Committee pares list for academic vice president

BY LORI MARLETT

Filing period for ASI president, vice president, and senators for each of the schools on campus opens today, announced Bob Walters, assistant director of Student Activities.

Prospective candidates may pick up registration forms, filing sheets and candidates may campaign by word of mouth or by appearing before student organizations before April 26, Walters said. Candidates for president and vice president may spend up to $600 for their campaign, with a maximum of $150 going to media advertising. Senate hopefuls are allowed $50 spending money, $25 of which can be funnelled into media advertising.

ASI elections will be held May 5 and 6.

Students practice lost art

BY ARLENE MIRANDA

"Cold shoeing" involves bending a pre-made shoe to fit. "Hot shoeing" involves making a shoe by heating the metal in a forge and then shaping it to fit properly.

"It is important to consider the amount of heat, the type of metal to use, the angle to hit the shoe and to avoid burning yourself," says one of Armstrong's students.

Horseshoeing is an individualized process in which the student must be able to work with metal, hammer and nails and then shape it into the desired shape. As one student says, "It's not as hard as it looks, it's harder." The second half of the quarter, students shoe horses on campus.

Junior animal science major Kathy Fowler dabbles in the ancient art of horseshoeing. The art has been practiced since man discovered metal forging and began using horses in agriculture.

Filing for student offices starts today

Filing period for ASI president, vice president and senators for each of the schools on campus opens today, announced Bob Walters, assistant director of Student Activities. Prospective candidates may pick up registration forms, filing sheets and petitions from the Activities Planning Center.

Active campaigning for student government begins Monday, April 26, but candidates may campaign by word of extension course views the matter from a scientific perspective, McKim said.

An element of bias occurs because each student is coming from some perspective as a result of their background and upbringing, therefore, total objectivity is difficult to obtain, according to McKim.

"Creationists have the distinct advantage of starting out with the answer," said McKim. "Evolution was not an assumption but, with conclusion, reluctantly drawn from overwhelming evidence.

Science developed mostly in Western European cultures by people of mainly Christian background, said McKim. Hence, some scientists drew conclusions based on their beliefs to the cultures in which they lived, he added.

McKim suggested that the author's beliefs fall somewhere between the two extremes of evolutionism and creationism.

The symposium meets Tuesday nights at 7 in Fisher Science Room 287. Persons interested in attending just one lecture may do so by paying $3 at the door.

Creationism and evolutionism symposium being offered

Providing a format for the examination of the theories of creationism and evolutionism is the goal of a symposium offered by the Cal Poly Extension, a social science professor said.

The symposium is designed to provide the basis for an informed opinion, according to a professor of social science.

The course format includes various speakers who address the class on matters of creationism or evolutionism.

"I'm giving both sides as much as I can," said McKim.

The course looks at the two models from a scientific viewpoint, not a theological viewpoint, added McKim.

The objective is to provide a format for rational, systematic examination of the natural evidence as it relates to the two models, McKim said.

Topics such as the laws of thermodynamics, fossil records, and genetics will be discussed by speakers.

Any examination of these issues will contain some element of bias, and the course views the matter from a scientific perspective, McKim said.

**Sailing, takes me away**

*Or, how I spent my Spring Break*

*BY SHARYN SEARS*

...Matt

Los Angeles fades from a sprawling metropolis to a hazy configuration on the horizon as the wind-filled sails carry us out to sea.

Minutes after departure, bottles of beer start tipping as people get acquainted with those who will be their fellow shipmates for the next few days.

Aboard the Ranger, a 100-foot schooner chartered by the Cal Poly Sailing Club, I sit perched near the bow, beer in hand, scanning the horizon for our destination: Catalina Island.

Walking below deck, I dig out my duffle bag and take off my watch; for the next five days that incessant ticking will be muffled to silence...vacation has officially begun.

At the helm is Captain Eddie, a burly man with a leathery tanned face and a mane of thick, silver-streaked hair and beard. He looks as much at home with the sea as the grey seagull perched momentarily on the stern.

Before long, Catalina Island is in sight, but it will be dark by the time we arrive. Some people have already become absorbed in the novels they brought along, others are chatting with their newfound friends.

Captain Eddie is a man of many talents; he cooks too. We line up in the main cabin and serve ourselves buffet-style for this leisure really works up an appetite. Wok-fried vegetables and chicken are on the menu tonight, followed by hours of card playing.

Faces are flushed with windburn already. 4 a.m. I am abruptly awakened by the roar of the ship’s engine. Our destination today is Santa Cruz Island, and we must get an early start if we are to see any of it in daylight. I pull my sleeping bag up over my face as we motor away from Catalina.

When I step on deck at about 7 a.m., I see 360 degrees of water. The other passengers are stirring, rubbing the sleep out of their eyes, and climbing out of their bags. Hot coffee pours into eager cups.

**TELENS LEAGUE**
Organized by 6 or 7 player leagues. This round robin tourney will begin April 20th. Entries will be taken in the Intramural Office, Rm. 104, U.U. Deadline for entries will be Friday, April 16 at 12 noon.

**GOLF**
A Saturday Golf League (pairs) will begin Sat., April 17. Entry cost is $3.00 per person and should be paid in the I.M. Office on or before 12 noon, Wed., Apr. 14. Greens fees will be $2.50/round of 9 holes. The course is the Sea Pines in Los Osos.

**CHESS**
Entry for this double elimination tourney will be taken until Friday, April 16 at 12 noon in the Intramural Office or call X1366.

**ULTIMATE FRISBEE**
An organizational meeting will take place Mon., April 19 at 7:30pm in Rm. 201, Science North. Each team desiring entry must send a representative to this meeting. Following the meeting there will be an officials' meeting for those desiring to officiate.

**COOKS CAMPUS**
Will be held Thursday, May 13 in the U.U. Plaza from 11:00am-1:00pm and Saturday, May 15 on the upper fields adjacent to the tennis courts. This event will contain several activities such as: 3-legged race, frisbee throw, tug-of-war, softball throw, volleyball serve, badminton serve, etc. To enter contact IM Office, X1366.

**FACULTY/STAFF AND DISABLED SCHEDULES AVAILABLE IN U.U.-104.**
Student explores south coast islands in leisurely 5 days

From page 3

As we eat breakfast, people comment on the beautifully clear day. For lack of wind, we will motorsail all day, and soon the boat is lined with bodies sunbathing, reading, sleeping and playing backgammon. What a life. I think to myself—my biggest responsibility today will be remembering to reapply sunscreen lotion. I remind myself that a photojournalist must be alert constantly. Everyone wants pictures to show the folks back home, and I sit wondering if a photograph can do justice to this beautiful scene with the sound of waves lapping against the ship, the smell of salt in the air, the sun warming our bodies.

Next stop, Pelican Cove. The ship's dinghy is inflated and we motor ashore in groups of five or six. I hike out to a point and become absorbed in taking pictures of the panoramic view, only to return to reality to find myself alone. The others have scattered in groups. I set off on a hike of my own; the sun's rays are hot, mist from the ocean winds.

I hike up a canyon. It is lush with vegetation. I can hear a small waterfall echoing off the canyon walls, and soon I come upon it, an icy gush between the rocks. I plunge my bare feet into the small pool formed at its base and pause for a moment. Why not? I plunge beneath the waterfall, chilled and refreshed.

The pungent smell of baked ham lures us from the deck tonight. Anchored in Smuggler's Cove, it would be another clear and warm night. After dinner a group of us sit huddled, a sleeping bag draped over our legs. Simon and Garfunkel plays on the radio, and I drift off to sleep...
**Track team going Anteater hunting**

BY ANDY BERGER

Sports Editor

The men's track coach is looking for some more national qualifiers, the women's coach is looking for carbon copies of performances in the last few weeks, and all track eyes on the West Coast will be looking at Cal Poly in action this weekend.

Such will be the situation Saturday as the men's squad travels to Irvine for its yearly grudge match with the Anteaters, and the women's team is off to Berkeley for the Cal-Nike Invitational.

Irvine and Cal Poly despite each other with a passion, and head coaches Tom Henderson (Poly) and Fred McNair are engaging in one of the most heated mind battles since Bobby Fischer retired from the chess world. Henderson isn't quite sure where to put some of his distance runners, depending on where McNair places his distance see, Jon Gerhardt, while McNair is probably trying to recruit some overstuffed football players to compete in the shot put and discus events.

The Mustangs and the Anteaters have nothing to gain and everything to lose. It's almost embarrassing to lose to a team that competes at a lower level than you do, even if that team has won the last three national championships.

John Croft, who has run a 46.0 this season in the 400, to face Poly's Pat Croft, who has done 48.77 in 1983 and has a lifetime best of 46.03. Croft will either run the 400 or the 200, depending on where Carey runs. In last year's dual, Carey won the battle between the two, 48.6 to 47.0.

"They have a strong, well-rounded team. They're almost identical in overall strength, and they have good people almost everywhere. It'll all boil down to who gets the seconds and thirds. We're comparable all around, and it'll come down to getting good performances from everyone," said Henderson.

The Mustang look to have an edge in the distances, if only because of their depth. Henderson will send three national qualifier Steve Strangio (16-6-10,000), and Doug Avetis in the 5,000 and middle distance near Vernon Dallas and Chuck Penter in the 800-1,500.

The women's squad, fresh from its strong showing in the Martin Luther King Games last weekend, will make another stop in Berkeley this weekend for the Cal-Nike Invitational.
BY MIKE MATHERSON

The Grand Finale. The final curtain. The last en­
core.

Saturday night in the main gym the Cal Poly men's volleyball team, under head coach Craig Cummings, will play its last regular season home game of the 1982 season.

You can also make it the last regular season home game ever.

In another must-win situation for the Mustangs in the California Collegiate Volleyball Conference title chase, the UC San Diego Tritons will invade the premises for a 7:30 p.m. start. Cal Poly currently stands atop CCVC play at 9-1. It is 15-7 for the season.

"Under the athletic budget, this is it," Cummings said referring to the last men's volleyball match ever to be played on the gym balcony. "It's kind of a sad note. But we're go­ing to go out with our guns blazing. We've got to take it. If we're going to go down, it's going to be a fight."

Realizing that it is the last home match, the players want to thank whoever they are playing. The seniors sure want to win. For the under­classmen it's kind of tough because they came expect­ing to play a few more years of volleyball. But they still be out to do the job.

Cummings' crew is fresh off victories over Cal State Northridge and UC Berkeley last weekend. The Mustangs squeaked by the Matadors in five games, 4-1, 18-16, 16-14, 11-16, 15-15. The match was as ex­cit­ing as the scores in­dicate.

"We had to win the Northridge match to have a chance for the league championship," Cummings said. They are "the toughest competition in the league for us. San Diego is right behind them. Northridge and San Diego are second in the league because San Diego best them earlier in the season."

"The San Diego match will be just as important for this week as the Northridge match was for us last week. If we beat San Diego and then beat Riverside (April 17), we'll be league champs."

The initial meeting between Cal Poly and UC San Diego this year was no contest. The Mustangs whipped the Tritons in La Jolla, 15-3, 15-8, 15-10, on Feb. 28. In all fairness to his club, Cummings really doesn't see that happening the second time around.

"They have one guy who is 6-6 and hits from the outside. He wasn't on the night we played them. The team goes like he goes. Basically we'll set up our offense to our liking."

"Their defense is along Northridge's and ours," Cummings said. "It's scrappy. They'll dig a lot of balls. It will be just as exciting as Northridge, for sure. This will be a crowd-pleaser because of the defense."

So, if you've always wanted to see a Cal Poly men's volleyball match and have never really made it to the gym, be there Saturday night at 7:30. It's your last chance.
Expensive dinosaurs

On March 28, 1979, a commercial nuclear power accident occurred. In the worst such accident to date, a valve in the cooling system of the Three Mile Island nuclear power plant failed resulting in the release of radioactive gas into the atmosphere surrounding the Susquehanna River in Pennsylvania.

People all over the country have been paying for the accident since TMI—in terms of loss of faith in government regulatory agencies and the fear instilled by the stark reality of a near nuclear meltdown. Near the plant, mental stress and miscarriage rates have skyrocketed since March 1979, and public antipathy toward nuclear power is so strong that the Nuclear Regulatory Commission conceives “it would take an armed force to operate the plant again, and even this might not be enough to protect it.”

Now the government wants us to pay for the accident again, this time with a more concrete asset—our pocketbooks.

A Senate committee approved a bill last week that would require all utility companies with nuclear reactors to pay for the $1.5 billion cleanup of the damaged Three Mile Island plant.

Some senators have called the bill a national consumer bailout of the nuclear industry. They hit the bull’s-eye. A majority of people have expressed grave concerns about the safety and economic viability of the nuclear industry which a majority of people have expressed grave concerns about.

The Nuclear industry, however, manages to keep plodding along with the help of the government—our tax dollars, to be precise.

The American public should not be expected to support an industry which a majority of people have expressed grave concerns about.

The Mustang Daily Editorial Board strongly opposes this preposterous bill, and we urge all senators to oppose it on the Senate floor. We urge our readers to write to Senators Cranston and Hayakawa and demand they oppose this bailout of a dinosaur.

Stanly Stoked

Now the government wants us to pay for the accident again, this time with a more concrete asset—our pocketbooks.

A Senate committee approved a bill last week that would require all utility companies with nuclear reactors to pay for the $1.5 billion cleanup of the damaged Three Mile Island plant.

Some senators have called the bill a national consumer bailout of the nuclear industry. They hit the bull’s-eye. A majority of people have expressed grave concerns about the safety and economic viability of the nuclear industry which a majority of people have expressed grave concerns about.

The Nuclear industry, however, manages to keep plodding along with the help of the government—our tax dollars, to be precise.

The American public should not be expected to support an industry which a majority of people have expressed grave concerns about.

The Mustang Daily Editorial Board strongly opposes this preposterous bill, and we urge all senators to oppose it on the Senate floor. We urge our readers to write to Senators Cranston and Hayakawa and demand they oppose this bailout of a dinosaur.

Stanly Stoked
