Fraternities seek homes as city threatens the boot

by Caroline Paras

Recent rains provided some spectacular scenery as the sun went down its soothing laws.

The city is being really reasonable because it's true, the fraternities are illegally zoned,” said Falloon. He also said that the United States does not have the facilities to train people in the skills needed in developing countries. People who come here for training in order to teach in universities at home, receive training that is too specialized. “What happens is many times they are gobbled up into management or administration, but we frequently give them no training in these areas.” He said we need more flexibility in our schools’ curricula, so that people who need a more hands-on training can receive it.

Even after Hutchinson’s speech several members of the audience were still skeptical about the benefits underdeveloped nations would receive from AID’s programs.

AID’s programs are not autonomous. Its programs are not independent of political goals we have in the third world, “many of the others, a senior Crop Science major, who has worked extensively with Food for the Hungry, “He mentioned three goals, one of the three security and economic are high so that the basic must be sustainable training can receive it.

AID’s programs used to be for large operations,” said Paul Maina, a senior Ag-Management student from Kenya, “and it was not successful. I think it benefited the bureaucrats and multi-national corporations. More emphasis should be given in working hand-in-hand with the nationals so when AID leaves, the nationals can take over.”

“[They have good motive a billion, but it is a waste of money,” said Maina.

Falloon said the city has offered to help in the situation by offering assistance in locating other places to build.

“Tell me how you can’t talk about security anywhere without talking about the whole world,” — Fred Hutchinson

Economically, there is no base which will sustain it,” Hutchinson noted.

One of the things AID does when it goes into a country, said Hutchinson, is to set up institutions which can benefit a country for years. “If you look at AID’s successes over the years, clearly it has worked best when AID built institutions and trained people for those institutions. If you go back 30 years later, they will still be there.”

Falloon said the city is going to crack down on the fraternities now is other people have gone to the city for use permits and the city turns them down because the area they want to work in isn’t zoned for that purpose,” he said. “They’ve decided to crack down on everyone.”

One of the fraternities, Theta Chi, has been located in the same area for the last 27 years, Falloon said. He said that house — like the others — has not had any major neighborhood complaints, but city attorney Roger Piqueu feels it is time to comply with zoning laws.

“They backed off the last couple of years hoping that Cal Poly would get a Greek Row. But now they have to start following regulations,” Falloon said. He said the city has operated with the fraternities in good faith.”

Falloon said the city has been asking the director of the agency to act, effective Jan. 1, pending selection of a new director.

He went on to say it is ridiculous for people to say that the United States should feed the world. “We can’t,” said Hutchinson. “There are many reasons, not the least of which is doing as would create a welfare situation that would be unrealistic. Countries need to do for themselves.”

Should contribute aid to hungry?

Speaker says hands on approach gives an edge

by John Bachman

Cal Poly has something special to contribute toward making a dent in the world’s hunger problems, said Dr. Fred Hutchinson, executive director of the Agency for International Development (AID), in a speech he gave the students in UU 280.

“You have something to offer that is unique,” said Hutchinson. “The hands-on experience that students get here is not in existence anymore in many places in the world.”

The first thing Cal Poly should do, said Hutchinson, is decide if it wants to make a commitment to help alleviate world hunger. “If you have a sense of commitment, and if you develop some plan to get there, I have little doubt that you will be doing more from Cal Poly.”

“The reason the city feels it has to crack down on the fraternities now is other people have gone to the city for use permits and the city turns them down because the area they want to work in isn’t zoned for that purpose,” he said. “They’ve decided to crack down on everyone.”

A dusty issue

Chalk.
A flaky white calcium substance usually found in limestone rock. Pretty harmless stuff, right?

Not according to the administration and Student Senate. In recent weeks, they have instituted a new policy which will bill organizations for scribbling chalk messages in chalk on the campus. Plant Operations Director Ed Nuetto said these clubs will be charged by the amount of time it takes to scrub the graffiti off the steps. The hourly wage is $9.

The official reason for the charge is because it detracts from the beauty of the campus. They would have a good point if chalk created permanent inscriptions. But it is a dusty issue that in my opinion, the campus’s steps. Plant Operations Director Ed Nuetto said these clubs will be charged by the amount of time it takes to scrub the graffiti off the steps. The hourly wage is $9.

SLO kids get close-up look at Farm City Day zoo

Cal Poly’s 20th Annual Farm-City Day went off without a hitch Saturday as several children and their parents flocked to Madonna Plaza to see the animals and learn more about the agricultural community.

The event, which featured a farm animal petting zoo, was sponsored by the School of Agriculture and Natural Resources as part of a nationwide awareness week to promote the interrelationship between rural and urban areas.

Twenty-eight of the school’s 36 clubs participated, with awards going to the best booths. The Poultry Club took first, while the Food Science and Los Lecheros Club placed second and third respectively.

Clockwise from top — Jesse Parsons tries to feed a piece of straw to an uninterested goat; Jordan Howland gets a free ride on a barrel horse at the Rodeo Club exhibit; Marina Bouton is fascinated with a baby chick that mom, Angie, picked up at the poultry unit.

Rose Parade proves a rosy experience

by Chris Counts

It's January 2, 1983. The float entered in yesterday's Rose Parade has won the coveted Princess Award for the best animation, giving the school its 18th award in the past 18 years.

An estimated $200,000 and countless hours of volunteer labor by Cal Poly students and staff have paid off in the past. Last year's float won the award, but this year's float has earned its own award.

For the students, it's a proud moment. "It's great to work with students who are enthusiastic and enjoy the opportunities available through Rec. sports," said Ciano.

There are a few minutes here and there, he said, that are not so positive. He felt that the biggest problem is the lack of space 'both inside and out' that is available for use. This problem, he felt, is further hampered by the construction of the new engineering building.

"The difficulties are in priorities because the building comes first. If there is any conflict in scheduling times, they get the facilities," Ciano explained.

Ciano won't be filling the spot permanently because he doesn't have a degree in recreation. "That's not me," he said. "I have the interest in participation, but not the experience."

The Recreational Sports Director's responsibilities include running the sports program, intramurals and equipment checkout. Members of the staff are also in charge of the gym openings and closings as well as the weight room and both pools. They also help coordinate club sports activities such as rugby, Ski Club and women's soccer.

Rec Sports seeking new director

The Recreational Sports Department will be equipped with a new director by January 1, 1984 according to Allan Yang, assistant director of the Activities Planning Center.

A nationwide search for qualified and interested applicants has been narrowed down to five finalists by a selection committee headed by Yang. The final decision will be left to Russ Brown, dean of students and Hans Barklay, director of the Activities Planning Center.

The previous director, Denny Bura, left at the end of the summer for a position at the University of Wisconsin and has been temporarily replaced by Dave Ciano. Ciano was previously the Director of Judicial Affairs and feels that working with Recreational Sports has been a positive and rewarding experience.

"It's great to work with students who are enthusiastic and enjoy the opportunities available through Rec. sports," said Ciano.

But there are a few minutes here and there, he said, that are not so positive. He felt that the biggest problem is the lack of space 'both inside and out' that is available for use. This problem, he felt, is further hampered by the construction of the new engineering building.

"The difficulties are in priorities because classes and intercollegiate sports come first. If there is any conflict in scheduling times, they get the facilities," Ciano explained.

Ciano won't be filling the spot permanently because he doesn't have a degree in recreation. "That's not me," he said. "I have the interest in participation, but not the experience."

The Recreational Sports Director's responsibilities include running the sports program, intramurals and equipment checkout. Members of the staff are also in charge of the gym openings and closings as well as the weight room and both pools. Insurance: it's not worth the risk

by Vicki Tulio

Students wishing to insure their stereo or television may find it’s more trouble than it’s worth.

Students are usually considered a higher risk, and insuring personal property could mean higher premiums and deductibles, said Mike Chew, Marketing Manager of Morris & Dee Insurance Agency.

“Most companies lump all young drivers in the same category. We look at students as responsible citizens — being a student can benefit you,” said Strand.

For the remaining 10-20% of the students not covered, insurance policies can be difficult to find. "It is hard to find companies to insure personal property when more than one person is living in any residence if they are not related," said a representative of Neal-Trusdale Insurance Agency.

As for auto insurance, all the companies and agencies follow the same requirements. A student’s driving record, age, and sex determine the premiums he or she will pay. Some of the companies offer student discounts for drivers under twenty-five with at least a ‘B’ average.

After several insurance agents, the students are considered a higher risk because of the number of occupants in one residence, the traffic coming through the dorm or apartment, the rapid turnover of roommates, and possibility of property damage when students travel to and from school.

In many instances students do not need personal property insurance. Approximately 80-90% of parents’ home owner insurance policies cover property away from the premises," said Strand.

For the remaining 10-20% of the students not covered, insurance policies can be difficult to find. “It is hard to find companies to insure personal property when more than one person is living in any residence if they are not related,” said a representative of Neal-Trusdale Insurance Agency.

As for auto insurance, all the companies and agencies follow the same requirements. A student’s driving record, age, and sex determine the premiums he or she will pay. Some of the companies offer student discounts for drivers under twenty-five with at least a ‘B’ average.

Insurance companies would cover $10,000. You can insure your property for less, but your premium would be based on the average.

A student with a good record can get a competitive rate. Strand-Murrell deals primarily with Mercury Casualty Insurance Company. “They specialize in student and young adult auto insurance. To them, this class of business is profitable and this allows them to offer competitive rates. This benefits everybody — the student, the agent, and the company,” said Strand.

“We are competing against people who are making their livelihood building floats.”

Another problem that the committee encounters is the lack of money. Each school contributes $8,000 toward the float, with donations financing the balance. This year’s float will cost an estimated $200,000.

40 students from both campuses comprise the float committee while another 276 have donated time to help with the construction. What attracts so many students to the construction of the float?

“Most of them just take pride in seeing the finished product on the parade route,” Colvin said. “Many students get an opportunity to implement things they’ve learned in the classroom on the float.

“We’re the only float in the parade that is built entirely by students,” Colvin said. “Students finance, decorate, design and build the float. This helps make us a crowd favorite.”

by Linda Raiff

**EXHIBITS...**

**CAL POLY CRAFT SALE**

The work of Cal Poly students, faculty and staff members will be on display and for sale at the annual Christmas Craft Sale in the University Union Craft Center Dec. 1 and 2. Ceramics, photographs, quilts, cookbooks and stained glass works are just a few of the many items for sale from 11 a.m. to 7 p.m. both days.

**TOYS AND TRANSPIRATIONS**

Two exhibits continues to be featured in the University Union Gallery. “Toys That Play With Art,” an exhibit by Ken Botto and Susan Eason, explores the fun and seriousness of children’s toys through photographs and toy-art. Also in the Gallery is “Transpirations,” a mixed-media exhibit concerned with photosynthesis by San Jose artist Michael Arata. The Gallery is open everyday, admission is free.

**PLAZA PRESENTATION**

The San Luis Obispo Parks and Recreation Department will be sponsoring the annual arts and crafts faire in Mission Plaza on Dec. 3 and 4. Admission is free to the gala of Christmas decorations and gifts.

**MUSIC...**

**MUSICAL HIGHLIGHTS**

The Cal Poly Marching Band will present “Musical Highlights of 1983 Football Halftime Performances,” for its annual Render in Dec. 3 in Chaminade Auditorium. Also featured at the event will be “Strings and Hot Air,” a six-member Dixieland group. Tickets are $1.75 for students and $4 for general admission at the 8 p.m. show.

**CHORAL CONCERT**

The Cal Poly men’s and women’s choirs will combine to perform “Christmas Celebration” at 8 p.m. on Dec. 3 in the Cal Poly Theatre. Tickets are $2 for students and $4 for general admission.

**LAST U S H O U R**

Jazz up next Thursday, Dec. 1 during this quarter’s final University Union Hour. The University Jazz Band will be performing in the plaza.

**CHRISTMAS MELODrama**

The San Luis Obispo Civic Ballet will be presenting “Christmas Ballet” Dec. 8 through 11 in the Cal Poly Theatre. Dancers will include two Cal Poly students and special guest performer Enrico Labayan of New York. Tickets are $10, $7 for general admission and $4.50 for children.

**WINEMAKER IN LOVE**

The Piano Light Opera Theatre is running the Broadway musical comedy “The Most Happy Fella” Nov. 25 and 27. The full stage production features Larry Woodford as the Napa Valley winemaker in love with Rosabella, played by Caitlin Browne. The comedy is housed at the Marion Houston Theatre in Pismo Beach. For tickets, call 773-2882.

**SCROOGE**

What would Christmas be without the traditional “Scrooge,” playing at the Hilltop Theatre Dec. 9, 10, 11, 16 and 17. Tickets are $4 for adults and $2.50 for children to the production, sponsored by the Central Coast Children’s Theatre.
Hoopsters register first win with grand finale 72-61

by Shari Ewing
Staff Writer

The Cal Poly women's basketball team saved the best for last at the Cal Poly Classic, winning its conclusion after dropping the first two games.

The Lady Mustangs bested the UC Davis Aggies, 72-41, thanks to forwards Terri MacDonald and Michelle Harmeyer. Both contributed 16 points each to the Mustang cause, with Kelly Ulrich also scoring in double-figures, adding 14 points. As a whole, the team hit 25 shots out of 61 attempts for a 49.0 average, while Davis could only manage 17 of 49.

The Aggies outset the Mustangs from the free throw line, sinking 7 of 22 to Cal Poly's 22 of 30. In the second half of the game, the Mustangs hit 18 free throws out of 20 attempts for a 90.0 average. The win was the first for Cal Poly during the season-opening tournament.

In their first game, the Lady Mustangs lost to UC Santa Barbara, 65-76. MacDonald got the team off to a quick read, 7-6, with two buckets and three free throws. MacDonald scored 11 points throughout the game in only 13 minutes of playing time.

Freshman Sherrie Atteberry scored a game high 14 points, with Harmeyer contributing 12 points.

At the end of the first half, the Mustangs led the Gauchos, 34-29. Cal Poly relinquished its lead during the second half, when a rejuvenated Gaucio squad went on a shooting spree. UCSB forward Diana Pantili led the charge, scoring 10 of her game high 20 points during a span of four minutes, when the Gauchos broke away from the Mustangs.

UC Santa Barbara coach Darla Wilson, assistant coach to Marilyn McNeil last year commented on her team's success, "Coach McNeil taught me well."

"We were terrible on rebounds," said McNeil. "That's our fault (coaches). We didn't emphasize that. The Mustangs pulled down only 35 rebounds. The team improved on its rebounding skills 24 hours later when it played University of the Pacific, boosting its number of rebounds to 41. Despite the improvement, UOP handed Cal Poly its second defeat, 66-55. UOP showed the Mustangs that good things come in small packages, when the Tigers 5-5 award Mary Lary shot a game high 17 points. Michelle Harmeyer led the Mustang attack with 14 points, with Atteberry scoring 12 and MacDonald furnishing 11 points.

"We made fewer mistakes than last night," said McNeil. "We played really well defensively."

The Mustangs finished seventh in the tournament behind University of Oregon, which defeated UC Irvine 73-59 for the championship. San Jose State beat Francisco State 80-50 for fifth place, while UOP defeated San Francisco State 80-50 for fifth place.

Cal Poly will host Davis Friday Dec. 2 at 7 p.m. in the Main Gym.

"We were terrible on rebounds," said McNeil. "That's our fault (coaches). We didn't emphasize that. The Mustangs pulled down only 35 rebounds. The team improved on its rebounding skills 24 hours later when it played University of the Pacific, boosting its number of rebounds to 41. Despite the improvement, UOP handed Cal Poly its second defeat, 66-55. UOP showed the Mustangs that good things come in small packages, when the Tigers 5-5 award Mary Lary shot a game high 17 points. Michelle Harmeyer led the Mustang attack with 14 points, with Atteberry scoring 12 and MacDonald furnishing 11 points.

"We made fewer mistakes than last night," said McNeil. "We played really well defensively."

The Mustangs finished seventh in the tournament behind University of Oregon, which defeated UC Irvine 73-59 for the championship. San Jose State beat Francisco State 80-50 for fifth place, while UOP defeated San Francisco State 80-50 for fifth place.

Cal Poly will host Davis Friday Dec. 2 at 7 p.m. in the Main Gym.

The Lady Mustangs lost to UC Santa Barbara, 65-76. MacDonald got the team off to a quick read, 7-6, with two buckets and three free throws. MacDonald scored 11 points throughout the game in only 13 minutes of playing time.

Freshman Sherrie Atteberry scored a game high 14 points, with Harmeyer contributing 12 points.

At the end of the first half, the Mustangs led the Gauchos, 34-29. Cal Poly relinquished its lead during the second half, when a rejuvenated Gaucio squad went on a shooting spree. UCSB forward Diana Pantili led the charge, scoring 10 of her game high 20 points during a span of four minutes, when the Gauchos broke away from the Mustangs.

UC Santa Barbara coach Darla Wilson, assistant coach to Marilyn McNeil last year commented on her team's success, "Coach McNeil taught me well."

"We were terrible on rebounds," said McNeil. "That's our fault (coaches). We didn't emphasize that. The Mustangs pulled down only 35 rebounds. The team improved on its rebounding skills 24 hours later when it played University of the Pacific, boosting its number of rebounds to 41. Mustangs season slip, slide away

by David Kraft
Staff Writer

Whoever ordered the rain Saturday night must have been trying to sum up the Cal Poly football season. If so, they found a most appropriate manner.

The sky certainly fell in on the Mustangs in 1983. A record 21-8 loss to the Cal Poly pounds with a 27-20 victory in the rain at Mustang Stadium before 3,140 fans. It marked the first time in 16 years that rain had dampened a Cal Poly home football game, and there was no better backdrop for the Mustangs' emotions as they walked to the locker room.

The loss was the low of the season, a fact that became apparent as the Mustangs moved up the ladder of their final eight, sliding from a number five national ranking to a 5-6 record and only their second losing season in 16 years. It's been eight weeks of issues for the Mustang coaching staff and players.

To add insult to injury, the Mustangs saw a chance at a possible league title wash away. Santa Clara and Northridge finished 1-2, tied with Portland State.

As has happened so often this season, the Mustangs couldn't take advantage of a big two against the defense.

One key reason for the Mustang comeback was the exciting play of quarterback Izaac Vaughn, who entered the fray in the second quarter. Vaughn, who had four touchdown passes in his first two seasons, was thrown for a sore ankle, but he showed no signs of hobbling in for the final four. Vaughn had 23 completions in 35 attempts when he was in, 6 for 10 for 107 yards, giving the Mustangs a 109.5 yards via the air the Mustang pass game wasn't nearly as successful.

Quarterback Tim Snodgrass had a disappointing final start as he was only able to manage 7 of 23 for 126 yards and two interceptions. Snodgrass had trouble with receivers slipping and a wet ball, which prompted Sanderson to say "it looked like they had a wet one.""

The Mustangs mustered a final of 1-3-2, tied with Portland State.
