Melodrama

by Linda Reiff
Staff Writer

In 1852 two American women separatedly enhanced the stages of San Francisco with their sweet singing. In 1862, Stephen Massett, played by John MacAllister, ran two city theaters, and always arranged for the two famous singers, Biscaccianti and Hayes, to sing in opposing theaters on the same night.

The first act takes place in San Francisco in 1852. Stephan Massett, played by John MacAllister, ran two city theaters, and always arranged for the two famous singers, Biscaccianti and Hayes, to sing in opposing theaters on the same night.

Last Sunday's presentation, however, was to portray the night Massett arranged for the two rivals to sing together.

Sharon's resignation called for

Prime Minister Menachem Begin's government, on Thursday accepted all recommendations of the Israeli massacre inquiry commission, calling for the resignation of Defense Minister Ariel Sharon. But Sharon was reported refusing to quit.

During the 6-hour Cabinet session a bomb exploded among a group of anti-government demonstrators nearby, and police said one person was killed and nine injured. Israel Television said the explosion apparently was caused by a grenade. The group of about 100 Peace Now protesters was demanding that Sharon be fired. Three of the injured were policemen.

There was no official word on Sharon's fate, but Energy minister Yitzhak Modai told reporters after a Cabinet meeting: "He said he will not resign."

Sharon was challenging Prime Minister Menachem Begin to fire him—something Begin has said he will not do.

The announcement of the Cabinet's acceptance of the recommendations was made by Cabinet Secretary Dan Meridor, who said the vote was 15-1. Asked if Sharon voted against, Meridor replied "presumably."

Hundreds of demonstrators outside the Cabinet building chanted: "Arik resign. Arik resign!" using government and army "the people are with you." But Sharon was fired. Three of the injured were policemen.

About 500 people rallied with placards telling the government and the army "the people are with you." But 2,000 others marched from a central square to the building chanting: "Arik resign, Arik resign!"—using Sharon's nickname.

Sharon, the architect of the June 6 Lebanon invasion and a war hero in his supporters' eyes, drew a big cheer as he arrived for the 90-minute late. Israel and a war hero in his supporters' eyes, was demanding that Sharon be fired. Three of the injured were policemen.

There was no official word on Sharon's fate, but Energy minister Yitzhak Modai told reporters after a Cabinet meeting: "He said he will not resign."

From Modai's report, it appeared that Sharon was challenging Prime Minister Menachem Begin to fire him—something Begin has said he will not do.

Sweets for your honey

The perfect Valentine's Day present for a chocolate lover—or any other lover—may be hard to find, but try looking among the gourmet gifts in Sweetie's at 722 Marsh St.

Owner Sammie Kardel bills Sweetie's as a gourmet chocolate and confections shop. Tell her how she remembers Ses cartoons and she'll respond, "I'm insulted."

Kardel stocks Sweetie's with high-quality European and American chocolates and confections. You won't find one preservative or additive in any of her candies, she declares.

"If you want quality, you come here," she added.

Sweetie's most popular chocolates are truffles made by Cocolat in the Bay Area. The size of a golfball, Cocolat truffles are decadently delicious and rich enough for one to be a filling dessert.

At $1 a piece, the Cocolat truffles may seem expensive. But one truffle from Sweetie's is enough to melt the heart of anyone who's not allergic to chocolate.

The truffles come in a variety of creamy flavors—Grand Marnier Toasted Almond, Amaretto, and Crème Cassis, to name a few.

For the Valentine who's worth his or her weight in gold, Sweetie's has solid chocolate ingots wrapped in gold. The ingots are imported from France, and are the size of a textbook. They sell for $15.85.

If you want to impress your Valentine with candy sold at Neiman-Marcus, Sweetie's carries handmade fudge from Ft. Worth, Texas and an $80 solid chocolate chess set. Both are featured in the Neiman-Marcus catalog at higher prices than Sweetie's offers.

In addition to Valentine's specials such as chocolate lips and solid chocolate greeting cards, Kardel says, "For those who must spend less, we have a variety of chocolate hearts to $50 for a 5 pound satin-heart box containing an assortment of Sweetie's buttery chocolates."

The candy shop takes Visa and Mastercard for Valentine shoppers on the installment budget. Sweetie's will be open Saturday from 10 a.m. to 6 p.m.

Surprise her/him with something different

Ye Old Candy Shoppe on Higuera has handmade fudge from Shaw's of San Francisco. The Shoppe also has its own "Lovers' Mix," a blend of chocolate kisss, foil-wrapped hearts, and other secret ingredients for $4.95 per lb. The store also sells red, heart-shaped boxes for fifty cents for customers to fill up with their own choice of candy. The per-pound price of the candy to fill the box is in addition to the box's price.

Cowboy Cookies at 1035 Chorro St. will make a 2 pound or 1 pound heart out of any of its fine cookie mixes. The store will decorate the heart cookie with special-order messages; customers can pick up their personalized cookies within three hours. Owner Rae Wohlford said Cowboy Cookies sold 350 of the edible valentines last year. Prices are 80 for a 2 pound heart-cookie, $5 for the 1 pound cookie.

If you want to impress your Valentine with candy sold at Neiman-Marcus, Sweetie's carries handmade fudge from Ft. Worth, Texas and an $80 solid chocolate chess set. Both are featured in the Neiman-Marcus catalog at higher prices than Sweetie's offers.

In addition to Valentine's specials such as chocolate lips and solid chocolate greeting cards, Kardel says, "For those who must spend less, we have a variety of chocolate hearts to $50 for a 5 pound satin-heart box containing an assortment of Sweetie's buttery chocolates."

The candy shop takes Visa and Mastercard for Valentine shoppers on the installment budget. Sweetie's will be open Saturday from 10 a.m. to 6 p.m.

Traditional long stemmed roses are running about $36 a dozen in the San Luis Obispo area, but sweetheart-cut roses are selling for around $25 a dozen. A single long-stemmed rose arrangement from Earthly Pleasures on Higuera sells for $3; for another $5 to $10 the store will put your Valentine flowers in a crystal vase.

For the sugary sweet Valentine, the Paper Star on Higuera offers Hot Lips soap and key-shaped soap with the chocolate grape, "Red Hot," for $1 each. For another $5 to $10 the store will put your Valentine flowers in a crystal vase.

Paper Star is also selling red baseball caps covered with white hearts for $10.

For serious Valentine shoppers, Britton Jewelers on Higuera Street has a $145 gold ring set with a heart-shaped amethyst.

For something for the more adventurous Valentine, P.M.'s on Higuera features lingerie and sleepwear ranging from $12 toadies to $42 fleece nightgowns.

"A red rose is great, but green's okay too, because with this plant my love goes to you."

The Poly Plant Shop is selling bright pink and red flowers and green blooming plants for that special someone. The Valentine's Day special will also include an arrangement of cut flowers topped off with a heart-shaped balloon.

To really surprise that special love, the Plant Shop will deliver anywhere in San Luis Obispo ($5 minimum charge). All orders must be placed no later than Saturday, Feb. 12 at 5 p.m. at the Plant Shop. Orders will be taken on Friday, Feb. 10 in the University Union Plaza from 10 a.m. to 2 p.m.

The English Club will provide the rest of the "hearts and flowers" by selling candies with messages in the UU and in the English Building today from 9 a.m. to 2 p.m. "Message candies," which include five candy hearts with a card, will be selling for $2.50. Chocolate marshmallow hearts with a card will sell for $5.00.
Valentine's Day

Buy something extra for that special professor

Good or bad: they deserve some gift

by Steve Goodwin

Valentine's Day is just about here, and it's time to think about those friendly people who educate us all. Most students have a professor who deserves a little special attention, and February 14 is your chance to show that you care.

Journalism and English—Instead of a dozen roses, a dozen pencils with nice new erasers will always warm your favorite instructor's heart. (For an English professor, make that a dozen red pens!) For your least favorite instructor, write a poem with poor punctuation and lots of misspelled words. It will drive him crazy.

Botany—Give your favorite educator a fully dissected Physocarpus Capitatus, with all the main organs labeled. (For those of you who've slept through class, that's a rose.) This will make your instructor proud that you have turned out so well.

For the one you dislike, send some poison oak.

Animal Science—A stuffed animal, as cute and furry as possible, will be appreciated by the good instructor. For the professor you hate, a heart-shaped box of candies (not to and all) would be appropriate.

Zoology—If any professor should get a heart-shaped box of candies (not to and all), it would be your zoology professor. Should you dislike this one, put that old frog you dissected last quarter in the box after you eat all the candy and send it instead.

Economics—if you really like this instructor, get something extravagant because he will know how much you paid for it. If you dislike him, get him a dribble glass to prove that the trickle-down theory really works.

Photography—The gift of art would be enjoyable for your favorite instructor. Demonstrate your talents by giving your favorite instructor a piece of art, nicely mounted. For the one you hate, send some nice blackmail shots of him in some kind of embarrassing situation.

Valentine's Day
Unfamiliar love tales promise freshness

By Judy Luts
Section Editor

If Harlequin novels and Hallmark cards are any indication, literary love isn't what it used to be. But reading old classics is no solution—you always know how the story is going to end.

A hard-core romantic has to search anthologies or used books to find unfamiliar lovers' tales. Sometimes it's just a matter of flipping to the wrong page in your English textbook. Either way, the discoveries make the exploration worthwhile.

For instance, imagine the creation story retold from Eve's point of view—or Adam's. Mark Twain used "Eve's Diary" and his later "Excerpts from Adam's Diary." He makes the exploration worthwhile.

By Judy Luts

collections of Twain's work. Some sentimentalists prefer their passionate tales giggle-free, and Edgar Allen Poe's "The Asignication" is just such a tale. His moody prose is rich, romantic, velvet—even a little bit violet, but entertainingly so. The young wife and her handsome lover swear they'll meet each other at dawn, and then...find an anthology of Poe's stories and mini.

Kate Chopin is best known for her novel The Awakening; yet her short stories give insight into love and marriage. Her turn-of-the-century short short, "The Story of an Hour," reveals a woman's response to the news of her husband's death—and with two O Henry twists that leave you gasping in surprise. Another of American women's short stories is a probable source for this tale.

If Juliet were a werewolf, would a modern Romeo respond? Peter Bagge, better known for his fantasy novel The Last Unicorn, has it all figured out in his "Wolfenmilla." Lila's puzzled beau is unprepared to cope with a world which has both werewolves and Pyrex vases in personality, but, he does his best. Bagge's biting satire is not for the squeamish. The short story was published as a Capra Press Chapbook in 1974. One last warning: he likes O Henry endings, too.

Tillie Olsen's 1956 "Stand Here Ironing" is altogether different, a mother's honest, pain­ful, poignant reminiscence about her first daughter, who had been "a child seldom smil­ed at." Published in Olsen's collection Tell Me A Riddle, the story is a moving lesson in why you should let your love show.

If motherly love doesn't appeal to you as a story line, consider James Baldwin's "Sonny's Blues" instead. Being your brother's keeper takes on a new meaning in the heroin-filled streets of Harlem. Sonny is the rebellious jazz musician in the 1957 short story, which concludes with the best verbal portrayal of jazz you are likely to encounter. Check out the jazz literature anthologies for this one.

"Raymond's Run" by Toni Cade Bambara also deals with siblings, love and life in the big city, but the feisty, self-confident "tomboy" Squeaky is one of a kind. This 1970 story goes winning isn't everything, but with these O Henry endings, how can you guess who will win anyhow? Check Bambara's collection, Tell Me A Riddle, or skim through modern anthologies.

For a true romance in the grand old style, try "Bihana: Black Marigolds," the Sanskrit poem from the 11th or 12th century. (Don't worry, this is the translated version.) The fifty stanzas lyrical lan­guage was written by Chauras, condemned lover of a princess, hours before he was executed. If you can't find E. Powys Mather's translation in an anthology of Eastern literature, flip to the final scenes of John Steinbeck's novel, Cannery Row, in which some of the best stanzas are quoted.

Love has many forms, but this may be the most unusual one. Christopher Smart showed his devotion to God by describing the actions and character of his cat. It's true he wrote Jubilate---

Valentine’s Day
‘Love Run’ aids cardiac patients
by Mark Brown

How would you like to help victims of heart disease like artificial heart recipient Barney Clark, improve your own health, have lots of fun and possibly win a trip to Lake Tahoe on top of it all? Sounds like a wonderful way to spend the morning, doesn’t it?

On Saturday, Feb. 12 you’ll have the chance to do all of this in the American Heart Association’s first annual ‘Love Run’. Sponsored by the Association in conjunction with the Creamery and KEZO, the 10-kilometer run will begin at 9 a.m. at the Creamery, with registration beginning at 7:30 a.m. It’s open to everyone 18 years or older. Registration is $5.

Prizes will be awarded to the top three finishers in both the men’s and women’s divisions. First prize is two days at south Lake Tahoe with a one-day lift ticket. Second place winners will receive a one-month membership at the San Luis Health Fitness Center, and third place winners will take home a $50 gift certificate from Charles Shoes.

“I hope we get a really good turnout,” publicity coordinator Barbara Fontes said. “We’re expecting around 75 people, but the police are expecting about 300. It’s going to be a big surprise on the day of the event. We’re just going to be prepared for hopefully a large crowd.”

“February is Heart Month, so we’re doing a lot of different fundraisers,” Heart Association Area Field Coordinator Wendy George said. The fund raising will be done primarily door-to-door, but some special events are planned. These include a ‘Rock and Roll Jamboree’—older people in local rest homes do the rocking and rolling, in rocking chair and wheelchairs—and fraternity-sponsored ‘Cardiac Arrests’—the ‘arrest’ of prominent citizens of San Luis Obispo, with the ‘reason’ going to the Heart Association.

Please see page 10

For all creative hearts

If you are creative, now’s your chance to win awards and recognition for the products of your talent and imagination.

Two contests which utilize your creativity have deadlines set for Feb. 14, Valentine’s Day. The 13th annual Cal Poly Creative Writing Contest, sponsored by the English Department, will award cash prizes for two divisions—short story and poetry.

Along with the $20 to $50 cash awards, selected manuscripts will be printed in Cross Currents, a literary supplement to the Poly Royal edition of the Mustang Daily.

For further details, contact A.W. Landwehr, faculty office building, section 32.

Entries must be turned in by 5 p.m., Feb. 14, to the English Department, Faculty Office Building, section 32.

In addition, Cal Poly Public Safety is sponsoring a logo contest in conjunction with the Graphics Department. The department wants a new logo which unifies the public safety section and will result in increased awareness of the services of the department.

A $50 award and two free dinners at 1865 will be awarded as first place; one gift certificate at The Old House and a gift certificate from Graham’s Art Supply is second prize; and a Logandale, faculty office building, section 32.

Valentine's Day Cupid zings an arrow over the telephone wires

by Jenny Coyle

When it comes to romance, having roommates is like living with the folks—no privacy.

Luckily for local Romeo and Juliet Santi Obispo and her surrounding towns provide a few in-spirational spots where under the premise of "staying at the library, sweethearts can sneak off and squeeze in a little romance.

The traditional location is a parking place with a view, a lonely hilltop where two can watch the submarine race.

If a car is at hand, then the ridge above Cuesta Grade might be the ideal spot. On the north over the grass, there is a left turn just before the top through a bad situation. It's a long story, puddin', but the best way I can describe it is, this is your Valentine's Day gift.

"Well, no, it didn't start out that way. It just kind of ended this way. You still don't believe I'm in Caracas? Listen...That was Pablo, yelling at me because I haven't paid cab fare to come to the telephone.

"It's like this: You know how the stores all had their Valentine's Day decorations up before the display windows could cool down from Christmas stuff? Well, I said to myself, I have procrastinated all my life. Better start doing things on time, and what better way than with it.

Anyway, I'm getting all prepared to be on time with this, you know, and wouldn't you know it, here the phone calls February 13. I said to myself, 'Well, why you blew it again'. All your life you're going to be late, everything you do is going to be at the last minute, everyone is going to...what's that, Sugar? Don't you want to hear the whole story?

"So now I have to do a lot of running around. I lost my list of gifts. Swear to God I had a list. I told you I had this planned. So I went to Emergency Plan B. That's Hearts and Flowers.

"I call up the florist. Did you know they're open the day before Valentine's, even if it's a Sunday? Well, I didn't know. Mellow out, couldn't you, please? Cinnamon Bear?"

"Didn't you tell me you didn't like roses? Oh, rhododendrons, that's right. I thought the stores were all out of them. Roses and rhododen-
drons. You don't like daisies because my daisy right, good? See, I remembered something. They were out of daisies, too.

"So I went to the candy stores. They were open too, but not very good selection-wise. For example, they were out of chocolates.

"Like, they were almost out of candy. But they had pralines. Now, I remember you said something about pralines. What was it? Did you say you hated pralines and cream, or that you liked them? Or was it pralines and pecans? Pralines ice cream? Or maybe it was peanut butter? What was it, dear? Jelly beans? You never said you liked jelly beans? Never. Besides, the stores were all out of jelly beans. And whoever heard of jelly bean hearts?"

"All the card stores had those frilly things with those poems inside. You know:

Here is the day I know so well
How we feel only hearts can tell
Our two souls, this fateful day
To say, hoo-ray, it's Valentine's Day.

"But they had pralines. Now, I remember you said something about pralines. What was it? Did you say you hated pralines and cream, or that you liked them? Or was it pralines and pecans? Pralines ice cream? Or maybe it was peanut butter? What was it, dear? Jelly beans? You never said you liked jelly beans? Never. Besides, the stores were all out of jelly beans. While some feel obligated once a year on Valentine's Day to give tokens of love and appreciation to their loved ones, others offer a gift of love year-round by volunteering services to those in need.

The ASI Student Community Services office in the University Union coordinates a comprehensive program of volunteer assistance for students wishing to lend a helping hand. Formed 10 years ago, SCS involves close to 300 student volunteers.

President Mark Hollingshead said most who volunteer do so for the "deep personal satisfaction" gained by it, and he mentioned several programs.

Pals is a group of volunteers who devote three hours a week to be big brothers or sisters to motherless or fatherless children between the ages of four and 14. Poly Pals provide focused attention on their special friends by spending time with the child to form a good relationship.

Atascadero Interpersonal Services, a volunteer group associated with the Atascadero State Hospital, helps mentally and physically handicapped people living in residential Facilities such as Casa de Vida. Outreach is also the campus coordinating group that helps with the county Special Olympics each year.

Adopt-A-Grandparent enables young people to become friends on a onetoone basis with elderly persons living alone in the community or in convalescent homes.

Poly's Senior Services Program also helps senior citizens by organizing group activities and providing volunteers for fundraisers.

Pen Pals is a student group in which volunteers write letters to inmates in the California Men's Colony. By first reading through a pool of letters, students choose inmates with whom they feel they have common interests, views and opinions. Anonymity is assured, and pen names are used and all mail goes through the SCS office.

Volunteers are always needed by the Disabled Student Services for helping others with class note-taking, tutoring or reading to the sight or learning impaired. The Tutorial Program involves helping kindergartners through high school students with problems study areas two hours a week.

Anyone interested in learning more about ASI Student Community Service is urged to call 546-1395.

Short Term is a program dealing with projects that are not ongoing. A volunteer group is helping Friendship School (a school for the trainable handicapped) set up a recycling drive, which helps clients learn money management. Another Short Term project is the Tay-Sachs test which is performed free on campus March 8.

Stories examine love

From page 5

Ages in an 18th-century madhouse, which may seem to be a strike against it. Yet "My Cat Jeffrey," which has been excerpted from the larger work and anthologized, is both moving and humorous, a worthy commentary on love.

In conclusion, if you've always loved romantic Scottish ballad-poems and yet, you're tired of "My Love Is Like a Red, Red Rose," try one of Robert Burns' less well-known poems, "Sweet Afton." The haunting verse is directed to the river on whose green banks he and his wife spent many pleasant hours before she died. Check anthologies or his collected works.

Long distance valentine

From page 7

He? How did I know about fine print?

"When we got to Caracas, I said to them, 'What about the roundtrip?' One of them handed me a five-dollar bill for a phone call.

"So I'm calling you. No, I'm not making this up. How could I make Pablo up? He's still yelling at me. No, don't worry about me. Now stop laughing. It'll just take some time to raise the air fare home. That's where the year comes in.

"Maple kris, I'm sorry. This is all too much for me, too. But now that the day has arrived, will you be my—hello? Hello, Operator, is it too late to reverse the charges?"
Student builds pre-fab house

by Maria Canna
Staff Writer

It's a long and grueling walk to the house that Nathan built in the serenity of the green hills above Poly Canyon.

The house that Nathan built is a Cor-X plastic house with aluminum framing. The plastic costs 22 cents a square foot and covers 600 feet of wall. The 240-square feet of flooring cost $2.86 a square foot. The house has polystyrene insulation, and an RV-type toilet with holding tanks and cold water. It took a full three weeks to assemble and is portable. The total cost was $800.

There's all that and a lot more to the house that Nathan built.

Nathan Duddles is a Cal Poly student majoring in Crop Science. He wants to call attention to the need for alternative low cost housing.

"I want to create more awareness of and identify the needs of people in developing countries," said Duddles. "The American lifestyle has too much drain on the world's resources. If we could simplify what we live in there would not be such a drain."

Duddles' motivation for the Cor-X house started when he became involved with Food for the Hungry International, a Christian-motivated world relief and development organization. Part of their work was in the field of appropriate technology tools for the Third World which involved their low cost "Hope House" made from plastic.

"The resources were dropped on my doorstep," he said. "Food for the Hungry donated part of their house if we agreed to live in it until spring of 1984 and do the research."

After official approval from the Quality Control Committee of Poly Canyon and others last spring, Duddles completed the Cor-X house with the help of Jim Thean, a junior architecture major and his brother Craig, a junior applied art and design major, who lives in the house with him.

And this house is very simple. At first glance it looks fragile, but on closer inspection it turns out to be quite sturdy. The foundation of the house is a wooden floor. The plastic sheets that make up the house are held together at the seams by thin pieces of aluminum. The front door of the house is actually green house in which Duddles plans to grow plants.

It seems amazing that all the necessities for living are encompassed in such a small living area. There is no waterbed, television or stereo. A blue mat serves as the bed and is stored up against the wall in the day.

"This house is perfect for the average homemaker," said Duddles. "There are a lot of domestic uses like a workshop. We're not limiting what it can be used for."

The Crop Science major feels that this type of house will be most useful in disaster areas or for training areas in the Third World.

"We are not trying to replace the village house of the average peasant," said Duddles. "The perfect situation for the house right now would be in Tijuana, Mexico."

Within the next two weeks, he will be traveling to Mexico with Food for the Hungry to see about building these houses for their volunteers in refugee camps.

There are 12 criteria which the house's success will be evaluated: protection against moisture, protection from the wind, insulation against temperature extremes, air circulation and ventilation, light infiltration, spatial accommodations, privacy, security for

Please see page 10

Nathan Duddles keeps his refrigerator stocked just enough for him and his brother.

Comfortably warm, Duddles snuggles in his sleeping bag on a cushion every night. Showing off the inside of the home he and his brother share, Duddles stands at his front door, which leads into his green house.
Student arrest for rape attempt

A Cal Poly student was arrested and charged with rape and attempted rape last week in an on-campus incident, according to Cal Poly Public Information Officer Don McCacle.

The suspect, Jonathan Smith, 20, allegedly raped a victim in her dorm room at approximately 8 p.m. Feb. 2 while she was asleep. Smith then reportedly proceeded to lie on top of the sleeping vic­tim.

Cal Poly Police Officer blonde Miller arrested Smith and booked him into county jail. The $7,000 bail was posted and Smith was released pending trial.

According to McCacle, there is some speculation that District Attorney Chris Money may reduce the charges to misdemeanor assault because Smith did not attempt to remove the victim’s clothes.

Internships in Washington available

How about trading in those textbooks, pop quizzes, and homework problems for a semester of work experience in Washington, D.C.? Under the auspices of the Washington Center, six Cal Poly students—Leigh Hamilton, Jeffrey Levy, Alan Mansfield, Anne Nor­dyke, Robert Statt and Susan Tamagaki—earned academic credit while living and working in our na­tion’s capital during fall quarter, 1982.

On Monday, Feb. 14, a representative from the Washington Center, Claire Guimond, will be in University Union Plaza from 9 a.m. to 12:30 p.m. Information is also available from the Heart Association at 564-1505.

Pre-registration and information is available today in the University Union Plaza from 9 a.m. to 12:30 p.m. Information is also available from the Heart Association at 544-1505.

The remainder is used to fund the national programs of the Heart Association.

Run for your heart: sprints help out

From page 6

Fifty-five percent of all monies collected by the Heart Association stays within the county for maintenance of the local office, CPR training, blood pressure screening and education, George noted. Twenty percent goes directly into research such as maintenance of the local office. CPR training, blood pressure screening and education. George noted.

One. Anything I do I have to consider in terms of how it affects my credibility.”

Hartley’s trip to Long Beach was spurred by the fact that the third of four public hearings before negotiations began was oc­curing for the academic support unit. “Nothing really substantial happens at public hearings,” Hartley said. “It’s more of a for­mality, making the con­tract proposal public.”

Hartley said the most substantive change that the management is offering to employees is in terms of salary.

“They are basically offer­ing the status quo,” he said. “They are proposing a minimum and maximum salary scale. Right now salaries are given in steps.

When you reach a certain level, you go up.”

Hartley will start travel­ing to Long Beach once a week when negotiations begin the first week of March. He will probably be re­quired to attend two and three times a week by the end of spring quarter.

House is designed for utility, function

From page 9

The house is so portable that everything but the insulation will not be spent merely shaking hands and handing out pamphlets. Cal Poly students who have interned in Washington will be available to answer questions regarding anything from financing the trip back east to finding the best place to eat lunch on Capitol Hill.

Additionally, the Washington Center produced a 15­minute promotional film highlighting many of the aspects of a Washington, D.C. internship. Yes, Cal Poly students are in the film.

By planning ahead, you can spend summer or fall quarter, 1983, living and working in Washington, D.C. Here is your chance to talk with students who have actually been there. Contact Dr. Carl Lutrin in the Political Science Department for more informa­tion.

Hartley to represent students in state

Historian to speak

As part of Black Heritage Month, world-renowned Biquge, anthropologist and cultural historian Dr. Ivan Van Sertima will give two presentations at Cal Poly on Friday.

Van Sertima, an Associate Professor of African Studies at Rutgers University, is the founder and editor of The Journal of African Civilization and the author of They Came Before Columbus: The African Presence in Ancient America.

Van Sertima will discuss his book from 11 a.m. to 1 p.m. in California Audition Room 204. Friday evening, he will speak about “Blacks in Science and Technology From Ancient Times to the Present” in Fisher Science Room 318.

Both lectures are open to the public and students, faculty, and staff are encouraged to attend. Dr. Van Sertima’s appearance is sponsored by the Presi­dent’s Office, ASI Speakers’ Forum and Student Academic Services.

Poly student art wait in gallery

An exhibition of drawings by Cal Poly students, both art and non-art majors, is being featured in the Art Department Gallery January 26 - February 16. Many of the drawings are from collaborative projects in the intermediate and advanced level classes taught by Dan Pie! and Ruth Fash. One such study is a series of forms of sea shells and marine plants. The gallery is open to the public Monday through Friday from 8 a.m. to 5 p.m.

Beyond it lies your future in telecommunications.

Pacific Telephone is more—much more than just the telephone. What you see is only the tip of the iceberg. What was once simply the telephone is now the key box to data and voice communications and information management. At Pacific Telephone we’re involved with microelectronics, fiber optics and digital technology—things that make telecommunications one of today’s leading industries.

The challenges at Pacific Telephone couldn’t be more exciting! Right now we have a number of engineering positions available, and are seeking applicants with technical degree (preferably Electrical Engineering or Computer Science), who have excellent oral and written communications skills and demonstrated leadership abilities. Our salaries are competitive (from low to high twenties) and our benefits outstanding.

Any questions you may have will be addressed by Hampton Lyons and Betty Shaddox during an Orientation Session on Thursday, February 17, 1983 at 7:00- 8:00 p.m. in Staff Dining Room B. On-campus interviews will be conducted on February 29, 1983. Either sign up for an interview or leave your resume at the Career Planning and Placement Center.

Look beyond the tip of the iceberg. Discover your career in telecommunications.

Equal Opportunity Employer.

For Two... a Valentine Treat

Vista Grande Restaurant
Dinner served from 4:00 to 8:00 PM.

Valentine's Day Special Menu!
Your Valentine will love one of these six special dinners:
Prime Rib, Filet Oscar, Scampi, Chicken Mediterranean, Fresh Salmon, or Fresh Broiled Snapper. Each dinner served with soup or salad and rice or potatoes.

Prices from $8.95 to $14.95

Featuring the Whale’s Knees
Reservations recommended
Free carnations to the ladies

2nd Annual Square Dance
Poly Christian Fellowship is sponsoring a square dance Saturday, Feb. 12 at the Old San Luis Junior High School gym. The caller will teach the various dances, cost is $2, and the dance will be held from 7-10:30 p.m.

Poly Notes

chartering a 103-foot schooner during spring break (March 20-24) for $165 each. The trip includes all meals. The group will leave from San Pedro and sail to Catalina and the Channel Islands. Five more people are needed to fill the boat or the trip is canceled. Call Ken Brewer at 543-2213 or Bradley Brooks at 541-3171 for more information.

Poly Club
Those interested in playing polo for fun and competition and want to learn more about the game are invited to join the Polo Club. Meetings are Tuesdays at 7 p.m. in Agriculture Enhardt Room 241.

Topic Plant Tour
The Society for International Awareness will present a slide show on Britain on Monday, Feb. 14. The slide show will be shown at 5 p.m. in the Multi-Cultural Center in the University Union. Refreshments will be served.

Poly Royal Craft Fair
Applications are being accepted from now until March 1 for the Poly Royal Craft Fair and sale. Applications can be turned in to the UU Craft Center. For more information contact Laurie Lee at 546-1966.

American Marketing Association
AMA is having a meeting on Tuesday, Feb. 15 at 11 a.m. in Architecture Room 225. Nominations and elections for new officers and details on the Chicago conference will be discussed.

Washington D.C. Internships
A representative from the Washington Center will be on campus to answer questions and show a film about interning in Washington D.C. (and earn credit at the same time.) The seminar is sponsored by the Political Action Club and will be held on Monday, Feb. 14 in UU 220 from 10 a.m. to noon.

American Society of Mechanical Engineers
A Lawrence Livermore Laboratory representative will speak on "Fusion Power in the Next Century" on Wednesday, Feb. 16 at 7 p.m. in Science Room E-37. The lecture is sponsored by A.S.M.E. and all majors are invited.

Sailing Club
The Sailing Club will be chartering a 103-foot schooner during spring break (March 20-24) for $165 each. The trip includes all meals. Audience joins performers in melodrama closing

From page 1

Act I opened with Loder playing an overture, while the audience waited for the entrance of the two queens of the stage. Massetti, who ran the entire show with charm, had to persuade the two jealous rivals to sing together.

When they did their battling operettas kept the audience amused and tickled. They emphasized what a strain it was to sing together, yet their voices actually blended beautifully.

Monroe Kanouse must be applauded for his outstanding piano playing, as he kept up with the ladies' dual the entire show. His piano playing was the only accompaniment for the two-act presentation. Kanouse was also in charge of his musical direction and special arrangements for the show.

The first act sparkled with a solo by Swall called "The Shadow Song." She sang and echoed herself, which brought smiles to the audience.

All four performers later joined together for a musical remeant of "Little Red Riding Hood." The two singers became so disturbed with each other that they stormed off, never concluding the show for the San Francisco theater audience.

The second half of the melodrama takes place in a gold mining camp in the Sierra, the following spring. Loder opens the scene with his masterful piano rendition of "Yankee Doodle," variation 966.

Once again the two female stars meet, only this time in the mud, and without a stage. Massetti suggests that since the San Francisco concert was never finished, the two should conclude it here. He persuades them (with the help of a pouch of gold) to do so.

While waiting again for the two ladies to take the stage, Massetti and Loder entertained the audience with a few rounds of "Oh Susanna," which the audience joined in.

The two ladies finally did sing together, happily, since this time gold was involved. The old enemies even joined hands as they presented a moving medley from an unpleasant environment.

McGinn's lecture, which was part of Cal Poly's continuing Arts and Humanities Lecture Series, was sponsored by the School of Communicative Arts and Special Arrangements for the Show.

He described this group as a "sentinel culture" who is discriminating in the way in which it chooses to maintain cherished values in our society.

Mass produced items of technology, McGinn said, are displacing dependency on other human beings. He pointed out that one of those penalties will be the maintenance of cherished values in our society.

He described this group as a "sentinel culture" who is discriminating in the way in which it chooses to maintain cherished values in our society.

McGinn admitted some of the problems associated with growth will be solved, but he warns that if the increased growth is not limited, we will pay the penalties.

He pointed out that one of those penalties will be the maintenance of cherished values in our society.

Mass produced items of technology, McGinn said, are displacing dependency on other human beings. He pointed out that one of those penalties will be the maintenance of cherished values in our society.

We use our technology to block out the problems of their technologies," McGinn said, citing the Sony Walkman as one such device which provides an escape from an unpleasant environment.

McGinn said he was hopeful of limiting the large scale growth of technology. He referred to a slowly emerging group of people, from a variety of backgrounds, who believe in the reality and importance of intangible values.

A rock and a hard place

Just when the Cal Poly women's basketball team is trying to find the right track in the California Collegiate Athletic Association (CCAA), tonight the Mustangs must contend with the nation's No. 6 scorer and rebounder in Division II.

Chandra Trower, a 5-foot-11 senior, is also the league's top scorer and rebounder and she will lead the 3-5 Cal State Dominguez Hills Toros into the Main Gym for a 7:30 p.m. start. The Mustangs will host Chapman College (4-2) Saturday evening at 7:30. Chapman does not play Friday night.

Poly, 1-4 in the CCAA, is riding a three-game losing streak, and has lost seven of its last eight. The Mustangs' most recent loss was to UC Santa Barbara, 62-60, last weekend. Poly is just one game out of the CCAA cellar. Cal State Los Angeles (0-6) is the Mustangs' only conference win.

Trower is averaging 24.0 points and 14.5 rebounds in 14 games. Helping her with the scoring is 6-6 guard Kris Frelix. She is averaging 17.5 points. Adrienne Harris comes off the bench to contribute 14.3 points. The Toros already own an 86-68 win over the Mustangs this year and are 8-6 overall this season.

Please see page 15

The climb toward the basket isn't always so free, as Mike Franklin finds out against a Cal State Bakersfield opponent. Alex Lambertson watches.

Men's basketball

CCAA crown race just gets harder

by Mark Gang
Staff Writer

At this time last year, the Cal Poly Mustang and Cal State Bakersfield Roadrunner basketball teams were both 4-5 in the league and were stuck in the middle of the CCAA race. But during the last round of 1982 conference play, both teams ran away from the pack, Poly losing to Bakersfield in the title showdown after each squad had demolished the league by winning six straight.

This year, well, things are different. Poly is only one game better than it was last year (5-3) but Bakersfield is three games better than it was (7-0). Consequently, the Mustangs find themselves a full two games back in the CCAA race with seven to play.

Simple math tells you that the Mustangs don't have a lot of time in which to catch the Runners, but, by the same token, recent memory indicates that the feat, while difficult, is not impossible.

This weekend, Poly begins Round Two of CCAA action and from all indications the sequel will be more intense than the first chapter. That's because Poly and Bakersfield, two notoriously rude hosts, will play five of the next seven games on the road.

Friday night, Poly will be visiting Cal State Dominguez Hills and on Saturday the host will be the Chapman College Panthers. Dominguez Hills is 2-5 in league, while Chapman is tied with Poly at 5-2.

The Toros have been the biggest disappointment in the CCAA this year. Last year they tied with Poly for second in league, but losses like the triple-overtime heartbreaker against Poly earlier this year have the Toros shaking their heads.

Dominquez could earn a big win in an otherwise dismal season by beating Poly. Six foot forward James Shaw is one man who could be a big factor. Shaw pulls down almost 10 rebounds a game and scores almost 16 points each time out.

Shaw limped out of San Luis Obispo last time they played the Mustangs. Still, they managed a 58-55 upset and the Mustangs will be the ones out for revenge this time. If Poly hopes to win, it must break the Panther press and control the rebounding.

On offense, Poly is led by Alex Lambertson (10.3 points per game) and four other players who get at least eight a game. Tom Perkins, Mike Franklin and Chris Thomas each get nearly five boards a game to lead the Mustangs.

Since Poly and Bakersfield meet just once more this year, the Mustangs must solve the dilemma of which team to catch the Roadrunners.

At this point, no one is sure about who will win the CCAA. After all, if anything is sure in the CCAA, it's that nothing is sure.
Women's soccer

Three may be the charm

by Judy King
Special to The Daily

The Women's Soccer Club did it again, extending its conference record to 2-0. Wednesday by defeating UC Santa Barbara 2-1.

The Gauchos were the defending Division I State champions and were undefeated in league play.

But Cal Poly was not faxed. Even with six freshmen holding starting positions, the squad gave almost nothing away to the more experienced Gauchos.

The game had a fast pace from the beginning, both teams getting scoring opportunities, neither team able to capitalize. Then, 26 minutes into the game, squad captain Susie Johansson took a perfect pass from co-captain Nancy Wilson, ran the ball up field and scored on an incredible shot 20 yards out.

Then Cal Poly showed the Gauchos how they could be defeated, scoring the decisive goal only seven minutes later. It came after halfback Judy King passed to Kristin Sandberg 10 yards in front of the goal. Sandberg faked the Gauchos goalkeeper out of the box and scored easily into the unprotected net.

On Poly's defense, with fullbacks Sandy Johnson, Ross Emerson and Maureen Murray all keeping their guards up.

The women continue play at home Saturday afternoon and hope to continue their winning ways as they host Cal State Northridge beginning at 2 p.m.

Nothing to lose for Poly, only a chance to play at home.

Poly (11-6) had a 1-2 match record, but the Gauchos (13-6) had a 6-0-2 mark before the match.

Opinion

The time has come

Last October, the Campus Preparedness Task Force voted 10-4 to pass the campus-wide emergency evacuation plan on to the Public Safety Advisory Committee. The four people who dissented were the two faculty representatives, Carl Lutrin and Carl Morgen, and the two student representatives, Susan Figini and Skip Mosse.

At the meeting in which the plan was passed, it was apparent there had been a lack of communication concerning what exactly the task force was to accomplish. Richard Brug, Cal Poly's Public Safety Director, and Robert McKee of the Cal Poly Foundation Food Services both called it "a plan for future study." The representatives felt that too much of the plan was general in nature and set no time frame for studies of seismic hazards and shelter possibilities. They felt as soon as the plan was adopted all would be forgotten and Cal Poly's Public Safety personnel would settle back in gratification but with a plan that lacked essentials.

Brug told the four that such concerns were to be met by the Public Safety Advisory Committee, that the task force was only to pass a basic framework from which to build to the committee. The committee, he said, would be the place to raise specific concerns. McKee compared addressing the four's concerns in the task force to purchasing construction materials to build a house before drawing up the floor plan. The task force then voted to pass the plan onto the Public Safety Advisory Committee.

Since then the ASI Student Senate and the Academic Senate have both passed resolutions condemning the plan as inadequate. They say not enough attention was paid to details like those raised by the faculty and student representatives. They say the plan should not be approved by the advisory committee until the concerns are met. The Mustang Daily Editorial Board agrees.

We agree with Brug and the others that the task force was not supposed to deal with the specifics of the plan, that as McKee said, its job was to draw up the plans, not buy the materials and build the house. The time has arrived, however, to build that "house" and to deal with the lack of specifics in the plan.

That job belongs to the Public Safety Advisory Committee, and it must address the concerns of both the student and academic senates before the plan receives final approval. The plan was passed to the committee on the provision that the committee would address the problems, that provision must be lived up to.

We see the task force as the medium step to final approval of the plan. The public safety committee role is a much larger one. It should not be there to rubberstamp the task force plan, but to move ahead in discovering the specifics required by the committee. Setting time frames to be sure studies will be done, and addressing the concerns of those most affected by an emergency: Cal Poly faculty, staff and students.

We believe the job will not be an overnight one. It should not. Too much needs to be finalized and the process should not be hurried. Decisions need to be made involving the safety authorities and the representatives in regards to the questions raised by Lutrin, Brown, Figini, Moss, the ASI Student Senate, and, now, the Academic Senate. The faith these people and groups have in the plan is understandably lacking. The task force was not the place to raise them; the committee, however, is.

We expect the Public Safety Advisory Committee to listen to concerns and reach a realistic answer, from both safety and logistic points of view, before passing the plan to Baker. In the meantime, Baker should keep the tentatively adopted plan, and the two senate bodies should continue to push for an answer to their questions until the process is complete and Cal Poly has an evacuation plan that is mutually agreeable.

For more information on the evacuation plan see the front page of yesterday's Mustang Daily.

"Impressive technology" continues

Editor:

Was Robin Lewis' Jan. 26 article, "California's 'Sea Monsters': a Drilling Opening" written for extra credit, space filler or was it an undocumented opinion? What was the objective... "Sea Monsters" or offshore oil drilling?

I am not a supporter of James Watt nor am I a "joiner of organizations." Therefore, it appears I am of the apathetic genre. However, I must admit, I do get irritated when I hear or read only the negative side of offshore oil drilling. This attitude is based on my undergraduate studies in the geology department of UCSB, and a summer internship with a major U.S. oil company.

Offshore drilling is not an oil company's first choice for petroleum exploration; nor is James Watt their first choice as a public relations man. The economics are apparent. Mary of the larger oil companies are entailing the idea of going to capped wells and using steam injections in the production of heavier oils by decreasing their viscosity. Alternative methods of energy are consistently being explored to keep the U.S. independent of foreign interests. But, until the techniques are refined, petroleum is our one number one energy source.

After spending many an evening watching the sunset off the cliffs of Isla Vista, no one needs to remind me of the "monster heads" looming in the distance. If we must view these platforms for a lifetime, let us at least be able to look above and beyond their physical appearance and keep in mind that the same "impressive technology" that went into developing these rigs has not ceased. Things are not always what they appear to be on the surface. For one example, look under the platforms and take note of the newly created reefs giving refuge to a variety of sea life.

Book store explanation

Editor:

Paul Weber's Feb. 4 letter to the editor of Mustang Daily needs a more complete explanation.

There are only a few bookstores in the country who place special orders and they usually on college campuses. The reason that they do not is perfectly illustrated by Mr. Weber's experience. When the bookstores take a special order, it does not have a firm uptodate price. To get an estimate of the price it goes to the index, Books Au Print, which is published annually. At the moment the index goes to print, it is an as nearly uptodate as possible but begins to be out of date immediately as publishers change their prices and pass the increases in costs on to the customers.

McGraw-Hill, the publisher of the book Mr. Weber wanted, changed the retail price of the book to $49 when the index had been out several months and El Corral first learned of the change when we received the invoice at the new price. We advise customers who use our special order service (and hundreds do) that prices are subject to change when their order is placed. We find that prices do change as the index gets older but the amount of the change on this book was very unusual. I could only speculate why McGraw-Hill made such a large adjustment but I did verify that it is correct according to their latest list.

Special orders of this sort are not final until the extra amount is paid or the book is returned. In this case Mr. Weber returned the book to El Corral and received a full refund.
