Women's locker facilities expanding

by Lorie Wertman
Staff Writer

Women at Cal Poly will soon be getting their fair share of the facilities in the physical education building. Plans for remodeling to allocate more space to women were drawn up by Peter K. Phillips, architectural coordinator. It took three months to come up with the "working drawings" that met approval, he said. Construction is underway, and the target date for completion according to Phillips is around Thanksgiving, although construction workers say it won't be finished until January.

Building the job at $129,949, Central Coast Development Company of San Luis Obispo was awarded the contract to modify the building.

When completed, the women's facilities will encompass 45% of the total space (3,843 square feet), while the men will get 60% or 5,732 square feet. Construction workers are expanding the women's locker room to accommodate many more lockers, double the number of showers, and add more restroom facilities. A new floor system is being built to support a training room to copy the upper portion of the weight room, which is now just wasted space. (The weight room was originally designed for gymnastics and trampoline — hence the extra-high ceiling).

Temporary plywood partitions have closed off portions of locker rooms during the construction, making fewer lockers available to students. Less than 200 lockers were available to women this quarter, and they went fast. Only students enrolled in PE classes were issued lockers. As a result, the bathroom near the gym is packed with women trying to get dressed and straining for a quick glimpse in the mirror.

Phillips said the money for the remodeling came from the statewide minor capital outlay fund. Each year, he explained, the university gets $200,000 to $200,000 for building projects which Phillips designs. Other projects under construction are a holding facility for hazardous wastes, a dairy unit addition, and various projects for facilitating access to the handicapped.

"Title IX," he added, "is behind the PE remodeling project," he said. Congress passed the law in 1972 forbidding sex discrimination in education programs. The mandate said that institutions receiving federal funds must have equal facilities for men and women. "Each year we get another layer of regulations to comply with," he said, "so the existing gym had to be split to accommodate both sexes and meet Title IX requirements."

Title IX Coordinator Dave Ciano, who is also director of judicial affairs, explained that even though the law was passed in 1972, regulations for implementing the law were not issued until 1975. Regulations were issued by the Department of Health, Education and Welfare, and universities were given three years to comply with Title IX terms. According to Ciano, Cal Poly was not in compliance in several aspects.

Before Title IX was passed, university men and women did not receive equitable amounts of scholarship money, and the opportunities available to women in sports were very limited. These problems have since been corrected, he assured. Then in 1978, Ciano said, a student complaint about Cal Poly's athletic facilities reached the government.

A federal investigative team came last year to see if Cal Poly did indeed fail short. "It made us nervous that the federal government was coming to stir things up," Ciano said, "but it worked to our advantage by pointing out areas where we needed improvement." Ciano gave credit to Howard West, Associate executive vice president, for shepherding Cal Poly through the investigative period.

There are four areas covered by the educators in the program: nutrition, oral health, alcoholism and family planning.

Nutrition education conducts workshops on weight loss and gain, nutrition and the residence halls, nutrition on a low budget, vegetarianism, nutrition for the physically fit, and consumerism.

In oral health — or dental care — services focus on visual examinations, dental x-rays and consultations with dentists, said Synder.

"There's no drilling, filling or cleaning or oiling," she said. "Most of what is stressed here is preventative care... how to brush, floss, oral examinations of the mouth."

She added twice a quarter the program holds toothbrush exchanges, where students can get a free toothbrush in exchange for an old toothbrush.

The alcohol program holds support groups for students who have a loved one who is an alcoholic or are themselves alcoholics. The program currently conducts one support group.

"You can conduct workshops on topics such as "Alcohol and Lifestyles," "Positive Partying," and "Women and Alcohol. A non-alcohol cocktail bar is also available by request for a fee of $30."

To further planning, education involves group, individual or couples workshops that discuss the advantages, disadvantages, side effects, use and cost of contraceptives. Other workshops available include communication in relationships, sex and sexual decisions, and considerations of abortion.

"Nutrition, alcohol, and family planning services are free to all students," Synder said. "Oral health education is free to students with a health card or students may come in and pay on a fee-for-service basis."

Educators also conduct a variety of health education workshops to student organizations, residence halls on and off campus, fraternities and sororities. The service is also free.

"The job of educators is not only to run workshops, but to also talk with peers."

"But we just listen, try to help you with a problem. And, if we can't help you solve it, we'll refer you to someone else that can help you better," she said.

"We're here to answer questions — we want to help people. No one here is going to prescribe anything or to tell you what to do... what we try to do is help you help yourself."

Mozart Festival plans Wine celebration

by Maria Casas

The San Luis Obispo Mozart Festival will join in the first celebration of Austria Salutes California with a "Heuriger Abend" at the Spindle on Oct. 16 at 7 p.m.

"Heuriger" which means "the new wine" and "abend," meaning evening, originated in the wine growing areas of Austria.

Heuriger is most interesting since it's real," said the festival administrator Joanna Ronczey. "In Austria a whole area's income depends on the wine growing. People are anxious to taste the wine celebrated and we want to celebrate the year's vintage. With the growing wine industry in this area, this is really exciting for us." When the Austrian new wine is available each fall, wine growers signal the community by hanging bouquets over their doors. The whole community then turns out for the "Heuriger Abend" and the first tasting of the year's vintage which is served in gardens with simple picnic tables in a setting similar to the Spindle, which is located at 728 Higuera St.

The Mozart Festival will recreate the heuriger celebration spirit in San
Mine kills Marine in Beirut

BEIRUT, Lebanon (AP) — U.S. Marine reinforcements and amphibious vehicles splashed ashore today to bolster the 500-900 leathernecks guarding Beirut airport, and Pentagon officials in Washington said one Marine was killed and three were injured in a possible mine explosion.

President Amin Gemayel officially reopened the airport after a nearly four-month shutdown and proclaimed Beirut a united city. Marine frogmen searched the waters near the airport for mines and other Marines swept the shore for explosives before the reinforcements landed.

One Marine was killed and three were injured by what "may have been a mine explosion," Pentagon officials in Washington said. They said the injuries were "not the result of hostile fire. It was an accident of some sort."

U.S. officials said there was still "quite a bit of ordnance" in the airport area, which until two days ago was occupied by Israeli forces.

Earlier, as a landing ship stopped short of the shoreline and the ramp opened, a bulldozer flying the U.S. flag rumbled off and the first of about 200 Marines began wading ashore.

Moments later, 14 amphibious assault vehicles with machine guns mounted snaked their way about one mile to the beachhead near the airport, and Pentagon officials in Washington said one Marine was killed and three were injured in a possible mine explosion.

"Electricity generated by water will account for some 37 percent of the power used by our customers this year, up from a normal 22 percent," said Shackelford. "This enables us to reduce our use of more expensive resources, such as oil, and the savings are passed on to the customer.

Except for customers with all-electric homes, the $371 million reduction will not negate a slight increase in bills this January as compared to average bills on Jan. 1, 1982.

The utility has pending before the PUC a total of $545 million reduction will not negate a slight increase in bills this January as compared to average bills on Jan. 1, 1982.

The test decrease, the fourth this year, if granted by the PUC would bring total 1983 electric rate cuts to $1.4 billion, said Barton W. Shackelford, PG&E president. The utility asked the state Public Utilities Commission to make the rate reduction effective Dec. 1.

"Electricity generated by water will account for some 37 percent of the power used by our customers this year, up from a normal 22 percent," said Shackelford. "This enables us to reduce our use of more expensive resources, such as oil, and the savings are passed on to the customer.

Feds seize starch blockers

WASHINGTON (AP) — Federal agents are seizing stocks of "starch blocker" pills from producers across the country who are defying a Food and Drug Administration order to halt traffic in the popular weight-loss products.

The FDA charges that the pills, which use a kidney bean extract, are classified as a drug and are marketed illegally because they have not been approved by the agency for safety and effectiveness.

Some of the producers in the $100-million-a-year business are ignoring the FDA's July 1 order on the ground that starch blockers are a food product, not a drug requiring government approval.

The FDA announced Thursday that at its request, U.S. marshals dispatched by the Justice Department have raided six starch blocker manufacturers and distributors in five states since Sept. 17, and seized pills valued at $401,000.

Other, unidentified producers will be raided as court warrants are obtained, said FDA spokesman John Brown. He said most of the more than 300 manufacturers and distributors of starch blocker pills had complied with the agency's order to halt operations.

The six companies whose inventories have been seized were listed as American Dietetics Co., with plants at Seabrook, Texas; Orangeburg, N.Y.; Ooltewah, Tenn., and Tulsa, Okla.; General Nutrition Corp. at Arlington, Texas; Nashville, Tenn., and Pittsburgh; Phoenix Laboratories, Dear Park, N.Y.; and three other companies based in Tulsa, Eden's Own Products Inc., Naturade Products Inc. and Holistic Products Corp.
The ASI Student Senate accomplished little more than approving new executive staff and committee chair appointments at their long Wednesday night meeting.

Each member of the staff appointed by ASI President Sandra Clary was approved after a short introduction of each to the Senate.

The new executive staff consists of: Bill Doyle, external affairs; Pablo Marlen, ethnic affairs; Robert Woolery, Greek affairs; Adam Littlefield, academic affairs; Rogelio Ruiz, administrative affairs; and John DeAngelis, special projects (a new position).

In addition, the Senate confirmed ASI Vice President Kevin Moses' choice of Agriculture and Natural Resources Senator Randy Jones as vice-chairman for the body.

Speaker: man's future with technology

A talk on technology by Peter Diamandopolous, PhD, president of Sonoma State University, on Thursday, Oct. 7, will open the 11th annual Arts and Humanities Lecture Series at Cal Poly.

The lecture on "Technology: Problems and Prospects" will begin at 11 a.m. in Room 220 of the University Union. The lecture is open to the public without charge.

Dr. Diamandopolous is expected to focus on the characteristics of modern technology, exploring its challenges to public policy, social aspirations and private morality. His aim, he has said, is to "underscore the uncertain relation between technological determination and individual freedom...to suggest the responsibilities of higher education in preserving a precarious but creative balance between scientific advances and innate human limitations."

Born on the Greek island of Crete 52 years ago, Diamandopolous received a diploma in mathematics and natural sciences from Athens College in 1947.

An All-Western Horse Show featuring fifteen classes of competition will be held Sunday, Sept. 2, at 8:30 a.m. at the Cal Poly Horse Unit. The show is free for spectators.

A barbecue open to everyone sponsored by Alpha Gamma Rho, the national agriculture fraternity, will begin at 11 a.m.

Charlotte Stott, an agriculture business senior, and Preston, an animal science senior, are organizing the show together for their senior projects. A step-by-step manual based on the experience of putting together this show will be written on how to run and organize a small or mid-sized show.

Smaller shows are usually unorganized and have low turnouts because of poor publicity, according to Scott. She wants to make a check list to show others where to begin when putting on a show.

The manual will cover many aspects of shows, including how and when to hire judges, how to estimate costs, and how to find local stable that will board the horses for a short time during the time of the show.

The show will include halter, showmanship, pleasure, equitation, trail and stock classes. Classes will be divided into different divisions, such as novice, open, and kindergarten. Two classes for 4-H students will also be held.

Prices will include $10 for first place in each class and ribbons for the top five in each class. The judge will be Tom Kimura, a Cal Poly agriculture education senior, and a veteran of showmanship. Most recently, he placed third in the Bridle Horse class last weekend at the Snaffel Bit for Charity in Reno, a major horse show.

Entry fees are $3.75 and are due today by 9. Late registrants on Sunday will be charged $1.00 more per class. Entry blanks are available in the Agriculture Building and at tack and feed stores around the area. Entry may also be obtained by calling Charlotte Stott at 543-0397 or Jill Preston at 543-4180.

No one was hurt when the pipe burst Wednesday and sent a stream of water roaring downhill into Lake Wishon below the underground pumped-storage plant in the Sierra Nevada, utility officials said.

"The powerhouse is not damaged," said Chris Piper, a PG&E information officer in San Francisco.

The pipe burst Wednesday afternoon, sending tons of water down the side of the mountain, toward a Pacific Gas & Electric Co. hydroelectric plant.

She said workers were inside the powerhouse at the time of the break, and said the accident was being investigated.

Several miners were killed when a platform collapsed in a tunnel in January, 1981. The state issued citations against the contractor, Granite-Ball Groves, which contended that the platform was overloaded with equipment.

A criminal manslaughter indictment also was returned against the contractor.

The cost of building Helms inflated from an estimated $321 million when it first was planned in 1973 to $741 million now.

There also were allegations of large-scale equipment procurement fraud.

PG&E said "it is too early to make any predictions" whether the latest accident will delay the startup of the first unit scheduled for mid-October.

The pipe broke at 5:38 p.m. PDT in "the only section of the tunnel between Courtright and Wishon Reservoirs," said John Angius, another PG&E spokesman. He said the flow was "controlled one hour later when the water gate was closed."

Utility officials had not determined the cause of the break nor why it took an hour to turn off the water supply.

The break was in a canyon between the upper reservoir, Courtright, and the lower reservoir, Wishon. Except for the stretch through the canyon, the water tunnel was built under mountains.

The concept of a pumped storage plant is that water flows through a tunnel to a powerhouse plant between two lakes to generate electricity during peak, daytime use. The water then is pumped back to the upper reservoir at night, using electricity from other sources when the system is not needed.

The burst pipe washed down two dirt roads and caused minor damage to an offshoot pipe, though it did cause some local delays. It took an hour to completely clear the tunnel.

A PG&E spokesman in San Francisco said the pump system was still active and providing electricity during peak demand periods.

"We are not planning to close the normal spillway," said Piper. "People are free to have the wine, enjoy the evening and atmosphere. It's going to be real fun."
Cyanide-poisoned Tylenol capsules kills five Chicagans

ARLINGTON HEIGHTS, Ill. (AP) - Five people in two Chicago suburbs died of cyanide poisoning after swallowing tainted capsules of Extra-Strength Tylenol, and a search began Thursday for the source and extent of the contamination. Nearly 4.7 million pills were promptly recalled by the manufacturer.

Robert Kniffen, a spokesman for McNeil Consumer Products Co., the manufacturer of Tylenol, said the company had been notified that two bottles of Extra-Strength Tylenol Capsules "have been tampered with and cyanide poison added to some of the capsules.

In a statement, Kniffen said no product from lot MC2880 should be bought or consumed until further notice, adding that the company has no evidence any other product was contaminated.

He said the recalled lot contained 93,400 bottles containing 50 capsules each and that they had been distributed east of the Mississippi as well as in

Film, slides depict more effects

A slide show, film, and discussion on Friday, October 1 will explore how the Central Coast and the South Pacific are connected through nuclear missile development, and will document the effects of these weapons. The program, sponsored by Action for Peace and Disarmament with the Cal Poly Political Action Club, will begin at 7:30 pm (Friday, October 1) in University Union room 220 at Cal Poly and is free to the public.

The Last Epidemic, a film of the conference on the Medical Consequences of Nuclear War at the University of California, will show expert testimony on the results of nuclear conflict and the growing risk of its outbreak. The Nuclear Free Pacific Slide Show will examine the crucial role of the Pacific islands in the history of the arms race, the effects of atomic weapons tests there, and the Islanders' struggle to break away from foreign and military control.

After the slide show and film there will be a brief presentation and open discussion on the role of Vandenberg Air Force Base in missile development.
Football at Portland State

History-making Mustangs to post another road marker

by Dave Wilcox
Sport Writer

Drum roll, please. While it won't go down in gridiron history as important as the AFL-NFL merger, the Cal Poly Mustangs Saturday begin their Western Football Conference era against winless host Portland State.

The Mustangs may have a knack for history-making. Last week they gave head coach Jim Sanderson his first win as Poly mentor by upsetting defending Division I-AA champion Idaho State and snapping the nation's longest collegiate football winning streak.

"It might have been the biggest win in the history of this school," said Sanderson. Well, maybe one of the biggest. The Mustangs did win the championship themselves not too many years back.

There's a little more history-making on the Mustangs' mind — going down as the initial champions of the Western Football Conference. True, their record in league play still stands at 0-0, but with only five teams vying for the crown, each game can make or break a season. Sanderson admits that his squad will probably have to get through the conference schedule unscathed to finish on top.

"We can't afford to stub our toes against any of the league teams," conceded Sanderson. Certainly not against Portland as well — kicking against Portland as well — kicking against Portland as well —

"fun." Opposing running backs probably won't share in Booker's good feeling.

Booker calls Poly's new 3-4 defensive alignment "fun." Opposing running backs probably won't share in Booker's good feeling.

There's a little more history-making on the Mustangs' mind — going down as the initial champions of the Western Football Conference. True, their record in league play still stands at 0-0, but with only five teams vying for the crown, each game can make or break a season. Sanderson admits that his squad will probably have to get through the conference schedule unscathed to finish on top.

"We can't afford to stub our toes against any of the league teams," conceded Sanderson. Certainly not against Portland State. Rare is the coach who'd admit to taking an opponent too lightly, but Sanderson said he "really doesn't expect a letdown" against the Vikings.

"It's not like we're 3-0," Sanderson said. Still, Sanderson said he doesn't believe the Vikings are as strong as the Mustangs previous three foes. And there's some evidence to support that view.

For instance:

- Idaho opened its season dropping a tough, 26-21 contest to undefeated Santa Clara. Since then things have gone from bad to well, horrible. Two weeks ago the Vikings were routed 38-14 by the same Idaho State squad the Mustangs just upset, and Portland may still be picking up the pieces after last week's 56-0 shellacking at the hands of the University of Idaho.

- Simple arithmetic shows the Vikings are surrendering 40 points a game. Though Poly's offense certainly hasn't been what you call explosive thus far, the Mustangs might set off a few more fireworks this week.

- If that's not enough, since the two teams first met in 1977, the Mustangs have captured all four contests, including last year's 41-12 victory at Mustang Stadium.

On the other hand, Sanderson acknowledged that his team — especially the offense — has been improving each week.

Sanderson put to rest any notion of a quarterback controversy on the Mustangs by tabling junior Tracy Biller as this week's starter. Sophomore Clark Sorensen was the starter last week, but Biller, who Monday was named as one of the Western Football Conference's players of the week, came on in the third quarter to lead the Mustangs comeback, finishing with 7 of 13 passing attempts, completed for 147 yards, including a 69-yard touchdown pass to Clarence Markel.

But the Mustangs' greatest offense this year has been their defense, which leads the WFC in every statistical category. Spearheading that defense is inside linebacker Steve Booker, who last week was picked as one of the initial players of the week by the Mustang Daily.

Booker, a 6-3, 215 pound senior, calls Poly's new 3-4 defensive alignment "fun." Opposing running backs probably don't share in Booker's good feeling.

Sanderson has also turned to his kicking game in the first few games as a source of offensive power. The long and short of it, you might say.

Senior Rick Brennan is employed by Sanderson in short field goal situations, such as the 32-yarder he connected on last week. "Using Brennan makes 48 yards is stretching it," Sanderson said.

Forty-six yards happens to be the length of last week's winning field-goal kicked by freshman David Croteau. Croteau, the long man, missed a 63-yard attempt by a reported two yards against Idaho State. Together, Brennan and Croteau have made five of their six attempts.

Sanderson also used the quick kick, which he calls "a great offensive weapon," twice last week, once going for 72 yards and getting Poly out of a hole.

You might see Poly doing a lot of kicking against Portland as well — kicking off.

No. 7 volleyball team goes to Berkeley on Cloud 9

BERKELEY – You'll have to excuse the Cal Poly women's volleyball team if it is feeling a bit jujuval today. The Mustangs prepare to face the University of San Diego here at Harmon gym in the first day of the UC Berkeley Tournament.

You see, the Mustangs, head coach Mike Wilson and assistants Tina Reyes and Craig Cummings have good reason to be feeling on Cloud Nine. And it's because of what transpired in Stockton the Alex G. Spanos Sports Center on the University of the Pacific campus Wednesday evening.

On Cloud 9, playing with Willey and Reyes feeling a bit under the weather, brought home team's hustle had on the smiling side of the flip-flop after just two hours. The remedy was a convincing 15-16, 16-10, 15-16 Poly. Three-site wins later, Pacific tied it at 15-All. Poly got the serve back on a Kristin Harris kill and won the next two points via kills by freshman Lynn Kessler and senior Wendy Hopper.

The fourth game wasn't even close. At one point the score stood 4-4. Some 30 minutes later, the scoreboard read, Cal Poly 15, Pacific 4. Huffman and Stowell combined for seven of those 10 points off their serve.

"I can't say whether Jolena and Stacy were happy about the bench to play super," Wilton said after his club raised its young 1982 record to 11-2. "Jolena's stats may not have been as impressive, but she did put in quality time and it seemed to be when we really needed them."

I just tried to have fun, said Huffman, who has been relegated to the bench after starting early in the season. "I just didn't expect to be out there, really get into it, and just enjoy myself."

Huffman finished the match with five kills in 14 chances. Stowell was nine-for-24. Junior Sunny Augustan- hausen had six kills and senior middle blocker or outside hitter, Donna Helper was again her consistent self, putting down 16 kills in 55 attempts. For the team, the Mustangs hit "big-league," as Wilton calls it, pounding down 100 of their 220 seta. "I knew we could win coming in (Wednesday)," Wilson said after their seventh-straight victory. "Especially the way our team has been playing. I felt the same way against Stanford (whom the Mustangs defeated a week ago, 17-15, 15-17, 15-10, 15-11, 16-10, 15-16) we are capable of beating those teams easier than what we did. There's still a lot of questions with the match. I'm sure Terrie Lyskovych, the Pacific coach felt his team could hold better than that."

The Mustangs will face Stanford for the second time this season Saturday at 4 p.m. in the second day of play at the UC Berkeley affair. Poly takes on the host Bears at 8 p.m. And if things go according to history, one Stacy Stowell will be seeing a lot of playing time. Stowell is valuable because he can change up the middle blocker or outside hitter.

"I don't mind playing multiple positions," she said after helping Pacific's record drop to 7-2. "It gives me an opportunity to play a lot. I know if something is going wrong, I'm one of the girls to go to, do my job and help the team. Of course, I'd like to start, and that's my goal. But as far as what I can do now, I appreciate the more experience.

"I'm really trying to work on my passing. That's the key to a good volleyball player. I'm happy with my game in general. I do feel good about my hitting. I know when I go in to do things aren't working, I can sit out there for us. And I have to come in and be the spark."

But, Wilton, being the head coach, put the win in perspective.

"It's still early in the season," said the fifth-year mentor. "There's still a lot of season left. I'm grateful we won, but you didn't see any cartwheels. If we win here in December (where the NCAA Nationals are scheduled), you may see a cartwheel."

Kicks, no thoughts to please Gardner

by Mark Gang
Staff Writer

"We want people to come out and see the best college soccer team in the country. We don't come and pay for nothing." No one can play a schedule like almost all our non-league Division I schools."

Indeed, the Mustangs have been on the field with some very good squads. Stanford is ranked fourth and U.C.S.B. fifth in the NCAA's Far West. But back to Northridge for a moment. Gardner continues Gardner's Northridge including the team besides Cal State L.A. that could do it. And Gardner's hopes for a first over CAA title.

Clearly, he isn't taking Saturday's match lightly at all. "If we come to Northridge it would be a big accomplishment. Mustang forward Curt Liskevych, the 'Tubes."

"We want people to come out and see the best college soccer team in the country. We don't come and pay for nothing. No one can play a schedule like almost all our non-league Division I schools."
Now there's an easy way to get stereo sound when you watch Music TV and HBO on cable TV. A specially designed FM stereo reception kit is now available from Sonic Cable TV. You need no technical experience to make the connection. Just attach the stereo TV kit to your cable TV and your own FM receiver and start listening to Music TV, on cable FM 105.7. HBO and 21 FM stations in big, beautiful stereo sound. Best of all, the "FM Stereo Kits" are only $5.00 each plus a small monthly charge and are now available at your local Sonic Cable TV office.

Elimination of jock dorms
A House Vacated Will Still Profit
by Valerie Brickman

The lower campus dormitories — known to most as the "jock dorms" — are no longer used to house athletes, but are on the university's master plan to become a Student Service Center, according to Executive Dean of Facility Planning Doug Gerard.

The dorms, Jespersen Hall and Heron Hall, will ultimately be renovated and an adjoining building will be constructed to be used for counseling, testing and placement.

"It has always been in the master and financial plans to convert the dorms to a Student Service Center, this is why the buildings have not been used for housing since last June 30," Gerard said. "The halls were built between 1928 and 1930 and the codes were less restricted than today," Gerard said.

If you have had to find other living arrangements, whether in the upper campus dorms or off-campus housing. According to Director of Housing, Robert Bostrom, the upper dorms had room for all 192 continuing students.

About 50 of the continuing students were housed in the upper dorms and because of the lower enrollment there was space for all the students.

Football was hit the hardest since a large number of football players were housed in Jespersen and Heron Halls.

Head Coach Jim Sander son said that there was a financial effect of losing the housing on the lower end of campus. The dorms Jespersen and Heron did not give us anything to house the athletes. Now we must come up with money to pay to house the spots in the upper campus dorms," Sander son said.

A new position in the athletic department has been added to help supplement the needed $130,000 that will pay for housing in the student athlete's scholarships.

Denny Martindale holds the positions of Director of Athletic Development and Executive Director of Mustang Boosters.

Martindale said that the individual sports will continue with the fund raising projects, for example, the baseball team will continue to sell advertising for its yearbook.

We are going to continue such things as jog-a-thons," Martindale said.

Martindale said he hopes donations from the Mustang boosters and from local and private enterprises will help the department meet its goals.

The Student Service Center has been designed to be completed within a couple years.

While plans are being made, the halls will be repaired and will be used for university needs.

One university need, according to Gerard will be to store the contents of the old Dexter Library while it is being remodeled.

Heron Hall will eventually be the new site for the placement center, which is currently located in the Administrative Building.

"We are receiving fun-

for itself. Against four very good teams (1981 Division II runners-up Cal State L.A., Stanford and U.C.S.B.) Poly has been outscored by only one goal (7-6). If the trend continues, the Mustangs could have their second win of the year.

The only thing the Mustangs need now is a good size crowd, according to Apeey. "We need all the support we can get."

That, and a little
A House Vacated...

Sunlight streaks through the windows of an empty room in what used to be a Jock dorm. The buildings will now be used as counseling centers.

"They instilled a love to mingle with the rest of the campus and won't be stereotyped as a jock or football player," Sander-son said.

Opinion

Gulping crow

Finally, the New Right eats crow. After preaching for so long about his moral mandate, Sen. Jesse Helms has been handed two defeats on amendments he tacked onto a bill to extend the national debt limit to $1.3 billion.

Two weeks ago, Helms pushed for an amendment that would have held federal financial support, direct or indirect, for abortion and would have declared that human life begins at conception. After a long filibuster, Senate Majority Leader Howard Baker moved to and succeeded in removing the issue from consideration with the bill.

Last Friday, Helms’ second amendment, one that would have kept the Supreme Court from ruling on state laws that permit voluntary prayer in public schools, was tabled in- dependently. This also followed a long filibuster, and three failed attempts by Helms and his supporters to end it by vote.

Admittedly, much of Helms’ failure is due to his miscalculation in attaching the amendments to a bill the Reagan administration wanted passed soon. Majority Leader Baker’s removal of the anti-abortion amendment and his an- noyance at Helms’ stubborn and lengthening fight for prayer in school were pivotal reasons for the amendment’s failure.

But, even taking into account Helms’ mistake in timing, things were not as easy as he and the New Right hoped. Senate liberals and moderates showed they are not going to allow themselves to be bullied by righteous rhetoric into sup- porting measures that would set the country back a hundred years in civil and personal rights.

It is a hopeful sign that the New Right crusade will be one without victory, and one that dies a slow, but complete, death.

Letters

Stereotyping

Editor, This letter is in response to Mr. Ken- ny Fall’s letter in the September 28 issue. I find the validity of Mr. Fall’s points questionable and his attitude of- fen­sive.

To conclude that women have no in­ terest in self-defense classes because of a single man’s experience in the military during one quarter is, I feel, a hasty generalization. A number of fac­ tors, most notably the lack of publicity given the course, could account for the low turnout.

I’m also not convinced that self- defense classes are very effective. I have taken a self-defense class and found most of the moves to be either common sense or not at all effective in an emergency situation. I’m also concerned that these classes might give some people a false sense of securi­ ty causing them to take unnecessary risks.

My major complaint with Mr. Fall’s letter is not, however, a great conviction on my part against self-defense classes. It is Mr. Fall’s attitude that I find in­ troducing. He seems to imply by his tone that women are in some way responsible for the attacks upon them. I think the Daily’s tactless choice of the title “Stupid Helplessness” is blatant exam­ ple of this ridiculous attitude.

The frequency of sexual assault and harassment against both sexes (and sheep is a sad commentary on today’s society. It is a problem that everyone needs to be aware of and consider. Yet attitudes like Mr. Fall’s are not helpful in combating it.

Community alert programs, after hours bus services, and lighting im¬ provements are a few suggestions. I cer­ tainly don’t believe the answer is to do away with self-defense classes, but I would like Mr. Fall to consider the idea that perhaps he does not either.
