Title IX abuse charges against Poly dismissed

BY GAIL PELLERIN
Staff Writer

The Cal Poly intercollegiate athletics program is not discriminating on the basis of sex, according to a review conducted on campus.

The athletics program was found to be in compliance with Title IX, following a review conducted by staff of the U.S. Department of Education’s Office of Civil Rights.

The review was initiated after five students active in the program and ASI filed a complaint in July 1979 before the university’s task force on the role of athletics.

The task force, organized in May 1979, was in the process of formulating recommendations, and had not yet completed its report when the complaint alleging discrimination in the university’s athletics programs was submitted.

Substantive changes have been made in the administration and operation of Cal Poly’s intercollegiate athletics program as a result of task force recommendations and continuing evaluation of the program, President Warren Baker said.

“The USDE/OCR finding is evidence that we have made substantial progress, particularly in the areas of scholarship assistance and housing, facilities scheduling, and coaching assignments,” he added.

Title IX, an education amendment to federal legislation passed in 1972, prohibits sex discrimination in federally assisted education programs and activities.

After visiting the campus, and conducting several interviews, OCR found that Cal Poly will be proportionally distributing scholarships in 1982-83.

Also at the end of this year, the College Avenue Halls will no longer be used for housing the male athletes, said Howard West, associate executive vice president.

The review also found that Cal Poly is insuring equality in the assignment of coaches and in scheduling of games and practices, he added.

The most significant concern of the OCR was the quality and quantity of locker facilities and locker rooms. Although plans are being made to build additional dressing facilities in the parking lot west of the main gym within the next five years, West said the review didn’t think it was a reasonable period of time.

In response to OCR’s concerns, Cal Poly has made a proposal to modify the main gym to accommodate both males and females.

West said that after finding out Cal Poly is making and planning more changes, while eliminating inequalities, the OCR was satisfied that the university would achieve an equitable intercollegiate athletics program.

Split roll designed to correct Prop 13 inequities

BY STEPHANIE WINN
Staff Writer

Split roll, a newly-started initiative to amend Proposition 13, proposes to raise $1.6 billion for California in order to help college students and others affected by budget cuts, campus supporters of the initiative say.

The initiative will benefit college students who are mostly renters, prospective homeowners and recipients of local services.

Joe Johnson, external affairs officer and coordinator for the initiative’s campaign on campus, said that he sees the initiative as a fair way of bringing equality to Proposition 13.

Because public universities face funding reductions of 2.5 percent next year, Johnson said any additional revenue the state might receive will aid in the prevention of further budget cuts.

"Any additional dollars to the state will further improve funding for the state education system," said Johnson.

A legislative analyst estimates the net gain in 1983-84 from additional tax revenue to be between $1.1 billion and $1.3 billion. This figure is estimated to grow to between $1.8 billion and $2.9 billion by 1987-88.

Property reassessment

Should the initiative – sponsored by Taxpayers for California – be adopted at the November election, it would require that all property other than residential and agricultural property be reassessed annually at its full value, as it was before Proposition 13.

Current state law requires that all property, including commercial and industrial property, be taxed at the rate of one percent of the full cash value. The split roll initiative would increase the maximum amount of any added value tax on property other than residential and agricultural property to 1.33 percent of full value.

In other words, the initiative would decrease the amount of relief given to businesses by reassessing commercial and industrial property to market value and increasing the maximum tax rate on those properties from 1 percent to 1.33 percent.

Supporters of the initiative state that commercial and industrial properties would still pay less than half of the tax rate they paid before Proposition 13 passed.

However, San Luis Obispo County Assessor Dick Frank said these estimates of extra state tax revenue don’t include the cost of personnel to implement the initiative.

"Poor initiative," said Frank. The statistics are badly staggered.

The assessor said that he doesn’t think Cal Poly would receive any additional benefits from passage of the split roll initiative. This is because Cal Poly, he explained, doesn’t receive any of its funding from property taxes.

Student support group

Fighting the alcoholic’s grip

BY MAURA THURMAN
Staff Writer

Embarrassment. Confusion. Helplessness, hopelessness. pity. These are just a few of the emotions felt by people who realize a friend, family member, or an alcoholic, said a campus alcohol educator.

Senior child development major Maureen Shea directs Cal Poly’s first support group for students who are affected by alcoholics; a description she said could fit a quarter of the university population.

Studies have shown that about 10 percent of any group is alcoholic, Shea said, and that each problem drinker has a disruptive effect on the lives of four others.

"These people who are close to a problem drinker have been ignored," Shea said. "I come from an alcoholic situation and I’ve been through a similar program. I know how much it can help.

Shea, who is aided in the program by Health Center counselor Joan Crome, said her role in the group is mainly to put discussion going.

"The group members help themselves," she said. "They help each other realize they shouldn’t feel bad for hating someone they love."

A 21-year-old Cal Poly sophomore, who wished to remain anonymous, said her first reaction to the group was relief.

"The whole meeting I was just so glad that I was there," she said. "I just kept thinking how many other people could benefit from it."

The student said her father has been an alcoholic "probably for 30 years," and that she could describe two Cal Poly friends as problem drinkers as well.

The Name Of The Game

In MOS.

If you're an engineering student who wants to break into the semiconductor field, you already know that MOS is the hot technology right now. The name of the game in MOS, though, is Fairchild. We're out to achieve leadership in MOS through substantial R&D funding and capital improvements. Along with a commitment to quality and flawless execution, a commitment made through modern consensus style management techniques.

Our strength comes from the resources of a multinational dollar international firm determined to establish leadership in semiconductors. A firm that has been a leader in quality and innovation, Schlumberger Limited. The name of the game in MOS is Fairchild. To find out more, talk to our representatives.

We'll Be At San Luis Obispo

Vera Otto chosen 1982 Poly Rodeo Queen

BY STEPHANIE WINN

St Mary’s

They weren’t wearing long dresses and high heels, but last Thursday night’s queen contestants at Madonna Inn were none-the-less beautiful in their western outfits that included boots as well as hats. Five Cal Poly women ran in the 1982 Poly Royal Rodeo Queen contest, a competition that lasted two days.

For newly-crowned Poly Royal Rodeo Queen Vera Otto, Thursday night’s glory was just the beginning of a lot of hard work.

“I never expected to win,” said the 22-year-old Otto. “But now that I’ve prepared to put in a lot of effort in order to represent Cal Poly well at the finals.”

Otto is an animal science graduate of Cal Poly who is pursuing a second degree in agriculture business management. She said she plans to combine her love for flying with her agricultural knowledge and become an aerial surveyor.

Along with representing Cal Poly’s rodeo club throughout the year, this year’s queen will also compete in June at the National Intercollegiate Rodeo Queen finals held in Bozeman, Montana.

This year’s recipient of the rodeo crown was presented with a sterling silver buckle, a hatpin, numerous gift certificates donated by local merchants and a perpetual trophy donated by retiring queen Leslie Ferreira and her mother, Erelane Ferreira. A gift from the San Luis Obispo County Cowbelles was also awarded to the new queen.

First runner-up in the queen contest, Charlotte Stott, said the most challenging part of the contest for her was the riding portion, “But it was also the funnest,” she added.

The riding portion of the contest, which constituted 30 percent of the contestant’s score, was held on Wednesday at the rodeo arena on campus. Contestants were not only asked to ride their own horses through a stock pattern, but were also asked by the judges to switch mounts and repeat the pattern on a horse they had never ridden before.

“Swinging mounts was probably the most intense part of the contest,” said Ferreira. “It’s much more difficult to ride someone else’s horse through a stock pattern."

The riding portion included figure sights, where the horse is galloped and asked to switch leads in the middle of the sight, riding stops and half turns. Contestants also demonstrated goat tying skills. This event, common in college rodeos, involves riding to one end of the arena, dismounting and tying three legs of a goat so that they are secure.

The poise, personality and appearance phase of the contest was held the final night in the Garden Room of Madonna Inn. Seventy percent of the contestants score was based on this portion of the contest. The five women modeled their western attire in front of six judges who scored them on their speaking ability, poise and appearance.

The contestants were asked questions such as, “What is your definition of a best friend?” and “What does your dream man look like?” They were also asked questions pertaining to the national intercollegiate rodeo program and specific questions dealing with the Cal Poly rodeo club and team.

Vera Otto, second runner-up in the contest, said although the contest was pretty tough, she was glad she entered it because, “the people I met were really nice and it really tested my knowledge.”

The other contestants in the contest were Lorna Holloway and Lori Rodrigues. Eden Goforth who competed in the riding portion was unable to continue in the contest due to illness.

Ferreira, who said she hopes the rodeo club will utilize the new queen better than she had been, explained that the queen can be an important asset to a school like Cal Poly.

During her reign as Poly Royal Rodeo Queen, Otto will be asked to talk on local radio stations, help give demonstrations at grammar schools in the area and be available to answer questions about the rodeo club and Cal Poly in general.

Medical author: Ethics can be touchy

BY SHARYN SEARS

Problems of clinical ethics have been much more pronounced by advances in medical technology, a co-author of a book on the subject said yesterday.

Technological advances have made a patient’s participation in decisions affecting their treatment and surgery harder for him to understand, said Dr. William Winslade.

Winslade, co-director of the program in medicine, law and human values at the University of California at Los Angeles, used case histories to illustrate his point.

Winslade told of a 79-year-old Los Angeles man who had gangrene in his foot. Surgery was necessary to remove his foot to stop the gangrene from spreading, but the patient kept changing his mind about consenting to surgery. The man was given pills to relieve the pain caused by his affliction, and he refused surgery because he believed he was getting better. On one occasion that Winslade interviewed him, he did not even recall his doctor telling him he had gangrene.

Believing he was not fit to decide for himself, the man’s family sought a court order for surgery against his will. The judge received conflicting medical testimony; some doctors said he was mentally competent, others said he was not.

The judge ordered the technological capacity to cure a patient of something that would otherwise kill him for the clinician to approach such cases from a human values perspective, according to Winslade.

The question of whether patients preferences should be respected when they may be mentally incompetent to make a decision has, at least in this case, brought clinical issues into the courtroom. Winslade cited another case in which a 79-year-old...

Professional Engineers will hold a meeting Wednesday at 4 p.m. in University Union Room 218. Guest speaker Cathy Sanchea of the Department of Water Resources will discuss employment opportunities for engineers.

Basketball
By popular demand, 5-on-5 men's basketball will be offered again this quarter. Send a team manager to the manager's meeting tonight at 7 in Science North Room 212 to sign up.

ASIF Films
ASIF Films will present the futuristic drama "Escape From New York" on Wednesday in Chumash Auditorium. Cost is $1 and shows are at 7 and 9:30 p.m.
Bag design wins cold cash

A Cal Poly graphic communications major earned $300 in cold cash for designing a bag for a San Luis Obispo manufacturer.

Lindy Hoppough, a 23-year-old graphics major with a design option, took the $300 first place award in a competition to design bag or Pacific Ice, a company that will soon be manufacturing ice in San Luis Obispo. The award was announced at a small ceremony Monday.

Hoppough’s design featured a polar bear whose ice truck is stranded on top a mound of crushed ice. Hoppough said the idea for the design developed over time.

“I had a couple of ideas running through my head. I wanted to do something with an ice truck...I was thinking of an arctic image. Somehow the polar bear ended up in the ice truck,” said Hoppough.

Marlyn Stickler, wife of Pacific Ice owner Don Stickler, praised the winning design for being eye-catching and displaying warmth. Stickler presented the award on behalf of Pacific Ice.

Al Traving, a 25-year-old art major, took second place in the competition and received a bribe case. Erin Thomas, a 20-year-old graphic communications major, won a pen and pencil set for coming third in the contest.

Twenty-three-year-old graphic communications major Mike Ainscow was awarded a pen for fourth place.

From page 1

disagree. “More money in the state better gives us a better chance to receive money from a larger pool of funds,” he said.

Hawk said that registration fees for fall of next year are forecasted to cost students between $129 and $140 per quarter. He said he feels split roll should be the concern of all students because its passage would have a positive effect on higher education programs in the state.

“The system is deteriorating and a lot of it has to do with the passage of Proposition 13,” said Hawk. “Counties must fund themselves so states don’t have to bail them out.”

Along with increasing the commercial and industrial property tax rate to 1.33 percent, the amendment would cut property tax assessment increases in bail for all homeowners moving since 1975 or in the future.

The property would be taxed not on its full cash value at the date of the ownership change, as under Proposition 13. Instead, 50 percent of the increase in the full value base of such property would be exempt as long as the purchasers continue to own and occupy the property.

Section three of the amendment states that the initiative would also require the Legislature to provide tax credit to all renter households. It would set minimum credits at $100 for single people and $200 for married couples, heads of households and surviving spouses.

At the present time the state personal income tax law provides a refundable renters credit of $60 for single people and $117 for married couples.

Increased funds

Allen Settle, a political science professor or Cal Poly’s San Luis Obispo City Council member, said he thinks passage of the initiative might create possible funds for many of Cal Poly’s slashed programs.

Supporters of the initiative, along with Settle, see the initiative as a way to retain even out the relief between different types of property while still supporting homeowner property values.

“Because homeowners change ownership more frequently than do business properties, homeowners are reassessed under Proposition 13 more frequently, therefore they bear a larger share of the overall property tax load,” he said.

Frank said, however, that he feels the effect of the initiative is how to determine which property is actually residential and after that is decided, determine if the property is owner-occupied.

The initiative campaign on campus has already collected several hundred signatures to get the initiative on the November ballot. Johnson said their goal is to attain 2,000 signatures by the end of May in order to assure a place for it on the ballot. ASI volunteers will be out collecting signatures again by next week, said Johnson.

“[We’ll be putting in our very best effort to see that this viable initiative gets on the ballot in November],” he said.

Technology entangles ethical choices

From page 3

Winslade said.

A physician who prescribed different treatment was able to restore her mental awareness of the suffering woman to a degenerated state of her mind, said Winslade.

However, respecting the patient's wishes, Winslade said, would have been assisting a suicide.

The medical technology that brought her back was part of the problem," said Winslade.

Winslade added that the medical profession should have a legal obligation to prevent euthanasia.

Clinicians should not provide interventions that are designed to hasten death, Winslade said, in the case of a patient that is "persistent vegetable with no chance of recovering.

Winslade’s speech was the ninth lecture in the Communicative Arts and Sciences series, "Technology and Human Values."
Trackmen can't clear Irvine hurdle

BY ANDY BERGHEIMER
Sports Writer

The Mustang track team wanted to get off on the right foot in Saturday's dual meet against host Irvine, but unfortunately, it chose the right foot of steeplechase Joe Green to start it off. Joe, a national qualifier with a best of 9:12, tripped over the first water barrier and barely dipped into the pit, and then got up stopped by teammates Steve Offill as he tried to get up. Things improved only slightly for the Mustangs, who were downed by the Anteaters 94-69.

After his even dive and being used as a cushion by Offill, Green did manage to get up and run the 1,600 meters to finish a no-scoring fourth in a gritty 5:30. Luckily, his uniform was dry-clean.

The beautiful skies of Orange County began raining 30 minutes before the steeps, and Green later said that he recalculated his push-off from the barrier.

But when the Mustangs got up in the event order, 40.5 to 40.9, they were trailing the Division I Anteaters, 15-1.

Poly won seven of the last 10 events, including by a good depth secured the win.

In fact, the meet's events have been totally different. The Mustangs not lost three crucial events—the short relay, the mile relay, and the 1600. The mile relay team of a pole vaulter, a half-miler, and two timed runners finished second behind UC Irvine's first team.

3:16 to 3:17, while the Mustangs were sweeps in the 8000, good for fourth Irvine points. Home scoring in those three events the Mustangs would have finished a result in win.

Poly head coach Tom Henderson, although not too thrilled with the outcome, said he was proud of his team's performances.

"I think it was much better than the scores indicated," said Henderson after suffering the first dual-meet loss in his head-coaching career. "Our guys performed really well. We had 10 season bests, five lifetime bests, and had two guys qualify for the nationals. It was a really close meet."

While the runners weren't putting their fair share of the point production, the rest of the team had a field day. The Mustangs won five of the eight field events, and grabbed second-place finishes in the other.

Ron Wayne and Terry Armitage joined the ranks of the national qualifiers with season-best long jumps of 14-4 and 14-3 for first and third, respectively, while Armitage came back to win the triple jump with a leap of 49-8 12/16. Dave Kibort won the hurdles in 14-1/2 1/2 for a big win and a season best, and Steve Thomas and Mark Kibort each cleared 16 feet to finish 3-3 in the long jump.

Matt Butterworth threw a lifetime best of 188-4 2/4 to win the javelin, and Allen Abraham took second in the discus and the shot put. Kibort, the Mustangs' best distance, took third in the discus with a lifetime best of 131-2. All in all, the field events as for 40 of the Mustangs' 60 points.

However, there were a few outstanding performances on the track. Brad Underwood continued to amaze fans as he again lowered his 400 intermediate hurdles time. Underwood, whose loss was bittersweet to him so much after he finished second in the 100 low hurdles that he was considering not running his specialty, sliced more than a second off his previous best.

He won the run handily in 11.94, which is leading the Division II nation this season back. Said Henderson, "The guy just keeps running faster and faster."

Spring Pat Croft continued to compete consistently, running unclassified in the open 400 and finishing second in the 200 in 21.5. Verna Smith second in the 1,500 in 4:51.5, and Gordon Reed ran a lifetime best of 59.3 to finish third in the 400 intermediate hurdles.

The women's team could last through only five events before the whole and rain of Berkeley forced the Mustangs out of the Cal-Nike Invitational Saturday.

However, both Chris Doherty and Liz Cerrillo qualified for the nationals in the heptathlon. Doherty, who placed in the heptathlon in last year's nationals, finished second with 5055, while Cerrillo, her first competition ever, came in fourth with 4710 points.

Mustang 9 hurdle through weekend, lose three

BY DAVE WILCOX
Staff Writer

As far as the Cal Poly baseball team was concerned, there was nothing left to lose last weekend.

Playing despite a steady rain that delayed the start of the final game 1 1/2 hours, Cal State Northridge combined an average of one hit and some timely hitting to dismantle the Mustang nine and complete a three-game sweep by capturing both Saturday's doubleheader at Northridge, 9-1 and 13-0.

The Mustangs, who occupy the top spot in the California Collegiate Athletic Association standings with an 11-0 mark, opened up the series Friday using three home runs to bomb the Mustangs, 7-4.

Although Compano's record dipped to 5-0 with Friday's loss, Harr praised the senior lefthander's efforts but said unfortunately Northridge capitalized on his only three mistakes.

Saturday's doubleheader had something for both teams.

The opening game featured a brilliant pitching battle between the Mustangs' Joe Flannego and Northridge's Bob Schok as each allowed the opposing hitters just four hits.

The Mustangs mounted their only serious scoring threat of the whole afternoon in the first inning as they loaded the bases with just one out after Poly's John Scott hit single home Robj Tambar t with what turned out to be the Mustangs only tally. But groundballs by Mike Wecker and Bryan Biederle were turned into force-outs at home plate and Schok proceeded to retire 14 of the remaining 22 Mustang hitters.

It was a heartbreaking defeat for Flanengoo, who watched Mustang centerfielder Mike O'Hara scamper across the plate in the third inning after he was able to run after his pitch bounced away from the catcher.

Larry Pett

In the second game, the small crowd at the game watched Northridge stage its own dramatic day early with 13 Mustangs marching across home plate.

Leading the charge for the Matadors against a trio of Mustang hurlers was Tim Collins, who cracked a two-run home run in the first inning with two out. Pett also had a two-run single in the third and a two-run home run in the fifth.

Pett's home run led to the Mustangs' first mistake as Northridge's Jack Neall bounced a single into left field for Pett's first hit. Holmes got in a little hot water after that as he walked the next two Mustangs to load the bases. But he ended the inning by strking out Peter Fong and allowed only one more single in the final two innings, finishing with a silky two-hitter.

After being disappointed following the twinning ball, reflected positively that he was pleased his club had not bowed themself.

Spikers drop heartbreaker in home finale, 3-2

BY MIKE MATHISON
Staff Writer

The scoreboard said more than any spoken words could have.

By the final score of the fifth and deciding game of Saturday night’s crucial California Collegiate Volleyball Conference contest between Cal Poly and visiting UC San Diego, it would appear this was a very exciting affair. It was. Or at least the final three games were.

After dropping the first two games 10-18 and 7-15 it appeared the Mustangs were going to allow the fans to get out of the dry confines of the main gym early.

But such was not the case. Cal Poly, realizing this was the last regular season home match ever under the athletic budget and a win would give it the inside track at hosting the state tournament. May 6 and 9, decided to tighten things up a bit.

In game three the Mustangs turned an 8-5 deficit into a 15-8 lead. And in game four Cal Poly raced to a 10-2 lead before a 1-1 tie at 16. As one point the serve changed sides 12 times before a point was registered.

After the serve changed hands 16 times, the score stood knotted at 5-2. This game was going to take a while.

Both teams loosened up from their obvious nervousness and when Warren Strand nailed an Eddie Pettit set down on the Tritons’ part of the hardwood, the Mustangs led 6-2. But like Cal Poly earlier, UCSD was not going to be denied. The La Jollans eventually tied it at 9-9.

The Mustangs, determined to make the Tritons’ 300 mile trip home seem more like 500, exploded for five of the next six points and a 1-10 advantage. Game and match point, Cal Poly. Side-out UCSD.

The visitors promptly won the ensuing five points for a 13-14 lead. Game and match point, UCSD. Side-out Cal Poly—game and match point, UCSD. Side-out Cal Poly.

Ruse Bird served the score at 15-15 with a kill which was set up by a beautiful dig by Strand. The Mustangs took one, 16-15. Mustangs. Game and match point, Cal Poly. Side-out UCSD.

The Mustangs had next two kill opportunities beyond the yellow boundary line of the court. 17-16 Tritons. Game and match point. C al Poly. Side-out UCSD. Side-out UCSD—game and match point. UCSD. Point and match T rain e d and UCSD.

Russ Bird then missed a shot and the Tritons hit one of theirs giving the Mustangs a 14-17 lead. Game and match point. Mustangs. Side-out UCSD. Side-out UCSD—game and match point. UCSD. Side-out Cal Poly.

With a kill which was set up by a beautiful dig by Strand, the Mustangs took one out, 16-15. Mustangs. Game and match point, Cal Poly. Side-out UCSD.

The Mustangs held their last two kill opportunities beyond the yellow boundary line of the court. 17-16 Tritons. Game and match point, UCSD. Side-out Cal Poly. Side-out UCSD—game and match point. UCSD. Point and match T rain e d and UCSD.

After dropping the first two games 10-18 and 7-15 it appeared the Mustangs couldn’t get the point it wanted when it needed most in the match.

With the loss the Mustangs are in a three-way tie with UCSD and Cal State Northridge in the CCVC title chase with 5-2 records. Cal Poly can give itself a share of the CCVC crown with a win over the Tritons Saturday night on the road against UC Riverside.

Mustang roundup

Schedule for week of April 13-18
TUESDAY
Men’s indoor:
Cal State Bakersfield at Cal Poly, 7 p.m.
Women’s室内:
Cal Poly at Cal State Fullerton, 7 p.m.

WEDNESDAY
Men’s室内:
Cal Poly at UC Riverside, 7:30 p.m.

THURSDAY
Women’s室内:
UCSD at San Diego State

FRIDAY
Men’s室内:
Cal Poly at UCSD, 7 p.m.

SATURDAY
Baseball:
Cal Poly at Cal State Dominguez Hills, noon

Women’s室内:
UCSD at San Diego State

SUNDAY
Baseball:
Cal Poly at UC Riverside, 2:30 p.m.

Baseball:
Cal Poly at Cal State Dominguez Hills, 1 p.m.

Men’s室内:
UCSD at UCSD, 7 p.m.

Women’s室内:
UCSD at UCSD, 7 p.m.
Opinion

Falkland crises

Until April 2, the Falkland Islands were either unknown to most of the world's population, or at best a small group of harsh, remote islands in the far South Atlantic, carrying little intrinsic value. Nevertheless, their takeover by Argentina represents a direct slap in the face to the order of international law and diplomacy, as well as the islanders' human rights.

So many, the Falkland crisis may just represent the climax of a 150-year-old struggle between Great Britain and Argentina for control of the islands. Argentina's military invasion of the Falklands, however, stands as a violation of both the United Nations Charter and the 1947 Rio Treaty on inter-American defense, by which the signing nations renounced the use of armed forces in North or South America. Since April 3, Argentina has also been in violation of a U.N. Security Council order to withdraw its forces from the islands.

With or without justification, Argentina has laid claim to the Falklands ever since their British takeover in 1833. However, the April 2 invasion was prompted mainly by the deteriorating political/economic situation in Argentina. The six-year-old military junta, led by President Leopoldo Galtieri, has found the Falklands to be an effective means of drumming up patriotic support. The invasion also serves to divert attention from Argentina's 150 percent inflation and 13 percent unemployment rates, as well as its loss of human rights record.

The government's most profound violation, however, has been of the human rights of the Falkland's 1,800 residents. The U.N. Charter makes it clear that self-determination is a basic right of all peoples and a prerequisite to normal relations between nations. For years, Great Britain has said it would surrender the Falklands to Argentina only if its residents consented. So far they have been opposed to such a move, preferring to be affiliated with Great Britain to the usually unstable Argentine government.

So far, the role of the United States in the crisis has been as a neutral mediator. Before the British Navy reaches the Falklands to challenge the Argentinean takeover, our only course is to try to reach a peaceful negotiated settlement, granting self-determination for the Falkland residents.

Should these efforts fail, the United States should follow the same course already taken by Great Britain, the Security Council and the European Economic Community by giving diplomatic backing to Britain, a long-standing friend with whom we share the same political, economic and strategic interests.

Brainless women

Editor:

Stanny Stoked is an obvious male chauvinist, and his article has a rather disgusting sexism attitude towards women. In Tuesday's comic, a woman is depicted as brainless and chaste. It is not only bad for women's credit, it also gave the illusion that she liked Stanny's abuses above.

I'd like to inform Stanny and his readers that we are getting brainier and more selective in their relationships with men. Women are demanding equality in having their needs met and they are demanding active communication. To show a bouncing half-wit falling for a surfing m-wit not only insults women, but also prolongs the attitude that they are not better than what they are.

Most of our world conflicts are due to some kind of ethnic, national, prejudice, power struggle, instead of an attitude of reciprocal respect and understanding. What men and women need, as well as people as a whole, more than a superior attitude, is to treat one another with acknowledgement and courtesy. That is the pathway to peace, as well as to successful relationships.

Letters

Myopic vision

Editor:

Expensive dinosaurs indeed! The Mustang Daily Editorial Board consistently fails to view the nuclear power issues with more myopic vision. While one study showed an increase in mental stress among some individuals during the accident at TMI, the Daily scrupulously avoids the well-documented conclusion that it was in fact the fearmongering media representatives that were responsible for the stress-causing exaggerations in the first place.

The Daily is by no means immune... and the fear instilled by the stark reality of a near meltdown, the editors imply. For most of the masses, the Daily hopes this will conjure up everything from the bomb to California sinking into the sea. The fact is, though, real accidents and reactors that the government has deliberately melted down and completely destroyed have proven that the public has little to fear from their "neighborhood" mikes. At Windscale, England, 1957 a nuclear graphite reactor caught fire too containment domes in those days releasing thousands of times more radioactive gas than at TMI, and guess what happened...that's right, nothing. The cows still roamed the nearby pastures and after six or seven years there's no sign of cancer. The 'great' danger is a hoax.

Daily policy

Letters and press releases may be submitted to the Mustang Daily by bringing them to the Daily office in Room 226 of the Graphic Arts Building, or by sending them to: Editor, Mustang Daily, GrC 226, Cal Poly, San Luis Obispo, CA 93407. Letters must be double-spaced and include the writers' signature and phone numbers.

Editor’s reserve the right to edit letters for length and style, and to omit libelous statements. Letters should be kept as short as possible. Inordinately long letters will not be printed.

The Mustang Daily encourages readers' opinions, criticisms and comments on news stories and editorials.
