Spring quarter fees may climb to offset cuts

by Robin Lewis

corn.

Spring quarter fees at Cal Poly may jump as much as $50 in order to meet funds lost in a recent state cutback and a drop in non-resident students, the California State University Chancellor's Office announced Monday.

The two percent budget cutback ordered by Gov. George Deukmejian on Monday reduced the CSU budget by $18.6 million. The CSU system was already facing a shortfall of $8.3 million because of a drop in the number of non-resident students enrolled in the system.

The cutback has set off a flurry of activity in Cal Poly's Senate, according to Budget Officer Vicki Stover. Stover said there is no way to know for certain how much fees will be raised until an emergency meeting of the CSU Trustees is held on Monday. She said the cutback and shortfall will be met by a combination of higher fees and cuts in expenditures in non-instructional areas. Fees can jump anywhere from $20 to $50 for spring quarter, with the balance coming from expenditure cuts, Stover said.

Stover said Cal Poly President Warren Baker has decided the cuts will be made in other areas than instruction. Baker, who faces a $1.2 million of the $18.6 million cut by December, said Cal Poly will absorb $1.2 million of the $18.6 million cut ordered by Deukmejian. Cal Poly students who are residents now pay $453 a year in fees, and would have to pay anywhere from $20 to $50 for spring quarter, with the balance coming from expenditure cuts, Stover said.

Stover said the cuts will be made in other areas than instruction. Baker, who faces a $1.2 million of the $18.6 million cut by December, said Cal Poly will absorb $1.2 million of the $18.6 million cut ordered by Deukmejian. Cal Poly students who are residents now pay $453 a year in fees, and would have to pay anywhere from $20 to $50 for spring quarter, with the balance coming from expenditure cuts, Stover said.

At the Dec. 6 ASI meeting bond members asked the senate for $12,900. But upon hearing a recommendation from the ASI Finance Committee, the senators agreed to allocate $10,800.

ASI senator Tom Kimbrell asked fellow senators to reconsider the amount allocated. He told senators of the bond who attended the meeting, "I don't know what to do with the Senate, said Kimbrell. They're causing more accidents on campus than any other vehicle, and their causing more accidents with each new quarter.

Many more bike-related accidents on campus aren't reported to the police, said Cal Poly Investigator Wayne Hall. "There's a big difference between what actually happens and what gets reported," Hall stressed. He estimated there are at least six injury-related bicycle accidents each quarter.

"They're usually head injuries, so there's a lot of blood. They look pretty bad, he said. Most accidents occur in the inner campus area. "The whole inner perimeter is bad," said Investigator Wayne Carmack. "You get bicyclists riding like crazy down those walkways. They're just not intended for bike traffic. They're intended for pedestrians."

"I know there's a lot of hard feelings from pedestrians towards bicyclists in that area because of the way they bowl their way through there," he added. The worst accidents seem to occur at the stop signs between the Dining Hall and the Health Center. "Via Carta and South Perimeter has to be the worst intersection," Hall said. "There's so many bikes, cars, and pedestrians."

Bicyclists cause a lot of accidents at the three stop signs on South Perimeter because they regularly run them, Carmack said. "They (bicyclists) don't pay attention at all. A pedestrian steps out in front of the Applied Arts building, he gets a bike in the teeth."

Bicycle accidents, usually collisions with pedestrians, are increasing on campus. Campus Police regulations make cyclists responsible for all accidents they are in, but they cannot be prosecuted in court under current laws.

Senate decreases grant to Poly Band

by Caroline Paras

The Student Senate voted Wednesday night to subtrac $3,500 from an amount previously granted to Cal Poly Band for its tour in Europe.

After agreeing in December to allocate $10,800 to the band, ASI members decided Wednesday night to voted instead to allocate $7,200 from next year's budget.

That decision came on a 14-10 vote. But before the vote was made a debate developed over whether the original amount of $10,800 was in order, and on debate on how the band will meet the budget shortfall.

At the Dec. 6 ASI meeting bond members asked the senate for $12,900. But upon hearing a recommendation from the ASI Finance Committee, the senators agreed to allocate $10,800.

ASI senator Tom Kimbrell asked fellow senators to reconsider the amount allocated. He told senators of the bond who attended the meeting, "I don't know what to do with the Senate, said Kimbrell. They're causing more accidents on campus than any other vehicle, and their causing more accidents with each new quarter.

Many more bike-related accidents on campus aren't reported to the police, said Cal Poly Investigator Wayne Hall. "There's a big difference between what actually happens and what gets reported," Hall stressed. He estimated there are at least six injury-related bicycle accidents each quarter.

"They're usually head injuries, so there's a lot of blood. They look pretty bad, he said. Most accidents occur in the inner campus area. "The whole inner perimeter is bad," said Investigator Wayne Carmack. "You get bicyclists riding like crazy down those walkways. They're just not intended for bike traffic. "There's so many bikes, cars, and pedestrians."

Bicyclists cause a lot of accidents at the three stop signs on South Perimeter because they regularly run them, Carmack said. "They (bicyclists) don't pay attention at all. A pedestrian steps out in front of the Applied Arts building, he gets a bike in the teeth."

Student bike accidents increase

by Teresa Mariani

Bicyclists cause more serious injury accidents on the Cal Poly campus than any other vehicle, and they're causing more accidents with each new quarter.

Many more bike-related accidents on campus aren't reported to the police, said Cal Poly Investigator Wayne Hall. "There's a big difference between what actually happens and what gets reported," Hall stressed. He estimated there are at least six injury-related bicycle accidents each quarter.

"They're usually head injuries, so there's a lot of blood. They look pretty bad, he said. Most accidents occur in the inner campus area. "The whole inner perimeter is bad," said Investigator Wayne Carmack. "You get bicyclists riding like crazy down those walkways. They're just not intended for bike traffic. Bicyclists cause a lot of accidents at the three stop signs on South Perimeter because they regularly run them, Carmack said. "They (bicyclists) don't pay attention at all. A pedestrian steps out in front of the Applied Arts building, he gets a bike in the teeth."

Student dies of infectious hepatitis

by Judy Lutz

A Cal Poly liberal studies senior died of infectious hepatitis on New Year's Day, after contracting the disease during the fall quarter.

Caroline Lee Kiefer, an Alpha Chi Omega sorority member, died Jan. 1 at Washoe Medical Center in Reno. The 21-year-old Santa Cruz native left Cal Poly when she became ill in November with plans to graduate this spring, according to Health Center Director James Nash.

"She was diagnosed very quickly as having hepatitis (by her family physician)," he said. "She improved up through Christmas and was feeling better." Kiefer became jaundiced but then improved enough to join her family in a vacation trip to the Tahoe area. Nash explained. She then became sick again and was taken to Truckee General Hospital and later transferred to the medical center in Reno.

"This is extremely rare with hepatitis...death is very unlikely if you get the proper treatment," Nash explained. "If someone thinks they're a close contact (with Kiefer), we'll give them gamma globulin," Nash said, adding that San Luis Obispo County Health Department has given gamma globulin injections to non-students who may have been in close contact with Kiefer.

Nash said it is a bit late to give the injections, although it might still be effective. "If someone thinks they're a close contact (with Kiefer), we'll give them gamma globulin," Nash said, adding that San Luis Obispo County Health Department has given gamma globulin injections to non-students who may have been in close contact with Kiefer.

Students bear share of cuts

SACRAMENTO (AP) - One of the state's top education advisers says California's public universities and their students will "bear a disproportionate share of the burden" of Gov. George Deukmejian's emergency budget cuts.

On his first day in office Monday, Deukmejian announced a two percent budget cut for many state operations, along with freezes on hiring, promotions, transfers and out-of-state travel, which would save $870 million.

State officials have forecast a $1.6 billion budget deficit by June 30.

The executive director of the California Postsecondary Education Commission, Patrick Callan, said in a report Wednesday that the cuts will fall heavily on the University of California, the California State University and their students.

Deukmejian's order "will inevitably result in mid-year student fee increases, occurring on top of unprecedented increases already in place in 1982-83," Callan said.

"Because this action was taken without consultation with leaders in higher education or students, it is not clear that the consequences of these cuts on colleges and universities and on students were fully understood," said Deukmejian, Callan said.

UC President David Saxon and CSU Chancellor W. Deukmejian, Callan said.

"I think the problem extends beyond Cal Poly," Callan said. "The problem in campus bathrooms is not confined to those involved move to another building."

Hall said that it would be unlikely that the sex offender would be released by February, when the number of complaints received grows. In fact, Hall said, another sex offender was arrested last summer's case, campus police received a call from an architecture department technician who reported a sexual incident involving two men. They were also required to register as sex offenders with the possibility of reevaluation and bench probation and $275 fines in San Luis Obispo Municipal Court. They were also required to register as sex offenders with the possibility of reevaluation and bench probation and $275 fines in San Luis Obispo Municipal Court. They were also required to register as sex offenders and perform sexual acts and observe others through which they perform sexual acts and observe others.

Hall said that it would be unlikely that the sex offender registration requirement for the two men would be dropped.

"Usually, these people have to register with the police wherever they live for the rest of their lives," he said.

The problem isn't confined to specific area, but as police step up patrols of one area, those involved moved to another building.

Reportage of homosexual acts grow on campus

by Scott Swanson

Cal Poly has had problems with homosexuals committing lewd acts on campus for the last 10 years. Recently the problem has worsened.

According to Cal Poly Public Safety, part of the problem is not caused by Cal Poly students at all, but by people off-campus.

"I think the problem extends beyond Cal Poly students," said police investigator Wayne Hall. "I think outsiders come in who are responsible for a lot of this stuff."

Hall arrested two San Luis Obispo men July 20, 1982 in a bathroom in the Dexter Building when he caught them committing a lewd act. The two received one year of bench probation and $275 fines in San Luis Obispo Municipal Court. They were also required to register as sex offenders and perform sexual acts and observe others through which they perform sexual acts and observe others.

Hall said that it would be unlikely that the sex offender registration requirement for the two men would be dropped.

"Usually, these people have to register with the police wherever they live for the rest of their lives," he said.

The problem isn't confined to specific area, but as police step up patrols of one area, those involved moved to another building.

Hydrogen leak delays shuttle

CAPE CANAVERAL, Fla. (AP) - Launch of the shuttle Challenger has been delayed until at least Feb. 1 and possibly "much later in the month," because of an unplanned hydrogen leak, space agency officials say.

A two-week search for the source of the leak into Challenger's main engine compartment has now interrupted the regular schedule of test and preparations for the new shuttle's maiden flight. Hugh Harris, public information chief at Kennedy Space Center, said the launch could slip well into February. Harris, if another test firing of the shuttle's three main engines becomes necessary.

The National Aeronautics and Space Administration pushed back its most recent tentative liftoff date of Jan. 30 after a telephone conference between officials at KSC, Johnson Space Center in Houston and NASA headquarters in Washington late Wednesday.

Another meeting of the NASA management team is scheduled for Friday, at which time a decision may be made on whether another "flight readiness firing" of the engines should be carried out, said KSC spokesman Mark Hose.

Reagan signs gasoline tax bill

WASHINGTON (AP) - President Reagan signed on Thursday a bill which boosts the gasoline tax by a nickel to nine cents per gallon April 1, promising motorists an immense transit system a smoother and safer journey.

The measure, expected to raise more than $5 billion per year for road repair and other transportation needs, is "an investment in tomorrow that we must make today," said Reagan, and will end "a period of decline" in surface travel.

Under the law, four-fifths of the nickel increase will be used to repair and rebuild highways and bridges. The fifth penny will go to mass transit programs.

The new nine cent rate will apply to gasoline and diesel fuel. Gasohol, which is exempt from the present highway tax, will be taxed at four cents per gallon.

Reagan said the work financed by the new revenue is expected "to stimulate 170,000 jobs with an additional 180,000 jobs created in related industries."

However, his chief economic adviser, Martin Feldstein told him in a memo last month that the program might actually result in increased unemployment. Feldstein explained the money taken out of consumers' pockets by the new tax would cost jobs in other areas while it would be many months before people actually go to work on the roads, bridges and transit systems that will benefit from the legislation.

Public safety generally knows the problem is intensifying when the number of complaints received grows. In last summer's case, campus police received a call from an architecture department technician who reported observing a lewd act, but the participantes had left. When police returned, they discovered the two men and arrested them.

While most people are bothered by the lewdness more than anything else, janitors have to deal with the vanishing of that requirement after a year.

Registration requirement for the two men would be dropped.
Bike repair

Working on bicycles is not as tough as one might think, especially if the right tools and place are available. The craft center in the University Union offers all the tools and work space needed for proper bicycle repair and maintenance, or even a total overhaul.

Six bike racks, solvents to clean excess grease, and plenty of elbow room are provided in the work area. Along with the bicycle facilities, areas for pottery work, screenprinting, serigraphy, and a darkroom for developing film and printing pictures, can also be found.

The center is open every Monday through Saturday from 10 a.m. to 10 p.m., and Sunday from noon to 10 p.m. All students and faculty are welcome to come in and check it out.

Story and photos by Keith Van Dam
Poly Band will try to raise funds for Europe trip

From page 1

band members had talked with Cal Poly President War ren Baker. According to Littlefield, the university could not help the band with funds, but that they could help out with fund-raising projects.

In a memo to band members, Baker wrote, "It should be noted, however, that the Development Office will not divert prospective funds away from the instructional programs or other university development activities which have a higher priority."

Baker then wrote that he would allocate some "discretionary funds from my office for the trip, but this will be limited to approximately $1,000."

"I agree with your position to request funding for the trip from ASI," he wrote.

Littlefield added that along with its request for money from ASI, the band had scheduled fund-raising activities such as a concert with the San Luis Obispo Chamber of Commerce and a possible recording contract.

Dave Haynes, chairman of the University Union Board of Governors, told senators that what the band was trying to do was make them feel "guilty."

"You should not feel guilty at all—and you shouldn't feel embarrassed to rescind your vote." Woollery added that the senators "are lucky enough to be able to rescind our vote."

ASI Senator Donald Erickson disagreed, saying "it would look very poor if this body would not support them. I feel the band is deserving of this money."

A vote was taken and the motion to rescind the vote passed.

In a debate over what amount should be granted to the band, Ximbel made the motion to allocate $7,200. ASI senator Peter V'Acour then amended the motion to allocate $5,000. The amendment failed 11-13.

In other action the senate:

—heard a report from the Finance Committee allocating $600 to Intramurals for the purchase of two table tennis tables.

—gave support to two student surveys—ASI Academic Advising Survey and the California State University and Colleges Student Needs and Priorities Survey.

—accepted the resignation of two senators, June Allen and Martin McKeel, because of class commitments.

McKeel asked to be reinstated spring quarter.

Cycle collisions get worse

From page 1

There have also been several head-on bike collisions at the curve of Highland Drive near the baseball field.

The accident problem has worsened, over the last two years because of an appellate court decision affecting the state motor vehicle code. Bicycles are no longer considered vehicles under the vehicle code, but are considered vehicles under civil codes and local city ordinances.

Police used to be able to ticket bicyclists for reckless driving and other violations.

San Luis Obispo municipal codes allow the city to ticket and prosecute bicyclists as well as auto drivers. But accidents occurring on campus are outside city jurisdiction. The state university system does not have traffic codes covering bikes.

Cal Poly, along with the rest of the state university system, is in the process of adopting codes which would make it possible to cite reckless bicyclists and send them to city court for prosecution.

"The only difference (from the old state law) would be that the citation would not go on your driving record," Hall said.

Under the civil law codes bicyclists are responsible for all damages they cause in any accident.

"If they bicycled into injure someone, they have to pay for it," Hall said. "If they damage a car, they have to pay for it out of their own pockets. Civilly, they're still considered a vehicle. That should be an incentive to save their own necks."

The Rape Crisis Center will hold a 6-day training seminar during the next two weeks to prepare volunteers for part time or phone work.

The sessions will be held Monday and Wednesday mornings from 7 to 10 a.m. and all day Saturday for two weeks. Monday meetings will be in the French Hospital Annex, while Wednesday sessions convene in the San Luis Obispo Veterans Memorial Building.

The Rape Crisis Center held a 6-day training seminar during the next two weeks to prepare volunteers for part time or phone work.

The first Saturday meeting will be at the French Hospital Annex from 9:15 a.m. to 4:30 p.m. The Jan. 22 meeting will begin at 9:30 a.m. in the General Hospital Annex conference room.

People interested in more information may contact the Rape Crisis Center at 543-RAPE or 549-5534.

"Even if it is gamma globulin shot didn't totally prevent it, it would probably lead to a lesser case," Nash said. "And then just because somebody's been exposed to it doesn't mean they'll get it... it can be a trivial illness - you thought you had a bad flu..."

Campus bathrooms diverse

From page 2

According to Tony Ortiz, maintenance supervisor of the area where the Dexter and Architecture buildings are located, people tear the seat covers off the walls of the stalls and make holes in the walls with drills they bring. The largest of these "glory holes" in an Architecture Building bathroom measured 10 by 14 inches. Ortiz said:

"The janitors have to clean the writing off the walls. Cleaning the graffiti strips the paint and costs the university money. The maintenance department has also had to patch the walls where holes have been made. "There’s nothing we can do unless we catch them," Ortiz said. "We see them from time to time, but we’ve never caught any of them."

The janitorial staff is looking for a young man in his 20’s who drives a cream colored Mercedes Benz and parks behind the Dexter Library, he said. "This guy has been chased by some of my people, but he was too fast for them," Ortiz added.

Not all parties responsible for the destruction and lewd public conduct are necessarily local. "Bob Dameron’s Ad Book", a guidebook for homossexual listing gay hotspots throughout the United States, cites Cal Poly among five "crusty" areas to be found in San Luis Obispo.

Two Cal Poly students were recently honored with $100 merit awards in an engineering competition. Jim Wood of Danville and Steven Toon of Modesto, were honored in the 1982 College Student Engineering Competition sponsored by the Lincoln Arc Welding Foundation. Both students were honored for work completed while enrolled in the university’s Agricultural Engineering Department. Wood was honored for his project titled "Design of a Firewood Conveyor." His project adviser was Gary Weisensberger, a member of Cal Poly’s Agricultural Engineering Department.

CableData is looking for unique individuals to join our electrical digital and RF design engineering teams. Numerous opportunities exist for having degrees of experience from entry level to supervisory. Excellent "HANDS-ON" R&D and management experiences are being placed on design/development of all circuits. Ideal candidates will be familiar with video and fiber optics, tuners, video and RF amplifiers, oscillators and phase-locked loops. Problem solving ability, inventive creativity and communication are more important than experience.

If working on long term R&D projects for the promising Cable TV industry is appealing to you, here is the opportunity to achieve your ambitions prior to the optimum working conditions. Send resume, drawings or samples of your work to above address. We offer competitive salaries and benefits to 30% of the market. We offer competitive salaries and benefits to 30% of the market. We offer competitive salaries and benefits to 30% of the market.

Coach says little teamwork prevented a possible upset

by Scott Swanson
M.T.

The Cal Poly Wrestling squad lost a heartbreaker to the Oklahoma Sooners Wednesday night 20-18. It was the Mustangs' first loss in seven outings, including a 28-9 thrashing of Oregon State the night before. But despite the fact that Oklahoma was ranked fourth in the nation going into the match, coach Vaughan Hitchcock was not pleased with his ninth-ranked Mustangs' performance.

"It was team weakness that caused us to lose the match," he said. "We wrestled well enough to win the meet, but as a team, I was disappointed."

It was the large point spreads in the 128, 134, and 177-pound bouts that put Cal Poly down and when junior John Noland lost in the last five seconds of his 190-pound bout with Jim Hall, the match was out of reach for the Mustangs for all practical purposes. Noland led 8-0 in the third round, but with eight seconds left, Hall took Noland down and scored on a near-fall to win.

"Noland shouldn't have been thrown with a headlock," Hitchcock said. "He knew it was coming and he let it happen. That was the pivotal bout. Our heavyweight is not that experienced to get a pin, even though the boy wrestling him was not that tough."

Please see page 7
Gilmartin goes to the pros despite injury-ridden years

It makes you want to say, a little determination goes a long way.

Senior defensive end Tom Gilmartin might have waved goodbye to his playing days five games into the 1982 season. The problem—knees, at least knees that won’t stay healthy. And when your knees are damaged in a sport that demands, it’s a pretty good sign you had better stop.

Gilmartin didn’t. The starting defensive end when Cal Poly won the NCAA Division II national championship in 1980, the 6-6, 250-pounder suffered a knee injury and was forced to sit out the entire 1981 season.

He came back for the 1982 season but—deja vu—lost his starting job when the Mustangs would go on without him. Then suddenly, three games left in the season, what is this? Gilmartin returned in form enough to garner 29 tackles, 19 of them solo, as two opponents feeling backward, including two quarterback sacks and a swatted pass.

Now the determination is paying off. The Boston Breakers of the United States Football League Wednesday put Gilmartin up as the 22nd round of the draft.

Gilmartin joins inside Linebacker Steve Booker as the second Cal Poly player to be drafted by the USFL. Booker, picked by the new Western Football Conference as defensive player of the year, was selected Monday by the Oakland Invaders.

Booker at times did a good impression of a hungry defensive line—yeah, the whole line—when he was on the field this season, making 76 tackles, 25 solo. Seven tackles were for losses of 31 yards. He had two quarterback sacks, six deflected passes and—the icing—three pass interceptions, two for touchdowns. Long touchdowns.

Booher, though, may not be going alone to Oakland. Four former Cal Poly players—offensive linemen Chris Daum and Mike Daum, running back Louis Jackson and safety Chris Jones—are reported to have signed free agent contracts with the Invaders.

For every two questions raised (up to $60,000), Dick Heaton announced Monday that the department solicited help from alumni throughout the country to meet that challenge. At conference time the department raised $25,000, O’Neill said. Heaton, the department solicited help from alumni throughout the country to meet that challenge. At conference time the department raised $25,000, O’Neill said. Heaton, the department solicited help from alumni throughout the country to meet that challenge. At conference time the department raised $25,000, O’Neill said.

"I thought there was a good chance of it. I expected it to come pretty close to the range," O’Neill said.

"I didn’t know what kind of money we were going to raise, but—deja vu—and it looked like the Mustang Challenge works. A t the completion of the Mustang Challenge, it was also very happy and very pleased to announce that we have met that challenge and in fact we have gone past the Challenge by a couple of thousand dollars," Heaton said.

Coupled with the $877,424 raised prior to the Mustang Challenge, the athletic department has now raised approximately $1,160,000. According to Heaton, the department still must raise another $1,950,000 to meet Athletic Department expenses.

"To raise the money for the Challenge, the athletic department solicited help from alumni throughout the state of California. When asked if he expected the athletic department to raise the total of the Challenge, O’Neill said:

"...then you need a must still raise another thousand dollars."

From page 6

Pat O’Donnell gave away three points in the 150-pound match on stalling calls and third-ranked Roger Frizzle scored a three point near fall to beat fifth-ranked O’Donnell 6-0. But Poly tied the score at 8-7 when Howard Lawrence defeated third nationally, defeated fifth-ranked Johnny Johnson 2-1 in the 158-pound category.

The Mustangs pulled ahead when Howard Lawrence, ranked 12th in the nation, upset eighth-ranked Melvin Douglas at 167-pounds. Lawrence nearly pinned Douglas in the first round and held on to win 9-6. In the 175-pound match, Tim Vaughan lost to Dan Chad 20-3. Chad, a freshman from the San Jose area, was ranked eighth in the nation at 160-pounds but was down to 157-pounds.

The future for Hischcock’s Mustangs looks brighter, as he announced after the Oklahoma match that he had recruited four junior college state champions—weight-heavyweight Alonzo West, Tim Boyd at 190-pounds, 142-pounder David Wood, and Demetra, a 136-pounder. Tomorrow night our hosts the Mustangs host Temple basketball after 9 a.m.

Mustang Challenge works

Three months ago, Cal Poly alumnus Dick O’Neill presented the Mustang athletic department with a challenge. For every two thousand dollars raised (up to $60,000), O’Neill would contribute one dollar. The fund-raiser was called the “Mustang Challenge.” It was also called an incentive. At conference time the department raised $25,000, O’Neill said. Heaton, the department solicited help from alumni throughout the country to meet that challenge. At conference time the department raised $25,000, O’Neill said.

"I thought there was a good chance of it. I expected it to come pretty close to the range," O’Neill said.

Duck and cover

Here we go again!

Once more, students of the California State University system are being forced to pay for the state government’s inability to balance its budget. And we’ll be literally paying for it—with a slap-in-the-face fee of $20 to $50 increase in student fees beginning spring quarter.

This means shelling out as much as $199 by February 9, the last day to turn in Computer Assisted Registration forms for spring.

But that’s not all. CSU Chancellor W. Ann Reynolds has also announced that Cal Poly and the other universities in the system will get the pleasure of serving our great state in another capacity—the number of courses will be reduced, adding to Cal Poly’s already-significant problem with overcrowded classes. State employee promotions will be eliminated and part-time teachers should start thinking about employment opportunities in other states. Clerical and other non-teaching workers are likely to receive a grim belated Christmas gift as well—layoffs and cutbacks.

Why is it that every time a cut in state spending is needed, the CSU system gets hit? Apparently, it is the easiest target. The bureaucracy is too entrenched to allow itself to be cut back, so the people at the bottom, students and average state employees, get the brunt of the cuts. CSU students and employees have another source of power—numbers—which translates into votes. Unfortunately, the time for exercising that power has passed. Voters were too easily wooed by newly-elected Gov. George Deukmejian’s law-and-order stance, leaving his questionable approach to California’s education system unquestioned.

Deukmejian promised to support California schools during his campaign, but that was apparently only political rhetoric. His Ways and Means committee got left out in the cold again as it did under the “late” Jerry Brown. The more things change, the more they stay the same.

The Mustang Daily joins the opposition against this latest disregard for the future and quality of education in California. We also urge ASI Vice-president Kevin Moses to take a message to the California State Students Association when it meets in Sacramento. There will be a bone to CSU students, and university employees have been made the scapegoat of incompetent financing long enough. The CSSA should vote to eliminate any differential cut in the CSU budget.

It is time to look elsewhere for a place to drop the axe.

Student! Please etch your names on your calculator. Any conspicuous identifying mark—record somewhere separately the serial number. You may think of the number of calculators that are lost here at Cal Poly, and may be you do not know that the campus Lost and Found office is keen on identification, unless the claimant can identify it positively.

This means that you must either have the serial number, or know of some other conspicuous identifying mark such as your name scratched on it. By the way, if you bought your calculator at El Corral, you could probably get a record of the purchase including the serial number, so you can get that information from them if you go over there and identify yourself. Furthermore, if your name on your calculator may make it much harder on anyone who steals it from you. It also surprises me greatly how many calculators that are turned in are never claimed. Maybe they aren’t as expensive as they used to be, but still, nobody wants to throw money away, especially if they can get a calculator every other day!

The same, more or less, goes for textbooks and other possessions. We could get them back to you much quicker if we knew to whom they belonged, especially textbooks, which I know are very expensive these days, not to mention very necessary to your studies. I believe that when someone goes to reduct a textbook at El Corral they have to identify themselves, so if someone else’s name is in the book, then it may be less likely that such a thief can make money from your textbook.

When you lose something, you should check the department offices in areas where classes that you might have lost it and also check the campus Lost and Found office, phone number 2321. I think more department representatives are necessary and will help you locate items whenever they can.

Anne Fletcher, Secretary Chemistry Department

Before quarter break, I attended an “Ending Hunger Briefing” sponsored by the Hunger Project at Cal Poly. I can’t tell you the difference it made in my whole outlook towards world hunger. I went there knowing it was a subject I should be interested in, but I was generally apathetic and ignorant about the problem. I left the briefing much more informed, but even more importantly, back in touch with my vision. I had when I was a little kid that no one should have to be hungry. I know I can no longer turn my back to the issue.

One of the reasons of the problem of hunger astounded me—more people have died as a consequence of hunger in the past 5 years than have been killed in all the wars, revolutions, and murders in the past 150 years. Even more of a surprise to learn was that hunger was not inevitable, that it doesn’t have to exist. We already have the technology to feed everyone. The world’s expert community is in wide agreement that hunger can be ended by the turn of the century, but is being held back by the political will.

“Mankind has never before had such ample technological and financial resources for coping with hunger and poverty. The immense task can be tackled once the necessary collective will is mobilized. What is necessary can be done, and must be done.”

—Breast Commission, 1969

End hunger
