California Polytechnic University, San Luis Obispo

Wednesday, February 9, 1983

State and Federal Highway funding comes to the University for the first time, according to John Ristow, Federal Highway representative. The California Public Employee Retirement System, the state of California and the Federal Highway Administration are all funding the project.

The project, which is expected to cost $6 million, includes the construction of a new parking lot, the widening of California Poly's main highway, and the construction of a new dormitory.

The project is expected to be completed by the end of the year.

The county is considering a new transit system that would provide better service to the entire county.

The proposal, which was presented to the Board of Supervisors last week, is being considered because of the current transit system's inadequate service.

The new system would be a mass transit system that would provide service to all areas of the county.

The proposal was met with mixed reactions from the Board of Supervisors.

Some members of the Board were in favor of the proposal, while others were opposed to it.

Antinuclear pair sparks soldout solar concert

A pair of antinuclear activists sold out a solar concert.

The concert, which was held on the University's campus, was sponsored by the Solar Energy Program.

The pair, who are known as the "Green Team," were able to raise enough money to cover the cost of the concert.

The concert featured many well-known environmental activists, including Jane Fonda and Ed Begley Jr.

By Bonnie Raitt

"Angel From Montgomery" with guitarist Johnny Lee Shell

Bonnie Raitt sings "Angel From Montgomery" with guitarist Johnny Lee Shell.

The performance was held at the University's Music Center and was attended by many fans of Raitt's music.

The concert was sold out, and Raitt was praised for her powerful performance.

County reps discuss mass transit system

The county representatives discussed the possibility of a mass transit system for the county.

The representatives agreed that a mass transit system would be beneficial for the county.

However, they also agreed that the system would be expensive to implement and maintain.

The representatives decided to continue discussing the possibility of a mass transit system in the future.

Two arraigned in wine crime

FRESNO (AP)—Two Texas men have pleaded innocent to a federal indictment charging that they tried to extort $200,000 from Ernest and Julio Gallo Winery by threatening to put poisoned wine on store shelves.

Kenneth Stewart, 35, and Gerald Orville Graham, 46, both of Houston, were arraigned in U.S. District Court at Fresno Monday after being extradited from Texas last week. Their trial was scheduled April 12 by Magistrate Alan D. Christensen.

Stewart and Graham were charged with sending a bottle of Gallo wine laced with hydrochloric acid from Houston to the winery at Modesto via commercial airline express. They then threatened to put similarly poisoned bottles on shelves unless their demands were met, said U.S. Attorney Donald Ayker.

Gallo officials wired money to Texas, and an FBI agent posing as a Gallo representative placed the bottle of Gallo wine laced with hydrochloric acid from Houston. Stewart was arrested at the scene, and Graham was arrested later at his home.

Officials said Stewart owned a tour bus company, and Graham was a driver.

Sharon liable for massacre

TEL AVIV, Israel (AP)—Menachem Begin personally emerged with few scars from the special inquiry on the Beirut massacre, but his battered 5-year-old government must now put a political gambit to survival.

The inquiry commission's report, holding Defense Minister Ariel Sharon "personally responsible" in connection with the massacre and calling for his resignation, strengthens pressure for early national elections in Israel.

Prime Minister Begin had let it be known in the past that he would consider resigning and calling new elections if the commission's findings were critical of his government or the army. But he never said it on the record.

Candy yields spicy surprise

HUNTINGTON, W. Va. (AP)—An 8-year-old girl got a crash course in sex education recently when she found the surprise inside her box of Crackers Jacks.

The girl's relatives say that instead of a trinket or some other small prize, the box of caramel corn contained a pamphlet entitled "Erotic Sexual Positions From Around the World."

"[The child's] grandmother was present when the pamphlet was discovered. She recalled the girl saying, "Wow, look at this!" Her eyes got great big," the grandmother said. "I don't think she even realized what it was. She thought it was an exercise book."

A spokeswoman for Borden Inc., which distributes the candy nationwide, said several similar pamphlets had turned up recently in Crackers Jacks boxes.

Betty Garrett of the company's Columbus, Ohio, office said officials had determined the booklets were put into the boxes during production in Chicago.

Congratulations LAMBDA'S on initiation into ALPHA PHI

At TRW it's what we're all about.
We've created an environment encouraging you to believe you can define and go after your individual professional goals.

So when you work with us, you'll get a personalized approach to your technical growth. An approach that includes:

- An informal atmosphere that encourages insightful thinking.
- Co-workers who value the free interchange of ideas.
- Responsive managers who look out for your advancement.
- A broad spectrum of challenging projects to choose from -- Projects ranging from large data base software systems, communications spacecraft and alternative energy sources, to scientific satellites, high energy lasers and microelectronics.

And you'll appreciate the opportunity to see these projects to completion. In the long run we think you'll find that TRW offers an environment that brings out the uniqueness in you.

TRW will be on campus March 2, 1983 -- hiring-graduates in most Engineering and Scientific disciplines at all degree levels.

See your Placement Office for more information.

The challenge of snow camping

Coming out ahead in the cold means starting on the right foot

Winter camping can be an exhilarating experience or a big disappointment depending on how well the snow camper applies his or her skills to the situation. Spending a night in a clammy sleeping bag inside a half buried tent would make even the hearty mountaineers rethink their reasons for exploring winter's wonderland. Despite the cold, the winter does have its virtues. The highly used trails of the Sierra Nevada become deserted, and the powdery campgrounds rarely have more than a few visitors. Most of the time winter campers have the wilderness to themselves. The bears are asleep and the mosquitoes have gone to Florida for the winter.

If you cannot tolerate the cold, you might want to try beach camping in Baja California. Snow camping should not be thought of as fun, but as challenging and rewarding. The challenge comes from staying warm the whole time you're out there, whether it's an overnight trip or a major peak ascent.

Having the right equipment and knowing how to use it are the most important parts of winter camping. Several members of an expedition to Mt. McKinley in the early 70's got frostbitten fingers because they lost their mittens and wore nothing on their hands. None of them thought to wear their extra socks on their hands to protect them. In addition, having a $200 down parka does not automatically guarantee that an inexperienced snow camper will not get hypothermia, the potentially fatal cooling of the body's core.

Wool is one of the most economical and dependable types of winter clothing available. Wool keeps a person warm even when it gets wet, unlike cotton or down clothing. By layering clothing, winter campers can adjust their comfort by adding or subtracting clothing. Nylon wind and rain clothes are important for keeping the layers of wool dry and free of snow. A wool hat that covers the ears and two pairs of mittens (sometimes the first pair always manages to get soaked) are also essential.

Cold toes are a biting reminder that good boots are a worthwhile investment. To help keep snow from sliding

Story by Craig Stebbins
Photo by Evelyn True
Successful snow camping means planning ahead

After spending a night in a snow cave, several of my friends swore they would never carry a tent again in the winter. Unfortunately these shelters take a great deal of time and energy to construct, and are only practical for winter backcountry. Exposing sources energy in the winter is not a good idea because the camper ends up being more tired and colder than if he had just pitched the tent and cooked dinner.

Setting up, or “making camp,” in the winter requires more time and work than in the summer. Sleeping warm and safe depends partly on the skill of the camper in choosing a camping site. These sites in low spots and near lakes tend to be colder than those which are elevated and away from locations of water. Avalanches are frequent in the backcountry during the winter and if you’re not careful about where you choose to set up camp, you may find yourself waiting for spring camping the hard way.

Before pitching a tent on the snow, the camper needs to compact the area with snowshoes or skis to make a tent platform. If a platform is not made, the camper needs to compact the area these shelters provide is addicting.

Winter campers also need slow burning energy to keep warm throughout the night and on long days of travel. Fats such as cheese and margarine, and compact carbohydrates such as pastas and quick-cooking grains are some of the foods that provide this type of slow burning energy.

Dehydration is another condition that must be avoided. Besides the common symptoms headaches and nausea, the blood in a dehydrated snow camper is thicker and circulates slower, which inhibits frostbite. "Two to four quarts of Butane-cartridge stoves become very unreliable at freezing temperatures. Butane fuels do not vaporize in temperatures below freezing, which makes them hard to light.

Bedding down for the night also requires a little thought. Water and munchies should be available to relieve those late night cravings and thirsts, and provide additional energy. To avoid an allowing match inside the tent at bedtime, have one person put all the gear inside the tent after it’s set up. According to the the eskimos, little trolls come out and steal any equipment left laying out in the snow. I have never seen these trolls, but have lost enough stuff to an evening snowfall and winds, to believe they exist.

The temptation to lay around for half of the morning in a snow cave is often overwhelming especially in the winter. If you’re planning to change campsites, it’s a good idea to get an early start while the snow is still hard and to get full use of the limited daylight. The advantage of early starts is often realized too late as campers find themselves cooking dinner in the dark.

Snow camping is not something that can be learned from books or newspaper articles, but must be experienced. Going with someone who is experienced on a snow overnight trip is one of the best ways to learn all the secrets that surround this type of challenge.

Raitt, Young sing against Diablo, rally crowds

Campbell then introduced Jesse Colin Young, who broke into his smash hit "Songbird," accompanied by keyboardist Scott Lawrence.

"I believe that we all have a power within us," Young told the audience in his characteristically husky voice after the opening number. "If you use it (the power), it grows like a flower. If you don't, it recedes. And this is like the anti-nuclear movement...we have the power (to stop Diablo Canyon from operation)."

Young then played "Fire Over Water," a potential hit from his recently-released album Perfect Stranger. The piece, like most of the songs Young played that night, was serious, melodic and haunting. The piece, like most of the songs Young played that night, was serious, melodic and haunting.

Young followed "Fire Over Water" with "Long Walk Through Downtown," a poignant tale of the last time together for a pair of lovers. Then he sang perhaps the most stirring number of the evening, a song written for his daughter titled "Song for Julia." Before beginning the piece, Young spoke quietly to the attentive audience.

"Deep in my heart, I have the feeling my children won't have the chance to grow up—and that's why I'm here..." his voice trailed off before breaking into song.

Young planted a song titled "Ophelia," about men who get lost in their work and forget about their loved ones, as well as several tales from his days with the Youngbloods, including "Hesitation Blues," "a song written before herpas," he laughed.

Young wrapped up his set with "Fight For It," and a tune, on which Raitt backed him up, titled "Night School." After a 20-minute intermission, People Generating Energy spokesperson Noreen E. McGrath gave a brief presentation on the continuing fight against Diablo Canyon. She told the audience that the Nuclear Regulatory Commission has never refused to license a nuclear power plant and that "We (People Generating Energy) have no confidence in the NRC's regulatory process."

McGrath said PG&E will sponsor a community walk through downtown San Luis Obispo on March 25, to enable area residents to "vote" against the operation of the nuclear power plant.

"The Nuclear Regulatory Commission has never asked the people of San Luis Obispo County how they feel about Diablo Canyon," PGE representative Pam Metcalf said in a recent press release. "Just because they've never asked doesn't mean we shouldn't tell them."

"Everyone opposed to Diablo must do something," McGrath concluded, then introduced Raitt and her accompanying guitarist Johnny Lee Shall.

Raitt began her set with a John Prine tune titled "Angel From Montgomery," and continued with mostly rhythm and blues pieces, both her own and those of other artists.

"Don't Advertise Your Man!" a song Raitt performed in her early days as a singer, evoked shoutings and whooping from many women in the crowd. "Love Me Like A Man", caused an equally enthusiastic response.

Prior to a medley of older blues songs including one by the late Joe Tex, Raitt said, "If I make any mistakes, don't give me any shit," and the audience roared with laughter.

Sunshine performance

"Maybe the state could give them tax incentives to let them do this without turning it on."

Campbell expressed concern for the future of solar tax credits because of the Governor George Deukmejian administration's position on state budget cuts.

"If the wheel falls off this trailer, there's no big deal," Campbell said, "But if the wheel falls off at Diablo, all the king's horses and all the king's men couldn't help us."
Poly Notes

Chili Cookoff
The Cayucos Merchants Association is holding the third annual Cayucos by the Sea Chili Cookoff on Saturday, Feb. 12 from 2-6 p.m. It's all you can eat, and the judging will be between 2-4:30 p.m. There will be door prizes and cash prizes of $25 for the best individual and a plaque for the best commercial entry. Entry fees are: $3 for chili, and $5 if you are an exhibitor. Cost of the cook-off is $4 advance, and $5 at the door. The cook-off will be held in the Veteran's Hall on Cayucos Drive and Ocean Avenue in Cayucos.

 Phi Upsilon Omicron
The Home Economics Honor Society will be holding their Founder's Day Celebration on Thursday, Jan. 10. Mar­jorie Martenson, founder of the honor society will be speaking at 8 p.m. in the Home Ec Living Room. Following the ceremony, there will be a party and refreshments.

Medieval Faire Pizza Feed
The UU Craft Center is holding a Medieval Faire meeting tonight at 8:30 p.m. in the Home Ec Living Room. Following the ceremony, there will be a party and refreshments.

Bible Study
A Bible study will be held every Friday in University Union at 7:30 p.m. for the duration of winter quarter. This study is open to all Poly students and faculty with the intention of encouraging all to come to a true knowledge of and relationship with the Lord Jesus Christ through the study of the Bible.

Cayucos Chili Cookoff
Entry fees are: $3 for chilli, and $5 if you are an exhibitor. Cost of the cook-off is $4 advance, and $5 at the door.

Geothermal Energy Technology
The American Society of Engineering Technologists is sponsoring a speech at 7 p.m. by an engineer from Union Oil's Geothermal Plant in Santa Rosa in Fisher Science Room 207. A slide and film presentation will also be given.

Draining the "bathtub notion" of executive fitness

by Jenny Coyle
Staff Writer

Exercise is when you fill the bathtub with water, hop in, pull the plug and then swim against the current.

That's what a few executives think, according to a man who designs workouts for some top people in business.

The "bathtub notion" is why corporate fitness is important, said Stan Mints, executive fitness director for the Flor Corporation in Irvine.

Mints spoke on campus last week to a crowded roomful of over 50 people. His lecture was sponsored by the Association of Fitness Directors in Business and Industry.

Mints is in charge of fitness programs for 180 of the 3,000 Flor employees.

"The typical executive lifestyle is smoking, drinking, sitting and eating poorly," said Mints. "Lolos of executives are just waiting time bombs, ready to explode. The result is bypass heart surgery."

Mints explained that companies like Flor, an international engineering and construction firm, spend lots of money for health care coverage.

Corporate Fitness can put a dent in those costs, so in a way our program is an insurance investment. It's preventative medicine," Mints said.

"Plus, the key is to improve work performance by increasing energy and vitality. Exercise is one way to do that," he added.

The program at Flor deals strictly with exercise, not with nutrition or stress management.

Mints begins an individual executive's program by conducting a series of tests on the eyes, ears, lower vitality. Exercise is one way to do that, he added.

The Cam Poly Department of Public Safety is sponsoring a logo contest. This contest is open only to Cam Poly students.

There will be three prizes awarded. The first prize winners will receive a $500 project award and two free dinners from the San Luis Obispo restaurant, 1466. Second prize will be a buffet dinner from this Old House and a gift certificate from Graham's Art Supplies. The third prize recipient will be given a gift certificate from Korebe.

The purpose of this event is to develop a logo for the Public Safety Department. This new logo will help cause increased awareness and exposure for the department and also will promote the public safety concept.

The Public Safety concept is one in which the six separate sections of the department (ranging from the cite investigation and enforcement to crime prevention) would be drawn with each other in order to reach the goal of assuring that Cam Poly is a safe place. Logos will be judged on how well they incorporate the Public Safety concept, with the positive aspects of the six different sections.

According to Public Safety Department Chief Richard Drag, the logo will be primarily used for crime prevention material.

The deadline for the contest is Feb. 14. Entries should be black-and-white drawings on an 8V4 by 11 inch sheet of paper. They should be turned into the Public Safety Department. "This new logo will be given a $60 project award and two free dinners from the San Luis Obispo restaurant," said Mints.

"AID-Unified Givers donates in county by Marla Casas Staff Writer

It's their silver anniversary and AID-Unified Givers sure has a lot of reasons to celebrate, as do the 641 staff, faculty, state and county employees at Cal Poly who contributed $37,677.60 to the AID fund-raiser last quarter.

This total was a 7.6 percent increase over last year's total," said Larry Voss, executive assistant to the president. "This is a lot more than salary increases, which were zero."

AID-Unified Givers allows San Luis Obispo County residents to make donations through AID to any of the 53 AID-supported programs. According to Daise Budke, executive director, there is such a great human need that all programs which receive donations have to fit into one of any four categories: health, welfare, youth and research.

Some of the programs supported by AID are: counseling services, a halfway house for alcoholics, emergency help for disaster victims, research into the cancer and causes of diseases and many others.

"All the money from employees in the community goes towards causes for the people in the community," said Voss. "The money serves our community needs and doesn't leave the area."

The Cal Poly fund raiser ran from Nov. 1 through Dec. 1. School dance and division heads selected group captains to contact 15 to 20 employees each. Once people decide to contribute, they decide if it will be a payroll deduction or one time contribution.

Payroll deductions run from January to January. At the time a person pledges money, he designates which AID program will receive his contribution.

If a person does not wish to designate a particular program, his donation is put into an undesignated funds pot. They are distributed to programs which have raised a certain percentage of money on their own. All this has to be approved by AID's Board of Directors.

There are 30 members on the board of directors, ten each from management, labor and the general public.

"We're a local program, and we do what we want," said Budke. "We keep good balance and input. Our policy is made here in San Luis Obispo."

AID-Unified Givers' operating cost is 14 percent, low when compared to the 40 percent operating cost of other government agencies, he said.

"Their cost is high because they pay salaries," said Budke. "Our work is all volunteer. "This is a small operation and we take care of the job at hand," he said.

"Program volunteers work out of the kindness of their hearts," Budke and Voss agree that many at Cal Poly do not know about AID.

"We want to make the AID campaign a household word," said Budke. "The 16,000 Cal Poly students are an untapped source."

"AID-Unified Givers doesn't get the exposure that United Way does," said Voss. "You can't with the NTL."

One way suggested to get the students involved in the fundraising is to get Cal Poly athletes to be spokespersons for AID.

Budke asks that any students or campus organizations that can help AID contact her at 541-1234.

"You can't ask for a better project or purpose," said Budke. "The programs supported can be utilized by students. You won't be turned away."

Logo contest held for Public Safety
by Daryl Teshima Staff Writer

The Cam Poly Department of Public Safety is sponsoring a logo contest. This contest is open only to Cam Poly students.

There will be three prizes awarded. The first prize winners will receive a $500 project award and two free dinners from the San Luis Obispo.
Peace Corps rep tells of Latin America

From page 1

He said 18 Peace Corps applicants will be invited to the April reunion, and recruiters from Los Angeles may be asked to speak to the group about the current status of the program.

The Peace Corps is a government agency which sends volunteers to over 90 nations. These volunteers apply their skills and work with locals in an effort to improve their lives without changing their culture.

There are over 100 returnees in San Luis Obispo County, the campus recruiter estimated.

Orloff, 26, joined the Peace Corps in 1980 after earning a degree in geography from UC San Diego. He spent one year each in El Salvador and Honduras.

After a three-month training period, Orloff taught water and soil conservation to villagers in Nueva Esparta, El Salvador. "No American, without having been there, can imagine what the poverty in Latin America is like," said Orloff.

During Christmas, Orloff went home to Lancaster for the holidays. "I hadn't even said goodbye to my friends there," Orloff said. "I was just expected to move on, but I couldn't do it."

He negotiated with the Peace Corps and was finally allowed to return to the village of Nueva Esparta for one week.

During his stay Orloff was told that (while he was gone,) some leftist guerrillas had identified three villagers as spies. One man was publicly executed in the town square.

Orloff saw the bullet holes and blood stains on the wall.

He also learned that a farmer he had worked closely with was one of the revolutionary leaders of the village. "But I never felt afraid when I was there. They knew who I was and why I was there. I never felt threatened or scared," he said.

After that week of goodbyes, Orloff was transferred to Santa Rita, Honduras, a town with a population of about 4,000. There he worked with peasants in the mountains, teaching soil and water conservation and Spanish literacy classes as well.

In Santa Rita, Orloff met Islia Lopez, the daughter of a woman who cooked lunches and dinners for people in the village. Orloff and Islia dated for eight months.

"My Peace Corps job was almost over at that point, so I had to decide whether to say goodbye and never see Islia again, or marry her," Orloff said.

They were married in Santa Rita in April, 1981. Orloff had to learn the Lord's Prayer in Spanish, and became baptized as a Catholic.

The church in the town square was filled with 300 people who wanted to see the local girl marry an American.

Orloff said the peasants were also anxious to see him in a suit, since he always wore blue jeans when he worked with them in the mountains.

Together they returned to the United States, and eventually moved to San Luis Obispo.

Besides doing his job as the campus recruiter for Peace Corps, Orloff is working on a master's degree in agriculture.

The church in the town square was filled with 300 people who wanted to see the local girl marry an American.

Orloff said the peasants were also anxious to see him in a suit, since he always wore blue jeans when he worked with them in the mountains.

Together they returned to the United States, and eventually moved to San Luis Obispo.

For more information on the reunion meeting, or about the Peace Corps in general, call Orloff at 546-1320.
Above, Bobby Navarrette on saxophone and Roberto Loya on trumpet add to the sound of Tierra, backing up Michael Jimenez at the microphone, right. Center, members of Just Friends warm up the audience.

Music of two bands charge with talent, unity and celebration

by Maria Casas

There was a lot more than music going on at the sold-out Tierra concert Feb. 5 in Chumash Auditorium.

The majority of the crowd were non-Cal Poly Chicanos. The attire for the evening was dressy. The concert organizers of MECHA (El Movimiento Estudiantil Chicano-American) were all suited up in fancy attire with red carnation boutonnieres adding the finishing touch.

A little after 8 p.m. Vice President Bobby Contreras appeared on stage. He too was dressed for this special event: black tuxedo with tails, red cummerbund and red bow tie.

This is the first time a concert has been sponsored, attended and performed by Chicano,” said Contreras. “Let us all think of unity and of La Raza.”

Then the music began with a warm-up band from Santa Maria, Just Friends.

The five-man band was outstanding. Their rendition of such top hits as “Hurts So Good,” “Let’s Work It,” “Your Fault” and “Flame Thrower” were very similar to the original recordings.

And like a band member said, “We play a little rock ‘n’ roll and it doesn’t matter what color you are.”

“Versatile and talented” would best describe the band, which utilized a bass and electric guitar, saxophone, drums and keyboard. Each member played each of the five instruments at least once during their performance.

But more enjoyable than the music were the band members. They were having a great time. Smiles were always pasted on their faces, as they swayed and moved to the music. It was evident from the applause and yells that the audience enjoyed watching them.

Intermission was an event in itself. Classical music came over the public address system “to psych the crowd out” according to one member of the audience.

Then Tierra came out to a grand reception of yells and applause and sang “Born In the City of Angels” (Los Angeles) off their hit LP “Bad City Boys.”

Tierra, formed in the barrio of East Los Angeles, is made up of Rudy Salas on guitar and vocals, Steve Sales on timbales and vocals, Roberto Loya on trumpet, Eddie horn and trombone, Bobby Navarrette on sax, flute and vocals, Andre Basar on congas and percussions, Joey Guerra on keyboards and vocals, Michael Jimenez on vocals and Phillip Madayag on drums.

The most touching moment in the concert occurred when Rasta dedicated their new single “Lovely Lady” to everyone, especially his daughter sitting in the front celebrating her first birthday.

Aside from the band’s ease of transition from salsa, jazz, rhythm and blues, instrumental solos and mariachi, their rapport with the crowd was constant throughout their performance. Basas, sitting in front playing the congas, kept singling out individual people to sing to and point toward.

The big hit with the crowd was Tierra’s rendition of “Zoot Suit.” Navarrette appeared all suited up in his orange full-legged tight-cuffed trousers and a coat with a wide lapel. As the lights were dimmed, Navarrette’s lapel lit up with arrows flashing on and off.

“This Day Is Our Day” and “Everybody Celebrate With Tierra” finally brought the crowd to its feet.

After sitting and enjoying the music, they had to express their approval. By the time they reached the encore, “Turn the Music Up,” people were dancing in front of the stage.

The atmosphere was more one of “sit back, relax and enjoy some good music.” And Tierra definitely played some good music.

COOPERATIVE EDUCATION EXPERIENCE AVAILABLE

The Naval Ship Weapon Systems Engineering Station (NSWSES), Port Hueneme, CA, has numerous openings for students interested in the cooperative education experience. Civil Service openings, which begin in spring and summer quarters, are available for students majoring in the following fields:

- Electrical Engineering
- Electronic Engineering
- Mechanical Engineering
- Accounting
- Computer Science

For information about NSWSES, contact Mark Hutchensneather, EL/EE Department, extension 2028 or Dick Oshita, Business Department, extension 2811. Interested students should file applications with the CS Poly Cooperative Education Office. AN EQUAL OPPORTUNITY EMPLOYER

PRESS PERSON WANTED

FOO-MICHOO ITALIAN FRIES

- YOU GOTTA BE GOOD
- YOU GOTTA BE FAST
- YOU GOTTA BE COOL

Printing experience required

Apply in person.

The men's tennis team had only a fleeting glimpse of what the season will be like, but that's all it needed on the court when an afterthought, a secondary skill, became everyone's best asset. Andrew Weber at No. 1 beating Westmont opponent Brad McClain 6-2, 6-3, and Randy Havena, Brian Bass, David Raymondson, Rob Pritzkow and Thor Holt following. Only Havena and Bass lost in the encounter, falling in the No. 1 doubles match Doug Mathews and Chip Cullison. Otherwise, Poly finished the meeting in ease, the doubles teams of Weber-Raymondson and Pritzkow-Holt downing their opponents.

Chapman College, ranked eleventh in NCAA Division II, showed the men that the conference title wasn't an easy goal. The Panthers beat Poly 6-2, relying on strength apparently secured by visas rather than scholarships. Chapman's No. 1 player, Roger Alex of Sweden, edged Brian Bass, 7-6, 6-4, while their No. 4 player, Vic Kumar of India, defeated David Raymondson, 6-2, 6-7, 6-2. The international dominance.

The Cal Poly Women’s Soccer Team opened its season with a decisive 3-0 victory over UC San Diego last Saturday, combining a stifling defense with a fast-break attack to shut out the San Diego team.

Defending the feisty offense were freshman Rosie Emerson, and seniors Patsy Young and Peggy Falgic, who managed to allow San Diego only eight shots the entire game. The Mustang offense was superior, taking 20 shots on goal, capitalizing on three-of them.

The young team came out looking like a squad of veterans, playing a controlled passing game despite the wet and muddy field conditions. Scoring opened up with only 20 minutes gone in the first half, with forward Kristen Sandburg ponding in a shot off a pass from Sus Sandberg.

Sandberg scored again 12 minutes later, this time with an assist from Lori Moore. The rest of the first half was marked by a very physical play, partially because of the rainy conditions in which the women played.

The single goal of the second half was scored by halfback State Johansen. Johansen scored after a corner kick by Janet Harslow was deflected, punting a ball shot into the net. This brings Cal Poly to a 1-0 record in Division I play. The Mustangs take on arch rival UC Santa Barbara Gauchos at 3 p.m. at Cal State Northeridge Saturday at 2 p.m. Both games will be played in the stadium.

"Save Poly Shuttle"

You've heard Save the Whale and Save the Condo. This week at Cal Poly it's "Save Poly Shuttle." Associated Students Incorporated is sponsoring Public Transportation Awareness Week until Friday. Along with making students aware of the transportation services available to them, the week is also aimed at encouraging students to ride the buses to and from school.

If an increase by the end of the quarter, Po­ly Shuttle will be cut as a part of the public transportation service. Poly Shuttle was almost canceled at the end of fall quarter. At this time, in an attempt to save money, Poly Shuttle was unique in that it runs a direct route from Cal Poly to City Hall, the heart of the entire transportation system. Poly Shuttle is unique in that it runs a direct route from Cal Poly to City Hall, the heart of the entire transportation system. Since Routes 1 and 2 run once an hour on a less direct route.

While Routes 1 and 2 run once an hour on a less direct route. Poly Shuttle operates every day from 7:32 to 10:16 a.m. and 1:32 to 4:50 p.m. The service route includes stops at the City Hall on Osos and Palm, the corner of Mill and Grand, and on campus near Vista Grande Restaurant and across from Jespersen Hall.

Supported by Poly students who will not have a quick noode of transportation to the university. We encourage all students to take advantage of the Poly Shuttle service. It is a less costly alternative to bringing a car to school every day. Instead of paying for gas and car maintenance, paying $10 a quarter for a parking permit and wasting money on parking tickets, a student could be spending a mere 25 cents for one ride.

Riding Poly Shuttle can also cut down on several hassles a student faces when driving to school. A student can be dropped off by the Theatre or by Jespersen Hall—both near the center of campus—instead of hunting for a parking space and finding the edge of the university. Students could study a few extra minutes on the way to school because they are "leaving the driving" to someone else. Students can also be dropped off anywhere along the bus route by telling the driver or by pulling the buzzer.

Poly Shuttle operates every day from 7:32 to 10:16 a.m. and 1:32 to 4:50 p.m. The service route includes stops at the City Hall on Osos and Palm, the corner of Mill and Grand, and on campus near Vista Grande Restaurant and across from Jespersen Hall.

Threatened by peace

It's too bad that there are so many indi­viduals, like Jim Austin, that feel threatened when anyone advocates anything less than worldwide military dominance by the U.S. The writer uses violence-oriented beliefs to point out the mistakes of others. One group immediately comes to mind: the people obviously don't think peace is as important as maintaining world resources and main­taining levishly high standards of liv­ing. It's too bad that our world is getting smaller every day, or up and change the channel (is anything else on?)

David Nelson

Support for Dearing

Editor: Andrea had been in a show choir in high school and had several years of piano, but her decision to major in natural resources management left little time for music. Mr. Dearing has rekindled her enthusiasm and broadened her knowledge and appreciation of music.

I hope that my remarks have added another dimension to the current con­trovery and earnestly hope that the Student Senate will reverse its deci­sion.

Thank you.

Barbara Pace

Editor: My letter is in response to an article the Mustang Daily printed regarding the talk given by Linus Pauling on Jan. 28. The writer, Scott Swanson, mentioned what I consider to be a major part of Dr. Pauling's message. In his book, Dr. Pauling explained President Reagan's absurd rationale behind the arms race, namely, that by increasing the American defense budget we can force the Russians to increase theirs. Dr. Pauling paraphrased Reagan by stating, "Sooner or later, the Rus­sians will be spending all their money on defense and the people will overthrow the government."

I wish to suggest, then, an alternative to the motto of "Live and let live." It is this: "If it is in our power to prevent something bad from happening, and we can prevent it without violating so­meone's rights, then we ought, morally, to prevent it."

Sincerely,
Jane Ann Hayes
Associate Professor of Philosophy

Brother' need not be Christian

My Random House dictionary defines pacifism as "the principle or policy of opposing or ceasing wars and all forms of violence that either injure or destroy human life, human rights, or human property, including armed force and all forms of nationalistic or political aggression."

I do not believe it is possible, nor is it moral, to "factor out" or avoid in any way the suffering and misery of millions of human beings as a result of war and violence. Pacifism is a commitment to the value of human life and to the right of self-defense.

David Nelson

Implications of 'live and let live'

Editor: Although Mr. Austin does not claim to pacify himself, he presumes to advise us that "Pacifist types have long given up on selling the American people on the virtues of unilateral disarmament." Nononsense! He then invents an absurd definition of pacifism as "the denial of the right of self-defense."

Pauling's point

Editor: My letter is in response to an article the Mustang Daily printed regarding the talk given by Linus Pauling on Jan. 28. The writer, Scott Swanson, mentioned what I consider to be a major part of Dr. Pauling's message.
