Training for nuclear emergency workers debated

BY MAURA THURMAN

Training for the 1,173 county employees who would be on call in case of a nuclear emergency will go on "basically forever," the county's Emergency Services Coordinator testified Monday at the Diablo Canyon full-power license hearing.

Tim Ness also said that the Board of Supervisors has made no resolution to fund a training program.

The supervisors, however, have "indicated their interest" in supporting a training program, Ness said, by staffing and upgrading the Office of Emergency Services.

Before the plan can be called "effective," Ness said, it must be "tackled and updated" from its implementation.

Training for Cal Poly is among items designated as top priority by the Office of Emergency Services. The plan has been in effect since the California Department of Transportation began preparing emergency routes. This estimate contradicted an earlier six-hour estimate made by two PG & E traffic consultants.

In addition, the engineers characterized traffic congestion in the area as "nonexistent as far as I can see.

Ness testified that a top priority of the board is to upgrade the Office of Emergency Services.

"We are starting with the staff," he said, "and then we'll work our way up."

Ness said plans for most cities, school districts and Ferraris within the emergency zones are in the making.

Developments of a standard operating procedure for Cal Poly is among items designated as top priorities by the Office of Emergency Services. The plan has been in effect since the California Department of Transportation began preparing emergency routes. This estimate contradicted an earlier six-hour estimate made by two PG & E traffic consultants.

The purpose of the Affirmative Action program is misunderstood by many people, according to the program's coordinator.

"It is not a program to get just minorities and women hired. It is a program to make sure that everyone gets equal treatment," said Smiley Wilkins, affirmative action coordinator.

"[W]e establish goals, not quotas," he said. "We do our best to see that a woman or a minority that is qualified for an available job will be screened for it.

Wilkins said the program facilitates recruiting of minorities to apply for available jobs. Advertisements for the jobs are sent to those on a specialized recruitment list. The list consists of colleges and universities where a larger number of minorities exist.

When a minority or a woman does apply for a job at Cal Poly, the same criteria are used in determining her qualifications as is used for a non-minority. The same applications are read and the same tests are given, Wilkins emphasized.

Applicant guidance

"We do give guidance on the type of questions asked on application, so they won't be discriminating. That's about all," said Wilkins.

"I've seen a difference since the program has been in, but not the success I'd like to see," said Wilkins. "We want to improve the total hiring for everyone, not just women and minorities. It will help all institutions to get a better qualified staff.

"We deal with education, and awareness is the key," he said.

Armando Pezo-Silva, director of the Educational Opportunity Program, Student Affirmative Action, and Disabled Student Services, agrees with Wilkins.

The idea of affirmative action is much broader than bringing more minorities to Cal Poly, said Pezo-Silva. It is to educate people how to deal with other people, he said.

I think that we have to start in the classroom environment."

Research encouragement

Part of this encouragement includes plans for a "computer productivity center," which would provide hands-on experience for many schools which now can only teach through texts, he said.

He has asked for $3 million from the private sector, but only has "modest investments" so far, including an IBM computer contributed by Standard Oil of California and a promise from IBM to help "upgrade" their equipment now on campus.

"It is in the embryonic stage now," he said.

In a question and answer period following Baker's address, Chris Hartley, academic affairs assistant and Mike Carr, chair of the Student Senate, both questioned the flaws in the campus disaster plan. Hartley objected to the lack of student representation on the committee formulating the plan, citing the "slow response" to the campus fire as an example of that lack.

President Baker agreed that student thoughts should be represented in the plan, but pointed out that the subcommittee of the Public Safety Committee only formulated the plan and is not a "determining body." The committee started updating the disaster plan three years ago, he said, and is only a working committee.

Possible negligence

Carr questioned whether the present staff of an SOP (Standard Operating Procedure) coordinated with the county effort is leaving the campus open to charges of negligence in the event of a disaster.

Baker said that although the new plan has not been approved, and admitted "a number of years to the old plan," "we need to take a stance, not to be accused of negligence."

Mandatory academic disqualifications are going to be enforced more closely than in the past, due to Cal Poly's impacted enrollment and enrollment cuts scheduled for this summer and fall, said Warren Baker in his annual Presidential Address to the Student Senate Wednesday night.

The shortage of faculty—75 more are needed for present enrollment, he said—and the crunch in enrollment, make academic disqualification more important as a way of easing the enrollment pressure. He added that it was not fair to carry students not achieving academic goals while so many are waiting to get in.

One senator questioned his intent, expressed last year, to "emphasize research at Cal Poly. To make Poly into a research institution was never his intention. Baker said only to encourage professional development of faculty to keep programs up to date.

He said that years ago, universities he has been in, "the state of the art," but since, that role has switched to industry. His encouragement of research, he said, is aimed at providing a "high quality undergraduate experience," so that Poly graduates will not be "harassed" when they enter industry.

Radioactive release at Ontario

ROCHESTER, N.Y.(AP)—Bursts of radioactive steam were released into the atmosphere Monday for a total of three minutes when a generator tube ruptured at the Ginna nuclear power plant in Ontario, N.Y. officials said. Some workers were evacuated and the reactor was shut down.

A "site emergency," the second highest nuclear emergency classification, was declared at the plant, about one-third of Rochester near the shore of Lake Ontario.

There is "no danger to the public at this time," said a utility spokesman.

The plant "appears to be fairly stable," said Gary Sanborn, spokesman for the Nuclear Regulatory Commission. The releases occurred over one hour, said Jack Duklethberger, director of the Bureau of Nuclear Operations for the state energy office.

Earlier, the National Weather Service said radiation was released into the atmosphere from 9:09 a.m. to 10:42 a.m. and attributed that information to the state Office of Disaster Preparedness. The wind was blowing from the northeast at 14 mph, the service said.

Soldier killed in desert accident

FORT IRWIN, Calif. (AP)—A training accident left one soldier dead and three others wounded from gun, fire and a fifth man injured climbing out of an armored personnel vehicle at the National Training Center, the Army said Monday.

The accident, at about 7 p.m. Sunday, occurred during a live-fire exercise at the sprawling desert a mile northeast of Barstow, Army officials said.

"Preliminary investigation indicates the fatality was caused by small arms fire," said Bob Hughes, a civilian spokesman in the base.

Three of the injured soldiers received light wounds from small arms bullet fragments and were admitted to the Walter Reed Community Hospital at Fort Irwin, where their condition was listed as good.

"One soldier injured in his knee while leaving an armored personnel vehicle during the incident and is in good condition," Hughes said, adding that an investigation was under way to determine the cause of the accident.

The army could provide no further details of how the accident took place, he said.

The dead soldier was identified as Pvt. Robert G. Solomiak, 20, of Salem, Ore. He was an infantryman assigned to Company B, 1st Battalion, 18th Infantry, 1st Infantry Division Mechanized, Fort Riley, Kan., Hughes said.

Senator Wanted

The School of Communication Arts and Humanities is seeking a new A.S.I. senator. Now is your opportunity to come forward and get involved in your school! Anyone interested in filling this position please contact Laurie Michaud at 544-6445.

Senator Opening

There is a position open for an A.S.I. senator in the School of Engineering and Technology. Anyone interested to leave their name in the Activities Planning Center in Box #35 of the Administration Building.

Outreach Meeting

There will be an Outreach meeting tonight at 8 p.m. in Science Room E-47. Agenda includes discussion of Sweetheart dance. Everyone welcome!

Racquetball Club

The Cal Poly Racquetball Club will meet tonight in the Learning Assistance Center in Chace Hall at 6 p.m. Topics to be discussed include the intracub tourney and the Campus Sports Society tourney. Two more tourneys will be held.

Gymnastics Club

The Cal Poly Gymnastics Club invites all of those interested to attend the meeting tonight at 6 p.m. in Crandall Gym.

SCE Meeting

The Society of Civil Engineers will hold its general meeting Wednesday at 7:30 p.m. in Science, Room B-5. Louis Valenzuela from American Concrete Institute will speak on civil engineering in concrete industry.

Clio Awards

The American Marketing Association is sponsoring a film of the Chico F dem dite award Friday at 11 a.m. in Architecture, Room 225. Visitors are welcome. Clio Awards won't Enmity or Oscars, but the best collaboration of commercial creative. Join us!

CASAM Film

The Central American and Caribbean Association will present the film "El Salvador: Another Viet­nam." The film will be shown Wednesday at 7:30 p.m. in Pacific Hall.

Fencing Club

The fencing club will hold its first meeting tonight from 7 to 9 p.m. in Crandall Gym.

MOS Division

On-Campus Interviews Tuesday, February 2.

We're looking for people gaining degrees in Electronic Engineering, Chemical Engineering, Physics and Industrial Engineering. See your Placement Office for more details. There will be four representatives from the following companies:

A Schultenberger Company

The Central American and Caribbean Association will present the film "El Salvador: Another Viet­nam." The film will be shown Wednesday at 7:30 p.m. in Pacific Hall.

Fencing Club

The fencing club will hold its first meeting tonight from 7 to 9 p.m. in Crandall Gym. Come practice your knowledge of fencing. Pro­fessional coaches will train you to be an effective fencer.

Career Day

Kappa Pi Epilson Math Honor Society is sponsoring a Mathematical Sciences Career Day on Thursday at 11 a.m. in the Dexter Building, Room 106. Representatives from ten companies will be there to discuss the opportunities for Math, Com­puter Science, and Engineering Majors.

Scuba Club

The Cal Poly Scuba Club will hold an organizational meeting including the elec­tion of officers on Thursday at 11 a.m. in Fischer Science, Room 289.

Jill Pala

Pala—one of the many representatives of the Student Community Services—is leaving a general meeting on Thursday at 7 p.m. in the University Union, Room 218. The meeting is very important!
Assassin: game allows students to imitate killers

By GAIL PELLERIN
Staff Writer

"Killing" your opponent is the object of the college campus game "Assassin," said Howard Miller, coordinator of the Sierra Madre version of "Assassin," said Miller, involves receiving a contract describing the regulations students must follow in order to wipe out their peers. First, the "Killers" must find their victims alone or with non-tower residents. Second, the "Killers" approach their victims and stick them with stickers and say "you're dead." At this point the victims must hand over their contracts to another "Killer." The game continues until the "Assassin Champion" has all the contracts, he added.

Miller said that there are safety zones, such as the bathroom and library, and safety times, before 7 a.m. and after 10 p.m., when students cannot be "assassinated.

Rules vary

On other campuses the rules vary, and students are allowed to "kill" their opponents as creatively as possible with fake weapons, said Dick Brug, chief of California campuses, said Dennis Hawk, A S I president. "It sounds sadist;" Hawk said. "I worry about the administration if worried, as "Assassin" after he reportedly pointed a toy gun at suspect, to freeze, officials said.

Using toy firearms in the carrying out

faire weapons, said Dick Brug, chief of made a comment about a "fake weapon," he added.

You must first have a mission in life, it makes you look like a purposeful person to a skilled interviewer, he said. Hawk also added that designing your own strategy for success and learning to take responsibility for what you determine your success to be, are other things you should consider when looking for a job.

Representatives from various agriculture and Miller said that be living in Honduras. He said by the Peace Corps have "that was hard," he said. For instance, he learned about Honduras and go home.' Other times he stuck to the Peace Corps have a slow pace when compared to events in the United States. Americans rush too much, he said. Now Miller has a more casual falling towards things.

"I felt the two years was an experience " opened his eyes to other countries and general, he added. He also said he has a feeling of accomplishment. He helped people dig wells for their farms so they would have water. He also said he has a feel­

He said the people of Honduras with the different organizations. He added that he faced w as dealing with the different organiza­

He said that he was living my experience in a few different countries. I worked in a different country, lived in different country, and was also a tourist in that country." Some of the materialistic goals he had before joining the Peace Corps, have vanished, he said, "I used to want a fast car, a fancy house as well as many other things. Now I don't need them. I learned to get by with just what I need." He said his experience was good and bad. At times he wanted to pack up and go home. Other times he wanted to stay forever. The biggest problem that he faced was dealing with the different organizations. He had to learn how to play their games and "that was hard," he said. For instance, he learned how to overcome the problem of using the copy machine by drinking a few beers with the people who worked in the copy room. "It's difficult to describe my experience in few sentences. There are so many different aspects. I worked in a different country, lived in different country, and was also a tourist in that country."

Library provides senior project aids

BY LORI MARBELL

Since senior projects are mandatory at Cal Poly, the librarians at the Robert E. Kennedy Library are giving students an opportunity to get extra help in using the facility.

Senior project clinicians, organized by student and placement, will meet for 50-minute sessions in Room 202 of the library.

There will be a library specialist in each field to conduct the sessions and to start students out on the right foot, according to Eileen Pritchard, reference librarian and head of the program.

A free checklist of library sources will be handed out to all who attend and will "focus on unique types of sources," said Pritchard.

Sessions to be discussed include the subject card catalog, the logic of call numbers, search strategy, indexes and abstracts, searching the literature by computer, government documents and guides to further sources in the students field.

Open to senior project students and anyone who finds the library confusing and has a term paper coming up, the times and dates of these sessions are listed below:

USC arch dean to lecture here

The dean of the University of Southern California's School of Architecture will present a lecture titled "Essence Seeking" tonight at 5 p.m. in Room 110 of the Architecture building.

Robert S. Harris will give his presentation as part of the Guest Lecture Series sponsored by the Architecture Department. The lecture is free and open to the public.

Harris is both an award-winning architect and an architectural educator. Before assuming his present duties at USC, he was dean of the School of Architecture and Applied Arts at the University of Oregon.

Last year, the board created committees such as the Building Improvement and Expansion Committee, the Budget, Policy, Publicity/Special Programs, and the Space Allocation and Review Committees.

Crawford appeared before the board Thursday to address board members regarding his resignation.

In his letter of resignation, Crawford stated that the Board of Governors should dissolve itself. The board was created only as a "transitional vehicle" on decisions made by the administration, he said.

Crawford contends that school and personal activities do not allow him enough time to participate on the board.

However, "I just feel that the time I put to the board, does not procure anything worthwhile," said Crawford.

"I don't feel that it is in the power or the purpose of the board to make the changes which I feel should be made," stated Crawford.

"But with federal funds, up, he recognized that it is in the minority to relocate to a "fairly expensive cost of living." He said he is also looking into the possibility of starting a program for minorities should have an impact.

Baker addresses Senate

From page 1

CASAS questioned

Baker addresses Senate

Senator Randy Boyne has complained that there had been "no visible support" from the administration in the first two years of affirmative action at Cal Poly. Baker disagreed, but allowed that the program had problems. In his filling with the Academic Affairs office, CASA's director was appointed to alleviate these problems, he said, and Poly's outreach programs for minorities should have an impact.

But with federal funds, up, he recognized that it is in the minority to relocate to a "fairly expensive cost of living." He said he is also looking into the possibility of starting a program for minorities should have an impact.

STUDENT RELATIONS BOARD

The Student Relations Board, formed a year ago, is a service agency composed of four committees dedicated to assist ASI and the community. President Margaret Stanton coordinates the committees under the Board, and ensures independent operation of the committees, while attempting to curtail duplication of effort. The committees are Campus Media, Polling & Briefing, Marketing and the ASI Newsletter. Published every two weeks in the Mustang Daily as "ASI Times."

Stanton also operates as a liaison among the ASI Executive Staff, the Student Senate and the Board. In January, the Board and Senate apprised of each body's activities.

The liaison aspect of her chairing the Board is in addition to her administrative responsibilities for scheduling meetings about securing facilities, attending executive staff meetings, and being responsible for the SSB's bylaw. It's almost a full-time job, more than 25 hours per week, and the spends it by distributing informational materials about SSB and the ASI, speaking to student organizations, and managing the four committees.

More than a public relations arm of the ASI, the Student Relations Board is trying to steadily inform the students at Cal Poly about the function of student government and its allied 260-plus student groups.

The Board is always looking for new members (experience not necessary), and interested people are requested to see Margaret in the ASI Offices, or leave a note for her for further information about the Board and its activities.

Margaret Stanton, Students Relations Board Chair

ACADEMIC POLLS JAN. 30

Who has not felt the frustration of being low on the registration priority list, not receiving any classes and then not being able to add the classes you need because of the many different ways in which teachers accept students into their classes? Do you ever wonder how many students have been waiting for exams that have to be taken the week before finals?

The ASI Student Relations Polling & Briefing Committee will be conducting a poll concerning these issues on January 30th of this year. The purpose is to find out how students really feel about CAR, class add procedures, and exam schedules.

The students will be asked what they think about the current system, or to be more exact, the lack of an established system. As it now stands, instructors add students to their classes by whatever criteria they choose. The poll will offer several alternative solutions to these problems.

The remainder of the poll will concern "Dead Week." Exams are often scheduled by students really feel about CAR, class add procedures, and exam schedules.

The Academic Issues Poll will be used to determine general awareness and perception of several academic issues of significance to students. The results will be considered by the Senate for both future reference and possible future action.

UNITED

STUDENT RELATIONS BOARD — COMMITTEES & FUNCTIONS

The Student Relations Board (SRB) is an ASI organization formed for the purpose of informing the student body of Student Government activities. The SRB consists of three committees: Polling and Briefing, Campus Media, and Marketing. The Polling and Briefing Committee obtains information directly from the students for the ASI use. The Campus Media Committee uses the Mustang Daily and KCPR to report on all ASI activities. The Marketing Committee will utilize posters, pamphlets, and packets to further emphasize ASI awareness and education. For information on joining any of these committees please contact: Catherine Fraser, Chief Editor, Campus Media (546-3340); Mike Isera, Polling Coordinator (544-7139); or Margaret Stanton, Student Relations Board Chair (543-2862).

ELECTION DATES SET

The election dates for the 1982 academic year have been set for May 5th and 6th. Active campaigning will begin the 26th of April which is the Monday following Poly midterm. Rurvoffs will be held May 13th, the week following the election.

The first area students will be questioned about concern for the priority system for CAR and the scheduling of classes by whatever criteria they choose. The poll will offer several alternative solutions to these problems.

So what's the big deal, right? The big deal, says Hartley, is that "students at Cal Poly pay more for their class schedules than students at any other Cal State campus," said Christopher Hartley, ASI Academic Affairs Assistant. Hartley cited a number of reasons for this. Approximately 4800 completion survey copies are distributed each year to administrators, departments, and various other areas on campus; another 10,500 are mailed each year free to all new students admitted to the University. Expensive paper and production costs plus the lack of revenue-generating advertising also play a part in the high costs.

What's the big deal, right? The big deal, says Hartley, is that "students at Cal Poly are paying for this unnecessary luxury." Some may not consider this important — and the cost per student isn't that high — but collectively students are spending about $10,000 a year on class schedules. According to Hartley, "We think that's too much. There is no need for the schedules to cost what they do. There are a lot better ways to spend $10,000."
Poly cager drop two on the road

Cal Poly’s plan for a second straight California College Athletic Association conference basketball title suffered a serious blow this weekend as the Mustangs dropped two road games to conference foes Chapman College and Cal State Dominguez Hills.

Chapman’s Bruins’ Panthers came into their game with Cal Poly on Friday night in overconfidence in the conference (0-6), but the Panthers’ quick and aggressive style of play limited the Mustangs to just 13 points in the first half on their way to a 64-44 upset.

The Panthers, who don’t have a player over 6-4 in the starting line up, also out hustled Poly on the boards, out rebounding Poly 32-14.

Mustang coach Bruce Weather changed his starting lineup for the first time this season in the hopes of giving the team a more balanced scoring punch. Six-two sophomores, Mike Sales, placed Keith Wheeler at point guard while 6-4 Mike Burris filled in for Tom Perkins at center.

The switch had little effect on either the Mustangs or Panthers as Cal Poly’s power forward Kevin Lucas led all scorers with 17 points—the only Mustang in double figures—while four Panthers scored 10 points or more.

Please see page 7

Swim team upsets Pepperdine

Cal Poly pulled off its biggest win of the season in men’s swimming Saturday with 68-60 upset over Division I power Pepperdine in Poly’s outdoor pool.

The meet came down to the final relay, the 400-yard freestyle, in which the Mustang team of Loren Gerhardt, Mike Petreasen, Mike Radart and Kirk Simon won with a time of 3:14.96.

“This is the biggest win we’ve had in two years probably,” Mustang coach Mark Johnson said. “We swam over our heads to win this one.”

Simon, only a freshman, broke a five-year-old Cal Poly record on his way to win in the 50-meter freestyle with a time of 21.9 seconds. The time qualified him for the Division II national meet in March.

The Mustangs ranked No. 8 in Division II by Swimming World Magazine, opened their season last Friday with a meet at San Francisco State. Poly won the meet, beating San Francisco and Southern Oregon.

The following day Poly defeated UC Davis. The Mustangs now sport a 4-0 record with their next competition coming at the UC Irvine Relays on Feb. 6. After that Poly has only three meets to prepare for the national championships.

Needless to say, Johnson is optimistic at this point. “They’re going to be awesome at the end of the season,” he said of his swimmers.

HI-TECH SKIS,
HI-PERFORMANCE DEALER.

No matter how fine a ski may be, it’s important to shop for your ski store every last bit as carefully as you shop for the ski itself. That’s because even the finest skis won’t perform to their fullest capacity unless they’re properly fitted, and unless they’ve been well chosen to match the ski to your own unique abilities, strength and type.

At Mountain Air Sports, you’ll find the ski department manned by skiers who love the sport and who love helping people get the most out of it. The most fun. The most value for your equipment dollar. We’re proud to have been chosen as an authorized Rossignol dealer, it’s an honor that not everybody north. And we’re proud to have it. At Mountain Air Sports, we love skiing, we’re free. Because we don’t just want to sell you some ski. We want to make you a long-term customer.

The Cal Poly women's basketball team had its ups and downs this weekend as the team defeated Cal State Dominguez Hills 84-68 Thursday night but then fell to UC Riverside 71-62 Saturday night.

Head coach Marilyn McNeil said she felt that the Dominguez Hills game was not much of a contest. "The Mustangs were up by 10, 41-31 at halftime and never looked back," Leading Poly in scoring were Laura Bunting with 31 points and Sherri Rose with 18. Carolyn Crandall, Chris Roets and Terre MacDonald all added 12 points.

Bunting was the leading rebounder with 13.

The flat tires that accompanied the team's trip to Riverside should have been an indicator of what was yet to come.

While only connecting on 27 of 83 field-goal attempts, the Mustangs came up with a 32 percent shooting average.

"We weren't mentally ready for the Riverside game," said assistant coach Daris Wilson.

Bunting was the Mustangs high scorer with 13 points while Rose grabbed 13 rebounds.

The team now sports a 16-7 overall record and a 3-1 California Collegiate Athletic Association Conference record. The team will be hosting Biola University Thursday night in a non-conference game scheduled to begin at 7:30 p.m. in the main gym.

For Chapman, Norval Dickson scored 10 points. Butler, 11; Tran Sawyer, 12; and Vance Spellman, 11.

The Mustangs' nation leading defense was run over on Saturday night by the fast break offense of Dominguez Hills in Poly's biggest loss of the season, 70-43.

The Toros shot a scintillating 69.3 percent from the floor in the first half while the Mustangs put up only 26.4 percent of their first half shots through the hoop.

In the second half the Toros broke loose for 42 points against the Mustangs in their wake.

Lucas poured in 14 points for 10 for the game high, followed by the Toros' John Shaw with 13.

Commenting on the balance of the conference, coach Wheeler said in the preseason that a team which won all of its home games could end up with the title. Now all-3 in the conference race, Wheeler has been concerned with Mustangs' dismal performances of late.

Of some consolation to Cal Poly, former conference leader Cal State Bakersfield also dropped both of its games to Chapman and Dominguez Hills over the weekend. Cal State Northridge moved into first place in the CCAA race with wins over UC Riverside and Cal Poly Parent.

The Mustang women's basketball team had its ups and downs this weekend as the team defeated Cal State Dominguez Hills 84-68 Thursday night but then fell to UC River­side 71-62 Saturday night.

Head coach Marilyn McNeil said she felt that the Dominguez Hills game was not much of a contest.

"The Mustangs were up by 10, 41-31 at halftime and never looked back," Leading Poly in scoring were Laura Bunting with 31 points and Sherri Rose with 18. Carolyn Crandall, Chris Roets and Terre MacDonald all added 12 points.

Bunting was the leading rebounder with 13.

The flat tires that accompanied the team's trip to Riverside should have been an indicator of what was yet to come.

While only connecting on 27 of 83 field-goal attempts, the Mustangs came up with a 32 percent shooting average.

"We weren't mentally ready for the Riverside game," said assistant coach Daris Wilson.

Bunting was the Mustangs high scorer with 13 points while Rose grabbed 13 rebounds.

The team now sports a 16-7 overall record and a 3-1 California Collegiate Athletic Association Conference record. The team will be hosting Biola University Thursday night in a non-conference game scheduled to begin at 7:30 p.m. in the main gym.
Parking perils

In recent years, one of the first—and most irritating—problems students face when coming to Cal Poly is the difficulty in finding a parking space. It means that the price of parking stickers increases, so do the frustrations of those who drive aimlessly through parked campus parking lots in search of that one empty space.

Indeed, this quarter the situation appears to be worse than ever before. While there are only 3,993 student parking spaces on campus, there are about 8,000 student parking stickers in circulation. Add to this the larger number of classes that meet between 9 a.m. and 1 p.m. and the bad weather, and you get a rather sobering realization: the $15 parking sticker you bought at the beginning of the quarter is useless.

The primary cause of the parking problem stems from the same reason Poly has such an impacted academic program: the parking lots. The university has resulted in an increased enrollment. People are simply clamping to get in—and they want to bring their cars with them.

Solutions to the problem now being discussed may take years to implement. Cal Poly’s master plan recently was revised to include the option of building second levels in the H-1 and G-1 parking lots; however, it will take years before these plans can even be seriously considered. Moreover, given the budget cuts the California State University system faces in the years ahead, funds earmarked to ease parking problems may have to be diverted to more academic-related areas.

Douglas Gerard, executive dean of facilities planning, told Mustang Daily that during the next few years the parking problems may decrease as the university accepts fewer students. But again, this “solution” may be years away.

We believe there is another way.

A major reason there is such a squeeze in the popular H-1 and G-1 parking lots is because during Fall Quarter the zone system of parking was abolished because it was unenforceable. As a result, we have a “free market” type system that allows students to park in virtually any of the student lots on campus. And of course there is more competition for spaces in the more popular parking lots.

What is needed is an incentive for students to park in the outlying lots that usually have empty spaces, such as the lot on the corner of Grand Avenue and Slack Street. And the obvious incentive would be for the administration to charge outlying lots that usually have empty spaces, such as the lot on the corner of Grand Avenue and Slack Street. And the obvious incentive would be for the administration to charge outlying lots that usually have empty spaces, such as the lot on the corner of Grand Avenue and Slack Street. And the obvious incentive would be for the administration to charge outlying lots that usually have empty spaces, such as the lot on the corner of Grand Avenue and Slack Street.

Not only would this ease parking pressures in the H-1 and G-1 zones but it could also result in less traffic within the inner core of campus. And best of all, it is an idea that can be put into practice tomorrow.

Letters

Shadow-boxing Christians?

Editor:

I fear Christians on campus have the courage and integrity to debate me, not because I’m a “man of God” as Richard Winkler did in a letter to the Daily (Jan. 13.). Debate is fair; it gives both sides, allows student audience participation, and deals with a major issue. The Christian is not fair on all his Illusions about the Bible would be shattered. I can say the dynamic of Christianity and win a debate against anyone who believes the Bible is clear and true.

The truth is that no campus Christian can defend the Bible, no scholar can stand against me, and no minister has the fortitude to face an honest man. In a debate, I might point out what the Bible really says: God is a warrior and killer (Ex. 19:8; God creates calamities (Is. 45:7). God fought at man’s misery (Pro. 1:26), some infants are born evil (Ps. 58:3). slavery is approved as American history attests (I Pet. 2:18).

I might point out that Christians are racist (Negroes in white churches are less than 1 percent of total church membership), unoriginal (American pro-

false theory

Editor:

Have you ever heard of the second law of thermodynamics? It basically states that any system left to itself will deteriorate, not improve. That is a fact which will always keep the theory of evolution just that—a theory. It is a fact that we exist and it has just been shown that the theory of evolution is basically false. That leaves one more explanation for the creation. The only explanation and, the real truth for that matter, is God did create the universe along with us. The concept is so simple. Why then, do we make up stupid theories to question God. The answer to that question is simple: ever since the creation of man by God we have strayed away from him, we want to deny him. The theory of evolution is one example of this with homosexuality being the extreme.

I urge the Cal Poly faculty, staff, and students to earnestly consider God, his existence, and his plan for your life. Whoever reads this letter can no longer claim ignorance to God’s existence through the theory of evolution on the judgment day. It is obviously false.

Consider constitutional rights

Editor:

In rebuttal to the editorial in the Jan 22 Mustang Daily, it asserts that “the real issue of this proposed bill is not whether abortion is right or wrong—the issue is whether students may select programs they support and, in ef-

fect, set their own fees.”

I fail to disagree with this assertion. Numerous religions of our country believe abortion is sin, and therefore is against their faith to support such a degraded action.

If students are obliged to pay this fee, I believe this is an indirect violation of the First Amendment of the United States Constitution, which states:

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances."

If a student is obliged to pay such a fee against his or her belief, this is prohibiting the free exercise of their religion.

In conclusion, we will take into consideration our constitutional rights when voting on this bill.

James P. McAndrews
