Student dies in car accident

Michelle Jacobson, a freshman agricultural science major, died Saturday after being involved in an auto accident during spring break in the Bay Area.

Jacobson, 18, was a passenger in a car that was broadsided by another vehicle. She suffered internal injuries and lapsed into a coma. She was kept alive by life-support systems until she died April 3, said Ed Lunn, resident director of Yosemite Hall.

Michelle was always happy, always smiling, and ready to help anyone who needed it around here," said Chris Trifonell, an aeronautical engineering major who also worked with Jacobson at the radio station.

Besides KCPR, Jacobson was a member of the Cal Poly Ski Club and the Hebrew group Haverim, said Rabbi Mashoff of Congregation Beth David in San Luis Obispo.

A memorial service is set for 4 p.m. today at Congregation Beth Davis temple, located at 2933 Augusta Street.
MOSCOW (AP) — The Soviet Foreign Ministry tried to defuse speculation about the health of President Leonid Brezhnev by announcing Monday that he "is on his regular winter rest."

A Foreign Ministry spokesman made the statement in response to a question from the Associated Press about published Western reports that the 75-year-old Brezhnev was ill and might be replaced as leader of the Soviet government or Communist Party.

Capt. Ernest Hermanson of the guard's 149th Army Division at Selinna said his unit needs all the space it has at Camp Roberts for tank maneuvers.

Brezhnev was ill and might be replaced as leader of the Soviet government or Communist Party.

Panetta that a prison at Camp Roberts would be sold to Los Angeles for use as a prison.

Secretary Feinstein of a Los Angeles prison at the Army headquarters in Sacramento said he agrees with Panetta.

Brezhnev also predicted that unemployment would lag behind the rest of the economy in recovering from the recession. He said joblessness may climb higher than the 9 percent level it reached in March. That's the highest unemployment rate since World War II.

There may be even more unemployment, Reagan said just before climbing into a motorcade to the hospital where he was shot a year ago. He brought with him a speech which included a plea to the recession-battered economy to fall in line with high and his economic program.

The speech also was highly critical of the Soviets.

"We will not remain silent when, in Afghanistan, yellow rain is dropped on innocent people, solemn agreements are flagrantly broken, and Soviet helicopters drop thousands of 'butterfly mines' which maim and blind Afghani children, who pick them up thinking they are toys," Reagan said in his prepared remarks.

Reagan wants Soviet meeting

WASHINGTON (AP) — President Reagan roundly condemned the Soviet Union Monday for its actions in Afghanistan, but also held out hope that he and President Leonid Brezhnev can meet this summer to talk about arms control.

"I think it would be well if he and I had a talk," Reagan told reporters in the Oval Office.

Reagan also predicted that employment would lag behind the rest of the economy in recovering from the recession. He said joblessness may climb higher than the 9 percent level it reached in March. That's the highest unemployment rate since World War II.

"There may be even more unemployment," Reagan said just before climbing into a motorcade to the hospital where he was shot a year ago. He brought with him a speech which included a plea to the recession-battered construction industry to fall in line with him and his economic program.

The speech also was highly critical of the Soviets.

"We will not remain silent when, in Afghanistan, yellow rain is dropped on innocent people, solemn agreements are flagrantly broken, and Soviet helicopters drop thousands of 'butterfly mines' which maim and blind Afghani children, who pick them up thinking they are toys," Reagan said in his prepared remarks.

Students participate in 30-hour fast

BY MAURA THURMAN

They come home from school, open the refrigerator, and take out a snack. In fact, they seem to be eating all the time.

In contrast to that stereotype, 14 San Luis Obispo teenagers under the direction of former Cal Poly student Kathy DuPeri went 30 hours without food last weekend.

While dramatizing world hunger, the Old Mission Youth Ministry group also collected about $200 in hourly pledges, and donations which will be given to hunger relief organizations through Church World Service.

The fast, which began Saturday at noon, was broken by a "Third World Dinner," where participants drew lots to receive dinners in the style of the First, Second and Third Worlds.

"The dinner is the best part," DuPeri said. "It really sticks in your mind when you're hungry and you get rice and tea."

First World diners feasted on chicken, mashed potatoes and corn. Those who drew Second World tickets received two bean burritos, and Third World participants ate white rice and tea.

Cal Poly sophomore Emily Malsam, a member of the Campus Hunger Coalition, helped DuPeri screen educational films and lead discussion during the fast.

Malsam said the films, which were provided by the Christian Relief Overseas Program, emphasized strategies for overcoming the world food shortage, like eating lower on the food chain.

"People are going to have to learn they can't eat foods like beef," Malsam said. "Beef takes 7 pounds of grain to produce a pound of meat."

DuPeri said she left Cal Poly's agriculture program several months ago because she was frustrated with the major's emphasis on "big business agriculture."

Many agriculture students prepare to "work for a corporation and make a lot of money," DuPeri said, and study mainly management and economics.

"They're not very sensitive to the problems of raising crops in a Third World country just to feed people a minimum amount," DuPeri said.

Educational programs like the fast are badly needed in the United States, DuPeri said, although more people are aware of the extent of world hunger now than 20 years ago.

"But we don't just want to tell people there are hungry people in the world," she said, "because everyone knows that. We want them to ask why. Then people will begin trying to solve it."

Maureen Reagan speaking here today

Maureen Reagan, Republican primary candidate for the U.S. Senate from California, will speak at Cal Poly today at 11 a.m. Scheduled as the first speaker in the Tassels Honor Society's "Women of Accomplishment" series, Reagan's free address will be in Chumash Auditorium.

Long active in California Republican politics and fundraising, Reagan is the founder of Bell Overseas America, the Association of American Export. She was Vice President of the Southern Orange County Republican Women, and for six years served on the Board of Directors of the California Federation of American women.

For the past 12 years, she has been a major fundraiser for the Arthritis Foundation. Until recent­ly, Reagan hosted a Saturday talk show on a Los Angeles radio station. She is the daughter of Oscar­winning actress Jane Wyman, and President Ronald Reagan.

Tassels is an honor society which promotes "the advancement of the status of women, to recognize and encourage leadership, to provide service and to establish the opportunity for meaningful exchange of ideas." Reagan's address at Cal Poly is presented in cooperation with the Dean of Students Office.
Poly student misses Mustang April Fools joke

By TWYLA THOMAS
Copy Editor

When Mustang Daily editor Tom Johnson received a call from a Los Angeles Times reporter inquiring about the cancellation of Poly Royal, he thought it was an April Fool’s joke.

Johnson was right to be so incredulous. The Daily had just published a four-page spoof section chronicling such news-worthy Cal Poly events as a big pot bust, strip searches before concerts and charging students $1 to use the bathroom.

The April Fool’s Day stories were meant as a gag, but freshman electrical engineering student Brian Grenoble phoned the Times, the San Luis Obispo Telegram-Tribune and KCOY-FM, insisting media coverage be given to the Poly Royal cancellation.

“The April Fool’s Day stories were meant as a gag, but freshman electrical engineering student Brian Grenoble phoned the Times, the San Luis Obispo Telegram-Tribune and KCOY-FM, insisting media coverage be given to the Poly Royal cancellation.”

The call to Johnson turned out to be real, as a page 15 story about the Mustang Daily escapades that appeared in the Times last Friday attests.

“Thought we’d get some irate calls,” said Johnson, since the stories referred to such unlikely events as firing all employees hired after 1980 and dumping departments like journalism, but the only reactions were laughs and disbelief.

Debbie Jones, a sophomore architecture major, mentioned the big marijuana bust that caused the cancellation of Poly Royal to fellow students and had several of them believing it for awhile.

Daily reporter Sharon Ranak, who wrote the Poly Royal story under the byline of “Sharon Reefer, staff stoner,” said she got “sillier and sillier and thought no one would ever believe it” as she composed it.

Johnson said “a lot of people came up to me and said they were fooled or it was funny.”

The only serious reaction to the spoof section was a threatened lawsuit against the Daily due to a story written by reporter Twyra Thomas. The threat was an April Fool’s joke.

Is there life after cancer?

Some people think that even when a cancer is cured, the patient will never live a normal life again.

The American Cancer Society knows better. The Society offers cancer patients and their families extensive service and rehabilitation programs with practical help and emotional support. It helps people return to their homes and their jobs.

There is life after cancer. Two million people are living proof. If you or anyone close to you needs help, call us.
Student copes with pressure in the grill business

“Poly” and “Poly Cheese” are the leading buzz words in the vocabulary of Howard Hanson, one of the men who works the Snack Bar grill turning out burgers for hungry students.

BY BRIAN RAILSBACK

Howard Hanson is one of those people who points at you and asks, “What do you want?” You inevitably answer, “Poly” or “Poly cheese.”

He has been working at the Snack Bar grill since the Summer Quarter, and plans to continue to do so until he graduates in June (he’s a biology major, concentrating in botany).

Hanson flips patties and scoops french fries during his shift from 2:30 to 4:30 p.m. Monday through Friday. He also has days when he “works condiments” — keeping the mustard, ketchup, etc. in order.

Hanson is a student worker at the Cal Poly Snack Bar, and is usually seen dodging flames as he turns over one of a dozen patties on the grill at any one moment.

“I like to work here because of the people,” Hanson said. “It’s an easy job and you have a lot of time to joke around.”

But Hanson admits the job isn’t always easy.

“The worst part is cleaning up,” Hanson said. When the Snack Bar closes at 4 p.m., he is responsible for cleaning the grease off the grill—which can get up to a half-inch thick.

“You can tell the different quality of meat by the amount of grease that builds up at the end of the day,” Hanson said. He noted that the patties which are made on campus actually tend to be the best ones.

There’s also some pressure in the “grill business,” especially when the line for hamburgers gets long and people are impatient.

You can tell when classes have let out—the line suddenly gets longer,” Hanson said. “Then, the pressure is on usually about ten minutes after each hour.

“When the line really gets long, people always ask me to move faster,” Hanson smiles. “I get a little upset sometimes.”

Even after Hanson graduates and is through with the Snack Bar, he may have his hands in food. He hopes to find a job inspecting grain on the docks in Long Beach.

Community development director named

City Administrative Officer Paul A. Lanepary has appointed Mr. Toby Ross to the position of Community Development Director. The position has been vacant since January 1, with the resignation of Mr. Henry Engen.

Ross is currently employed as the Senior Planner in charge of Current Planning for Sonoma County. He has been with Sonoma County for approximately nine years, holding various supervisory positions.

ROSS has an A.B. from the University of California at Santa Barbara and M.A. and Phd. degrees in geography from the University of California in Berkeley.

He is 34 years old, married, has one son and will begin work as Community Development Director on May 17. His monthly salary will be $3,200.

### Mechanical & Electrical Engineers

#### Eight reasons why you should join Syska & Hennessy

**Innovative Engineering Leadership**
We are the nation's largest mechanical and electrical consulting engineering firm with a reputation for making systems work, and keep working. Worldwide projects range from the San Francisco International Airport Tolmats to the JFK Center for the Performing Arts and the Yale Medical Center. The firm has a well-balanced blend of commercial and institutional projects. Sanitary engineering, Fire safety systems, Automated security systems, and more.

#### Continuing Development

- **Challenging Project Involvement**
You can, for example, become an expert in Air Conditioning & Heating. Electrical systems, Energy management, indoor environmental systems. Sanitary engineering, Fire safety systems. Automated security systems, and more.

- **Unlimited Potential for Advancement**
You're motivated to develop your fullest potential in any of the 14 engineering disciplines. We'll help you acquire the education and recognition to advance in your field. You'll work with professionals of every discipline and at every level.

- **Diversity of Experience**
Our well-balanced blend of commercial and institutional projects can offer greater breadth of opportunity than any succession of job changes in industry or government service. You'll be exposed to every phase of projects-from feasibility studies and design to facilities management.

- **A People-Oriented Environment**
You'll find you're treated to equal opportunity. As a firm of more than 860 employees that conducts business in 6 continents, you'll work with professionals of every discipline and at every level.

- **Four Regional Locations**
You can choose the location you prefer. We invite you to explore openings in our Los Angeles, San Francisco, Washington, D.C. and New York City offices.

- **A Full Range of Benefits**
Attractive salaries are complemented by benefits that include life, health and dental insurance, and a stock ownership plan.

An orientation session on consulting engineering will be held Wed. April 14, 1982 at 7:00pm, Room 292 Fisher Science. All interested students are invited to attend.

---

**MEET US ON-CAMPUS Thursday, April 15**

Or send your resume to: Ms. J. McGarty, Syska & Hennessy

2901 Green Valley Circle, Culver City, CA 90230

An equal opportunity employer, m/A.

---

**ABS meeting**

The first ABS meeting of the Spring Quarter will be held tonight from 7:30 to 9 in Computer Science 252. The AUDIO TALES will be given by Keith DeVito.

**Peripheral Canal speech**
Matt Hilling of the California Department of Water Resources will speak on the Peripheral Canal and Central Valley Project at the Society of Civil Engineers meeting Wednesday at 7:30 p.m. in Staff Dinning Room B.

---

**MEET US ON-CAMPUS**

Thursday, April 15

846 Higuera

444-9813

---

**8.00 Haircut**

**Berkley**

24 hour Color Print Processing by Mastercolor

---

**Pete Christie hairstyling**

**$9.00**

---

**B e r k e l y**

**24 hour Color Print Processing by Mastercolor**

---

**Comedy film**

The hilarious movie "Murder by Death" will be shown in Chumash Auditorium on Wednesday at 7 and 9:15 p.m. Cost is $1, and the movie is sponsored by ASI Films.

**ASME Members contest**

The Society will hold a contest for members. Any ASME member can enter this speech contest—just give a 15 minute technical talk on any subject at the meeting Wednesday night at 7 in Science North Room 213. Call ASME President Michael Steiter at 544-9799 for more information.

**Joint meeting**

The Environmental Sciences and Engineering Club and the Alternative Energy Club will hold a joint meeting on Thursday at 11 a.m. in the Learning Assistance Center in Chumash Hall.

**Fencing Club meeting**

All those interested in practicing their fencing technique, or in just learning more about the art, are invited to attend the Fencing Club meeting tonight at 6 in the Learning Assistance Center. There will be signups for the club tonight and on Saturday, and the ACS Open will be in May will be discussed.

**Video tape series**

The American Production and Inventory Control Society will be showing the first film of a series on production and inventory management systems on Thursday. The film will be in Room 214 of the Business Administration Building at 11 a.m.

**Obedience training**

Dog Obedience training involving basic commands will be taught in the solver field beginning April 14. Cost is $17 for students and $20 for others. There will be a 10 percent discount for early registration. Contact Lauren Ireland at 541-9710.

**Engineering T-shirts**

The Engineering and Technology School Council will be selling "On the right track" T-shirts today through Thursday in the IU Plaza from 10 a.m. to 2 p.m. The shirts are $6.

---

**Diablo symposium scheduled**

A symposium on the Diablo Canyon nuclear power plant will be held Wednesday, April 7 at 7:30 p.m. in the Cal Poly Theatre.

The "Diablo Symposium" sponsored by the Ecology Action Club, the Political Action Club, and the Concerned Cal Poly Faculty and Staff will be held immediately following at 7 p.m. in the Cal Poly Union Union Union Union.

**Diablo Hunger Coalition Film**

The film "Controlling Interest" on multinational corporations and their influence will be shown at the regular meeting of the Campus Hunger Coalition on Thursday at 6 p.m. in Room 201 of the Agriculture Building.

---

---

**Child Time!**

The NSME Chili Wagon will be rolling into the Union Plaza Thursday and Friday at 10 a.m. A bowl of chili with cheese and onions will be 65 cents and cold soft drinks will cost 35 cents.

**Orchid Sale**

The American Public Relations Society will send an orchid anywhere in the United States, sealed in a box with a card and message for Mother's Day. Cost is $5, and orders can be placed with the group in the University Union Plaza today until May 4 from 10 a.m. to 2 p.m.

**Campus Hunger Coalition Film**

The film "Controlling Interest" on multinational corporations and their influence will be shown at the regular meeting of the Campus Hunger Coalition on Thursday at 6 p.m. in Room 201 of the Agriculture Building.

---

**FACING meeting**

Cal Poly's Associated Student Government will hold its first Spring Quarter meeting Wednesday at 6:30 p.m. in the Mathematics and Home Economics Room 133. Immoderately following at 7 p.m. Dorothy Glicker of Bullocks will speak on merchandising, buying, management and consumers.

---

**Facing meeting**

Cal Poly's Associated Student Government will hold its first Spring Quarter meeting Wednesday at 6:30 p.m. in the Mathematics and Home Economics Room 133. Immoderately following at 7 p.m. Dorothy Glicker of Bullocks will speak on merchandising, buying, management and consumers.

**Rainbow of events set**

The Julian A. McPhee University Union is celebrating its 11th anniversary. In honor of this event the UUSB present Kaleidoscope which will take place from Thursday to Saturday, April 9-11.

This three-day celebration will host a number of events beginning with the opening ceremonies at 11 a.m. Thursday. There will be live music, displays, food concessions, and a cake cutting ceremony with roses to give out.

This day also possibly marks the biggest Coffee House ever presented on the Poly campus. In Chumash Auditorium there will be the music of Matisse Forrest, Chris Smith and Scott Wilson, Steve Howard, Brownlee and Co. and Robert Desvague. This all happens at 8 p.m. Thursday and the cost is $1.

Friday's main event is Casino Night. There students may gamble the night away for a dollar and dance to the music of Newcastle in Chumash Auditorium from 8 p.m. until 1 a.m. Student events on these two days only are Club Days in the Plaza and half price ice cream sales. Prices range from $3 for a single dip to $4 for a double dip .60 for a triple.

A special television program in the Union will feature the jazz group Spyro Gyra. They will be playing continuously during the anniversary celebration.

On Saturday there will be a musical film festival in the Chumash Auditorium beginning with Funny Lady at 9:30 a.m. My Fair Lady begins at 12:15, and Fiddler on the Roof will be presented at 3:00 and will run until approximately 6:00 p.m. Tickets will be sold for $7.50 per movie or $3 for all three.

In the Union games area there will be a bowling, pool and video tournament beginning at noon. More details may be found at the games area.

An appearance by Mel Blanc, the voice of many well-known cartoon characters, will begin at 10 p.m. in the Chumash Auditorium. Advance tickets will be $2.50 for children, $3.50 for students, and $4.50 for the general public.

**Ag awareness plans revealed**

Information booths and livestock displays promoting agriculture will be a part of the three-day Agriculture Awareness Week to be held April 7-9 in the University Union.

"The exhibit will be in the plaza between 10 a.m. and 2 p.m. each day, and is sponsored by Alpha Zeta, the agriculture honor fraternity on campus."

The exhibit coordinator, Francisco Ubieto, the exhibit's main purpose is to inform the college community about different branches in the school of Agriculture and Natural Resources and its opportunities in the industry," said Ubieto, a senior dairy science major.

"The booths will be informative," he said, and most will display livestock or equipment.

According to the 20 clubs participating in the event are the Poultry Club, Cutting and Reining Horse Club, the Society of American Foresters, and the Agriculture Science Club.

According to Ubieto, various livestock, including sheep, goats, and cattle, will be featured at the event. At the Vet Science Club display, he said, students will be able to learn how to give injections to animals and to compare their heartbeat and respiration rates using a stethoscope.

"The participants in the event are getting ready especially about getting it on," said Ubieto. "I think it's going to be a very successful exhibit."

Other displays include a Medfly booth, presented by the Crop Club, a military demonstration and a loggin exhibit.

The Call Poly fire section has purchased new hoses to improve fire protection with the capability of carrying more water to the fire.

"The new 3-inch hoses are half an inch wider in diameter than the department's old hoses. The extra inch doubles the water flow compared to the old hoses," said Carmen Johnson, fire captain.

The past three years, the department acquired 1,600 feet of 3-inch hose for the three engines. The new hoses help the firefighters meet safety guidelines set forth in the Insurance Service Office's "Fire Suppression Rating Schedule."

"These standards we decide what kind of equipment we need to keep the risk factor down," Johnson said.

The new hoses are used to supply water from the hydrant to the pump on the fire engines. In many instances, hydrants on campus are 700 to 800 feet away from the buildings, making the use of very long hoses indispensable, Johnson said.

He also pointed out that the wider the hose is, the less friction there is and this results in conducting water over a longer distance or up a slope.

The fire section has invested $8,000 in new hoses. Johnson contends that this is inexpensive insurance when the cost of the hoses is compared to the price of the buildings and lives they protect.
Dairy bankers are named

Dan Giacomini of Ferndale, Leanne Bemning of Turlock, and John Schuetten of San Jacinto have been named the outstanding seniors in the Dairy Science Department.

The announcement of the recipients came at the annual banquet Saturday, March 19, and the presentations were made by Dr. Gene Starkey, Dairy Science Department head, and Dr. Earl P. Carter, dean of the School of Agriculture and Natural Resources. The awardees are the highest student achievement honors bestowed by the department.

Giacomini, from a distinguished family of dairy cattlemen, has a 3.5 grade point average and has served two years as a student senator. He has served both the student senate and the student Agricultural Council as vice chairman and was a candidate for student body vice president. He has been a member of the dairy club's executive body and has served as chairman for the state FFA dairy judging contest.

The outstanding senior awards were established in 1965 and recipients are selected by faculty and fellow students. The award honored this year for academic achievement and leadership abilities will have their names placed on the permanent George M. Drumm Trophy, named for a former Cal Poly Dairy Science Department head, for a former Cal Poly Dairy Science Department head.

Also honored at the banquet was Brock Eile of Stockton, Wash., named to receive the Joe Evans Award. Ricci is president of the dairy club, a representative on the student Agricultural Council and active in Campus Crusade for Christ, International.

Library provides senior project aids

SLO firm is low bidder for Poly building project

Walter Brothers Inc. of San Luis Obispo was the apparent low bidder when bids for conversion of a part of the Science Building at Cal Poly were opened on Tuesday (March 31) afternoon. The Walter Brothers' proposal for the university project was $639,000.

Other bids opened were from Wally LeFranture Construction Co., San Luis Obispo, $641,400; Tera Construction, San Luis Obispo, $646,000; Palmer Construction Co. Inc., Fresno, $646,400; and Cook Engineering Inc., San Luis Obispo, $671,576.

Douglas Gerard, executive dean of Cal Poly, said the contracts for the conversion project are awaiting an analysis of the bids. He expects to be able to issue in time for work to begin in late April and completion of the project to take about 14 months.

Dean Gerard said construction funds for the project were originally included in the state budget in 1979 and were augmented in 1981.

San Luis Obispo area subcontractors included in the Walter brothers bid were Collins Electrical Co. Inc., San Luis Obispo; Jost Floor Co., San Luis Obispo; Moor Bay Glass and Mirror Co., Santa Barbara Roofing: Santa Maria Acoustical Co.; Santa Maria Valley Flooring Inc.; Stone's Inc., San Luis Obispo; San Luis Obispo; and Eighty Refrigeration and Equipment Inc., San Luis Obispo.

Bargain book sale set for Sat.

The third annual book sale of the Cal Poly Library Associates will be held on Saturday, April 17, from 10 a.m. to 3 p.m. in front of the university's Robert E. Kennedy Library. A wide variety of hardbound and paperback books including both fiction and nonfiction will be available at bargain prices, according to Irene Rockman, executive secretary of the Library Associates.

Included will be books on scientific subjects that have been donated by members of both the Cal Poly faculty and the Library Associates, as well as other Central Coast area residents. Mrs. Rockman, said proceeds of the book sale will be used to purchase additional materials for the university library.

Also available at the sale will be information about the Library Associates, a community-based organization founded in 1979 to support the programs and services of the Cal Poly Library.

Child Development and Home Economics are working well together since they were incorporated into one department nearly two years ago, according to the department head.

Francis J. Parker feels good about the merging of the departments, which was caused by budget cuts.

The child development/home economics merger has been a positive move, since the workload is easier, and the faculty works well together, said child development instructor Robert Christenson.

The family is the core of home economics, said Parker, who added child development and home economics interact and are not different as such.

The teaching of the family is the core of home economics.

The department has doubled with the child development/home economics merger, Christenson said. The amount of work is lighter with more faculty working on it.

When the departments joined together, child development and home economics faculty worked hard together to make the family have enjoyed the interaction of working together.

Child development, nutrition, and design faculty are working together. They are able to share research and participate in the classes of others, said Parker.

Parker is a specialist in home economics education. Part of her master's and doctoral research dealt with aspects of family life. The size of the faculty doubled with the child development/home economics merger, Christenson said. The amount of work is lighter with more faculty working on it.

The merging has been a positive move, since the workload is easier, and the faculty works well together, said child development instructor Robert Christenson.

The family is the core of home economics, said Parker, who added child development and home economics interact and are not different as such.
Mustangs rally to spike Northridge in thriller, 3-2

BY RON HUTCHERSON
Staff Writer

Amid a deafening roar from the crowd, junior outside hitter Warren Strand drove a spike cleanly into the backcourt of the Cal State Northridge Matadors to give the Cal Poly men's volleyball team a hard-earned victory over its tough California Collegiate volleyball Conference rival Friday night in the main gym.

Poly was able to battle back time after time and finally came out on top in the match. Scores were 4-15, 15-12, 16-14, 15-16, and 15-13.

Poly coach Craig Cummings had nothing but praise for the Matadors after the match, "They were fantastic," he said, "like first game was an example of that. They were just digging everything." But after the first game Poly changed its strategy. Northridge was able to roll up points using its block, so Cummings decided to use the dink shot to break up the Matador block.

This strategy worked well for the Mustangs as they won the next two games before a disastrous showing in the fourth set. "We had just won two games, and that (game four) is just a perfect example of letting down," he explained.

But neither team could be accused of letting down in the fifth and deciding game of the match. The Matadors forged an early lead before Cal Poly was able to battle back and take the lead at 1:12. But then Northridge, behind the superb hitting of middle blocker Glen Pinkard, was able to reduce the deficit and take a 15-14 lead before a dink shot by Mark Booth saved the Mustangs from losing the match and got the ball back for Poly. Then it was Poly's turn.

Mustangs spiker Mark Booth puts the hammer down despite the best efforts of Cal State Northridge's Glen Pinkard (13).
The Mustangs men's and women's track teams both finished well at last weekend's Martin Luther King Games at Stanford University, with the men's team taking four firsts and the women's squad winning two events.

Distance runner Steve Strangio, who finished fourth overall in the 5,000 and second in the 3,000, placed sixth in the 1,500.

Guthrie, who has been dissatisfaction with her time in the 1,000, Doug Altavi also qualified nationally with a fourth-place time of 30:17, and Carmelo Noyes unattached in another section and finished in 30:05.

Long jumper David Tucker overcame rain, a strong head-wind, and the rest of the field to win the event with a best of 23-2. And both relay teams, the 400 and 1,600, squads, won their races in reasonable and qualifying times. The short relay team of Ron Wayne, Kevin Rush, Pat Croft, and Mark Kibett placed the field with a 40.84, and the 1,600 quartet of Tom Bowles, Brad Underwood, Rick Richard, and Croft took a win with a 3:15.25 clocking.

Other top performances included Underwood's 52.79 in the 400 intermediate hurdles, good for third place; Vernon Salesa's season-best 800 of 1:51.3, and Erik Johannesson's 6-7 effort in the high jump, which placed him second.

The women's team brought home a new school record and five personal records from the two-day meet. Senior Irene Crowley broke the old Mustangs mark in the 10,000 by more than a minute with a fourth-place finish in 34:49.

In the 5,000, freshman Carol Gleason came in fourth with a strong time of 16:54, which is a national-qualifying mark by more than a minute. Actually, her time would have been 16:47 had most events not recalculated the race's starting point, causing the runners to travel an extra 27 meters.

Donella Barnes won the javelin with a flip of 166-1, and Chris Dobalia took fourth in the 400 intermediate hurdles with a personal best of 52.58, a national-qualifying mark. Laura Hall held finished sixth in the event in 33:15.

Matadors are no match for Mustangs

From page 10

Two Matadors return shots were wide, giving the Mustangs a 16-15 lead before Strnad was able to put the game away. The last point had the screaming Mustangs fans on their feet, where they remained for some time after the point had been made.

In fact, according to Cummings, the crowd may have been the deciding factor.

"The crowd really brings out the best in people," he said.

Baseball series delayed

Mother Nature continued her dominance over Cal Poly's California Collegiate Athletic Association baseball schedule as rain washed away the Mustangs three-game series against visiting Chapman College last weekend.

Opinion

Nukesicles

You may be a Democrat; you may be a Republican. You may be a liberal, a conservative, or somewhere in between. Whether you’re a graduate or undergrad, on campus or off staff is irrelevant. It won’t matter one iota if you’re wiped out by a thermonuclear war.

The dilemma is remarkably simple. A nuclear holocaust will do little picking and choosing among its victims, so we’ll all go together—American and Soviet alike. The two superpowers have what they take—11,000 megatons of destructive force between them. A one-megaton warhead alone, dropped over the center of Detroit could take a half million civilian lives in an instant. What is perhaps most disturbing is that many government officials (“realists”) are beginning to openly discuss what was once the unthinkable: the possibility of a nuclear war, whether “limited” or otherwise. Such talk has been especially prevalent given the continued deterioration of U.S.-Soviet relations and their unchecked arms buildup.

Accordingly, it comes as no surprise that Americans are quickly making a grand dialogue on ways to control the nuclear stockpiles of the superpowers. The arms control movement in this country by no means consists of a narrow-based group of liberals and intellectuals; rather, it is a broad coalition of both liberals and conservatives, scientists, military men, professional workers and others. For the most part, they’ve just ordinary people like your roommate or your mother—people who just want to continue to live.

The movement’s voice has already hit home in the Senate where Democrat Edward Kennedy and Republican Mark Hatfield have recommended a solution that would place a freeze on the testing, production and future deployment of nuclear weapons by both the U.S. and the Soviet Union.

It should come as no surprise that the measure has already gained the support of nearly 200 Senators and Representatives, since the survival of the human race is certainly not a political or ideological issue. Who can argue with the resolution that the greatest challenge facing the Earth is to prevent the occurrence of a nuclear war by accident or design?

Still, the freeze has its opponents, and they make some valid points. They argue that since the Soviets enjoy an overall advantage in destructive force, measured in megatons, a freeze would hopelessly lock the U.S. into nuclear inferiority. But there is another side to the story. While the Soviets will enjoy certain advantages in a freeze, it will also lock the U.S. into a few advantages of its own.

For example, a freeze would lock the U.S. into an advantage in numbers of warheads, 9,000 to 7,000. Without a freeze, the Pentagon estimates that the Soviets could catch up with and pass us in this area in the 1980’s. A freeze would also prevent the Soviets from developing their next generation of bombers, ICBM’s and attack submarines—all now under development. It would also allow both countries to fill urgent social needs rather than defense.

So far the Reagan Administration seems determined to continue its arms buildup before considering any new arms control. But as pressure from the public and Congress grows, Reagan will have to reconsider his stance. The Soviets have gained the support of nearly 200 Senators and Representatives, since the survival of the human race is certainly not a political or ideological issue. Who can argue with the resolution’s wording that the greatest challenge facing the Earth is to prevent the occurrence of a nuclear war by accident or design?

The freeze proposal offers us a chance to stop the arms race in its tracks and begin negotiations that could decrease the probability of a nuclear war. There may not be another.

Letters

The truth hurts

Editor:

Thank you Lisa Larwood for your pro-life statement in the April 2 Mustang Daily and thank you Daily editors for printing it.

Lisa, don’t get discouraged in your efforts to “urge those who think abortion is wrong to voice their opinions.” We do vote our opinions. The problem is that those who manage the mediums of public expression don’t like our opinions and therefore don’t print them. I tried three times within the past year to have pro-life opinions expressed in the Mustang Daily. Each time they were disregarded, probably because the truth stung. For you to have your views printed is an encouraging sign that this quarter’s editors are much more open. Thus I will include again an excerpt from my past letters.

Editor:

The right to choose whether or not to have an abortion should remain the decision of the pregnant woman. This is in reference to Lisa Larwood’s “Laws aren’t always right,” April 2.

A woman should have the right to privacy and the right to control her reproductive life. Ms. Larwood’s statement, “The philosophy behind abortion only increases disregard for human life—hence more child abuse,” is nonsensical. There is no evidence that liberalized abortion laws have resulted in a decrease in the number of battered children. The whole problem of child abuse is far too complex to be resolved by the pro-abortionists: ‘The father has syphilis and the mother has tuberculosis. They have had four children. The first one was blind, the second one died, the third one was deaf and dumb, and the fourth one had tuberculosis. The mother is now pregnant with her fifth child but is willing to have an abortion if you determine that she should. What would you decide for her?” If you chose abortion, congratulations, you’ve just murdered Beethoven! (Medical History from: R.C. Agnew, U.S. Medical School.)

Thank you Daily editors for being honest enough to print a bit of truth, even though it may sting some of you; it is an encouraging sign for all your readers.
