CSU trustees boost spring fees to $193

by Robin Lewis

Full-time fees for spring quarter were raised $44 Monday afternoon by the California State University Board of Trustees. Fees for less than six units were raised $41, bringing the total fees for the quarter up to $193 for students with six or more units and $156 for those with less than six.

ASI Vice-president Kevin Moses said from the California State Student Association's offices in Long Beach that the trustees followed Chancellor Ann Reynolds' recommendation for a $40 increase and added four dollars. The increase was necessary to offset a 2% cutback ordered by Gov. George Deukmejian a week ago. Moses said the extra money will go to supplement the State University Grant which presently is being awarded to 28,000 state university students. The four-dollar amendment, Moses said, should generate $400,000 to offset the fee increase.

Cal Poly's Assistant Financial Aid Director Diane Ryan said the grant program was started this year and awards students meeting its criteria $100 a year in aid. She said Cal Poly awards the grant by giving out a third each quarter.

Ryan said the financial aid office will need to receive criteria from the chancellor's office before it knows whether the individual grants will be increased or more grants will be awarded. Ryan also said what percentage of the fee increase will be met will be known later.

Proof needed for fund transfer

by Steve Goodwin

The University Student Body Government's Finance Committee has asked the Cal Poly Foundation to show approval by the Chancellor for allocation of extra revenues from El Corral Bookstore to a student services fund.

UIBG Chairman Dale Andrews had sent a letter from Foundation Board of Directors Chairman David W. Haynes to the University Union Board of Governors Chairman Barbara McCaleb. The letter explained how retained bookstore revenues could be spent by the Foundation for public relations purposes.

In the Jan. 6 memorandum to Andrews, Haynes said that according to Title X lll of the Foundation's lease with the state, in order for the Foundation to use extra bookstore funds for student services the Chancellor's office must have on file "a statement of policy on accumulation and use of public relations funds."

Cal Poly chess queen ranks high nationally

by Susan Elliot

Women are a minority in the chess world but one Cal Poly secretary was recently named one of the top fifty women chess players in the nation by the United States Chess Federation. "Not many women compete in chess and I think it's unfortunate," Barbara McCaleb said. "But the number is increasing."

McCaleb, wife of Cal Poly public information officer Don McCaleb, was ranked number 48 as a result of accumulating points in tournaments she has played in throughout California. She plays about four tournaments a year and says she plans to spend her summer vacation at the two-week U.S. Chess Open which will be held in Pasadena this August. She holds a rating of 1742 which makes her a Class 2 chess player. Ratings are a statistical measure of performance that changes each time one plays in a tournament. 52,000 people in the United States have chess ratings and average rating is 1500.

McCaleb noted that Savereide has practiced and studied chess for five hours a day in preparation for a major tournament. McCaleb practices about an hour a day by studying from books and she plays when she has time. She takes lessons from Chess Master Lloyd Davis, who also teaches part-time as needed in the Cal Poly music department.

She has been competing for three years and started playing in eighth grade. She also plays on her high school chess team. "I'll continue to go on as long as I have time," she said.

McCaleb said she plays chess and McCaleb said she plays some of her matches with the Morro Bay Chess Club which meets each Wednesday at the Morro Bay Senior Center. Her coach also lectures there.

She also plays with the Cal Poly Chess Club which is open to chess players every day at noon in the University Union. Club participants visit the California Men's Colony to play chess and run a chess tournament for the San Luis Obispo school district.

Jan. 8 and 9 the club sponsored a chess tournament open to everyone including Cal Poly students, faculty, and out-of-towners.

Tournament Director George Lewis, a mathematics professor at Cal Poly, estimates there are about 200 people on the Central Coast who play tournament chess. Lewis is also the adviser for the chess team and he explained the chess team is more structured than the chess club.
German Lunch
Sprechen sie Deutsch? Students interested in speaking German are invited to join the German Lunch Table every Tuesday from noon to 1 p.m. at the Sandwich Plant. For more information, call Frederick Churchill of the Foreign Languages Department at 546-2744.

Christian Debate
The pro and con positions about the Bible, Christian experience and the church system will be discussed in a Campus Christian Center-sponsored debate between Bible believer Randy Franklin and rationalist Mark Roland tonight at 7. The Campus Christian Center at 1468 Foothill will be the location of the free debate.

Automotive Engineers
The Society of Automotive Engineers' first general meeting of the quarter will be held at 7 p.m. tomorrow in Computer Science Building, Room 247. New members are encouraged to attend the meeting, which will cover upcoming social field trips, plant tours and projects.

Testing Volunteers
Volunteers for the Tay-Sachs disease Testing Program should attend today's 11 a.m. meeting in Graphic Arts Building Room 106. For more information about this year's screening program to detect the genetic disease, contact Student Coordinator Theresa Trout at 544-6690.

Poly Notes
Civil Engineering Department Head Peter Lee will discuss the new Environmental Engineering curriculum with the Environmental Science and Engineering Club at 11:10 a.m. today in Air Conditioning Building. Room 203. Lee will speak on changes in the air and water pollution options re-

Computer Technology
It's Only As Good As The State Of The Artist.

We know that maintaining state of the art technology depends on self motivated individuals striving for excellence, not merely functioning as trained technicians. They come from many fields of expertise; including engineering, science, business administration and computer science. Each contributes a special insight or talent for organization, communication and problem solving that improves and maintains our intricate information network.

When you step on campus, Computer Services Department, you will immediately be impressed with the project that matches your experience and skills level. You'll receive a continuous on the job training and the support needed to advance quickly to increasingly responsible assignments. Our horizons are expanding so quickly that today, talented people can reach high technical or management levels faster than ever before.

That is the state of the computer professional at Standard Oil Company of California. Computer Services operates in four locations in the San Francisco Bay Area: San Francisco (Corporate Headquarters), Richmond (East Bay), Concord (near Mt. Diablo), and in the San Ramon Valley, our newest facility (still under construction) offering attractive and convenient housing nearby.

We think that our computer technology offers a stimulating and rewarding environment, and we invite you to consider joining our progressive staff.

We'll Be On Your Campus January 24 & 25.
Please contact your Placement Office to schedule an interview.

Standard Oil Company of California
Computer Services Department

A network of hardworking students serving the needs of their progressive company.

ASi Committee
The ASI is accepting applications for student representatives on the Campus Recreation/Teammath Advisory Board and the Liberal Studies Committee. The Elections Committee is seeking students interested in working on rule revision and overseeing and improving the election process. Contact the ASI office, Room 217A for more details.

Ski Club
The Ski Club's first meeting of the quarter will be held at 7:30 tonight in Science Building, Room 8-85. A slide show and exchange of pictures from the Utah trip are planned, and final details on the planned Sierra Summit and Mammoth mountain ski trips will be discussed.

Spanish Students Union
The first meeting this quarter of Haverim, the Jewish student union, will be held in Math and Home Economics Building, Room 226 at 6:30 tonight. Events to be discussed include potlucks, movies and an exchange with San Jose State University's intercultural group. For more information, call President James Codick, 541-0094.

Modern Brass Quintet to blow at Poly

The Modern Brass Quintet, which includes two trumpets, two trombones, a euphonium, and a tuba, will perform in the Cal Poly Theatre on Fri­
tday, Jan. 14 at 8 p.m.

The program for the Cal Poly concert will consist of "Rondeau" by Mouret, a toccata by Frescobaldi, "Quintet No. 3 in D Flat Major" by Ewald, Geomakes' "Ardira Zan­
areta," and Bartok's suite for "From Children."

The remainder of the program will be four dances by Helden and four Irish folk songs arranged by Keith Snell. Collectively, the musi­
cians have many years of performing experience in both the classical and popular realms. They have recorded with such diverse artists as Greg Ginn, Chri­
sie Sherri, Ervis Presley, and the Roger Wagner Chorale. The Cal Poly appearance of the Modern Brass Quintet is being presented by the Fine Arts Commit­
tee of the Associated Students Inc. Program Board.

Unknowns record some of year's best music

by Daryl Teshima

It is a sad fact today that much of America's listen­
ting taste is determined by radio. Due to the medium's strict and cautious formats, it is very difficult for any new and/or different music to get any airplay.

Last year was a little better than most. A few new groups (Men at Work, The Go-Go's, Human League) received heavy airplay but these were unfortunately the exceptions to the rule. Some of the boldest and most exciting music last year was virtually ignored by radio programmers. Here are four such records which should have been heard in 1982.

RICHARD AND LINDA THOMPSON — Shoot Out the Light

Former Fairport Convention guitarist Richard Thompson and his wife Linda have put together a sear­
ing look into a breakup of a relationship. In many ways it parallels their own separation last year. This per­
cussive smile helps give the album a realistic and bleak vision of life and love. In a series of solid rock songs and bitter soundscapes, one can see all of the emo­
tions they faced: despair, weariness, frustration, anger and regret.

Uncover this harsh message is the music. Led by Thompson's guitar work and raw, acidic singing of Richard Thompson, coupled with Linda's gorgeous husky voice of his wife Linda, the sound is diametrical­ly opposed to the themes involved. But at the end of their soul-searching, the Thomp­
sons seem to reach an acceptance of their fate. In the calm centerpiece of the album, they finally find peace and realize "it is just the motion..."

T-BOOM/HERBETT — Trapdoor

Texas-born singer/songwriter T-Bone Burnett's only album, "Lights that I've Never Seen," was released in 1982.

It's a shame.

Because this is part of a larger work Anderson has written called "United States I-IV." She is currently working to produce the entire work in one marathon eight-hour stage show.

X — Under the Big Black Sun

X is one of the few bands to emerge out of the punk movement with the potential of becoming a major force in music. One thing is sure: the ingredients are all there.

Under the Big Black Sun is their third album, and it is filled with all the raw ingredients that marks their uni­
que brand of music. On this album, the band members show more versatility than they have in the past by flavors their music not only with bitter punk anger but also with weirdness, rockabilly, 50's style ballads, and blues.

But whatever musical style X uses, their lyrics are as sharp as ever. Consider this line: "Absence makes the heart grow fonder/So I never want to see you again/"

Behind everything is the incredible instrumental skill of guitarist Jeff Lorber and his group Fusion, performing eight miles high...

Jazz pianist Jeff Lorber and his band Fusion will be playing at Cal Poly this Sunday.

“Music eight miles high...”

Lorber comes to Poly

Jazz keyboardist Jeff Lorber and his Fusion band, featuring Kenny G, will perform in Chumash Auditorium Sunday, Jan. 16 at 6 p.m.

Presented by the Special Events Committee, the show costs $7 in advance for students and $8 for the public, and are a dollar more at the door. Tickets are available at the University Union, BuoBo Records, and Cheap Thrills.

Lorber has recorded for Aria Records, and his LP's include "Soft Space," "Water Sign," "Wisard Island," which went to number one on the jazz charts, "Galax­
ian," and the recent "It's a Fact."

To jazz critics, Lorber is one of the best young keyboardists in the business, receiving rave reviews and attracting steady audiences.

"It's jazz tempered with funk; the best starts on the street and the solos arc into the ones. It's music five miles wide," one critic said.

Lorber went to the Berklee School of Music in Boston and started his own band in 1976, recording a debut album. The concert is sponsored by the ASI Pro­
gram Board Committee.

Looking for a challenging career in the Account­ing field? UNRCC Business Forms is looking for you! Our company is an Accounting Management Company in beautiful Southern California in a major manufacturing plant for good, hands-on Accounting experience.

Jazz pianist Jeff Lorber and his group Fusion will be playing at Cal Poly this Sunday.

Lighthearted western tale roars into Melodrama

by Daryl Taahima

At the start of the show at the Great American Melodrama and Vaudeville, the master-of-ceremonies bounded onstage and boldly announced that "everyone has a sense of humor...." And for the next 2 1/2 hours, he and the rest of the cast certainly proved his point.

Beginning its eighth year in existence, the Melodrama opened last weekend with a western musical spoof entitled "The Saga of Roaring Gulch." This play, along with the vaudeville show, is simply good old-fashioned entertainment.

This type of entertainment is rare. The Great American Melodrama and Vaudeville is one of the few theaters in the country staging turn-of-the-century social dramas, thrillers, and comedies. "The Saga of Roaring Gulch" is a likable "tongue-in-cheek" western in this classic tradition.

One of the major reasons for the Melodrama's success is its atmosphere. As you step inside the building, you are instantly transported back into another era. In Disneyland-like fashion, every detail feels authentic and vibrant; from the tinkling of the piano tuner to the costumes of the employees.

This atmosphere quickly rubs off on the audience. Spurred on by the master-of-ceremonies (he also played the villain in the play) David Maruna, the audience soon got into the spirit of the play.

Another key to the Melodrama's success is the way the actors and actresses make the audience part of the production. At the beginning of the show, the audience is given their "lines" (cheers for the hero, sighs for the heroine, and boos for the villain). The interaction between audience and performers helps give the play its warm intimacy.

The play itself commenced in true camp fashion. Although the storyline was totally familiar, the performances were surprisingly inspired and fresh. In many ways it was like watching Johnny Carson. It isn't exactly high-level comedy, but it has a light hearted likable charm.

In addition to the two-act play, the Melodrama also presented a Vaudeville Revue with a hillbilly accent. Some of the exotic events ranged from splitting exhibitions to dueling tap dancers.

In between acts there are two 15 minute intermissions! the Melodrama sells a variety of foods and drinks. For fairly reasonable prices, one can purchase a bucket of popcorn, pitchers of beer, and other little tidbits.

The bottom line on the Melodrama is that it's a lot of fun. It is definitely one of the more interesting and unique places in San Luis Obispo County to spend an evening.

The Great American Melodrama and Vaudeville is located on Highway 1 in Oceano. "The Saga of Roaring Gulch" will be playing every Thursday through Sunday evening through February 13. For more ticket information or reservations, call 489-2499.

Approval by Chancellor needed for fund shift

From page 1

Included in the statement, according to the lease, should be the "policy and procedures on solicitation of funds, source of funds, purposes for which the funds will be used, allowable expenditures and procedures of control."

The provision further states "that any funds which are used to provide services previously defined by the state must have prior approval of the Chancellor," Haynes said.

According to Haynes, a clause in the lease reads that "reimbursed earnings derived from bookstore operations, excepting those needed to meet current obligations and to maintain approved reserves and working capital" will revert to the University Union.

In the memo to Andrews, Haynes asked for copies of the required policies and prior approval of the Chancellor in order to clarify the matter. When contacted, Andrews had no comment.

Haynes said last month that the bookstore's donation of $8,264 to University Requested Services could be in violation of the foundation's lease for the bookstore with the state. The University Requested Services fund pays for athletic scholarships, student check-cashing and other student-oriented services.

Parents may be informed of contraceptive use

WASHINGTON (AP) - Health and Human Services Secretary Richard S. Schweiker on Monday recommended a rule requiring family planning clinics supported by federal funds to notify parents of minors who receive birth control services.

The Planned Parenthood Federation of America immediately moved in U.S. District Court to block implementation of the rule, which still must be approved by the Office of Management and Budget.

"These regulations are an outrage and threatens the health and well-being of hundreds of thousands of teen-agers and their families," said Eva Paul, Planned Parenthood's vice president for legal affairs.

But Schweiker said in a statement, "This department has a deep responsibility to protect the health and safety of minor adolescents who are given prescription birth control drugs and devices paid for with taxpayer dollars."

He cited the 1981 budget act in which Congress encouraged parental participation in a teen-aged's use of family planning services.

Critics charged that the regulation would not protect the confidentiality of the doctor-patient relationship, and he was to notify parents of minors who receive birth control services.

"These regulations are not going to strengthen family communication. They're going to endanger the health and safety of thousands of young people," said the American College of Obstetrics and Gynecology.

"We at Planned Parenthood encourage family involvement," Ms. Paul said, "but to make it mandatory means that there are some people who cannot involve their parents."

The rule also would violate the confidentiality of the doctor-patient relationship, she said.

Gusty weather hits campus

From page 1

A roof was blown off a hay barn near the Beef Pavilion, causing about $8,000 damage, according to Plant Operations. The sheet metal roof was broken in half with part landing on an adjacent corral. A portion of another roof attached to the hay barn was also damaged by winds.

A fence leading up to the Off unit was partially destroyed by the windstorm, as well as a portion of the unit's greenhouse roof. Plant Operations received several reports of broken glass and fiberglass near the greenhouse.

Power was out for six hours on the west side of campus near Public Safety, along with the farming area of field and dairy units. Several campus trees were also lost to the windstorm.

The Cal Poly Weather Data Correction Center, which measures wind from the top of Science North, reported wind gusts up to 58 and 60 mph over the weekend.

Engineering Graduates:

LET ARGOSYSTEMS HELP DESIGN YOUR CAREER WHILE YOU PARTICIPATE IN YOUR COMPANY'S SUCCESS.

ARGOSYSTEMS is a people-oriented company that provides a professional environment in a first class engineering facility. With a strong team of 450 employees, we have become a world leader in the design and development of electronic systems.

We are looking for graduating engineers and scientists with interests in the following areas: analog, digital, microwave or antenna design; software design; mathematical analysis; or, digital signal processing.

Consider joining us at ARGOSYSTEMS. You will find accelerated career advancement opportunities await you, along with a comprehensive benefits program that includes 100% retirement vesting after 6 years, and full tuition reimbursement.

WE WILL BE AT CAL-POLY ON MONDAY, JANUARY 24th

If you don't see us while we're on campus, please send your resume to:

ARGOSYSTEMS, College Recruiting, 884 Hermosa Court, Sunnyvale, CA 94086. An equal opportunity employer m/f.

Diversity is strength.

Diverse, it allows ELDEC to offer a varied, challenging, and stable career in high technology electronics. Quality, custom-designed products and innovative problem solving have earned us a strong position in commercial and military markets.

ELDEC systems cover a wide range of customer needs. From the company's solid state proximity switches to the cutting edge computer-based logic and control systems inform flight crews of critical aircraft functions. ELDEC produces small, lightweight, ruggedly packaged aircraft battery charger systems and high and low voltage power supplies as well as electronic measurement systems for aircraft, ships and space vehicles. We are an established corporation with over 86 million in annual sales and a beautiful setting just north of Seattle.

Our future is one of steady growth and technological achievement. Diversity is strength. Diversity is ELDEC.

Build your career on something solid.
Poly Athletes of the Week

If it's winning you want...

Today's lesson is Dependability. There's two extremes—the utter minimum of Dependability can be seen in the Athletes of the Week column. Due to either lack of space or outstanding athletes, the column appears irregularly.

Maximum Dependability, on the other hand, has been shown by middleweight wrestling power Jeff Barksdale, and basketball center Mike Franklin. These two were chosen as the winter quarter's athletes of the week by Mustang Daily's sports staff.

They can both be counted on to win, and if they don't win, they certainly put on a good show.

Barksdale put on two class shows this week. Going into competition he was ranked 16th in the nation, but his status will leap a few notches after these two upsets.

Fight matches style in LaCrosse at Poly

It's the oldest sport native to America and combines the moves and screens of basketball, the endless motion of soccer, the speed of ice hockey and the contact of football. The sport is lacrosse and Cal Poly's Lacrosse Club is hoping to repeat its championship season of last year.

The popularity of the sport has spread from the East to the West coast schools and has undergone some modifications in the process. The game in the west is much more physical than its eastern version, containing much more violent contact.

"The quality of West Coast competition is increasing, but the east is still where the established players come from," said Scott Graham, Cal Poly club organizer.

Poly LaCrosse: young and rough

From page 6

After winning the Western Collegiate Lacrosse League championship last year, the Cal Poly club has moved up to the ranks of Division 1 of the NCAA and will face such teams as Stanford, Berkeley, USC and UCSB. The decision to step up to Division 1 was made after beating USC in the semifinals 1-4 and shutting out Whittier College in the Snack 14-6. The Cal Poly Lacrosse club will host Whittier College in their home opener February 5 at Mustang Stadium.

The modern version of the sport, although somewhat toned down, is still very violent, but there is an agility and strategy of basketball apparent in lacrosse. A successful player must have all of the moves of a good point guard, and the ability to play basketball-like defense. The lacrosse player must also be ready to fast break to the other end of the field at a moment's notice.

Resembling soccer, endurance is another aspect of lacrosse. The field is slightly longer and wider than a football field, so the motion of the players is almost endless.

The speed of the game is rivaled only by the sport of ice hockey. Lacrosse starts the same way as a hockey game in a faceoff. The hard rubber ball used in lacrosse travels at speeds approaching 100 miles per hour. This can cause many small, silver dollar sized wounds and bruises to the defenders. All of the players are equipped with a stick or crosse of varying length, with a small netted basket at the end to catch and carry the ball. The goalie carries the widest netted crosse, the defenders or "middles" carry longer sticks designed for more reach, with the offensive or "attack" players using shorter, more controllable crosses. The crosse is used just as the stick is in ice hockey. It is used to carry the ball, to shoot, and to check the other players.

Lacrosse also contains the contact of football. The object of the game is to score goals, but this is sometimes overshadowed by an effective "pick" in which a complement defender is rudely slammed on his behind. The game has something for everybody, but it is the aggression that seems to attract fans.

The sport got its organized start in the small Eastern colleges and now has spread to the West Coast. The collegiate aspect of the game is still relatively young, but the western version of the game is quickly becoming popular.

BIOLICAL/PHYSICAL SCIENCES...

You're Needed All Over the World.

Ask Pecke Corps volunteers why they are using their Science major, minor, or aptitude in health clinics and classrooms in Malaysia. Why do they use them in fish pond culture projects and experienced forms in Western Samoa? They'll tell you their ingenuity and flexibility are as important as their degrees. Ask them why Pecke Corps is the toughest job you'll ever love.

PEACE CORPS
COME TALK WITH PEACE CORPS REPRESENTATIVES, TODAY ONLY 9 AM TO 3 PM, AT THE UNIVERSITY UNION PLAZA. WE HAVE AN ESPECIALLY LARGE NUMBER OF OPENINGS FOR MAY AND JUNE DEPARTURES.
Opinion

Add nauseum

Adding a class at Cal Poly is like ordering the proverbial "blue-plate special" at the neighborhood greasy spoon diner. Like cooks, each instructor has a different idea of what works. And often the customer, or in Cal Poly's case, the student, gets something indigestible.

Each Cal Poly instructor individually decides how to add students — whether by lottery, class level, major, or in some cases, favoritism. Some students report they have tried to add classes only to have the instructor arbitrarily add people he or she knows by acquaintance. Other unfair practices exist according to student reports, and without a standards, university-mandated policy for adding, there is practically no recourse students can take against teachers. The only edge students have is that instructors may not eliminate students trying to add on the basis of their major unless the class schedule specifically notes the course is open to selected majors only. Other than this provision, faculty members are free to choose their own method of selection.

Cal Poly is the only university in the California State University system which uses a faculty-controlled add/drop system. All other campuses have a student-controlled system, and Cal Poly students should have the same — a fair, standard policy that is implemented in all classes and makes instructors subject to penalty if it is not followed.

The registering and scheduling committee, currently studying alternatives to the present system, could come up with a solution to the random and inconsistent practices Cal Poly students must now deal with. Several policies should be formulated by the committee and the alternate plans presented to Cal Poly students in a special election to vote in the most desirable one. This would put the control of the adding system in the hands of those most affected by the current system — as it should be.

The Mustang Daily editorial board urges the registering and scheduling committee to take immediate action on this problem of adding policy of confusing and possibly abuse of power should not be to tolerated by Cal Poly students.

Letters

Pesticides

Editor:

I found your Opinion Section very interesting (Wednesday, December 2, 1982). One thing I would like to add to it is the fact that pesticides banned in the U.S. are sold to some Third World countries and are used on produce that is re-sold to U.S. grocery stores. Doesn't seem very effective if we still are exposed to dangerous chemicals from these imports...

Claudia Tantum

KCPR out of tune

Editor:

If the disc jockeys were given more latitude in selecting their material, I'm sure that the University Union would switch back to the San Luis Sound and to you, Bill, Brad and Dennis.

Marc Almengres

Anti-war dichotomy

Editor:

Letters have recently appeared concerning the antiwar movement of the 1960's and early '70s. One writer posed the question of why the American people ignored the Vietnam War protests of that era. As someone with long and vivid memories of that period, I may be able to add something to the dialogue.

From the very beginning, the so-called "blue-plate special" peace movement was an orgy of malice by the factions that joined together. The youthful protesters hated anyone over 30. Racial minority groups gave voice to their hatred of whites. A women's liberation movement proclaimed its hatred of men. The socialists hated the rich and were reshaped in the image of the American people not only ignored the antiwar movement, they loathed and despised it. They indicated their massive rejection by the overwhelming defeat of the movement's favorite presidential candidate George McGovern in 1972. The abolishing of the military draft and President Nixon's wind down of the Vietnam War took much of the wind out of the sails of the movement. The Kent State shootings in 1970 were themselves a factor, as it brought home to the kids the essential difference between a revolution and a rock concert.
