Bauer, who hopes to have fund-raisers plant on the campus' South Perimeter to work on designs for the showers in the main gym. Lee said he felt San Luis Obispo is still in the design stage, "It's still in the design stage," said Johnson. "We still need to work out the components for cost." Added Campbell, "We're still monitoring exactly how much water and energy is used for this part of the gym.

The water is presently heated by steam produced at the steam power plant on the campus' South Perimeter Road. But, according to Johnson, the steam is not sub-metered and "there is no figure that tells how much is being used and where.

Johnson added that although he does not know the monthly bill for the generated power, solar energy could "really cut back the cost." Even if it's only a 20 percent savings, added Campbell, "that's a lot when you consider the entire bill.'

BFAsers weather cramped quarters

BY STEPHANIE WINN Staff Writer

Although lack of space at Cal Poly is a growing problem for the annual Future Farmers of America conference, it looks like the conference will continue holding its meetings and judging contests on campus next year.

The FFA organization, designed to promote and improve agriculture education among high school students, has met every year since the 1930's, said Kip Rutty, agriculture education specialist.

The conference was May 1-4 and was attended by nearly 1,000 students.

Rutty said students take care of business for the coming year at the convention, resolutions are passed and state officials are elected. Proiciency tests which include written exams as well as judging evaluations are also included at the conventions.

Organizers said the possibility of changing the location of the conference was brought up within the last year. Among the universities bidding to have the conference held at their campus are Fresno State University, CRC, and Poly.

Eric Knight, this year's state FFA treasurer from U.C. Davis, explained that one of the problems associated with having the conference at Cal Poly is the lack of room.

"The conference is getting bigger every year," he said. "We only had 60 extra seats for guests this year, last year we had plenty.

Knight said that another problem that added to the overcrowded situation was the order by the San Luis Obispo fire marshal to reduce the seating capacity at Chumash Auditorium. "Last year 915 people attended the conference, this year we had to limit attendance to 747 people in order to meet the new regulations," said Knight.

Knight said that 290 chapters out of the 323 chapters in California attended the conference.

Senior project would convert pool to solar heating

BY JEANETTE VAN BERKEL Staff Writer

If the senior projects of four students are found to be economically feasible, Cal Poly may have its pool and domestic water supply in the gym heated by solar power.

The environmental engineering students, urged by ASI Senator Cam Bauer to consider the possibility of solar power on campus, have begun designs for the $40,000 project.

Bauer, who hopes to have fund raisers next fall for the construction, said he approached students in solar engineering because he "saw a real need for energy conservation at Poly.

I also saw that the state was in a bad financial situation," said Bauer. "There is a definite need to cut back on spending and this is one way to do it.

Bauer also added there is "lots of interest in the field of solar energy among students and faculty. People here are aware of the need for alternative energy sources," he said.

Seniors Don Campbell, 23, and Tom Johnson, 22, were interested in the senator's speech made at the end of Winter Quarter. They have been assigned to work on designs for the showers and other domestic hot water supplies in the main gym.

Design stage

"It's still in the design stage," said Johnson. "We still need to work out the components for cost." Added Campbell, "We're still monitoring exactly how much water and energy is used for this part of the gym.

The water is presently heated by steam produced at the steam power plant on the campus' South Perimeter

Environmental engineering majors Tim Johnson (left) and Don Campbell on the roof of the Physical Education Building. The students' joint senior project may use solar heat for showers in the building.
Argentina sinks British ship

The British destroyer HMS Sheffield Tuesday, sending it down in flames, and there were a number of casualties, among the warship's 280 seamen, the British Defense Ministry announced. The counterfeit came as Argentine rescue craft continued searching for survivors from the cruiser.

Argentina announced that at least 60 crewmen have been rescued, leaving about 360 sailors still missing.

British news media said the seven-year-old Sheffield, one of the most modern warships in the Royal Navy, was hit by a missile fired by an Argentine jet fighter from a distance of more than 20 miles.

CANDIDATES air viewpoints

From page 1

"We are waiting for the proposed intramural center or U.U. Annex to serve students," asked if they support a Greek Row of fraternity and sorority houses on campus, all four candidates answered affirmatively.

A "strong role in making Greek Row a reality," Hartley said. Clary said she disagreed with Hartley's proposal to coordinate with the fraternity and sororities on the project because "the Greeks don't want ASI telling them how to run the project."

KODACOLOR Film negatives, color slides,
VP hopeful will bring students to ASI......

BY PETER HASS

Communicating to students that "they are ASI" is one of the goals of ASI vice president candidate Larry Greene.

Many of the junior economics major's proposals deal with the administration of the Student Senate, which the vice president chairs.

"I would like to make the Student Senate more responsible for its actions and run the Senate more efficiently," Greene said.

"To do this, Greene said he would bring more order to Senate meetings, require mandatory attendance at workshops on the issues, provide more information to senators on procedure, and promote a "working together relationship" among Senate members.

Greene also said that communication between the Senate and the ASI finance committee of which he is the student representative is a problem. He suggested that senators be given the chance to question and approve finance committee representatives so that they know who they are working with.

Greene said ASI communication with students can be improved if the "ASI Times" is run weekly in the Mustang Daily and Senate-related information is announced over KCPR, Cal Poly's radio station.

In addition, Greene said he would like to hold some Senate meetings in the dorms and meet with students in the University Union since, he feels, "exposure is the word."

Projects Greene voiced his support for include an intramurals facility, a photocopying center, and "Greek Row" on campus. He encourages ASI support for the Greek Row project.

...other will bring ASI finances to students

BY PETER HASS

A desire to provide better communications between the Student Senate and its committees, as well as between ASI and students made ASI finance chair, Larry Greene decide to run for ASI vice president.

The junior economics major sees the Student Senate as the vice president's tool to "make the Student Senate more effective," Greene said.

Many of the Junior economics major's ideas deal with money issues.

Greene said ASI communication with students can be improved if the "ASI Times" is run weekly in the Mustang Daily and Senate-related information is announced over KCPR, Cal Poly's radio station.

In addition, Greene said he would like to hold some Senate meetings in the dorms and meet with students in the University Union since, he feels, "exposure is the word."

Projects Greene voiced his support for include an intramurals facility, a photocopying center, and "Greek Row" on campus. He encourages ASI support for the Greek Row project.

He also said he supports an increase in the intramurals program. Moses cited that 7,000 students are served by the program, and that it needs help in administration.

"It is a $40,000 per year program and it has only one person running it," he said.

As for communications between ASI and the student body, Moses would like to write regular articles in the Mustang Daily "conveying important ASI issues and the student government's actions on such matters."

Senate candidates declare planks

AGRICULTURE AND NATURAL RESOURCES

Karl Zwanegger
Major: Animal Science

As the times and students change at Cal Poly, so must the attitude of a student senator representing the students at large. We as students need to be able to express our views and opinions on the various issues confronting our university and our future livelihood as students on this campus. I believe the proper channel to express desires is through the Student Senate.

Blake Alexandre
Major: Dairy Science

As a student senator I have much to offer the School of Agriculture and Natural Resources. Last year I had the opportunity to serve as one of the six California State Officers for the Future Farmers of America. This required much leadership and included many responsibilities. Being a state officer also included meeting individually with Governor Brown and Lieutenant Governor Curb. I worked with the Director of Food and Agriculture Richard Rominger.

Randy Jones
Major: Ag Management

There are many different and varying issues and events that confront the students at Cal Poly and in particular the ASI Student Senate. I have been a student here for nearly three years and have observed and participated in school clubs, organizations, and events and feel I have the experience and maturity to carry out the duties of a student senator.

Martin Mc Keelis
Major: Animal Science/Ag Education

I realize that the Student Senate is a powerful body and has a large influence on the students. During my past three years here at Cal Poly I have gained considerable experience, and developed an awareness and concern for student affairs. As a student senator I would actively seek the opinion and defend to the best interest the School of Agriculture's clubs, organizations, and particularly, the individual student.

Lauren Shanahan
Major: Ag Business Management

Being an effective senator involves more than a weekly meeting. I strongly feel that a senator must take upon him/herself to attend workshops, make him/herself known and available to students and school clubs, be willing to take personal time to research issues, and most of all to be a decisive and active leader in Student Senate. A way in which this task can be accomplished is by strengthening the ties between the students, school clubs, Ag Council and the senators; assuring that the senators will get the most accurate and current input to take action on.

Stephen Remmers
Major: OH

The School of Agriculture and Natural Resources contains a large percentage of the Cal Poly population. All too often, the needs of these people are not met. The ASI continues to cut funds from vital programs and activities on the School of Agriculture while student fees continue to increase. I believe the Student Senate should take a more active interest in the distribution of funds to those minor programs.

Jeff Sanders
Major: Ag Management

The School of Agriculture and Natural Resources has always been well represented in the ASI at Cal Poly. In order to keep up our good reputation, we need Student Senators that are willing to dedicate much time and energy toward representing our constituents. I know that I have the leadership and enthusiasm to do the job required to be an outstanding Student Senate representative for our school.

ARCHITECTURE AND ENVIRONMENTAL DESIGN

Thomas G. Kimbrell
Major: Architecture

Personally, being of a vocal and highly non-apathetic nature, I feel I can bring to the ASI some active involvement and voice from the School of Architecture and Environmental design. Since I've purposely and been involved in any group or organization related to the school, I feel my approach will be fresh, objective, non-biased and representative of the majority.

Dean Thorn
Major: Construction

I intend to represent the students in the School of Architecture and Environmental Design fairly, honestly and competently. Hopefully, this will instill dedication, participation and commitment by the student body. The school just needs someone to care. I care.

Trina Auelmann
Major: Architecture

The purpose of Student Senate is to represent and support student opinion. This can only be achieved through communication. In order for a student senator to be effective on any issue, student input must be communicated soon enough so that students can influence issues in the development stage rather than react to decisions. I believe that this is something that is not currently occurring and I would hope to encourage.

---

**Student Senate candidates express their views**

---

**John De Angelis**

**Major: Architecture**

After sitting on the Student Senate for two years and then taking this past year off, it is clear to me that the Student Senate needs strong internal leadership. With my experience I can provide that leadership, not only for the School of Architecture, but for the entire university.

---

**Tammy Brandon**

**Major: Business Administration**

For the past year, I have been the Assistant Editor of the Campus Media Community. I put some of the ASI Times. Through this job I have learned the different sides of the crucial issues which are now facing the Student Senate. Thus, as a Senator for the School of Business, I would be able to take the opinions of business students and implement them in a knowledgeable manner.

---

**Timothy Jones**

**Major: Business Administration**

My platform is simple. I want to reestablish a direct communication with the business students and their respective clubs. I also want to reintegrate a more responsive and challenging Senate that actively represents the important needs of students at Cal Poly.

---

**Stephen Campbell**

**Major: Business**

Be sure to vote today, and vote for me. I have the skills, experience, and enthusiasm to do the best possible job as your senator. I will work to maintain the minor sports program and work at finding a perpetual funding base for all of Cal Poly's sports programs. I will also work for an equitable solution of the conflicts with the intramural sports program.

---

**Kevin Charles**

**Major: Political Science**

In my study of politics, I have discovered that the most important aspect of any government’s task is the communication with its constituency. In speaking with Cal Poly students I have found that they have deep concerns for such issues as sports cutsbacks, the lack of adequate funding, and increased tuition fees. As ASI Senator, I will direct my energies toward these issues.

---

**Gregory M. Stiller**

**Major: Political Science**

I feel that one of the most important problems facing ASI is communication. As a senator it would be my goal to bring the student population and ASI government closer together so that the interests of the students can be heard and met. I would also like to see more activities for the School of Communicative Arts.

---

**June Aiken**

**Major: Social Science**

As a junior social science major I have been involved in several ASI committees along with active participation in several clubs and organizations in the School of Communicative Arts and Humanities. My experience in these areas has given me an insight into the workings of both ASI and the School of CAH.

In order to adequately represent CAH I feel it is necessary to be involved in the community. There I will actively pursue goals I feel will provide better representation of our school in the ASI.

---

**Brian Raymonds**

**Major: Political Science**

This year, ASI Senate made much progress in tackling major problems such as “minor sports.” Next year, I am going to seek legislation that addresses these issues, and I am already familiar with the tasks we face and actively seeking solutions to them.

As a senator now, I serve on several committees and chair a Minor Sports Task Force as well as Academic Committee. Re-election is the best possible way for me to follow-up with plans we've initiated this year.

---

**Cameron Bean**

**Major: Mathematics**

As a sophomore math major, my involvement at Cal Poly, to date, has been on the University Long Range Planning Committee, the Academic Council and the Student Senate. My major goals for next year are improving communication with the ASI, striving to maintain affordable education, and improving the productivity of the Science and Math Council.

---

**Krisite Lahy**

**Major: Environmental & Systematic Biology**

My involvement in student government started when I was elected Student Body Treasurer for my high school. I enjoyed my work and wanted to continue to involve myself in politics when I entered college. As a junior environmental and systematic major I decided I was ready for the position on the Senate of the School of Science and Mathematics.

---

**Douglas Whitten**

**Major: Computer Science**

As a student senator for the past two years, I have communicated student opinions to the ASI. If re-elected, I can provide a long term viewpoint and continue to represent the students to the ASI. For responsible representation, re-elect David Chapman to the Student Senate from the School of Science and Mathematics.

---

**HUMAN DEVELOPMENT AND EDUCATION**

**Douglas Whitten**

**Major: Child Development**

I intend to pursue legislative options on the following:

1. Expansion of Intramurals — New Intramural Facilities
2. Revision of the IRA Board
3. Fund Raising Options for ASI
4. Guaranteed Support for the Escort Service
5. Support for More Student Involvement in Campus Projects
6. Support for More Cultural Awareness in Community Affairs

---

**Suzanne Westen**

**Major: Interior Design**

I am interested in representing the School of Human Development and Education on Student Senate because I want to be a part of some of the decisions made on campus. I'm a reasonable and hard-working person, and I want to get involved in the school overall, not only in the clubs directly related to my major.

---

**Maureen Shee**

**Major: Child Development**

Through my experience as supervisor of the Alcohol Education Program, I have been exposed to the workings of the university. I feel I have developed the necessary leadership skills to become a competent senator and representative for my school.

---

**Mary Ann Gomes**

**Major: Physical Education**

My goal as student senator is to represent the School of Human Development and Education in making their voices known on developing issues and help make the School of Human Development and Education have a stronger voice in the Senate.

---

**ENGINEERING AND TECHNOLOGY**

**Robert Woolery**

**Major: Industrial Technology**

My name is Bob Woolery and I'm a senior IT student. I feel being a senator for the Engineering and Technology Department I can bring to the Senate responsible judgment and representation. Present problems with the Senate are political infighting to the point of ineffectiveness and lack of credibility with administration.

I will, as senator, work toward helping make the Senate an effective force and credible in the administration. By accomplishing the above goals, the needs of the Engineering and Technology Department can be effectively met.

---

**Peter Varcar**

**Major: Civil Engineering**

Motivation is the driving force that must be present in order to have a strong, responsible, and competent group of senators. I think with my drive and ambition this type of motivation can be achieved. It is definitely a group effort though.

---

**John Hironaka**

**Major: Mechanical Engineering**

During this economic crunch, financial planning will require great care. I feel ASI needs to benefit the majority, not a selected few. Therefore, funded programs should be scrutinized closely. Also, during this high stress years in college, there should be a place to relax. I propose a pub on campus like other universities.

---

**Donald Erickson**

**Major: Industrial Engineering**

Many problems bedevil student today — rising fees, cutbacks in academics and athletics, and aid cuts for example. To cope, students expect ASI to voice the views of the students. It has done through the CSVSA and its close contacts with the administration. However, to continue this policy ASI needs experienced leadership. I have never sought this office before, but because I have served two terms as a student senator and have been the chair of the ad hoc committee and the elections committee.

Great Week '82
Four men netters bound for nationals

The Mustangs men's tennis won three matches last weekend to close out their regular season, but the team couldn't get a full six-player bid to the national tournament in two weeks in Miami, Florida.

Instead, coach Hugh Bream will journey to the East Coast with four players, two each in singles and doubles. Martin Deddel and Colis Maggin will represent the team in the singles competition, while either the duo of Brian Bass and Colie Simmons or Tom Morris and Andrew Weber will compete for the Mustangs.

Bream will have the two doubles pairs tangling later this week in a three-game match, with the winner of two games traveling to Miami. Weber and Morris played consistent tennis for Poly during the entire season, but Simmons and Bass were coming on real strong at the end of the year according to Bream.

"I'm disappointed that we can only take two players," said Bream. "I'd have liked to take both teams back there.

The nationals will begin Thursday, May 13, and run through that Sunday. A total of 64 of the nation's best Division II players will compete in the single-elimination tournament... with six-player bids among them. The Mustangs finished eighth in the final national poll, which knocked them out of a full-team bid.

The Mustangs swept their last three matches of the regular season to end with a 14-6 overall mark. Poly ripped Westmont 5-4 Thursday in Santa Barbara, then trekked to San Diego to defeat United States International University 6-3 Friday and UC San Diego 5-4 Saturday.

Bream conceded that his team was not up to par in the Westmont match, yet still managed to win.

"We were a little down after the Hayward match, which cost us a full-team bid. We played a little flat against Westmont. We could have beaten them worse than we did. In San Diego we finished our season with two good wins. Overall, we played really well," said Bream.

The Mustangs, who on the trip defeated Div. I USIU for the first time in three years, were led by Weber at the No. 5 singles spot. Weber won all of his singles sets on the trip, and his doubles partner Morris, clinched the USCD match after fighting off three match points in his No. 4 singles contest.

The team was without the services of Simmons in the single events. Simmons, a senior who missed the first part of the season due to insubordination, was nursing an injured knee and was relegated to playing doubles with Bass.

Meanwhile, the women's squad finished its 1982 campaign with an 8-1 loss against the visiting Cal Poly Pomona Broncos on Saturday.

The Mustangs, who ended California Collegiate Athletic Association play with a 2-7 mark and an overall record of 4-9, were paced by No. 6 singles player Lori Becker. Becker dropped the first set of her match with Pomona's Sue Humphrey, 4-6, then rallied to win the last two sets 6-2, 6-4.

The only other Mustang match in a win was Lisa Mum­my, who lost her No. 2 singles match 2-1 to Margie Scott.

"It was sad to end the season with a losing match," said head coach Orin Yeates, "but the performance by the team was of high caliber. Each player gave 100 per­
cent to end the season with a good match.
Chris Hartley

Although the electoral process in our democratic system was designed with the expectation that the public would be given the choice of two or more outstanding candidates to vote for, reality has fallen far short of expectations. In most elections, one candidate clearly outshines the other or the public is forced to choose between a liar and a fool.

The race for ASI president approaches the idealistic goal of democratic elections, as when Poly students step up to the polling stations today and Thursday, they will have the pleasant task of having to choose between two well qualified candidates: Christopher Hartley and Sandra Clary.

Although the Mustang Daily Editorial Board believes that either candidate could make a good ASI president, the editorial board endorses Christopher Hartley for that post.

Hartley combines a pragmatic approach to the problems facing Cal Poly with a concern for the welfare of the students. This is readily apparent when he addresses the issue of whether student fees should be raised to help build a satellite University Union and a new intramurals facility. Hartley recognizes that some intramural basketball players must wait until 2 a.m. to pump in a few baskets because intramurals are low on the Main Gym priority list. Therefore, the ASI must consider building a new facility. But Hartley is well aware that future fee hikes might drive some poor students out of higher education. Therefore, Hartley believes the Student Senate should investigate whether the facility could be built more cheaply with less expensive materials. Also students should be allowed to voice their views via the ballot box on whether they would rather have more facilities to serve them on campus or more money in their wallets.

The Editorial Board believes Hartley has discovered a simple and equitable solution to a complex problem — the kind of decision we hope he makes habitually should he be voted into office.

Hartley's mixture of humanism and pragmatism extend to other issues such as community relations and minor sports. Hartley concedes that although student internship programs through city groups such as the Chamber of Commerce strengthen the bonds between the city and the campus, they don't solve the bickering between the two parties. Hartley suggests that possibly a Greek Row and more cultural events directed at the community as a whole would strengthen the relationships between the city and the campus.

Hartley stresses a broad based athletic program — with concentrated effort on the hopes at both the planning and budgeting stages of the intercollegiate sports program. Hartley combines the essential elements of practicality and humanism, which we feel is essential for a good ASI president.

The editorial board could not reach a consensus on who to support for vice president as we rated the candidates as equally qualified.

Editor:

Everyone involved in higher education today is facing a time of crisis that is unparalleled. Federal, state and system policies threaten to not only prevent students from completing their education, but also threaten the quality of academic and student programs. The ASI can play an active and vital role in the preservation and enhancement of quality education at Cal Poly. This can only be possible if our leadership is strong, mature and knowledgeable. Sandra Clary possesses the essential skills needed to defend the rights of students, to fight for student programs, and to enrich the educational environment at this university. Sandra has the experience and the maturity to give the ASI the leadership it needs to face and defeat the current challenges to education. We need Sandra Clary to be our next ASI president and it is with the greatest of confidence that we endorse her for that office.

Hartley recognizes the need for the ASI to exercise restraint in the development of new programs that could involve additional fees for students.

Letters

Sandra Clary

Dear Mustang Daily:

I am writing to endorse Christopher Hartley for ASI president. Although the other candidate is also qualified, Hartley combines a pragmatic approach to the problems facing Cal Poly with a concern for the welfare of the students.

Hartley is the person who will combine practical experience with innovative leadership to promote a more open and responsive student government.

Christopher Hartley realizes the need to develop new and more effective ways of dealing with student problems. I am confident that we will see changes under his leadership.

Sincerely,

Sandra Clary
