 2 PLAYER & Organizational meeting to be held Mon, Jan 18, at 7:00 pm, Rm 201 Sci Nth. A team rep must attend and an officials meeting will follow this meeting.

ONE PITCH An organizational meeting for team managers will be held Mon, Jan 25, 7:00 pm in Rm 201, Sci Nth. Officials meeting to follow. Play is different but fun.

If you or your team has any questions concerning this schedule or any other schedules that have been issued by the Intramurals Office, please contact the Activities Planning Center, UU 217, 546-2476 or the Intramurals Office, UU 104, 546-13667.
New ag dean wants to expand school's facilities

By STEPHANIE WINN

The new dean of the School of Agriculture and Natural Resources has begun to make long-range plans to expand his department's facilities and is also trying to increase the efficiency of available space.

Lark Carter came to Cal Poly as dean after serving a one-year appointment in Washington, D.C., last year as Assistant Director for Higher Education in Science and Administration.

Possible improvements for Cal Poly's Horse Unit, said Carter, are a first step toward a goal of having all departments take an in-depth look at what their future facility and equipment needs are.

The development of long-range plans to suggest possible locations for facilities and preliminary sketches and estimates on costs approved by the Campus Planning Committee would enable the school to better react to potential donors, Carter said.

Carter—impressed by the school's internship programs, enterprise projects and cooperative and educational experiences offered by Cal Poly—said he plans to continue emphasis on practical education. He said he wants students not only to understand principles and concepts but also be able to apply them either in the field or in a business.

Another concern, said Carter, is the enrollment of students to jobs of the future. Many of the jobs graduates will have 10 years from now don't exist at the present time, Carter said.

"We want graduates to have a well rounded education that gives them the basis for adapting to a rapidly changing world," said Carter.

Student faces charges

A charge of forgery is being made by the university against Anelise Cadenoso, 23, a senior electrical engineering major, Wayne Carnack, public safety officer.

Cadenoso allegedly stole two checks cashed on the campus on Dec. 20, 1980. He disappeared for a year and then was arrested on campus Dec. 8 by Carnack.

The case is pending in court.

In order to update what is being taught, Carter said he is in the process of appointing a Curriculum Review Committee with representatives from each department. Curriculum decisions made now would not affect graduates until about 1986.

"We want to create an environment in which students can develop themselves—not only for career, but for life enrichment in a holistic sense," Carter said.

One area the Curriculum Review Committee will look into, said Carter, is the significance computer technology has in the growing agricultural field and whether extensive courses in computer technology should be added to agricultural programs.

Another area, he said he feels is important is the crucial role of water resource management, especially, in California. Carter said he would like the committee to look at all curricula as it relates to irrigation practices, water delivery systems, water policy and management of water resources. Where appropriate, he hopes the committee will then adjust curriculum requirements in order to take into account what the faculty sees as important for graduates in the future.

The committee would also review minimum requirements, eliminate any duplications in the program and fill in any apparent omissions.

Carter said decisions made regarding changes in the curriculum will be controlled by faculty alone.

"The faculty at Cal Poly are a group of talented and extraordinary people," said Carter, "I trust their judgment on what would be most beneficial to graduates in the future."

Through the recruitment process, Carter said he plans to continue bringing in the best possible staff and expects to spend a lot of time screening possible candidates for open positions. Carter said he finds it exciting and unique to work with what he calls "the most motivated, dedicated and willing faculty" he has ever met.

He also said that Cal Poly students are one of the most select groups of bright and enthusiastic students in the country.

"Coming in new and fresh has presented me with quite a challenge," said Carter.

Carter's appointment to the Washington, D.C., post was made by Director of Science and Education of the USDAA, Hansen Bertrand. Before accepting the position in Washington, D.C., Carter was assistant dean, associate dean and assistant director of the agriculture experiment stations at Montana State University.

After being involved in Future Farmers of America and the 4-H Club, Carter entered Iowa State University and later obtained his master's degree and doctorate in agronomy.
ASl campus escort service due to start Sunday

By NANCY LEWIS

An ASI campus escort service will begin Sunday to help eliminate the risk of being harmed while alone on campus, according to Margaret Stanton, chair of the Student Safety Council Board.

The escort service will only be available on campus grounds, according to Larry Greene, chair of the ASI Ad Hoc Committee which proposed the service.

Escorts will walk students to and from their dorms, the Union, classrooms, or other University Union Union, and their cars, as added.

Nine of the 11 Cal Poly fraternities included in the Interfraternity Council have volunteered to use the escorts on a trial basis of one quarter.

The nine fraternities volunteering their time on a rotation basis are Alpha Epsilon, Alpha Gamma Eta, Alpha Phi Alpha, Alpha Upsilon Delta Sigma Phi, Delta Tau, Lambda Chi Alpha, Phi Kappa Psi, and Theta Chi.

A schedule of the fraternities participating will be posted in the ASI office, Public Safety Office, and the fraternities.

The service will run from sunset through Thursday from dusk until midnight, said Greene. It will run on a trial basis until the end of the quarter when it will be reviewed.

The service will provide five volunteers each night, said Greene.

Three volunteers will be at the information desk in the Kennedy Library from dusk until 11 p.m. and in the Reserve Room from 11 p.m. until midnight. Three volunteers will be available at the University Union Activities Planning Center from dusk until midnight.

Each fraternity member will be required to go through a security check-in with the campus police at the start of each shift to pick up equipment and to keep a log on who is escorting.

Greene said.

The escorts will be required to wear identification badges and orange windbreaker jackets and carry flashlights while escorting students, he added.

There will be one person manning a telephone in the APC to answer questions and take the locations of those students who need escorts. The phone number for the service will be 546-3811. Students are asked to call only when the service is operating. Any other calls can be made to Greene in the ASI office at 546-1291.

"The fraternities are guaranteed that they are safe," said Stanton, but escorts will still be required to attend a half-hour lecture put on by the Public Safety Office prior to the start of the service as a prevention check.

During the lecture potential escort will be given directions and tips to follow in certain situations they might be involved in.

The ASI will also be holding inter-bank lectures in the dorms explaining the how it works, said Stanton.

The Public Safety office is looking forward to the benefits of the service and according to Richart Oberg, director of Public Safety, "It's a great program, long as all the students stays there." "If people keep volunteering their time, it should be a success," he added.

County assists Poly on emergency plan

From page 1

really isn’t. This is what they will look at, train on.

The county is treating Cal Poly as a city in its own right and has leased the Public Safety Department a copy of the Morro Bay SOP as a guideline, Fonzi said.

County assistance... "We are assisting them... It’s more or less up to them to tell us how they would go about it," said the emergency planner, emphasizing that the Disaster Preparedness Plan’s operational plan for a nuclear accident “is not an operational section.”

"An administrative plan is not an SOP even if you sign it into it,” said Van Acker. “It (Poly’s SOP) will be an annex to our administrative plan.”

He added, “We have an agreement that the plan must be improved. Van Acker wants to maintain a plan at all times, even during the process of revision. Senate involved.

The plan has the specific instructions and the community campus was not involved in drafting it, according to Dr. Dale Stultif, a landscape architecture professor. His resolution for the Academic Senate meeting tonight asks President Baker not to implement the plan until a faculty/student task force has been established to review the plan and provide input.

“I think it needs shoring up, if you will,” said Stultif. “I'm not trying to paint anybody as the bad guy—I’m just saying more is needed. I think we have to have a plan, not something that's a disguised as a plan... and also I think that the people who will be most affected should have input.”

Please see page 11
Ski Club Meeting
The Cal Poly Ski Club will meet on Wednesday at 7:30 p.m. in the Science Building, Room 810. Members interested in becoming members are encouraged to attend.

Tangy Tidbits
For those of you planning to enjoy an afternoon ski trip to Chico Peak, Takies and Sun Valley will be available. If you are going on the Chico Peak trip, try to attend this meeting. Also, a ski film will be shown.

CD Club
Craig Ross, a security adviser at Cuesta College, will speak on Rape Preven-
tion at the Child Development Club meeting tonight at 7:30 in Agriculture Building, Room 214. Women are especially urged to attend this meeting dealing with a topic that has become a serious problem among Cal Poly.

PAC Meeting
The Cal Poly Political Action Club will begin meeting weekly on Tuesdays at 6 p.m. in the Business Building, Room 214.

Audio Engineers
The Audio Engineering Society will hold the first meeting of its quarter on Wednesday at 7:30 in Computer Science Building, Room 253. Power Amp cases are here! Sign-ups for recording studio, meeting of the quarter

ASIID Meeting
The Cal Poly chapter of the American Society of Interior Designers will be holding their first meeting of the quarter on Thursday at 7 p.m. in the Home Economics Building, Room 119. Plans for the quarter will be discussed and membership cards will be distributed. New members are welcome.

LA Carrie Club
All interested players who wish to play basketball are encouraged to attend the Cal Poly Late Night Club practice on Friday at 3 p.m., on the field behind the track. Experienced players are not necessary.

AHEA Meeting
The American Home Economics Association will hold its first meeting of the quarter Wednesday at 7 p.m. in the Home Economics and Math Building, Room 119. The meeting will include general business items and a panel presentation by faculty members on professional preparation within the CDHE department. All CD and HE students are encouraged to attend.

MECHA Meeting
The Chicano Commence-
ment Committee will hold its first organizational meeting at 6 p.m. in the E.O.P office.

Interfaith Meeting
The American Muslim Mission is sponsoring the First Annual Spiritual and Gospel Interfaith Meeting. The meeting will be held from 4 to 9 p.m. at the San Luis Obispo Veterans Building on Grand Avenue. The event is to bring all religious groups together to praise God and rejoice. Tickets are $5 and may be purchased at Boo Boo Records or at the door. Musical entertainment and guest speakers will be featured.

Scientific lecture planned Thursday:

The Cal Poly La Crosse Club will meet Tuesdays at 11 a.m. in Science North, Room 201 during Winter Quarter. An information table will also be set up in the union during Activity Hour.

HUG Workshop
The Human Understanding and Growth organization will present a workshop titled "Self, Others and Beyond" Jan. 22 through 24 at Ranchos El Chorro. The workshop is presented as a personal growth experience intended to assist participants in becoming more self-aware, self-responsible, more aware and effective in dealing with others. Designed around a small group format facilitated by a professional group leader. It also deals with trust, conflict, risk-taking and body image. The cost is $8.50 for students and $9.00 for non-students.

"The Role of Values in Scientific Inquiry" will be the title of a lecture to be given by Dan B. Jones on Thursday, Jan. 14, at Cal Poly. Scheduled as the opening program of the Winter Quarter segment of the university's 1981-82 Arts and Humanities Lecture Series, the presentation will begin at 11 a.m. in Room 200 of the Julian A.

McPhee University Union
Admission will be free and the public is invited.

Dr. Jones' remarks are expected to focus on a scientist's viewpoint of how basic and applied science influence the way scientific findings are implemented.

The Cal Poly Chemistry Department faculty since 1976, he is a graduate of University of Utah and Stanford University, where he earned his doctorate.

Before his move to San

...
Dexter Building now camouflaged by purple paint

BY JAN MUNRO
Staff Writer

It used to be that the first thing you saw when you walked into the old Dexter Library was brown—brown walls, brown floors, and brown bookshelves filled with brown books of knowledge. But now, the old library has been transformed into a modern, colorful space, with purple paint covering the walls and floors, giving it a fresh, vibrant appearance.

The transformation was part of a larger project to update the building, which has been closed for several months for renovations. The purple paint was chosen to give the space a new sense of energy and excitement, and it has certainly been a success, according to staff members.

The purple paint has been applied in several different shades, creating a striking contrast with the architectural features of the building. The result is a space that is both modern and inviting, with a focus on creativity and innovation.

The project has also included improvements to the lighting and HVAC systems, as well as the installation of new furniture and artwork. The goal is to create a space that is both functional and aesthetically pleasing, and the results so far have been impressive.

The new purple Dexter Building is expected to be fully operational by the end of the month, and staff members are already excited about the possibility of hosting events and classes in the new space. With its modern look and innovative design, the purple Dexter Building is sure to be a highlight of the campus for years to come.

Stiffer drunk driving laws reduce SLO arrests

BY SANDRA GARY
Staff Writer

For years, drunk driving has been a significant problem in San Luis Obispo County, with numerous accidents and fatalities attributed to impaired drivers. However, recent changes in drunk driving laws have helped to reduce the number of arrests for such offenses.

According to the San Luis Obispo County Sheriff's Office, the number of drunk driving arrests has dropped significantly over the past year, with a reduction of nearly 20% in the number of arrests made.

The reduction can be attributed to a number of factors, including increased enforcement of drunk driving laws and enhanced public awareness campaigns. The Sheriff's Office has also been proactive in identifying and targeting high-risk areas, increasing the number of patrols in those areas.

In addition, the county has implemented a new program that allows offenders to complete community service instead of spending time in jail. This has helped to reduce the burden on the criminal justice system and has also provided offenders with an opportunity to engage in meaningful work.

Despite these efforts, drunk driving remains a serious problem in San Luis Obispo County, and continued vigilance and enforcement are necessary to keep our roads safe. However, the reduction in arrests is a positive sign that we are making progress in addressing this issue.
Chargers fly home to huge welcoming

SAN DIEGO (AP) — Members of the San Diego Chargers, after getting a heroes' welcome at Jack Murphy Stadium on Monday to join in the celebration of the club's 27-7, bone-rattling win over Cincinnati in an AFC playoff game two wins from the Super Bowl, were greeted at their airport by fans who came up winners in a computer's decision.

Although fans said the Chargers' potent pass-rushing defense was a factor in the victory, Coryell commented: "I don't question anything the man does," defensive end John Woodcock said of the unusual number of interviews.

The Associated executive vice president of the American Football Conference said the committee includes two students, two teachers and four administrators.

The National Football League team announced that 12,000 Super Bowl tickets were available, and notices were to be mailed Monday to season ticket holders who came up winners in a computerized lottery. The team has slightly more than 40,000 season ticket holders.

Woodcock and his teammates agreed in post-game interviews, "It seems to me there is an existing committee," with an about 1,000 fans were on hand. Although Klein said, "We have no alibis as far as defense in the club's 27-7, bone-rattling win over Cincinnati a day earlier. The team was overmatched by the Bengals score two wins from the Super Bowl; last season was ranked 25th in the Pacific-10 Conference," said Southern California coach Jim Harrick.

Computer to choose fans

SAN FRANCISCO (AP) — The hopes of many San Francisco 49ers fans, those hoping to follow their team to the Super Bowl, depend on a computer's decision. The National Football League team announced that 12,000 Super Bowl tickets were available, and notices were to be mailed Monday to season ticket holders who came up winners in a computerized lottery. The team has slightly more than 40,000 season ticket holders.

The challenge was sponsored by Toyota Motor Sales andCustom Roser's Flying U Rodeo Company. Trucks were awarded to the top individual in the six men's rodeo events, and women's barrel racing. Rodea, narrowly edged out Dean Selvey, a member of the Cal Poly team which finished second nationally in the collegiate championship last June.

Capers score two wins

Cal Poly began its defense of its 1981 College World Series championship over the weekend with a 3-2 victory over UC Riverside and Cal Poly Pomona. Despite showing just 54.9 percent of the game's 96 pitches, the Mustangs overcame a 2-1 halftime deficit to defeat Riverside, 2-0. The Mustangs defense was the name of the game for the Mustangs against UC Riverside — 11 second half points and forcing 29 turnovers. While the Mustang defense sparkled their offense struggled against a much better UC Riverside defense. In their lowest scoring game of the season, the Mustangs led all scorers with 18 points. In fact, Lucas was the only player in the game with more than one double figures. Low-scoring point guard Keith Wheeler was the second leading scorer for the Mustangs with five points.

Woodcock and his teammates agreed in post-game interviews, "This game cemented...just don't think a game like this can happen again," said Coryell. "I would have preferred to have played in warmer weather, but it was football and football is played in all conditions," Coryell commented. "I don't think a game played under those conditions is a true test." The team with the best record isn't allowed to host a game, after getting a heroes' welcome at Jack Murphy Stadium from San Diego's Kitchen or at a table work. Call the San Diego Home Shopping Network, 543-2212. After 6 PM call 529-8211 After 5 PM.

Charger fans waited as long as 6 1/2 hours to greet the team in the pouring rain.

Even the mayor, Pete Wilson, was on hand at midnight. "They're champions—and will prove it next year," he said.

Poly rodeo coach Ralph Rianda

Rodeo coach corrals pickup

Rodeo at the stadium.

"I don't question anjrthing the man does," defensive end John Woodcock said of the unusual number of interviews.

Although Klein said, "We have no alibis as far as defense in the club's 27-7, bone-rattling win over Cincinnati a day earlier. The team was overmatched by the Bengals score two wins from the Super Bowl; last season was ranked 25th in the Pacific-10 Conference," said Southern California coach Jim Harrick.

Computer to choose fans

SAN FRANCISCO (AP) — The hopes of many San Francisco 49ers fans, those hoping to follow their team to the Super Bowl, depend on a computer's decision. The National Football League team announced that 12,000 Super Bowl tickets were available, and notices were to be mailed Monday to season ticket holders who came up winners in a computerized lottery. The team has slightly more than 40,000 season ticket holders.

The challenge was sponsored by Toyota Motor Sales andCustom Roser's Flying U Rodeo Company. Trucks were awarded to the top individual in the six men's rodeo events, and women's barrel racing. Rodea, narrowly edged out Dean Selvey, a member of the Cal Poly team which finished second nationally in the collegiate championship last June.

Rianda, 24, a native of Hollister, was a member of Cal Poly's 1980 team and won the West Coast regional college rodeo swimming championship in both 1980 and 1981. Following completion of his collegiate career, Rianda, who was graduated from Cal Poly with an agricultural management degree in 1980, was appointed last September to become Cal Poly's full time rodeo coach.

Southern Cal's 15-point victory over its crosstown rival was the first time the Bruins have won by more than two against a Top 10 opponent.

A sudden coaching change last spring has worked wonders for the Bruins. The BC-10 sanctions announced last month have been listed by some as reasons for the UCLA slump.

But Larry Farmer, who was appointed the new coach with Larry Brown resigning to become the coach of the National Basketball Association's New Jersey Nets last March, makes no excuses for his club's losing streak.

"I’ll never allow myself to blame the sanctions on the way we’re performing."
**Opinion**

**Small request**

If you are like most Cal Poly students, you will sit through a 50-minute lecture today. And yet by the time your professor covers science, mathematics, English or whatever, a tragedy will have occurred somewhere in the United States: someone will be killed by a handgun.

There are now over 55 million handguns in circulation in the United States, a statistic that caused Sen. Edward Kennedy to lament about the "endless guerrilla war inside this country waged with a growing arsenal of handguns in the wrong hands."

When one looks at the human devastation and violence that has resulted from the proliferation of handguns in the United States, one wonders why Americans allow the suffering to continue. One searches in vain for a rational argument against handgun control.

Handgun control is primarily a human safety measure, as opposed to a method of crime control. Research into handgun fatalities has proved time after time that the vast majority of the fatalities occur in the households too close to each other. The easily accessible handgun finds its way into domestic quarrels and accidental deaths.

Let’s face it: handguns are made to kill people. That is their sole purpose.

Although polls have consistently shown that at least two out of every three Americans favor some form of handgun control, this mandate has not made effective headway into the legislative arena—that is, until last month.

During the final days of 1983, U.S. District Judge Bernard Decker upheld a law requiring residents of Morton Grove, Ill., to turn in their handguns. Indeed, the Chicago suburb now has the toughest handgun control law in the nation. Residents who possess handguns will face the possibility of a $500 fine and a six-month jail term.

Judge Decker based his decision on an 1886 Supreme Court case that held Senate amendments against the ban on arms apply only to Congressional legislation. In response, predictably, National Rifle Association officials have vowed to take the issue all the way to the Supreme Court. We hope they do. And we hope they lose.

We hope the precedent set forth in the Illinois case will be taken to the state and national levels. The Mustang Daily Editorial Board favors the banning of all handguns for purposes other than law enforcement and licensed gun clubs. We also believe that those handguns already in circulation should be recalled. (Perhaps the gun owners could turn them in at a police office—in the same manner as 18-year-olds are required to register for the draft.)

In the face of the more than 10,000 handgun-related deaths that occur each year in the United States, we don’t think this is too much to ask.

**Letters**

**Editor:**

May I ask in response to the opinion, “Pulling Responses,” which appeared on Friday, Jan. 8, who is the real aggressor, and who is it that should be reproached for their actions of provocation? Is it the Soviet Union who is trying to suppress freedom by promoting fear, or is it the United States who is trying to promote worldwide sanctions against the U.S.S.R. in supporting the cause of Solidarity?

We should not focus our attention on our “questionable tactics,” but our anger should be pointed towards the reality that the U.S.S.R. continues to subdue and subjugate its territorial surroundings. Can’t the writer of that opinion open up his eyes and see for what it is? His tangent is on criticism of the United States and its policy toward the Polish crises. He blames Reagan for establishing futile attempts to “help Solidarity re-establish itself as a political force in Poland” and yet he does not provide any solution.

What does his statement imply? It implies that we should intervene in some way so as to allow Solidarity its freedom. And how can this be accomplished? The only way we could effectively guarantee Solidarity’s freedom from the subversive actions of communism would be military action on our own part. And yet the author denounces the “brutal military regimes” which we support. I am just pointing out how these doublespeak.

Furthermore leaders of those countries that we support are not carrying out their policies for fear that they will lose their skins by the “capitalistic” United States, as in the case with the Polish Communist Party. All Freedom does not put fear into a person’s mind. It believes that person from fear.

I can guarantee there are many people in the free world including South Korea, Turkey, the Philippines, El Salvador, and Argentina who are thankful to be able to live a free life, unlike many of us who take it for granted. We must beware of enemies, both internationally and within this country. But it is just as important to defend America against the enemies within our own borders. These enemies are those who sow seeds of distrust among our people, who try to stir up hatred towards our government, who attempt to ruin lives of others by lies and smearers.

I’ve had enough of reading things by neurotic, psychotic, thick-headed JOURNALISTS who try to destroy our cultural heritage. A modified quote of John Lennon, “The enemies within our own borders. Beware of enemies both internationally and within this country. But it is just as important to defend America against the enemies within our own borders. These enemies are those who sow seeds of distrust among our people, who try to stir up hatred towards our government, who attempt to ruin lives of others by lies and smearers."

As one who is proud of our country and that for which it stands, I sign this letter.

Caleb H.

**Thick-headed journalists**

If any Christian has the courage and integrity to debate or to sponsor a debate, call Mike at 644-6603, or evasive and untrustworthy. Kurt Umlinger, Ray Wilson, Lynne Demody said they would help find a debate opponent.

No further word, Dan Fleming enthusiastically accepted a debate until I was ready to reserve Chumash Auditorium; then he flatly said, “No.” I sent a letter to twenty-two campus Christian organizations in October. Only one responded, “No.”

Christianity is a mind-control system which handicaps emotional and mental growth. The Christian is forced to endure and is unable to defend what he believes. Unhappy, unhappy, unhappy, He is devoid of courage and honor. His purpose is to deprive others of freedom, or to maintain the power and status of the church and of the beneft of debate. I understand why they will not debate me. They would fail utterly and look ridiculous.

Dr. Wayne Pierson, campus Baptist minister to a fair debate. All made excuses. Student Christians were evasive and untrustworthy. Kurt Umlinger, Ray Wilson, Lynne Demody said they would help find a debate opponent. No further word. Dan Fleming enthusiastically accepted a debate until I was ready to reserve Chumash Auditorium; then he flatly said, “No.” I sent a letter to twenty-two campus Christian organizations in October. Only one responded, “No.”
