President: summer still a possibility

by Caroline Paras

Cal Poly President Warren Baker announced to the Student Senate he is optimistic about the possibility of having summer quarter.

"I’m encouraged. The California Department of Finance has agreed to reconsider the proposal of eliminating summer quarter. It’s not a new proposal, which would eliminate summer quarter," Baker said Wednesday night.

Baker’s announcement came after he spent two days in Sacramento lobbying for support from state legislators, urging them to reconsider a plan which would eliminate summer quarter at four universities. Those universities are Cal Poly, Cal Poly Pomona, Cal State Los Angeles and Cal State Hayward.

If passed by state legislators, a bill entitled the "Trailer Bill" would repeal a section in the state's education code. Baker told the senate that Article 4, section 89080 provides that the California State University board of trustees maintain year-round operations at the four campuses.

Baker told the senate that legislators were informed of the integral part summer quarter plays to many of the students at Cal Poly.

"We graduate 30 percent of all those who graduate then," Baker said. He has voiced his concerns to legislators about the problems students would face if summer quarter were eliminated.

Student views count in debate

by Mary Hennessey

A debate on whether or not the ASI should take positions on social issues turned into a debate on whether the majority of Cal Poly students can accurately be represented as two ASI representatives battled it out.

The Thursday debate, titled "Should ASI Take Position on Social Issues?", was sponsored by Young Democrats.

"I don’t really want to say the way a certain student feels on a moral issue," said ASI senator Dave Chapman. "The range of inputs is of necessity limited." Kevin Moses, ASI vice-president, disagreed.

"Every effort is made to determine that we are accurately representing students," Moses said. "There are methods of getting student opinion polls, telephone surveys and the like."

Chapman pointed out polls take an average of six to eight weeks and even then it is very difficult to get a consensus.

"When you speak on social issues you have lost the common factor," he said. "We are all students, we can agree on student issues like fees, for example. But if we talk about the draft there may be 26 to 27 different viewpoints to deal with."

Grad student arrested

A Cal Poly graduate student in agriculture was arrested last week for allegedly cultivating marijuana and receiving stolen property.

Cal Poly Public Safety investigators Wayne Hall and Wayne Carnall arrested Marjorie Ann Miller of Los Osos on Jan. 13 after recovering approximately $3,000 in stolen property and confiscating two marijuana plants from her residence.

The recovered property included a single-beam electronic balance (a scale used by chemists) from Cal Poly valued at $1,600, and an IBM Selectric typewriter from the Montana State Department of Fish and Game. Two marijuana plants, one six inches and one three feet tall, were also confiscated.

The suspect was released on $1,000 bail shortly after the arrest. The arraignment date has not been set.
Murderer willing to surrender

FRESNO (AP) - A convicted San Luis Obispo County murderer who escaped from a Fresno jail told his attorney that he is willing to surrender if he is promised a safe prison haven.

Joe Nunez Jr., 27, of Nipomo telephoned Santa Barbara attorney Steve Balash Wednesday to say he feels his life would be in danger if he were sent to San Quentin, Folsom or Deuel prisons.

Nunez escaped from Fresno County jail Sunday with two other inmates, who have since been captured. He was convicted last November of first-degree murder-for-hire in the August 1981 shooting of Dwayne Johnson of Nipomo.

In a telephone interview Thursday, Balash said Nunez told him that he was unarmed, "does not want to get involved in a shootout" and is willing to surrender if he is guaranteed imprisonment at a different facility.

"He says he just doesn't want to be looking over his shoulder," Balash said. "I told him to give the district attorney a day or two to see what the response would be. He said he won't surrender if there's a chance of him going to San Quentin."

Oregon plane hijacked

PORTLAND, Ore. (AP) - A man claiming to have a bomb and saying he wanted to go to Afghanistan hijacked a Northwest Orient jet carrying 41 people from Seattle to Portland on Thursday, authorities said.

The Boeing 727 landed at Portland International Airport on schedule at 1:40 p.m. PST and was detained on a remote runway while the FBI negotiated.

No injuries were reported to any of the 35 passengers or six crew members aboard Flight 608.

Federal Aviation Administration spokesman Dennis Feldman in Washington said the pilot reported that as the plane was 53 miles north of Portland that there was "a hijacker aboard claiming to have a bomb."

Satellite team prepares

LAS VEGAS, Nev. (AP) - An elite team began loading sophisticated gear on three giant C-141 planes Thursday in the event they are called on once again to retrieve nuclear debris from a dying Soviet satellite.

Members of the Nuclear Emergency Search Team were placed on 24-hour alert and their highly-technical search gear containerized and loaded aboard the Air Force planes at busy McCarran International Airport.

The team was reported ready to fly anywhere in the world to search out and retrieve nuclear debris from the Russian spy satellite, Cosmos 1402, which is expected to crash to earth Sunday.

Some 300 team members were activated on January of 1978 to recover debris from the Russian's Cosmos 954 satellite when it crashed in the Canadian Northwest Territories.

The purpose of the team is to react to any nuclear emergency or threat. Team members have responded to such events as the emergency at the Three Mile Island nuclear power plant and the Harvey's Hotel bombing in Lake Tahoe, Nev.

YOU CAN DO IT!

It gets down to what you want to do and what you have to do. Take the free Evelyn Wood Reading Dynamics lesson and you can do it — handle all the work college demands and still have time to enjoy college life.

You can dramatically increase your reading speed today and that's just the start. Think of the time, the freedom you've had to do the things you want to do. For twenty years the ones who get ahead have used Reading Dynamics. It's the way to read for today's active world — fast, smooth, efficient.

Don't get left behind because there was too much to read. Take the free Evelyn Wood Reading Dynamics lesson today. You can dramatically increase your reading speed and learn about advanced study techniques in that one free lesson. Make the college life the good life. With Reading Dynamics you can do it.

State reconsidering stopping summer quarter

From page 1
Twenty-nine thousand students have already planned to take classes during summer quarter. At this late date, it would be hard for them to change their plans, Baker said.

The universities were told they had to support themselves during summer session, but he predicted the state would cost students between $400 to $500 to attend, adding it is financially impossible for many students to do so.

Baker hopes to know by March 1 if the state will fund summer quarter and said he will have more information in 10 days.

"We have to make plans for incoming students, arrange an offering of classes and notify faculty," Baker said.

Baker praised the senate's efforts to start student-organized campaigns to save summer quarter, but said they are not necessary.

Cal Poly has been state-funded each summer since 1968. In early January, Gov. George Deukmejian ordered a two percent state budget cut. Included in the budget was a reduction of $15.6 million in funds for summer session.

Also included in state reductions cuts a $4 million cut in library resources and a $1.3 million cut in custodial services.

Students also face a $44 increase in fees for spring quarter. The increase is to offset an $18.6 million cut required by the CSU system between now and June 30. The increase is expected to gross $15.9 million, with financial aid receiving $900,000.

In other actions, the senate:
--discussed a resolution pertaining to an Athletic Fee
--tabled action on a lunch break resolution.

Student opinion differs in debate

From page 1
Moses, however, felt social issues sometimes leak over into educational issues.

"Abortion is a good example," he said. "One campus discussed allowing students to deduct a dollar from their fees if they were against it because their medical facilities paid for it."

Moses added the fact that the state pours millions of dollars into education shows it is a social concern.

"Through exposure, it can lead to a more informed populous," he said. "We made the front page of the local newspaper even without action."

Chapman said it was hard for him to disagree with ASI's concern about social issues, but he was more concerned with the purpose of his office.

"We aren't elected to discuss social issues," he said. "We are elected to discuss educational issues."

Dr. Raymond Zweicher, moderator of the debate, who was impressed with the topic.

"Being a radical of the sixties, I am surprised that someone would even bother to debate this issue," he said.

One student was dismayed by the small turnout at the forum.

"How can the ASI represent the full student body when it has such an apathetic view?"

Cal Poly has recently adopted a conventional two-year program for a master's degree in Business Administration, according to John R. Lindvall, associate dean and MBA director.

Prior to this school year, the program consisted of a list of prerequisites and a one-year degree fulfillment requirement. The program is designed to prepare students for careers in all phases of management. "An MBA is a valuable degree," Lindvall said.

The purpose of the first year of study is to build a broad understanding of the concepts and principles of the field of business administration. Entering students should be competent in algebra and have had one course each in calculus and statistics.

The second year prepares the student for decision-making problems faced by most business firms. It places emphasis on interpersonal and organizational skills.

Acceptance to the MBA program is based on the student's undergraduate GPA and achievement on the Graduate Management Admission Test. Low GPA's can be offset by high GMAT scores and vice versa. The average GPA for admittance over the last 2 to 3 years has been 3.3, "but there is no cut-off," Lindvall stated.

In today's economy, an MBA can be an asset to anyone's career. Yet Dr. Lindvall agreed that "the most students know such a degree is offered at Cal Poly. Graduates from the program have received placement with top level management firms, such as Arthur Anderson, E.F. Hutton, Hewlett-Packard, Memorex, and IBM Corporation.

It is intended for full-time students from a variety of undergraduate backgrounds. Although the most sought after MBA graduates are those with a technical, rather than a liberal studies background, Lindvall noted that "two-thirds of 1982's class received placement by the time of their graduation."

Professional dancer to teach choreography

Cuesta College Community Service Department is offering a course in choreography by Lorraine Gist, whose professional credits include "Playing the Palace" with Judy Garland, "Dancing" with Gwen Verdon, Leslie Caron, Shirley MacLaine, Jack Cole, Ray Bolger, Bill Robinson and "Being Under Contract" to the Ballet Russe de Monte Carlo. New York City Ballet, Los Angeles Civic Light Opera find Universal and MGM studios.

Gist will teach the 12 week course beginning Feb. 6, at her School of Dance studio, 660 Morgo Bay Blvd., Morro Bay.

Choreography is the art of staging movement in the many forms of dance, acting or musical presentation. Gist will separate students into these categories and conduct instruction workshop style in her mirrored dance studio. For further information, call Gist at 772-9468.

TSgt Gib Linzman at 213/543-0700.
Classy pop concert banquet will include

"Tomorrow, tomorrow...", or rather, Jan. 29, is the day for the annual "Pops Concert," featuring selections from "Annie" and medley of Beatles' tunes. The 1983 Concert Series of the Cal Poly Symphonic Band will begin on Saturday at 8 p.m.

The concept will be performed in Chumash Auditorium in the grand style of the late Arthur Fiedler and the Boston Pops Orchestra. Seated at nicely decorated tables, the audience will enjoy the popular and semi-classical music in a symphonic setting while being served sparkling cider, coffee, tea, and dessert.

The Cal Poly Symphonic Band, its members chosen through highly competitive tryouts, will perform a medley of 12 hits from the Beatles era of 1965-68, as one of the highlights of the concert. Both the Beatles medley and selections from the popular show "Annie" have been arranged by John Higgins.

Other selections for the evening include "Slave" by Leonard Bernstein; "Ginger Marmalade" by Warren Benson; two John Philip Sousa marches; and "Shenandoah," arranged by Claude Smith.

Appearing with the Symphonic Band for the evening will be The Sticks, Strings and Hot Air Dixieland Band and The Cal Poly Studio Band.

The Dixieland band will perform "Yellow Dog Blues," "Coney Island Washboard" and "Chattanooga Stomp."

Poly professor to perform in county symphony

by Jennifer Joseph
Special to the Daily

Renowned harpsichordist Ronald V. Ratcliffe will perform with the San Luis Obispo County Symphony on Saturday, Jan. 29, at Cuesta Auditorium.

The concert program will include Haydn's Concerto in D major for Harpsichord and Orchestra; Poulenc's Concert Champetre, Blue's Symphony in C major and Nielsen's Prelude to Act II of Saul and David.

A Central Coast resident and Cal Poly music professor since 1983, Ratcliffe is recognized internationally as an authority on historic keyboard instruments. Among his credits are numerous articles published on the subject, a performance on BBC television, an English recording for the Pleiades label in 1982.

Ratcliffe often performs on models of early keyboard instruments, and for his Saturday appearance with the Symphony, Ratcliffe will perform on a copy of an 18th-century French harpsichord.

Ratcliffe's recent appearances include solo performances at the Beethoven Festival in Tanglewood and the annual San Luis Obispo Mozart Festival.

The studio band will offer the music of "In the Mood," "Night Train" and "Harlem Nocturne."

Tickets are available either individually or by season subscriptions for the four concerts in the 1983 series. Individual tickets for the "Pops Concert" are priced at $8.75 for the public and $4.50 for students. Season tickets are available at $15 for the public and $7.25 for students, representing a 20 percent savings over the individual prices for the four concerts.

Tickets for the "Pops Concert" are available from the University Union Ticket Office, Premier Music Co. in San Luis Obispo, and from members of the band. Season tickets are available by check or money order made payable to Cal Poly Band and sent with a stamped, self-addressed envelope to William Johnson at the Music Department.

The Jan. 29 concert is being sponsored by the School of Communicative Arts and Humanities, the Music Department and Associated Students Inc./Instructionally Related Activities.

The conductor for the concert is Johnson, also director of university bands and professor of music.

The other concerts in the 1983 series include the Winter Band Concert on Saturday, Mar. 6; the Japanese Benefit Concert, Wednesday, April 27; and the Spring Band Concert, Saturday, May 14.

Leona Flores plays the xylophone in preparation for the Pops Concert to be held Jan. 29 in Chumash Auditorium at 8 p.m.

Mustang DaNy Friday, January n . 1003

Pat Fraciaco goes unattended to the basket In a game last weekend. He'll try to keep up his 5.8 point per game average this trip.

This time, women have a chance

If than waa ever a weekend suited for the Cal Poly women's basketball team to win a pair of games, this is it.

Tonight at 7:30 in the Main Gym*, the Mustangs host CCAA foe Cal State Northridge in the second weekend of conference play. Saturday evening Poly will entertain Cal State Los Angeles.

The Mustangs are due for a win. Shoot, they're 4-12 and have lost six of their last seven. They are 0-2 in the CCAA via last weeks losses at Riverside and Pomona.

Senior Carolyn Crandall leads the team with a 12.6 scoring average through 16 games. Terris MacDonald is at 9.7 an o<Rin^ while Kdly Ulrich is scoring at an 8.1 clip.. Through two

Men's basketball

Mustangs take tough test in CCAA; take some notes

by Mark Gang
Staff Writer

The last time the Cal Poly men's basketball team played in a foreign gym there were Christmas carols in the air and the college basketball world was about to receive word that tiny Chaminade University had beaten Ralph Sampson's Virginia team in the upset of the century.

Since that night (in which the Mustangs lost to Santa Clara, 59-48 — their worst loss of the year), Poly has won six straight, including last weekend's victories over UC Riverside and Cal Poly-Pomona.

This weekend, Poly will face its biggest test of the young CCAA season when it travels to Northridge and Los Angeles for a pair of league games. Cal State Los Angeles has the worst record of any CCAA team, but Northridge is a different story. The Matadors have four starters back from last year's 17-7 squad and, despite a 1-1 conference record, played well enough last weekend to beat a very good Dominguez Hills team by six points.

The Matadors may have a mediocre 7-7 pre-league mark, but that was a result of tough scheduling more than anything else. In one stretch early this season, the Matadors lost to Utah State, Utah and Weber State, all three Division I schools. Even Arizona State found the Matadors a worthy opponent, beating them by only nine points (83-65).

For those one-man-seekers looking for anything else that might indicate how good Northridge is, consider this: the Matadors lost to the previously-mentioned Chaminade team by just two points—in triple overtime. Based on point differentials, then, someone might say Northridge is better than Virginia. Realistically speaking, though, the Matadors have always given Poly a hard time. Last year, the two teams traded ten-point wins and of all the CCAA schools, Northridge has the second-best series record versus the Mustangs (21-24).

Cliff Higgins is the Matadors' big gun this year. He scores 16.3 points a game and grabs 9.6 boards a contest. Mark Gauer (11.6 ppg) and Ben Bailee (9.6 ppg and 4.2 rpg) aren't little guns either.

Poly doesn't have one player in the league's top ten scoring, but that doesn't matter. Alex Lambertson is close to a double-digit average (9.9 ppg) and six other Mustangs score at least six aganw.

Please see page 11

Electronic Engineering & Computer Science Grads:

Your Bachelor's Degree in Electronic Engineering or Computer Science opens the door to Link, the leader in the rapidly growing simulation industry.

Link is involved in developing the next generation of simulators utilizing real-time computer graphics for out-the-window scene simulation and radar display simulation used in total flight crew trainers for commercial, military and space applications.

If you'd like to get involved in one of high technology's most exciting areas, consider our career opportunities for HARDWARE & SOFTWARE ENGINEERS/PROGRAMMERS. And take advantage of our New Engineering Training (NET) Program to smooth your transition from campus to career.

Wrestlers take sweet revenge, need close call to do it
by Scott Swanson
Staff Writer

It was too close for comfort, but the Cal Poly wrestlers' 20-19 victory over San Jose State Wednesday night day was as good as it got, as far as the Mustangs' record is concerned.

Cal Poly now owns an 18-2 dual meet season mark. The Spartans dropped to 16-4 with the loss.

The win was particularly significant for the Mustangs, since they lost their first match in 159 conference outings against California schools to San Jose last year.

Poly coach Vaughn Hitchcock was particularly pleased with the performance of Al Guillen, 136-pound Chris DeLong, Pat O'Donnell, Howard Lawson at 177 pounds, and Louis Montano.

Guillen wrestled the 118-pound bout by superior 25-3 decision over John Miletstein. DeLong wrestled the best match of his career when he won a 5-4 decision over John Miletstein. Miletstein came into the match ranked ninth in the nation with a 25-2 record. With the victory, DeLong's record improved to 12-6.

In the 143-pound category, Gordon Barnes beat Poly's Brian Miller 8-4. The loss went the other way to the Spartans, 9-6.

Seventh-ranked O'Donnell won an 11-9 superior decision over Jay Shirkoff in the 150-pound bout to raise his record to 14-6.

Montano followed with a convincing 21-6 victory in the 158-pound class over Pat Huyck, a sophomore from Limpert. Montano ranked second nationally, upped his record to 34-6 with the win.

The Golden Eagles are expected to roll over Mustangs' record is concerned.

No hemming-tennis is hot

Men take weekend on road

From page 10

Cal State Los Angeles isn't expected to roll over and play dead against Poly, but the Golden Eagles are the only CCAA team with a winning record versus Poly 30-26 and last year the Mustangs escaped unscathed with the Golden Eagles with 44-43 and 60-53 wins.

The Golden Eagles are led by Arnold Blackman (11.4 ppg and 8.7 rpg) and Franklin Furic (11.5 ppg). The Mustangs can be forgiven if they caught looking ahead to the coming weekend, after this weekend's road trip, they must face: in play: (i) Chapman, Dominque Hills and Bakersfield at home, and Dominque Hills and Chapman on the road. Those three teams are expected to roll over Poly and be the strongest run for the CCAA title.

And just think, this is only the beginning.

Slight adjustment in Valentine's Day

From page 10

Eagle's strong run for the CCAA title.

Women, 4-12, need a lift

From page 10

CCAA contests, Cranrall scored 32 points and Ulrich 31. Cranrall is a leading rebounder with a 7.2 average. She is followed by Nancy Hosken's 7.0 averaging 16.1 points and 7.5 rebounds a night, are coming off an 81-61 win over Chapman on the road.

Cal State Los Angeles will enter Saturday night's contest with a 3-6 overall mark, 0-1 in the CCAA. The Golden Eagles, who have a bye Friday night, are coming off an 81-61 win over Occidental. Cal State is led in rebounding by junior forward Jam Martin. She is averaging 17 points and 7.2 rebounds a night.

The Mustangs hit the road next weekend going to Chapman and Dominque Hills to complete the first round of CCAA play.

Sometimes coaches in pressroom are like chiefs of staff before a battle or Spielberg until a new film is released—secretive. Or when you ask him a question about his team, he can slip away, humans and walks away. This is Absolute Silence in question here.

Enter Coaches Hugh Beam and Ozzie Yeast for the men's tennis teams, who say their teams are good.

In fact, Yeast is calling his team one of the best ever at Cal Poly.

Cal State Los Angeles will enter Saturday night's contest with a 3-6 overall mark, 0-1 in the CCAA. The Golden Eagles, who have a bye Friday night, are coming off an 81-61 win over Occidental. Cal State is led in rebounding by junior forward Jam Martin. She is averaging 17 points and 7.2 rebounds a night, are coming off an 81-61 win over Chapman on the road.

Cal State is led in rebounding by junior forward Jam Martin. She is averaging 17 points and 7.2 rebounds a night.

The Mustangs hit the road next weekend going to Chapman and Dominque Hills to complete the first round of CCAA play.

Sometimes coaches in pressroom are like chiefs of staff before a battle or Spielberg until a new film is released—secretive. Or when you ask him a question about his team, he can slip away, humans and walks away. This is Absolute Silence in question here.

Enter Coaches Hugh Beam and Ozzie Yeast for the men's tennis teams, who say their teams are good.

In fact, Yeast is calling his team one of the best ever at Cal Poly.

It’s their fault

"If you want to see an example of the failures of socialism, don’t go to Russia," said Interior Secretary James Watt Wednesday. "Come to America and go to the Indian reservations."

Watt was referring to what he sees as the United States’ failure in assisting Indians in becoming a self-sufficient aspect of society. Instead, he said, they have come to see the American government as "the creator and the provider and the supplier." American Indians, as he said, do have the highest drug use, social disease, divorce, alcoholism and unemployment rates in the country.

Watt’s answer to this dilemma: The Indians must be trained to initiate themselves into the American system, as if they are the ones holding themselves back. Watt has always been a simplistic man in office, much like the rest of the members of the Presidential administration in which he serves. It is becoming hard to give his statements and views the serious consideration deserving of a Secretary of the Interior.

What Watt needs, aside from better education concerning the philosophies of socialism, is a better idea of the naive and carelessness of his suggestions. If Watt truly thinks the Indians want into the "American system," one they have scorned for years, then perhaps he should have a talk with his business friends. Job prejudice against Indians in the West and Southwest is as bad as any in this country. Often, mining, timber and oil interests are the largest job suppliers in the areas in which Indians live.

The main question, though, concerning "initiating" Indians into the American system, is do they want to be initiated? Or should Watt attempt what he feels his predecessors have failed at, to provide Indians with the assistance to get a viable economy within the reservations started? His pretentiousness in claiming to know what’s best for the Indians and what they want, and scolding them for perpetuating an environment his department oversees and should help change, is ludicrous.

As Indian attorney Hans Walker said in response to Watt’s suggestions, Indians didn’t choose to be where they are or regarded as they are. In fact, he said, "it was through a program of socialism of which our lands were taken and distributed to settlers across the entire country. There wasn’t a willing seller/willing buyer situation."

Letters
Cold costs

It’s so long until we get a break
It’s like living in a grave
Pasty and white
Snoozing all night
Winter quarter is blue

So, let’s try to find a little ray of sunshine coming through the haze
Fingers all gray
It’ll all go away
Russia makes us today

Cuban-backed insurgency

They’re not like us, Ronnie - they’re hungry. And not poor like us, Ronnie - oppressed. By police not like ours - it’s the army. And arrests aren’t like ours - it means death.

Can you feel it, a peasant’s subsistence? Is it hunger against which they’re fighting? Or are they all dying to be Red?

Brian Carstens

Outlandish charges

Editor:

In response to the Friday, Jan. 14, 1983, letter entitled "Deport Iranians," I must say that I hope he is a freshman, and that he will, in time, develop a more sensitive and educated approach to international conflicts, as well as to people from different cultures.

As was pointed out by the editor, foreign students must pay $70 per unit in addition to regular student fees. In other words, they help to "foot the bill" for our education. In addition, student visas do not usually permit students to work. They come to our country and spend money provided by their countries or their parents. The local community (especially landlords, merchants, etc.) benefits from their presence in an economic sense. The rest of us have the opportunity to find out about the various cultures of the world, by talking with them, without ever leaving home.

These foreign students knew, before they ever came, that it would be expensive to come to school in the United States, and that it would be difficult to study in a country where customs were different and classes and texts would be inaccessible to them.

Sensitivity needed

In response to Guy Dellavecchia’s letter, printed in the January 14 Daily, I must say that I hope he is a freshman, and that he will, in time, develop a more sensitive and educated approach to international conflicts, as well as to people from different cultures.

Jules Keshtgar

Editor:

I was shocked by the outlandish charges made on Iranian students by a well-informed student. I feel that it is necessary to set the record straight. The editor stated that the American worker in no way, shape, or form supports foreign students. These students, in addition to the regular fee of $149 for the winter quarter, must pay a non-resident tuition of $70 per unit.

So if a non-resident Iranian student took 18 units, he would be required to pay a total of $1,250 just for this quarter, whereas a resident with the same amount of units would only be required to pay $149. Mr. Dellavecchia was obviously mistaken by stating that the hard-pressed American worker is footing the bill for the Iranian students.

We are in college to learn. Not only should we learn math or chemistry or English, we are here to learn how to live and survive in this world. This world does not only consist of Americans, but of people from all nations. I pity you, Mr. Dellavecchia. It is obvious that you will find it difficult to survive happily in a world where you refuse to accept anyone different from yourself.
