Summer quarter reinstated

by Robin Lewis

Summer quarter is back. Cal Poly President Warner Baker announced Tuesday afternoon that Gov. George Deukmejian had rescinded his veto of the summer quarter bill. His action will allow Cal Poly to offer summer quarter to our overall academic program, some of the program and the integral nature of the summer quarter at Cal Poly. He said in a news release Thursday that many government officials did not understand, "the merit of summer quarter..." Hayward State, Cal State Los Angeles, and Cal Poly Sacramento that many government officials did not understand, "the merit of summer quarter..." Hayward State, Cal State Los Angeles, and Cal Poly Pomona. He said in a news release Thursday that "since we had the opportunity to explain the nature of the program and the integral nature of the summer quarter to our overall academic program, some of the anticipate savings became questionable. Baker added that the fact Cal Poly is an impacted campus provided strength for his arguments in support of summer quarter. He said cutting summer quarter would have reduced student access to Cal Poly by further worsening the problem of impaction and would have reduced students pursuing degrees that require more than four years to attain. "Tom Dict gun, Cal Poly's director of institutional research, said that the university has graduated an average of 400 students the last two summer quarters. He said this figure is somewhat inflated by the fact that many students have problems graduating official- ly in June because of administrative problems lumped into summer quarter. He said that Pol reduced students to 2,820 students with bachelor degrees and 204 with masters during the 1981-82 school year. Baker added that the budgetary process of summer quarter 1984 may still be cut from the 1982-84 budget. He explained that the proximity of the decision to cut summer quarter began a month ago and the 1984 budget to the decision to restore the fund. ASI Vice President Kevin Moses praised Baker for his lobbying efforts. Saxon said Wednesday, "if Baker's efforts had not worked the ASI's "Save Summer Quarter" petition campaign headed by student government vice president Ron Kimball would have been ineffective. "If that effort had failed (Baker's lobbying)," said Moses, "our legislative efforts would have backed up Baker's legislative efforts." Just how much summer quarter will cost is still up in the air, said Business Affairs Director Jim Landreth. He said the fee increase of $44 for full-time students this spring quarter was for that quarter only. He said a fee increase for the 1983-84 academic year of $320 per student will go before the California State University Trustees soon. If approved, the increase would put the Cal Poly state university portion of the fees for sum­ mer quarter at $134 for full-time and $44 for part-time students. The fees are now $50 and 816, and, with the recent fee increases, will be $894 and $831 in the spring. He stressed that the proposal has not been looked at yet by the trustees and has not been approved. He added that the state legislature is also looking at student fees and may set fees itself.

Baker thanked local representatives for their help in restoring summer quarter. He said Assemblyman Eric Weissand and State Senator Ken Maddy were helpful in lobbying efforts. "Both were very cooperative," he said. He also thanked Assemblyman John Vasconcellos, chairman of the Assembly Ways and Means Committee, for his active support.

"Continuation of the summer quarter is good news for Poly students," Baker said in the release. "They can now continue to plan their spring and summer quarter class schedules secure in the knowledge that they will be able to either complete their programs or make the progress they intended."
Violence mars truck strike

Snipers ambushed dozens of trucks with gunfire and rocks Tuesday as violence spread in a nationwide strike by independent truckers that has left one driver dead and 11 people injured, two seriously.

Police were investigating reports of attacks on at least 50 rigs in 22 states, including the slaying Monday night of a trucker who was shot in the neck while driving through North Carolina and the serious wounding of another trucker in Utah earlier in the day. A teenager in Pennsylvania suffered a fractured skull when a brick bounced off a truck into the family car.

The dead driver was a member of the Teamster Union, which opposes the strike.

In the second day of the strike called at 12:01 a.m. Monday by the Independent Truckers Association, some more local truckers organizations joined the shutdown, notably in Ohio and Massachusetts, to protest scheduled increases in the gasoline tax and highway use fees.

George Franklin Capps, 33, of Clayton, N.C., was killed by a sniper about 11:30 p.m. Monday on U.S. 701 just outside Newton Grove, N.C. Six other trucks were hit by gunfire in the state Tuesday morning.

Storm remodels beaches

SAN DIEGO (AP) New sandbars, the appearance of long-forgotten street-to-beach steps and seawalls that are now below the level of piled-up sand are some of the changes evident along the San Diego County coast since last week's storm.

When the weekend's high tides receded, city workers, homeowners and renters along the ocean front in north Mission Beach were surprised to find an 8-to-10-foot drop from the boardwalk to the beach below.

Beachgoers in the past only had to walk down a few steps to the sand. But after the storm they found 16-step concrete staircases, structures which many residents never knew existed.

The seawall itself, first built in the mid-1920's, was fully exposed for the first time in decades.

While a mile south, the residents found the opposite phenomenon: the sand was piled up so high that the seawall was actually below the level of the beach.

The current conditions resulted when the heavy surf picked up and moved hundreds of tons of sand. Some was pushed over the seawall onto the streets and some was dragged south and piled up against jetty's.

Ninety-five percent of all homes with television, and was watched in 69 percent of all homes tuned to any program during the time it was played.

Super Bowl tops ratings

LOS ANGELES (AP) Super Bowl XVII racked up its biggest television audience ever, boosting NBC to a rare dominance in the Nielsen ratings for the week ended Jan. 30.

NBC said the professional football game was seen Sunday in 40,480,000 homes. The game — in which the Washington Redskins defeated the Miami Dolphins, 27-17 at Pasadena — had a rating of 48.6 and a share of 69 percent, according to NBC, ABC and A.C. Nielsen Co.'s ratings.

Nielsen says that means the game was seen in 48.6 percent of all homes with television, and was watched in 69 percent of all homes tuned to any program during the time it was played.
When class is a real dive; learning scuba in P.E.

Students in a basic scuba diving class are learning it is not all that simple to just take a dive into the ocean.

It takes more than a tankful of air, a mask and a snorkel. It takes a lot of training and conditioning before one can take that first plunge into the ocean, said Wink Russell, Cal Poly scuba diving instructor.

Story by Caroline Paras
Photo by Amy Egbert

Russell teaches two sections of a Cal Poly course entitled, "P.E. 116—Basic Scuba Diving." The course was developed with the assistance of Courtney Platt, a senior physical education major and the former president of the Cal Poly Scuba Club.

According to Platt, the last time Cal Poly offered a scuba diving course was in 1976. And, since it’s reintroduction to Cal Poly, it has become a popular course. Platt is now assistant instructor of the Scuba Club.

With the growing popularity of scuba among students came the reactivation of the Scuba Club. The club died a few years ago from lack of interest and a lack of promotion, said Cal Poly Scuba Club President Matt Valbusa.

"It basically wasn’t organized and no one showed very much interest in it," Valbusa said.

But, in its reorganization in January 1982, the club has flourished. The club now has about 45 active members and Platt was instrumental in getting it off the ground. The club members meet weekly and even put out a club newsletter to inform its members of current activities, said Valbusa.

Most members of the Scuba Club have learned to dive prior to coming to Cal Poly, but many of the students who join the club now are persons who have learned to scuba at Cal Poly, said Platt.

The scuba class is limited to 18 students. In the classroom, Russell teaches, he has had to turn away as many as 20 students.

According to Russell, a course prerequisite is possession of an advanced lifeguarding card. Most students who sign up for the course do not hold a lifeguarding card. However, they are given a swimming proficiency test before being allowed to enter the class. Other requirements include taking a physical examination and being in good physical condition.

A $40 fee is also required. That fee covers equipment rental for the first 10 weeks of the course. The equipment rental includes: a mask, snorkel, wet suit and fins, wetsuit, weight belt, air tank and regulator. It also includes a buoyancy compensation device, which allows the diver to maintain a position underwater by compensating for the change in the weight as he or she descends from the surface. It also provides surface flotation in case of emergency. Students are also provided with a pressure gauge to monitor the amount of air left in their tanks.

A scuba diving course would cost anywhere between $150 and $500 to take privately or in groups outside the college, said Platt. Taking the course through the college saves students close to $100 or more.

Students are taught to correctly use scuba diving equipment. All class lectures are held at Cramdall Pool, while all ocean sessions are conducted at Morro Bay and Shell Beach.

The majority of the class period is spent familiarizing students with the equipment, said Platt. After brief lectures, students get into the water and practice using the equipment. The practice is called scuba circuits. During one circuit, students may swim to the equipment, work out what they have learned, then swim back to their original place, said Platt.

"All of what students learn are just the first steps of becoming a good diver," Russell said.

And, most of the pool workouts are rigorous, he said, adding "It’s all in the name of safety."

Said Platt, "They the students will do things like a lot of rigorous workouts with equipment, and all that stuff is just early basic things to get them in condition—to ensure when it comes time with the equipment, they are capable of performing and using it safely."

Russell stresses safety to his students.

"Never go diving alone," Russell said. "That’s one rule I keep telling students: ‘Never dive without a partner that is trained properly.’ A lot of times guys will take their girlfriends diving. Usually those persons aren’t trained and can’t handle emergency situations."

The Scuba Club also reinforces that rule.

"Our main goal is to promote the sport of scuba, but we also try to promote the safety of the sport," Valbusa said. "We emphasize safety whenever we go out on dives."

The club holds many local diving and boat trips. The activities are there for those members who want to scuba and need "buddies" to go diving with.

The club also sponsors guest lecturers. Many of the persons who speak inform club members about what is new in scuba diving and/or what or how divers affect the preservation of ocean wildlife.

After training with the equipment in the pool, students test their knowledge with ocean dives. All students work in pairs and are accompanied with a safety diver who is trained in case of an emergency.

Many of the students who learn scuba in Russell’s class go on to become members of the Cal Poly Scuba Diving Club—Courtney Platt, assistant instructor.

"They go out into the ocean and put everything they’ve learned in the classroom to use," Russell said.

If students learn all the basic requirements in the course, the end result is not only a passing grade, but certification by one of two national diving associations, said Russell. These are the National Association of Underwater Instructors (NAUI) and the Professional Association of Diving Instructors (PADI).

The certification ensures students that they will be able to get air in their tanks for future diving expeditions. According to Russell, students or anyone cannot get air for their tanks without a diving certificate.

"The certificate card just tells the person filling the tanks that the person receiving the air knows how to use the equipment safely and that the equipment is safe."

To join the Cal Poly Scuba Club, a member must have a physical examination and must fill out a membership form.

The club also has a diving certificate in order to participate in the club’s scuba dives.
The Adventures of Captain Pig

A man flew the Flying Boat, while someone caught in the second aerial part while Scotty flew the Flying Boat.

Meanwhile, back on the spacecraft.

The University Union Travel Center will offer a travel class with European travel tips and slides on Thursday, Feb. 3 at 11 a.m. in Science North, Room 202.

I.D. Cards
If you had I.D. photos taken at the beginning of winter quarter, you may pick up your new card in the University Union Plaza Feb. 3 and 4 from 8 a.m. to 3 p.m. Bring your temporary I.D. to turn in. In case of rain, go to the canopy by the bookstore.

HUG yourself
HUG - The Human understanding and Growth committee - will hold a half, others, and beyond workshop Feb. 4, 5, 6 in the Architecture Building. The workshop, which begins Friday at 7 p.m., is intended to help increase communication in relationships. Class is $6 and includes two meals. Tickets are on sale at the ASI Ticket Office. Call 546-2512 for more information.

The alternative Energy Club is bringing a PG and E representative to speak at their meeting Thursday, Feb. 3 at 11 a.m. in the Science Building, Room A-11. Speaker John Stone is a former start-up Diablo engineer.

Free tutoring in many troublesome subjects is being offered by the ASI Tutorial center. Drop by the center in Room 104 of Chass Hall, or call 546-2666. The tutoring continues through finals week.

The ASI Tutorial Program

Diablo speaker The ASI Tutorial Program

Arthur Cox, CIA agent, diplomat, and author of "Russian Roulette: Super Power Game," will speak on Soviet affairs Thursday, Feb. 3 at 8 p.m. in Chumash Auditorium. Tickets are $1.50 in advance for students; $2.50 at the door, $2.50 and $3.50 for the general public. Cox is being brought to Poly by the ASI Speakers Forum.

Hughes Story.

Today Hughes Aircraft Company is creating a new world with electronics.

In 1947 "Hercules" — the largest airplane in the world. The man was Howard Robert Hughes. His ingenious ideas and explorations brought new discoveries in aerodynamics, communications, avionics, electronics.

And the early years of Hughes Aircraft Company.

Today, Hughes no longer builds airplanes but the discoveries and exploration of ideas continue.

The company's long history of technological firsts, including the first working laser, first 3-D radar, and first synchronous-orbit spacecraft, position Hughes as a world leader in today's electronics industry.

Company-wide opportunities:
- Electrical, Mechanical, Manufacturing or Industrial Engineering
- Materials
- Computer Science
- Physics
- Industrial/Electronic Technology

Requirements may vary. Check with your placement office for more details.

The discoveries continue...
Summer Quarter - The Issue

Losing Summer Quarter would affect many Cal Poly students. However, many more will be affected directly from the proposed cuts. The timing of the possible cut of Summer Quarter is a large problem for students who were planning to attend it. With less than two quarters left before summer, those students counting on Summer Quarter to catch up on units or to graduate are left in limbo.

To this problem some may answer that a Summer Session should be kept but to charge a tuition. Unfortunately, this would not solve anybody's problem. Students who are putting themselves through school are having to struggle just to keep up with registration fees increases. It would be impossible for most of them to pay the proposed cost of a full tuition.

Also, many of us who rely on our parents for financial support would be unable to attend a Summer Session at full support. Some people feel that the loss of Summer Quarter may hurt their education in more indirect ways.

For example, involvement in the many clubs and organizations, as well as theaway program, on campus is considered a valuable learning experience not obtainable within classrooms. However, in order to take part in extra-curricular activities students must often decrease their unit load. Summer Quarter is a means of catching up on regular classes so that their education may be supplemented during the regular school year. By cancelling Summer Quarter students may need to narrow their learning experience and exclude extra-curricular activities just to graduate in a decent amount of time.

Several students attend Summer Quarter to obtain courses that are difficult to get during the other three quarters. This not only allows them to get these classes, but also lessens the amount of people trying to get those courses in the regular school year. In other words, the elimination of Summer Quarter will jam up courses that are already impacted. People may have to postpone graduation simply because they cannot add the courses they need.

Of course there are some who feel the elimination of Summer Quarter is not a large problem. But, for those to who it is a problem, it is a major one... and one that they would like to see resolved.

Problems For Faculty

As students, many of us may feel that the possible cut of Summer Quarter will drastically affect us. In addition, the effects of an elimination of Summer Quarter on our faculty would be tremendous. Those who do teach during the summer months would suddenly find themselves without a job. This will naturally lead to an increase in the state unemployment rate and is turn could only lead to a further depression of the economy. However, this problem does not end here. As you may know, the technological fields here at Poly have a great problem with faculty retention. This is due to non-competitive wages. If Summer Quarter was eliminated, wages would drop even lower because of an increase in unemployment in the Summer months.

We can see that the loss of Summer Quarter would cost our faculty wages that are already noncompetitive and this could cost us the benefit of having the best available faculty on the campus.

Spoiled Students

What can students do to alleviate the problem? Many people feel that Cal Poly students should pay a tuition, or at least more than they are now paying. One woman, who asked not to be identified, said that she was tired of California's spoiled students.

"If these kids would only realize that a break they're getting for their education, they might quit complaining about the rise in registration fees. If they went to school in other states they might realize then what a good deal they're receiving in this state."

Another San Luis Obispoan, John Baker is under the impression that most students don't work. He thinks that they should take some manual jobs just to help defray costs. "School would mean more to the students if they worked, too."

President Baker's trip to Sacramento may have been the turning point for the Summer Quarter issue. For instance, when President Baker’s full time trip to Sacramento. There. We still hope!

Good news

Since many students have expressed the desire to voice their opinions about the Summer Quarter issue, below are some of the ways in which you can act.

1. Write a letter to your state legislators.

2. Call the ASI office and ask for more information on the issue.

President Baker's trip to Sacramento may have been the turning point for the Summer Quarter issue. For instance, when President Baker’s full time trip to Sacramento. There. We still hope!

Rockwell VP will address annual banquet

Peter Cannon, vice president for research of Rockwell International Corp. and vice president of its Science Center in Thousand Oaks, will be the speaker at Cal Poly’s annual Engineering Week Banquet Tuesday, Feb. 22.

The banquet, which begins a week of activities sponsored by the School of Engineering and Technology student council, will be held at Trader Nick’s Restaurant in Pismo Beach. A no-host cocktail hour at 5:30 p.m. will precede the banquet at 6:30 p.m.

Cannon, who joined Rockwell in 1973, was appointed to his present corporate post in 1981. Previously, he was named a staff vice president in 1978 and was appointed to the Science Center position in 1976.

Cannon joined Rockwell International as director of new product development-research and engineering at the company’s corporate headquarters in Pittsburgh.

Prior to joining Rockwell, Cannon held various managerial positions with General Electric from 1956-73. He started his industrial career with Proctor and Gamble in 1955.

Born in Chatham, England, Dr. Cannon earned a Bachelor of Science degree in mathematics and chemistry in 1953 and Doctor of Philosophy degree in physical sciences in 1955 from University of London.

Cannon is a Fellow of the Royal Society of Chemistry; a senior grade chemist of the American Chemical Society; and a member of the American Physical Society, in which he holds a senior professional license.

Travel Center lets student bucks be better spent

by Lorle Wallin
Staff Writer

Before taking off on that special trip for which you've been scrapping and saving for months, why not run your plans by the experts at the University Union Travel Center who could very well slash a whopping $300 off your expenses.

UU Recreation Director Rod Neubert explained the difference between the center on the campus and the 13 travel agencies in town is "we're not here to make a profit—we don't have to worry about commissions or percentage of sales," he said, "so we don't sell anything people don't want or need."

Suppose a student wanted to go to Switzerland this summer. A regular travel agency would waste no time signing him up, taking his money and sending him on his way, Neubert said. Whereas at the center which is staffed with 28 people (five of which are paid), "we sit down and talk with people to find the best package for them. Instead of flying directly to Switzerland, he said, he would suggest flying to Frankfurt instead and then taking the train to Switzerland (which would save $300).

Summer 1983 offers journey to Japan

According to Lori Hurst, Travel Center office manager and four-year employee, the best fares for traveling come in right around now, but by May when people start thinking about vacation, they're reserved and the heavily discounted fares were only available through the university travel centers such as Cal Poly's.

Neubert said there is an art to low cost travel. "People with lots of money have no problem traveling—that's easy," he said, adding the challenge comes in trying to get by on a limited budget.

Classes and workshops are offered every quarter to help students learn to read official airline books (which Neubert said are very involved), help with travel strategy, and familiarize travelers with foreign countries by showing slides. The 24-year-old recreation director teaches a weekly class on Thursdays at 11 a.m. in Science North Room 207 which is open to anyone interested and no sign-ups are necessary.

The Feb. 3 and 10 classes will be covering detailed travel tips on Europe. "Most Cal Poly students have enough money to travel, but the biggest is knowing what they lack is the confidence," he said. With all the possible information on passports, youth hostel cards and international student cards (which for $6 includes health insurance and discount on flights, theaters and museums) available at the center, students can gain the self confidence needed to set out on an adventurous quest.

Neubert said that "travel classes instigate sometimes students need a little inspiration to pull it off."

He said that travel provides an excellent means for development in younger people. When a student is able to successfully get through a country where no one speaks his language, it gives him confidence. "At first, it's scary," Neubert admitted, "but one cannot help but gain a new awareness about himself and others. The experience of traveling in foreign lands may bring the student traveler if nothing else, "an appreciation of the softer, more absorbent toilet tissue found at home," he said. "But nevertheless, a transformation always takes place in the person."

He said travel is an educational tool in which history comes to life open seeing points of interest first-hand. While the novice traveler notices the differences of alien cultures, one cannot help but become more open minded to other ways of life.

In a new environment, Neubert said simple things like a trip to the store or a shower can be a radically different experience—a risk-taking adventure. But according to Neubert, that's what travel is all about. When students are confronted with new challenges, new faces, strange food, peculiar money, and can overcome those challenges, then "those are the experiences that become memories which last forever."

Trips offered during the quarter break in March are one to Hawaii, to Mexico, and to New York City. Interested people should contact the Travel Center downstairs in the UI with any questions they may have in getting ready for them.

The Travel Center will soon have a little more elbow room when they move across the hall to Room 102 of the Union where the pull-down machines are now. The picnics will be moved to the game room with a wall erected around them to cut down on the noise.

In the new locale, Neubert said the center would have much more browsing room for people to look through brochures and maps. They will also be incorporating services such as offering more trips which faculty and staff might be interested in, he said, adding many people would sooner pay the extra $110 for more leg room and comfort.

Academic Senate revises procedure for selection of deans

by Gail Pellerin
Staff Writer

The Academic Senate approved a proposal last week to modify the process to appoint deans of schools as outlined in the Campus Administrative Manual.

The change of the article in CAM was prompted because Dean of Business Robert Coe will resign in June, thus requiring a new dean to be selected.

Academic Senate Vice Chair Ron Brown said the senate wanted to finalize procedures before the search for a new dean began.

The senate revised the procedures when the administration presented them to them during the Center for Public Administration conference in December.

The Academic Senate, an advising group to President Baker, supports the development of a consultative committee to advise the president when choosing a dean.

The committee would consist of four faculty members from the computer sciences, who would occupy the vacancy, elected by the faculty; two faculty members selected by the chair of the Academic Senate Executive Committee; one department head elected by the Department Heads Council; one student elected by the school Student Council; and one school dean selected by the president.

The senate's proposal appoints the vice president for academic affairs to meet regularly with the consultative committee or order the vice president to interview candidates as it is reviewing. A mutual effort will be made by the vice president for academic affairs and the committee to determine which faculty members should be interviewed. The senate's proposal also allows the vice president to interview anyone who is a candidate.

The senate's proposal allows the vice president for academic affairs to interview the candidates they may choose to interview.

You Can
Catch The Wave.

Thursday, February 10

At Advanced Micro Devices, we're getting really good at what we do, and we're doing the right things the right way. We're on the leading edge of every critical technology in the semiconductor industry. There's still a lot more to do before we're Number One. If you're good at what you do, talk to AMD and Catch the Wave.

With your MBA, BS, MS or PhD in Electrical Engineering, Solid State Physics, or related field, you have an opportunity to work at the cutting edge of the world's most advanced microelectronics industry. AMD's wave carries all the excitement and challenges of the semiconductor industry with a company that just passed the milestone of 500 employees.

Make an interview appointment at your Career Planning and Placement Center. Or, if you can't make it on the above date, send your resume to Barbara Edmonds, Dept. CIN-CPR-15B, Advanced Micro Devices, 901 Thompson Place, Sunnyvale, California 94086.

An equal opportunity employer m/E/V.

At Extended Learning Programs, California State University at Sacramento, we are offering a history-oriented tour to Japan for summer 1983. "Feudal Japan and the Shogun: Kyoto Rules." Open to all, the program focuses on traveling to 13 cities in Japan's amazing development.

The tour will take participants to the magnificent castles at Osaka and Himeji, the former site of his English adviser's residence, and the grave of Tadamoto (Grand Honkome), the Christian convert who was the historical model for "Mariko" in the story "Shogun." The price is $1,999, which includes air fare, most meals, extensive sightseeing, theater tickets, and twin-bed hotel rooms with a wall wacked around them to cut down on the noise. The Travel Center will soon have a little more elbow room when they move across the hall to Room 102 of the Union where the pull-down machines are now. The picnics will be moved to the game room with a wall erected around them to cut down on the noise.

In the new locale, Neubert said the center would have much more browsing room for people to look through brochures and maps. They will also be incorporating services such as offering more trips which faculty and staff might be interested in, he said, adding many people would sooner pay the extra $110 for more leg room and comfort.

In a new environment, Neubert said simple things like a trip to the store or a shower can be a radically different experience—a risk-taking adventure. But according to Neubert, that's what travel is all about. When students are confronted with new challenges, new faces, strange food, peculiar money, and can overcome those challenges, then "those are the experiences that become memories which last forever."

Trips offered during the quarter break in March are one to Hawaii, to Mexico, and to New York City. Interested people should contact the Travel Center downstairs in the UI with any questions they may have in getting ready for them.

The Academic Senate revised procedure for selection of deans in December. The Academic Senate, an advising group to President Baker, supports the development of a consultative committee to advise the president when choosing a dean.

The committee would consist of four faculty members from the computer sciences, who would occupy the vacancy, elected by the faculty; two faculty members selected by the chair of the Academic Senate Executive Committee; one department head elected by the Department Heads Council; one student elected by the school Student Council; and one school dean selected by the president.

The senate's proposal appoints the vice president for academic affairs to meet regularly with the consultative committee or order the vice president to interview candidates as it is reviewing. A mutual effort will be made by the vice president for academic affairs and the committee to determine which faculty members should be interviewed. The senate's proposal also allows the vice president for academic affairs to interview the candidates they may choose to interview.

The senate revised the procedures when the administration presented them to them during the Center for Public Administration conference in December.

CO-OP CALENDAR
The Cooperative Education program is a work experience program through which students alternate periods of study with work related to their majors. The work is paid, and academic credit is given.

The following organizations are coming on campus to interview for co-op students and you may come to the co-op office to arrange to interview with them. There are also many other companies interested in co-ops, and information on these positions is available at the office in Chase Hall.

Fri. Feb 4

Vacation book offered
A new and different Bed & Breakfast and Home Exchange Directory is now available, exclusively to professional educators, including teachers, administrators and university personnel, active or retired, to find inexpensive, comfortable accommodations with colleagues across the U.S. and overseas.

The homes are not advertised in other publications, except in a few instances where the home is a small commercial inn that is owned by an educator.

The publishers have found that common interests, similar vacation schedules and the need to economize make within-the-profession housing arrangements attractive. Guests and Home Exchangers enjoy increased personal safety and home security, and local guidance and advice while travelling.

There are no MIRACLES...
There is only DISCIPLINE
4 MONTHS
$75 00
New Members Only
541-5180
3546 S. Higuera • SLO

The price for the EVA directory (including a copy of the Fall Supplement) is $5.50 (US). A postage charge of $1.00 is to be added. Orders for the guide must include information that identifies the purchaser as a professional educator.

The directory or further listing information is available from EDUCATORS' VACATION ALTERNATIVES, 317 Piedmont Road, Santa Barbara, CA 93105, telephone (805) 687-2947. The Econometrics Department had 11 proposed course reclassifications revoked by the Chancellor's Office and three accepted, according to Department Head Howard Smith. In a letter submitted to Malcolm Wilson, Associate Vice-President of Academic Programs, Smith asked that at least five of the original 14 classes be reconsidered. The proposal is still pending.

Smith said the department is "obviously disappointed" and feels the quality of course offerings will suffer because the straight lecture approach is no longer appropriate to accommodate analytical and mathematical discussions necessary in economic classes.

Several other department heads refused to comment on mode and level and declined to be interviewed.
Trans tour: Neil Young is still stunning

by Mark Brown

Neil Young. It's about time.

After the oversized stage props and mysterious "road-eyes" of the Rust Never Sleeps tour four years ago, what could Neil Young possibly do on this solo acoustic tour, to top all that for concept and weirdness?

He didn't leave us wondering long. Fans entering UC Santa Barbara's Events Center Jan. 19 were confronted with a huge television screen carrying live backstage reports from commentator Dan Clear, hired to provide tongue-in-cheek coverage of Young's Trans tour. Clear's coverage ranged from local weather reports to interviews with German shepherds to bizarre public service announcements. "We've noticed quite a bit of smoke in the auditorium this evening, so we'd like to tell our friends of you just where you are, in case you've a bit confused." Between reports a montage of clips ran, ranging from "Howdy Doody" to "Tina and Shirley."

OK, he could still deliver the weirdness and the humor. But what about the music? Four years between tours makes you wonder.

And Young's shaky start turned the wonder to worry. "The Old Laughing Lady," "Motor City" and "Revolution Blues" went by in a flurry. The sound was shrill; the audience screamed as if it was at an AC/DC concert; Young was shrill; the audience screamed as if it was missing without an entire electric band. "Blues" went by in a flurry. "The sound was thin, the audience screamed as if it were at an AC/DC concert."

Young was by now completely at ease, sauntering from guitar to piano and back as if playing in his parlor for some friends. The set started off with "Mr. Soul." A performed on the piano (it was written) and "My My, Hey Hey". "The Gold Rush" (performed on the piano it was written) and "My My, Hey Hey". A performed on the piano (it was written) and "My My, Hey Hey". A performed on the piano (it was written) and "My My, Hey Hey". A performed on the piano (it was written) and "My My, Hey Hey". Times columnist quips about politics and life

Story and photo
by Dave Goodwin

Being a columnist for the Los Angeles Times may not be all fun and games, but the way Zan Thompson talks, it must be close.

The spry Thompson, who writes for the Metro section of the Los Angeles Times, spoke at Cuesta Community College recently.

She was a bit surprised to see the 75 or so people in attendance with the torrential rains falling outside. "I can't believe you all came," Thompson said. "Is there nothing on television tonight?"

In addition to her years on the Times, she was an award-winning columnist for the Pueblo (Nev.)-Tribe, has been an extremely active in politics, was a syndicated columnist for the Washington Post-L.A. Times Syndicate, acted in theater, and has even been a Cub Scout den mother.

"If people could get degrees for their work experience," she said, "I would hold them for cooking, communications, politics, self-defense, and literature."

Thompson never attended grammar school because her father had her read instead. But, according to Thompson, when she entered Beverly Hills High School she had the highest I.Q. they had ever recorded. This, she said, was because she did not attend grammar school.

The mother superior at Mount Mary's College got much of the credit for Thompson's writing ability.

She wouldn't let me ever use the word very or any cliches because they were un

able to find a better word for the underground newspaper.

"She talked full of humorous quips. She said of columnist friend Jack Anderson, "I speak at a lot of the same places he does. I'll go to some wonderful group and they'll say, 'Oh well, we've had Jack. Do they mean that biblically or what?" she joked.

Thompson kept it light, talking about the people in high places she has met over the years. Her sharp wit was most evident when she spoke of her political experiences.

She told of the time Nancy Reagan had her prepare the dinner for one of the Reagans' close friends in Washington during the first Nixon inaugura

"Nancy wanted curry," she said, "so that's what I planned. But the cook was incompetent." While the meal was being prepared, a friend and fellow journalist named Harry dropped by to "see how the other half lived." He ended up fail

ing asleep on Ronald Reagan's bed. Luckily, she found him before the Reagans arrived. "Can you imagine hav

ing to tell him who the strange man sleeping on his bed was?" Thompson said.

About 30 minutes before it (the din

ner) was supposed to start, she added, "I noticed there were no hors d'oeuvres for the curry. She sent the cook out to get something appropriate. "He came back with a large can of Planter's peanuts and some shredded coconut! So I poured it all into bowls. But the peanuts and shredded coconut! So I poured it all into bowls. But we got to go/Sooner than we know/The Gypsy told my fortune/Let me have the

Bringing scorecard to see 11 new stars on women's team

Use early torrential rains or chilly temperatures will keep the women's tennis team from trying to place at least third this season among CCAA competitors. Last year the team finished fifth in conference play but now Coach Orion Yeast, in his third season as head coach, has what in breaking terms is a master blend-skilled returners, headstrong transfers and well-chosen recruits.

Yeast put the brew over years, especially, making the foundation the top six. Randy Havens, a transfer from Sierra Junior College, now holds around the No. 2 and 3 spots, along with three-year veteran Andrew Weber. Havens would have been a top three finisher last year had he continued in the conference. The same thing goes this year for the men's tennis team if it last year without the two top spots.

For, and for this reason, better.

Coach Hugh Breun, head coach of the Cal State Bakersfield men's tennis team, with a team of strong depth. "In the seniors, I can count on very good players that we've been able to hold on to," he said. "... Corisutia of their opponents. Chapman is ranked No. 9 in the nation in Division II, as well as ninth in doubles, and Bream calls him the best athlete on the team.

The Mustangs face at least seven Division II teams, so any speculation that the tougher matches are in front of Chapman. It will fit in at either No. 5 or No. 6 singles. Jennifer Stechman remains as the only returner right now to the top six. Last season she played as No. 1 singles player. She'll start out at No. 4 this season. Mimi McAfee, a sophomore last year from Morse High School, where she was rated No. 1 in CCA, will round out the top of the Mustangs' squad, playing No. 5 or 6.

Bream said he will flip-flop those spots according to the level of his competition. Haverland is ranked No. 90 in the nation in Division II, as well as ninth in doubles, and Bream calls him the best athlete on the team. The young man who leads the Mustangs to the top six this season—Dave Raymond of Flotill High School in Pleasanton. Ranked No. 9 last year in the Northern California Junior ratings last year, he is likely to switch the No. 4 and 5 spots with another veteran—senior Tyler Corisutia.

Moving up to the No. 1 singles spot—which wasn't much ofa climb, since he was No. 2 last year—is sophomore Brian Bass. He was No. 1 doubles player last season and chosen All-America.

"He has the potential to be a great player if he wants to put in the time and effort," said Breun. "There's a big question mark by his name about whether he wants to play. But he could be a great player."

The schedule

Men's basketball

Friday, Feb. 4 vs. Cal State Bakersfield

Women's basketball

Friday, Feb. 4 at UC Santa Barbara

Thursday, Feb. 4 at UC Santa Barbara

Saturday, Feb. 6 at Cal Poly Pomona

Saturday, Feb. 6 at Cal State Northridge

Sunday, Feb. 7 at Cal State Long Beach

Sponsoring this event are the Mustangs Athletic Booster Club and the Mustangs Athletic Association.
If you forgot to send thank you cards out after Christmas, now is the time because Cal Poly will continue to have a state-supported summer quarter.

The effects of the elimination of support funding for summer quarter no longer leaves at faculty, students, and the San Luis Obispo community. Thanks are due to the lobbying efforts of President Warren Baker, the efforts of Cal Poly students and faculty, and the understanding of several politicians in Sacramento.

Baker's lobbying for the reinstatement of the funds at the State Capitol over the past months is to be praised. He indicated that part of the problem was a lack of knowledge and understanding of the nature of the summer program, and his lobbying efforts made the true significance of summer quarter apparent to all concerned.

The recently developed Committee to Save Summer Quarter had tables set up in the University Union Plaza and the Library lobby, and urged students registered to vote to sign petitions and pick up form letters.

"Thank you to all student and faculty for signing these petitions or sending letters supporting summer quarter. Through this, we showed Governor Deukmejian how important it is for him to support this critical element of education at Cal Poly."

Several state politicians also stand in line to be thanked. The Mustang Daily Editorial Board stands alongside President Baker in praising the bipartisan efforts in Sacramento on behalf of the summer quarter at Cal Poly and other three campuses who would also have been affected (Hayward, Los Angeles, and Pomona).

A special thanks to Ken Maddy, state legislator for San Luis Obispo County, Assemblyman John Vasconcellos, chairman of the Assembly Ways and Means Committee, and Assemblyman Erik Sjostrom of the 29th District. As Baker stated, "the bipartisan support for summer quarter was obviously important in the governor's decision to continue funding.

Cal Poly students now have two new tasks added to their list of "things to do:" 1) write a thank you letter to Governor Deukmejian, State Capitol, Sacramento, Calif., 95814 for continuing to provide funding support for summer quarter at Cal Poly, and 2) confidently sign up for summer quarter classes.

Hopefully our efforts will also have paid off for summer quarter 1984. Deukmejian can take us seriously from now on.

Editor:

Editor: Fort Chancellor Schmidt of Syracuse University mentioned once: "There is a law that brings people together in groups. It acts like the law of gravity and regardless of what is done over the years, they have the college fraternity."

Many of the ages has tended to congregate in groups, from the early cave man tribe to the modern day social groups and clubs. Everyone has their close group of friends with similar interests and views and has been involved in a club or organization of people at one time or another.

I am afraid the "dissociated greek" is not only disillusioned, but is in the dark. The basis of his letter was the Greek philosophy "know thyself." How is not only disillusioned, but is in the dark. The basis of his letter was the Greek philosophy "know thyself." How many students feel is a lack of flexibility and student input in the curriculum. Perhaps also the paint is an attempt to claim an environment, certainly when an environment doesn't allow for personal expression the inhabitants will usually take it upon themselves to provide that outlet, legal or not. As architecture students there probably is an important lesson in this. I'll sooner be destroyed by drugs and alcohol than censorship.

An academic environment needs such spontaneity and freedom of expression. It keeps the administration on its toes and provides important avenues of discussion among the students. If one expects to learn and grow one must be exposed to many viewpoints and expressions. A homogenous environment breeds narrow people unable to deal or cope with others. Be very careful Jim, Lorenzo, and Tom that the term "future professionals" doesn't come to mean sheep as well, especially in a future that probably won't be as stable as you might like.

Civil disobedience, not vandalism

Editor:

Editor: Freedom to flop

It is indeed a sad state of affairs when a student's only creative outlet is destruction. On that point we will agree with Mr. Mavrynn Mr. Guerra, and Mr. Rakestraw ("Angered Students," Feb. 11). We will not agree however that the act of spilling paint down the east stairwell of the Architecture Building was solely one of vandalism. It was rather an act of civil disobedience. The beautiful and very appropriate quote of Melanarch which accompanied the paint pointed this out.

The underlying issue which is perhaps the root of this entire "problem" is what many students feel is a lack of flexibility and student input in the curriculum. Perhaps also the paint is an attempt to claim an environment, certainly when an environment doesn't allow for personal expression the inhabitants will usually take it upon themselves to express their feelings.

Letters

Editor:

Editor: Letters

Greeks would appreciate the Greek system that has become a part of the educational network of the American campus.

From my experience, individuals have found themselves through maintaining membership in a fraternity or sorority. They discover that to belong in a group takes individual effort. A fraternity is not an organization of faceless homogenous zombies; it is a living conglomeration of individuals attempting to learn from one another.

I admit that such house is looking for a certain type of individual to fill their ranks and each house has different ideas as to what qualities that person must have to maintain membership. But, similarity is not homogeneity. Beliefs may be the same, but backgrounds, lifestyle and thoughts on wealth of various subjects are different.

Just because an individual is in a brotherhood or sisterhood does not mean that brotherhood or sisterhood destroys the individual.
