Task force passes evacuation plan

by Robin Lewis

The Campus Preparedness Task Force voted Thursday to pass the campus evacuation plan to the Public Safety Advisory Committee for "review, comments and action." The vote was 10-4.

The plan is a basic framework from which to build a specific peacetime preparedness evacuation plan, said Public Safety Director Richard Brug, "a plan for future action." The plan will be implemented in case of an emergency involving an earthquake, toxic spill, or radiation leak from Diablo Canyon.

Four members of the committee, Carl Lutrin and Ann Morgan, two of the three faculty representatives, and Skip Moss and Susan Figini, the ASI student representatives, questioned the thoroughness of the plan in a four-page letter to their fellow committee members. All four voted to keep the plan in committee.

Lutrin said he felt the plan was inadequate because many actions have not been taken care of in the future without a time frame to govern them. "It is a future tense," he said. The letter quoted passages from the basic plan calling for "building assessments surveys (that) will be made by Facilities Planning/Plant Operations in order to identify structural seismic hazards" and "shelter facilities (that) will be announced." (Emphasis added in letter.)

Lutrin said he had felt his job on the committee was to decide "whether or not his university has a plan that guarantees the safety of the faculty and students. My feeling is, it does not."

Lutrin said he would vote for the plan if the reservations in the letter were addressed. Morgan said it was important the committee acknowledged that there must be follow-ups and that certain limitations exist in the plan itself. "I want it stated that I see the limitations," that must be addressed by the advisory committee, or that the plan is incomplete.

The letter also addressed what he said as inadequacies in the earthquake, hazardous material incident, and nuclear power plant accident sections of the report.

NRC contemplates low-power license

Washington, D.C. — The recent report by the Nuclear Regulatory Commission's staff in Washington, D.C. on the possible reinstatement of Diablo Canyon's low-power license came as no surprise to officials in San Luis Obispo. But that meeting is not without its problems.

"We believe the decision was pretty positive for us," said Susan Brown, spokeswoman for PG&E. "Basically, it was what the NRC said about what's been happening. But all along we've been telling people what's been happening around here with press releases and other information.

"The commission wants to have all the data in before making a final decision. They've scheduled another meeting for Nov. 2 to hear other sides of the issue — from people who oppose Diablo. But that meeting will probably be changed because it is election day."

The report said 54 of the 198 technical problems have already been corrected. In 1981 a San Francisco-based PG&E company was given a license by the NRC to commercial low-power tests of Diablo's twin reactors which had been loaded with radioactive fuel. The license was revoked as quickly as it was granted. The modifications were discovered in the equipment's design.

"The staff feels the modifications we have to make are minor," Brown said.

Poly tests campus emergency plan

by Scott Swanson

The Cal Poly Department of Public Safety participated Wednesday in an emergency reaction drill conducted by San Luis Obispo County to test emergency preparedness plans for accidents at Diablo Canyon nuclear power plant.

The entire county was involved in the drill to determine extents from simple notification that an accident had occurred, to evacuation of school children from areas closest to the plant.

The exercise, which was coordinated by the County Office of Emergency Services and evaluated by the Federal Emergency Management Agency (FEMA) was the second to be conducted in the county. The first was held August 19, 1981, but Cal Poly didn't get too heavily involved, according to Richard Brug, director of Public Safety.

"This was the first time that Cal Poly really totally participated in a drill," Brug said. "We have a rough draft basic emergency preparedness plan and we tested it to see if it was operational."

The problem at Diablo, which was set up by FEMA, began as an "unusual event," a relatively minor incident but one that is potentially threatening to the safety of the plant. The fire that burned up to the boundaries of the plant Sunday was an example of a real life unusual event.

Politician favors student tax credits

by Lisa Shidler

Congressman William Thomas (R-Bakersfield) discussed current issues with several Cal Poly students Wednesday during a brief stopover on his way up the Central Coast.

Congressman Thomas fielded questions from fifteen members of College Republicans in an unpublicized visit at Cal Poly. He is currently the representative for the newly reconstituted eighteenth district, which now includes part of San Luis Obispo County.

Thomas spoke strongly in favor of giving tax credits to parents who fund their child's college education. He believes the grant programs now in use have the advantage of it before moving to lower level schools.

For independent students who do not receive college funds from their parents, Thomas supports giving aid on a scholastic merit and need basis.

Thomas also said that he does not believe campaign expenses are exorbitant in American politics. He said fair campaign limits can not be set up, mainly because the limits would disadvantage challengers trying to unseat incumbents. He said although he can't see how the limits being set, complete disclosures of financial information would be tested.

One way to alleviate problems of high campaign costs is to eliminate the two parties were allowed to finance their campaigns for politicians, said Thomas. He would support a law eliminating such professionals before he would support laws for public financing of campaigns, he said.

Setting less limitations on the Republican and Democratic parties would also alleviate some of the problems of campaign costs, according to the congressman. He believes if the two parties were allowed to finance their campaigns, he said.
Newsline

Authorities search for suspects

CHICAGO (AP) — Authorities said Wednesday James L. Lewis, wanted in connection with the Tylenol killings in Chicago, had lived with his wife in a cheap Manhattan hotel for six weeks, including the period when seven people died from cyanide-poisoned capsules.

A special squad of 100 FBI agents and New York police officers were searching the city in hope the couple might still be there. FBI agent Kenneth Walton told reporters at a news conference. Walton said Mrs. Lewis may have a kidney ailment and agents were checking New York hospitals.

Walton said that Leann Lewis, 35, had signed the couple into the Rutledge Hotel on Sept. 6 and was last seen there Oct. 16. Lewis, 36, was last seen at the hotel on Oct. 14.

They stayed in Room 200. Walton said, registered under the name of Nancy Richardson, an alias Mrs. Lewis had previously used, and using the Lewises' Illinois address.

"We think they stayed here," said James Fleming, chief of detectives. "We don't think they'd go back and forth. They probably spent some time there and her husband was seen with her. And we believe she met her at lunch and met her away from the hotel and walked her home," Walton added.

All seven cyanide victims in Chicago swallowed the tainted capsules on Sept. 29.

When a good friend borrows your car, the tank may not come back full. But the trunk does.

When you get paid back with interest like this, it sort of makes you wish he'd borrow things more often.

Open up a few cold ones and toast a guy who really knows how to return a favor. Tonight, let it be Löwenbräu.

Löwenbräu. Here's to good friends.

New Corona trial to be argued

HAYWARD, Calif. (AP) — Lawyers for Juan Corona will present evidence next week of "possible juror misconduct" charges of winning a third trial for the twice-convicted mass murderer.

Superior Court Judge Richard Patsone on Thursday approved a defense motion for a week-long delay in Corona's sentencing hearing. He added he was disappointed a motion for a new trial was not ready for immediate consideration.

Defense lawyer Terence Hallinan told the judge and prosecutors he would file affidavits Monday and present arguments and testimony from one or two jurors at the hearing Oct. 28.

Corona, who appeared in court in his white prison jump suit, said through an interpreter that the defense tactic was "OK." Hallinan said after the brief session that the motion for a new trial focused on alleged misconduct by jury foreman Brian Douglas Hast.

"He jammed through a conviction over the objections of some jurors," Hallinan claimed. Hast, a 26-year-old tax lawyer, controlled the jury because of his legal experience and his contact with a girlfriend in the Alameda County district attorney's office. Hallinan alleged Hast has denied the claims.

Thousands bury Polish unionist

NOWNA HUTA, Poland (AP) — Marching slowly to Chopin’s funeral dirge under banners declaring "Solidarity Lives," thousands of angry and despairing Poles on Wednesday buried a young unionist killed by police in raids set off by a government ban on the independent union.

Hundreds of riot police backed by hemetced paratroopers kept a tight grip on Nowa Huta to prevent new unrest as an estimated 10,000 mourners and at least 21 Roman Catholic priests left the funeral of 20-year-old Bogdan Wlosik.

"My son, oh my son," cried Irene Wlosik as she threw herself twice onto her son’s coffin. Her husband, Jozef, and their daughter Malgorzata wept as the coffin was turned on one of about 60 wreaths placed amid flowers piled over six feet high on Wlosik’s grave.

"My son, sleep calmly in our Polish earth on which you were not permitted to live in peace," said a banner and a typewritten sheet on one of about 60 wreaths placed amid flowers piled over six feet high on Wlosik’s grave.

Wlosik was killed by a plainclothes policeman during riots Oct. 15 sparked by the outlawing of Solidarity on Oct. 8. He was the 15th Pole killed in demonstrations since authorities imposed martial law Dec. 13 and suspended Solidarity, the first union in the Soviet bloc free of Communist Party control.

"We shall avenge you," was scrawled on one of six feet high on Wlosik’s grave.

"We have no right to live, our world is not right. We shall avenge you," read a banner with a typewritten sheet on one of about 60 wreaths placed amid flowers piled over six feet high on Wlosik’s grave.

Wlosik was killed by a plainclothes policeman during riots Oct. 15 sparked by the outlawing of Solidarity on Oct. 8. He was the 15th Pole killed in demonstrations since authorities imposed martial law Dec. 13 and suspended Solidarity, the first union in the Soviet bloc free of Communist Party control.

"We shall avenge you," was scrawled on one of several black-bordered funeral notices appearing around the city announcing the burial.

The official PAP news agency carried a one-paragraph item on the funeral in which it was attended by the family and fellow workers from the Lenin steelworks.

CAL POLY SAN LUIS OBISPO
Poly reacts to mock emergency...

From page 1

Cal Poly Public Safety was notified at 9:38 a.m. by the California Highway Patrol that an unusual event had occurred at Diablo. They were told to stand by and as the problem got progressively worse throughout the morning, a Campus Emergency Operations Center (EOC) was set up.

Fourteen university officials including some department heads were called in to monitor the center. Brug was pleased with the smoothness with which the department heads were on duty, Brug said, but would if there was an actual accident.

The Public Safety Department activated an emergency telephone alerting system at about 36 locations on campus such as offices and residence halls. These were notified and told to stay by. The campus public address system was tested, as were the police and fire P.A. systems.

The Public Safety dispatcher also activated call back procedures to call all off-duty police and fire personnel back to the campus. They didn't actually return to duty, Brug said, but would if there was an actual accident.

The Public Safety Department activated an emergency telephone alerting system at about 36 locations on campus such as offices and residence halls. These were notified and called to stay by. The campus public address system was tested, as were the police and fire P.A. systems.

The Public Safety dispatcher also activated call back procedures to call all off-duty police and fire personnel back to the campus. They didn't actually return to duty, Brug said, but would if there was an actual accident.

As the situation worsened, the EOC opened three shelters at Crandall Gym, the Physical Education Building (main gym), and at Robert E. Kennedy Library. They also instructed the Child Care Center to shelter the children and arranged transportation of handicapped persons to sheltered areas.

"All different people in the university were making decisions at this point," Brug said. "The plan worked very well, I thought, for the first time. Response
"What kind of studio is this?" students usually ask when they enter the room. The third year students of the landscape design program are located in a large second floor room marked "studio" that is uniquely designed and certainly not a run-of-the-mill studio.

The landscape design program is beginning its second year in the old Dexter Library, however, the studio itself extends into the front of the Military Science Building. The students' classes are held here and it's here that drafting tables and workspaces are set up.

"We decorate and make it our spot," said third year student Andy Reimann of Mexico.

Reimann keeps the more durable, rubberized spider for his pet, often kept swinging on its web. "The record is six swings through the hoop" said one bystander.

Walking past a chain-link fence, and beside the old blinds (which have been repainted in Art Deco colors) scavenged from the old library, one might ask, "who would want to live here?"

Yet, 68 students do, according to the Landscape Design office.

Gregg Kobett, pointing to a corner he shares with four other students said, "This is our neighborhood; we'd like to keep it the way it is."

---

Under the shade of her plants, Vickie Schmedding studies her architectural plans.

Photos by Stephanie Pingel  Story by Phebe Fletcher

The students have classwork all day in the studio and assignments to work on in the evening, according to the unofficial tour guide, Alex Gross. "Students live in here," he said.

On the handbuilt shelves and under the desks are an assortment of items, like a blender, popcorn machine, an oversized doll, a sleeping bag, a coffee machine and a water-filled goldfish bowl with an R.I.P. sign taped to the glass. There are three names underneath.

"I had three fish and all three died," Lori Covey explained. She'll keep crying to raise fish, she said, "maybe guppies; they're harder."

Reimann keeps the more durable, rubberized spider for his pet, often kept swinging on its web. "The record is six swings through the hoop" said one bystander.

Gasoline station pennants refuel Ed Siribohdi as he breaks from his long hours of work.

Jim Rios looks up from his work for a minute to grab another tool from his desk drawer.

A mannequin friend of the landscape design students kicks back to keep an eye on the lab.

Campus evacuation plan goes to safety committee

Brug said the task force will continue to consider adding recommendations to the plan later and submitting them to Howard West, associate executive vice president for Academic Affairs, and could possibly be set up as the review committee to follow up on such recommendations. The plan presently calls for a yearly review of procedures.

The plan, when approved by the advisory committee, said Brug, will not be a directive for action by students, faculty and staff in the event of an emergency, but will direct "action personnel" in the fulfillment of their duties during an emergency.

Brug said he agreed with the letter's concerns but that "we can't work on this if the limitations of the plan and work on the plan at the same time." "We could be here for 10 years," he said.

Brug added he was aware there would be other problems when an emergency comes, citing the probable reaction of the campus population. He said he had talked to students in the dining complex who owned cars about what their reaction would be if the sirens went off unnoticed.

He said they told him they would get in their cars immediately and not listen to the radio and get off campus. He said they told him they would not wait for instructions. The approval of the plan by the task force came one day after Cal Poly's participation in a drill of the San Luis Obispo nuclear evacuation plan. (See related story.)

Brug and McKee agreed that many "minor" problems had surfaced during the drill that will also have to be addressed in the plan, but that they should not hold up its approval.

"It's a good, sound plan," said McKee, who said he has experience in military planning, "as good as I've ever seen as far as soundness."

Brug said he had not planned on the campus-wide notification taking "close to an hour," and said more people would be notifying in future drills. Expecting the traffic officer to be in the Emergency Operations Center and in the public safety office at the same time was another mistake.

Jim Neeland, the third faculty representative, said the red phone connecting the campus command center with Cal Poly's health center will have to be moved from the public safety office into the operations center in the fire garage. He said waiting for messages to be relayed was a hindrance.

Dr. James Nash, director of Cal Poly's Health Center, said there was no roster of people who lived in the Children's Center. He suggested an updated list might be kept on file in the public safety office.

The miscommunication of the amount of radiation exposure to the campus by a factor of 10 occurred, said Brug. He said he was feeding information over the telephone to the County Health Radiation officer and told the officer the campus was under .02 rems of radiation exposure and the county officer wrote it down as .2 rems. Brug said the county "immediately checked" the error by contacting a "rumor control" center to ascertain the real figure. Brug said concern about the overall effectiveness of the plan.

Brug agreed and proposed the approval of the basic plan saying, "it is not the purpose of this committee to review all the problems encountered and the answers to them."

Clary reopens applications

From page 4

"I know some members of the Senate would like to have been considered... it wasn't really brought into the open," Vacura said.

Clary said she asked Moses and ASI Controller Charles Dickery for appointments for the board from the Senate and finance committee. She added Moses "appointed himself, since he had experience on the IRA Board last year."

Clary said she believed Moses is a sufficient employee" but welcomed the Senate to examine the selection procedure. Moses admitted after the meeting that he had not informed other senators about the position, but simply told Clary he was interested in the position. "Clary told the senators to submit applications if they wanted the now-open position. The finance committee position is also up for reconsideration.

Other discussion involved California State Student Association representation. Communicative Arts and Humanities Senator Brian Reynolds, who last week said he would present a resolution on CSSA representation on social issues, did not. After attending last week's CSSA meeting in Norridge, Reynolds said he feels the problem needs to be solved on the local level.

"There's a relationship between us and our representative (Messe) and between the representative and the CSSA," said Reynolds. "We need to work on the relationship between us and the representative, because the relationship between the CSSA and the representative is fine."

The Most Sophisticated Training Ground

For Nuclear Engineering

Isn't On The Ground.

It's on a Navy ship. The Navy has more than 1,900 reactor-years of nuclear power experience—more than anyone else in America. The Navy has the most sophisticated nuclear equipment in the world. And the Navy operates over half of the nuclear reactors in America.

With a nuclear program like that, you know the Navy also offers the most comprehensive and sophisticated nuclear training. Every officer in the Nuclear Navy completes a full year of graduate level technical training. Outside the Navy, this kind of program would cost you thousands. In the Navy, you're paid while you learn. Then, as a nuclear-trained officer, you supervise highly trained personnel in the operation of the most advanced nuclear propulsion plants ever developed. You get a level of technical and management experience unequalled anywhere else.

You get important responsibilities and you get them fast. Because in the Navy, as your knowledge grows, so do your responsibilities.

Today's Nuclear Navy is one of the most challenging and rewarding career choices a man can make. And that choice can pay off while you're still in school. Qualified juniors and seniors earn approximately $1,000 per month while they finish school.

As a nuclear-trained officer, after 4 years with regular promotions and pay increases, you can earn as much as $37,400. That's on top of a full benefits package that includes medical and dental care, and 30 days' vacation earned each year.

As a nuclear-trained officer, you also earn a place among this nation's most qualified and respected professionals. So, if you're majoring in math, engineering or the physical sciences, send in the coupon. Find out more about the most sophisticated training ground for nuclear engineering—Today's Nuclear Navy.

Navy Officers Get Responsibility Fast.
To think, she wasn’t even going to play

by Mike Mathison
Staff Writer

She never gave herself much of a chance. If any at all.
So Craig Cummings and Mike Wilton did.
Randi Alvari had finished her junior college volleyball career at Santa Barbara City College after two years. It was time to move on.
Just with the studies, though. The 6-foot-4 Alvari decided to put her volleyball calling on the back burner to eventually die out. Trying out for the Cal Poly women’s volleyball team had crossed her mind. But, like what parents tell their children, it went in one ear and out the other. The thought didn’t stay in her mind for long.

“It had a lot to do with the reputation of the Cal Poly volleyball team,” Alvari said. “They are viewed so awesomely. I said to myself there was no way I would be able to make the team. I wanted to focus in on school, work two jobs, and basically make money so I wouldn’t have to stay in school so long.”

Then the volleyball team started having problems. The people in the back row, both starters and substitutions, weren’t doing as good a job as head coach Wilton wanted. Wilton needed help.
Enter Cummings, a first-year assistant on the women’s team. Cummings and Randi’s older brother Rich are good friends. So Cummings knew Randi. The younger Alvari was also on Cummings’ city-league volleyball team. He knew what Randi could do on the court. A few conversations later, Alvari was trying out for the team two days before the Pacific match Oct. 8.

“I felt pretty good out there,” she said. “I hadn’t really played in a while. My friends from city college went to play and I missed it. It felt pretty good to be playing again. It was only a practice. Even if you haven’t been playing a lot, you still know the game. I just tried not to be too spastic.”

“When Craig first asked me if I wanted to play, I said, ‘Don’t do this to me.’ I was really wary at the beginning. I thought about my jobs, school and money. It was a good opportunity for me, I didn’t know what I should do. I could hardly sleep that night. The main reason why I tried out is because Craig has so much confidence in me. And I figured if the coaches were willing to give me a tryout, I might as well take it.”

And so far she has made the best of it. Alvari got into the match against Pacific and played errorless ball. She also had two nice defensive saves. One practice later Alvari started versus UC Santa Barbara. She has also started against San Jose State and Fresno State. Alvari should also start tonight when the Mustangs face USC in Los Angeles.

CAL POLY GOURMET GUIDE
OFF-CAMPUS STUDENTS

Introducing a Great Way to Eat Well; Save Time and Money This Fall!

19/14 Meal Plan
No grocery shopping, cooking or clean-up time!
Enjoy daily breakfast, lunch, and/or dinner this fall for less than $485 (price pro-rated throughout fall quarter—buy any time!)

4 Lunch Plan
Have a nice on-campus lunch with your friends four days a week and save money, too! Available for less than $120 for fall quarter (price pro-rated daily).
Both plans good at the Sandwich Plant, Vista Grande Cafeteria, Snack Bar or Student Dining Room.

Sports

Soccer team kicked around at Santa Clara

by Mark Gang

The Cal Poly men's soccer team was shutout for only the third time this year as the Broncos of San
ta Clara turned the trick Wednesday night in Santa
Clara.

The 3-0 blanking snapped a 10-game Poly scoring streak, dating back to the
second game of the year. Since that game, the
Mustangs have outscored
their opponents, 25-13.

But it has been the goings-on during the last three games that have
casted some concern for coach Wolfgang Gartner.

On a week ago, the Mustangs were above the magical 500 mark for the first
time this season thanks to a four-game win streak that included a 6-0
wipeout of Cal State
Bakersfield.

Since that time, though, Poly has dropped two
three. And it's not just the
loose that are confusing —
it's how the Mustangs have lost that is so disturb-
ing.

After the win over
Bakersfield, Poly gave up four
goals to Chapman Col-
lege — three within twelve
minutes of each other —
and lost its first league
game of the year. Previously
to that game, no one had
been able to score more
than two goals against Po-
ly.

The next night, Poly returned to form and beat
UC Riverside 4-0 as Curtis
Asey, Kent Norville and
Tom Gleason scored. It
looked as though the Chap-
man game was only a fluke
and that the defense was
back for the Mustangs.

But just as quickly as the Poly defense reap-
peared for the Riverside
match, it vanished against
the Broncos. The three
goals Santa Clara scored were the second-highest
total Poly gave up this year. Not only that, the
Mustangs have now given
up seven goals in their last
three games. It had taken
the seven previous games for the Mustangs to give
up that many scores.

Hmmm.

Defense shouldn't be
much of a problem tonight.

The Mustangs are hosting the Roadrunners of Bakersfield at 7:30 in
Mustang Stadium. Accor-
ding to Gartner, "they are
the weakest team in our
league, so the Mustangs
should return to form and win.

The game Poly is really
looking ahead to is the Oct.
30 showdown with Don-
gue Hills in Mustang
Stadium. The Toros are
ranked fifth in the Par
West of the NCAA Divi-
sion II while Poly isn't —
this despite the fact that
Poly leads the CCAA race
to which Dominguez Hills
is a part.

"If we beat Dominguez
Hills we should be con-
sidered for the Division II
playoffs," Gartner said. "It's going to be hard for
them to ignore us if we win the conference."

So for this year, it's been
hard for anyone to ignore the
Mustangs.

Alvari got her chance
From page 9

"When I tried-out, I felt
some pressure not to mess
up. I regret the decision of
being the other goalie on
the team that was the
decision, although late as it
was, to try-out for the
team.

"I'm learning things I
never really heard of
before," Alvari said. "Like
dropping your shoulder. I
never heard of that term
before I came here. I'm also
not used to such quick
offenses. At Santa Barbara
we never really played
against such quick off-
enses. Right now I'm
slower than what I used to
be. One thing about play-
ning defense, it's just reac-
tion.

"I'm having a very
good time out there," said
Alvari. "It's also nice
being with teammates
who was word coming
from their coach.

"My only regret is
being here. But it has been
a blessing in disguise
to stay with it next year."

All she needed was a...
Mustangs look to spike Trojans

by Mike Mathieou
Staff Writer

LOS ANGELES — In 1981 this was the match Cal Poly women's volleyball head coach Mike Wilton felt catapulted the USC Trojans to their NCAA Division I National Championship.

Last year the Mustangs traveled to USC and had the Trojans dead. Chuck Erbe's crew had one foot in the grave. Poly was burying them. But, down 13-8 in the third game and having already lost the first two, USC rose from the dead.

"If we go down there and put forth a nice effort, I think we'll win," —Mike Wilton

The Trojans rallied for the next seven points to take the pivotal third game. The final two games weren't close. USC had spiked the Mustangs' spirit. The Trojans won the next two games with relative ease, 15-7 and 15-6.

"I think the girls will remember we had them on the ropes and let them off," Wilton said. "I think the girls who remember that match the most — Sherm (Walker), Marie (Lundie) and Donna (Deutschman) — all graduated. It's a thought for the girls this year, but I don't think it's that big of a thought.

"We beat them up here (11-15, 15-8, 15-8, Sept. 11) and played poorly in the San Diego State Invitational (Sept. 18) and lost to them (4-15, 15-8, 10-15). If we go down there and put forth a nice effort, I think we'll win."

The Mustangs take a 16-4 record into tonight's match here on the USC campus. The Trojans are 12-4 for the season and 6-3 in Western Collegiate Athletic Association activity. Poly is the only team to beat the Trojans in non-league play.

"The four matches we have lost," Wilton said. "Cal Poly has not played well. So far this year we have played the most top-20 teams in the country. We have played 13 and have a 9-4 record. I think that's an interesting statistic. We've had some nice practices this week and we're healthy.

"There's still a lot of season left for us. We have 10 matches and a tournament left. We'll have some good support down there. But so will USC. They had the band there last year. The people down there know Cal Poly is a good team. It's a raucous little gym at USC. It'll be a good test for us."

The Mustangs are coming off an easy 15-4, 15-7, 15-8 win over Fresno State last Monday. USC has been out of action since Oct. 16. That night the Trojans were buried in Palo Alto by Stanford, 15-5, 15-4, 15-13, 16-14. USC enters the match ranked No. 3 by the Tachikara Poll and No. 5 by the NCAA. Cal Poly is rated No. 6 in both.

Saturday night Poly travels to Cal State Fullerton to combat the Titans. The Mustangs own a 2-0 series record over Fullerton. They should make it 3-0 Saturday. Poly is currently riding a three-match win streak.

In time for Halloween, the Legend of the Headless Setter. Senior Tina Taylor sets this one up against Fresno State.

It's Tim Snodgrass' turn

Trial-and-error football

by Dave Wilcox

Computer science majors, please note: Hi-tech has invaded that bastion of brutality, football. That image of coaching staffs spending tens of hours in darkened rooms studying game films still exists, but more and more time is now spent poring over print-outs revealing an opponent's tendencies in almost any given situation. Three yards and a cloud of silicon chips.

But when it comes to his offense, Mustang head coach Jim Sanderson is reverting to an age-old theory of science, trial-and-error. If one quarterback doesn't work, try another one.

So when Canada's Simon Fraser University pays Cal Poly a visit Saturday night at 7:30, the Clansmen defense will line up across from the third Mustang signal-caller to get the starting nod this year, junior Tim Snodgrass.

By tabling Snodgrass, Sanderson has added another chapter to the quarterback saga of the 1982 season. He didn't have much choice. Sanderson's "not real happy with the passing game."

Since junior Tracy Biller opened the season as the number one quarterback against Fresno State, there have been almost as many changes of leaders as an unstable Central American country.

Snodgrass started against Cal State Fullerton but lasted only two series of downs before Biller took over. When the Mustangs traveled to Idaho State the next week, though, it was Clark Sorensen taking the snaps when the game started. A strong second half performance by Biller in that same game, which Poly won 15-13, convinced the coaching staff to give him the reins against Portland State, the Mustangs next opponent.

Biller, who on the year has completed 54 of 117 passes (46 percent) with seven interceptions, holds onto his job through three games, including last week's 16-13 loss to Northern Colorado, in which the Mustangs had a total offense advantage of 267 yards to 47 but couldn't put up the points for numerous opportunities.

Sorensen, sophomore, has fared worse than Biller. A USF graduate, he's completed just 34 percent of his passes, connecting on 13 of 30 attempts. Snodgrass has thrown only two times, completing one.

Passing is exactly what Sanderson fears in the Clansmen. Although he admits he doesn't really know alot about Simon Fraser, Sanderson says the impression he and his staff got from the films they've seen is the Clansmen aren't afraid to "throw the ball all over the stadium."

The Clansmen, who like the Mustangs, are 2-4, have averaged 273 yards through the air in five games with Jay Prepych at the helm. Prepych has completed 51 percent of his passes for 1,213 yards and 16 touchdowns. He has been picked-off 14 times. The Clansmen rushing game is barely there, accounting for 102 yards a game.

Snodgrass, a 6-2, 195 pound junior college transfer, has had success through the air against SFU as the Clansmen have surrendered 242 yards passing while giving up 169 yards on the ground.

Poly's defense enters Saturday's game lacking six wounds after suffering what should be debilitating injuries. Should be, but aren't due to clutch performances by a pair of youngsters in the Northern Colorado game.

Sanderson praised the play of freshman John Cummins — filling the big shoes of Tom Gilmartin, lost for the season — who hadn't played a down all season. Freshman Guy Cekada also did a great job, said Sanderson, filling in for noseguard, an unfamiliar position.

He replaced Steve Gibson, who is out of this week's game as well.

Also questionable are sophomore defensive tackle Paul Swierczek and sophomore offensive guard Kent Feldman, who sprained his ankle in practice this week.

The Mustang defense leads the Western Football Conference in every category, giving up only 245 yards per game. Running games have had an especially tough time against the Mustangs' defensive line. Opponents have averaged only 98 yards on the ground.

Poly's rushing game is starting to perk up as Brian Gutierrez became the first Mustang in three years to break the 100-yard mark in a game that he rushed to 117 yards on 23 carries versus Northern Colorado. Gutierrez, a junior, has gained 274 yards in 73 attempts in six games. Rick Cramer is the team's No. 2 runner with 173 yards on 52 chances.

At Standard Oil Company of California, we view our data processing people as innovators, dedicated to the art of technological application. We know that maintaining state of the art technology depends on self motivated individuals striving for excellence, not merely functioning as trained technicians. They come from many fields of expertise, including engineering, science, business administration and computer science. Each contributes a special insight or talent for organization, communication and problem solving that improves and maintains our intricate information network.

When you step on board with our Computer Services Department, you will immediately be assigned to a project that matches your experience and joining level. You'll receive continuous on-the-job training and the support needed to advance quickly to increasingly responsible assignments. Our horizons are expanding so quickly that today's talented people can reach high technical or management levels faster than ever before. That is the state of the computer professional at Standard Oil Company of California.

Computer Services operates in four locations in the San Francisco Bay Area: San Francisco (Corporate Headquarters), Richmond (East Bay), Concord (near Mt. Diablo), and in the San Ramon Valley, our newest facility (still under construction), offering attractive and convenient housing nearby.

We think that our computer technology offers a stimulating work rewarding environment, and we invite you to join our progressive staff.

My initial reaction to Mr. Veazey's letter is angrily call him a reactionary, bigoted, working-class WASP, but then I'd be just like him, instead of listening and people hate being audiences. This simplistic justification for hatred is frightening.

First Dave claims that anti-Reagan is the same as anti-American, whereas the Mustang Daily, I'm sure, feels quite the opposite. The Daily has clearly shown a strong concern for America, the way the Washington Post did in bringing down Nixon, the man elected president by more votes than any other in American history. Being elected by majority vote didn't free Nixon from criticism that eventually exposed what was generally seen as immoral behavior. However, this part of Dave's letter, I think, will mercifully be laughingly ignored.

No, it's his second point that's frightening: He stated...in a faggot is since Gays can only pass as...I'm going to make a moral statement either way, from the homosexual viewpoint. I can only ask Dave to...a letter, and write about how wrong this...HIPPIES! GAYS! FREAKS of all kinds, he who are, please, many of us not only accept...American and what it...fight, to protect our...Richard D. Quegley Jr.

I'm like, Richard M. Nixon, H.R. Haldeman, E. Howard Hunt. Tom Silva

Editor:

I am writing this letter in response to the October 10 letter by Dave Veazey titled "Daily's". In which he accuses the Mustang Daily of having a left wing, immoral, and anti-American format. I'd like to say that I disagree with all of his views.

First, I don't feel the Daily is intentionally anti-Reagan or anti-Watt, or anti-anyone. The political viewpoint which appears in the Daily are much like the political cartoons in any major U.S. publication. They are drawn to be just...political cartoonists: a lighter look at political issues of the day.

Secondly, David, I am also an American and what it stands for it stands for your opinion, not...David, 'Live and let live'. That is what America is. If you don't like it, then maybe you should get the hell out. Mark A. Montoya

I feel that I must respond to Mr. Veazey's letter in the Mustang Daily's Oct. 20th edition. I think that someone should shake Mr. Veazey's shoulders and wake him to reality. It is exceedingly obvious that Mr. Veazey has no inkling as to how our political system operates. If he did, he would realize that just because a man is elected president, it doesn't mean that the majority of Americans like, or even voted for him. In the last presidential election, only 63 percent of the electorate voted. That means that 47 percent of the electorate's opinions were not accounted for.

I don't see how Mr. Veazey can state "...obviously the majority of the country likes, which is why he was elected..." There happens to be some instances of presidents winning without the majority vote. In 1876, Tilden won the majority vote, but Hayes got the presidency. Mr. Veazey is upset because there are so many anti-Reagan and Watt editorials and cartoons. Certainly the reason isn't because the economy is in a mess and that 90 percent of the work force is unemployed? The Secretary of the Interior doesn't seem to know that his job is to protect the environment, not exploit it for big business.

Mr. Veazey doesn't seem to know that it is the duty of the press to print opposing views and opinions. The right to freedom of the press, speech and thought are guaranteed by the United States Constitution. It provided you the right to express your opinions on the Editorial Page, Mr. Veazey. Don't deny others their right. Your name-calling of a certain group is not worth commenting on. It certainly is a reflection of your character. Your letter has not accomplished anything positive. The only thing you have accomplished is to show the ideal of patriotism. No real American would associate with your ideals of denial, ignorance, and nationalism.

My advice to you, Mr. Veazey, is to clean out your saddle shoes and scripts of Joseph McCarthy and join the 1960's.

Editor:
I would like to commen­
tment Mr. Veazey for hav­
ing the guts to stand up to
the Mustang Daily. I too
am sick of your "left-wing,
immoral, anti-American format."

Writing about "faggots,"
on the front page of the paper just wouldn't hap­
pen back home. Fact is,
back home of Uncle Will
and Dick Rick would inject
those "faggots" full of bat­	ery acid and take care of
the problem for good. And
Uncle Will is a real moral
man too. I love to hear his
stories of how he killed all
those gooks defending our
country in Nam, but
that's a different story.

Let's talk about our
moral model and Presi­
dent, Mr. Reagan. I'm pro­
ud of the man. He use to
make movies, good movies,
one you could take the
whole family to. One
without "faggots" in them.
John Wayne made good
movies too. He would have
been a good president also.
I would like to say that we
need more presidents who
use to be actors, but most
of the actors nowadays are
"left-wing, immoral, anti-American, faggots." I'm proud of James Watt
too. He's going to get us oil
and tell all those left-wing environmentalists, who
can't stand the sight of a
little oil spill, to "get the
hell out." I drive big
American iron, not a small
fuel efficient, anti-
American import, and I
need that oil.

It's time that people like
Mr. Veazey and myself,
people who don't mind im­
pousing our moral stan­
dards and beliefs on others,
to speak up and be heard.
We can't let "left-wing, im­
oral, anti-Americans" push us around anymore.

Bryan Lennon

Editor:
I am writing in response
to David Veazey's "Daily
Dail" letter which ap­
appeared in Wednesday's
paper. My first reaction
was a smile, thinking his
letter was an attempt at
satire. But as I continued
reading, I realized that it
was the real thing — in­
tolerance and ignorance. Apparently, Mr. Veazey
has problems accepting the
right of other people to hold
views that are dif­
ferent from his and would
deny their right to express
these views publicly. The
"our country, love it or
leave it" mentality is in­
tolerance standing behind
phony patriotism.

Mr. Veazey shows his ig­
norance in the following:
First, President Reagan
was not elected by the ma­
jority of Americans, as Mr.
Veazey claims. He was
elected by the majority of
registered voters who
bothered to vote, which is
not the same thing.
Second, America is a
great country, not because
of majority rule but
because minorities are free
from the persecution of the
majority. When this
freedom is gone, so will
America's greatness.
Third, the fact that the
Daily printed Mr. Veazey's
letter is the lie to his claim
that the paper doesn't give
equal time to opposing
views. By running Mr.
Veazey's "left-wing, immoral,
anti-Americans" letter, it
gives equal time to opposing
views. This is the Daily's
mission.
Finally, I want to ask
Mr. Veazey — "Are you go­
ing to vote on Nov. 27?" I
hope so. Voting is a
privilege and the only way
to effect real change. If you
don't vote, don't complain.

said.
Editor:

Archie Bunker, move over. The progenitor of the American \"middle-of-the-road\" patriotism has a new rival; and he writes for the masthead of one of the Mustang Daily.

For years, I have often been taught that America is the land of the free. The place where dissenting viewpoints are not only allowed, but welcomed. The place where a man can subscribe to any political, social or moral opinion he should choose, without any fear of condemnation.

Judging from his recent letters, though, one David Vazey would have us believe differently. He seems to feel that those who disagree with his political, social or moral viewpoints are wrong, or even bums. Further, he feels that citizens should not be allowed to live within the borders of their homeland, dissenters should \"get the hell out,\" and find a place where they can exist properly.

Well, David Vazey, I am overpowered by the feeling that you are the true anti-American. And I will not go so far as to request your deportation, I will ask you to examine your opinions about the nature of America, and the concept behind the Bill of Rights.

The fact that some people voice dissent toward the government, as Dr. Martin Luther King, Malcolm X, or even Ronald Reagan, does not mean that they should be disallowed from the borders of our country. It does mean what it is, that they have discharged with a great deal of courage, and would like people to know why, possibly even sway some opinions.

This is the American way. Enforcing agreement and belief, and telling dissenters they are wrong. And opinions of the multitude is not.

Keith Jones

Editor:

This in response to David Vazey's letter as I \"Sick Daily\", I would like point out to him a contradiction.

You recommended that the Daily should start giving us your viewpoints. I would definitely call their articles on homosexuality as different viewpoint.

Also, you may be a patriotic American but you're also an illiterate one. The Mustang hardly lifestyle, and they are some of the clearest people I know. Who are you, may I ask, to speak for our country and say \"America doesn't care for homosexuality\". I wonder who you are, and what is your moral and immoral? The new testa- ment, a major portion of the bible, shall be judged. and for some reason, me, it was an eye-opener to an important group on gay closet.

I do not know if you have ever been to San Francisco, Mr. Vazey. But if you have then you know that over 60 percent of the people are homosexual. Since San Francisco is one of the largest cities in the United States, I could like to ask you, who do you propose to-see, exist, and listen?

I thought the article about the Gay Students Association was very well written and very informative. Now, if you are interested in Vazey, was forced to read the material. It may help you better understand what you're voting for.

Name withheld by request

Jennifer Parker

David Vazey ought to sit down, rewrite and resubmit the letter. It is opposition to educated viewpoints really in the battle of equal opportu- nitv?}

Brad Owens

**Opinion**

**Burning the flag**

In a move bare in its aversion for Constitutional controversy, the Supreme Court refused Monday to rule on a case involving both the burning of the American flag and the freedom of expression.

By a vote of 8 to 1, the justices let stand the convictions of two Revolutionary Communist Party members for burning the flag. The two had been convicted on the charges when the federal magistrate presiding at their original trial refused to rule on whether showing contempt for the United States government by burning the flag was a matter of freedom of expression. Instead, he said the only issue involved was whether or not the flag had been burned, leaving the issue open for the Supreme Court, which turned its back on it.

The Court’s senior member, William J. Brennan dissented saying the flag desecration law as it now stands "constitutes overt content-based censorship, pure and simple."

"Under this statute," wrote Brennan, "one may freely burn, mutilate or otherwise abuse a flag for any reason in the world, except for the purpose of stating a contemptuous message about the flag and what it stands for." He charged that "this censorship goes to the heart of what the First Amendment prohibits."

The Justice Department said in its brief that the law was carefully crafted "to prohibit only those physical acts performed in circumstances which Congress considered as showing a clear intention to cast contempt upon the flag." That is not the question.

There is a grave issue here concerning freedom of expression, whether or not the flag as a representative and icon of our government, should not be used to present a message of contempt, or at least of disapproval, of the majority of Americans. It seems to me that arresting someone exercising their rights of free speech by burning the flag, abhorrent as the act may be, is a restriction on those rights.

That is the issue the Court should have agreed to address, and it is an issue the Justice Department admits exists in its brief.

Are such acts protected? Should the law be dropped as a threat to the First Amendment? Don’t ask the Supreme Court.

**Letters**

**No-ray-guns**

**Editor:**

After reading the comments of David Veazey, I found the time to respond to his narrowed attitude. Starting with Ronny I ans; I grew up with that puppet of big business as my governor for many years. Ronny was elected president because of apathy, not because of the majority of Americans like him.

Veazey’s blanket statement “America doesn’t stand for homosexuality” makes as much sense as saying America does not stand, Gay Rights freedom.

What I think of James Watt’s is not printable. He is the biggest eyesore in the Reagan Cabinet in position that he tries hard to uphold. There are many alternatives to Watt’s way of dealing with the interior of our country, but they might not be in the best interests of the big oil corporations that James used to work for.

My view of this country is that it needs help. We do not need rubber stampers like David Veazey. I, also, have a lot of pride in our country — what it is and what it can be. We must reverse the trend started by Ronny and Associates; we need to care for those who can, not just the few who might have enough extra money laying around to trickle down to the rest of us.

Dean Sprague

**Letters**

**Sickened by Veazey**

**Editor:**

This letter is in response to the October 20th letter by David Veazey. First of all, I hope that this letter is only one of many in response to Mr. Veazey’s shocking letter. Mr. Veazey claims he is "sick" from what he reads in the Mustang Daily. If he is sick, well then I am terminally nauseated from reading his letter.

I am afraid I do not agree with what Mr. Veazey describes as "certain values and morals which this country represents." For the sake of all humankind, I hope that the majority of people do not hold the same values that Mr. Veazey does. Love and pride for one’s country — a final but condensation of others is not. What happened to this value? Love thy neighbor as thyself? I will not let Mr. Veazey define what is immoral to me, whether the issue is homosexuality or anything else.

Also, I would like to point out that one is not necessarily anti-American if one does not agree with or is not pleased with the way issues are being handled by the government. Does Mr. Veazey mean to imply that every person who did not vote for President Reagan is anti-American? What a ludicrous implication. I may be dissatisfied, but I am not "getting the hell out," because I like it here!

I will let Mr. Veazey’s opinion of James Watt go without response because I could write a book on them, and they barely deserve a response anyway.

Scott Danielson
