Student Opinion Profile goes on sale

by Linda Raff

The results from the first Cal Poly Student Opinion Profile were published yesterday, Jan. 34 by the A.S.I.

The booklet is available in the bookstore for 99 cents.

The book contains the opinions of 6000 students concerning their instructors. Students rated their professors in various areas, like "effective use of time," "teaches effectively," and "intellectual challenges."

Background information, teaching philosophy and course outlines for each instructor were also included and is included in the book.

At the beginning of the fall quarter all faculty members were sent a letter asking for support and participation in the program. Only 80 instructors agreed to participate.

Turner is hoping that in the future more faculty members will participate, as the A.S.I. plans to put out a new book every year.

"One more evaluation seems like one more threat. Hopefully, when they see the book itself they'll see the value in it," Turner said.

The idea for a student opinion profile of instructors has been discussed at Cal Poly for several years.

According to Jeff Mikulak, project director, the profiles were finally initiated because of the strong beliefs of last year's and this year's student governments.

A.S.I. President Jeff Stacers said he and his vice president, Steve Sommers, "Puh a need to make it (the profile) become reality."

Stacers also said in his opening letter to the profiles that he hopes future A.S.I. officers will continue the evaluations, making them bigger and better every year.

In the Spring quarter all faculty members will be asked if they want to participate in the program. Only 80 of Cal Poly's 900 faculty members are critical to the profile. Depending on the number of responses to the questionnaires to classes was optional to instructors.

Cal Poly's Task Force
seeks reorganization of
schools and departments

The President's Reorganization Task Force, which previously proposed reducing the Cal Poly's seven schools to six and the realigning of 13 departments, is scheduled to release its report this Thursday.

The Task Force examined Cal Poly's different departments, said Tomlinson Port, provost and chairman of the Task Force, to see if restructuring would help in various department's roles in teaching applied or support courses.

Earlier Task Force suggestions called for transferring the art department to the School of Architecture and Environmental Design from the School of Communicative Arts and Humanities. The journalism and graphic communications dept., would be moved into the School of Business and Professional Studies from the School of Communicative Arts and Humanities, said the preliminary proposal.

Stacers said in his opening letter to the profiles that he hopes future A.S.I. officers will continue the evaluations, making them bigger and better every year.

Cal Poly's Task Force seeks reorganization of schools and departments

The President's Reorganization Task Force, which previously proposed reducing the Cal Poly's seven schools to six and the realigning of 13 departments, is scheduled to release its report this Thursday.

The Task Force examined Cal Poly's different departments, said Tomlinson Port, provost and chairman of the Task Force, to see if restructuring would help in various department's roles in teaching applied or support courses.

Earlier Task Force suggestions called for transferring the art department to the School of Architecture and Environmental Design from the School of Communicative Arts and Humanities. The journalism and graphic communications dept., would be moved into the School of Business and Professional Studies from the School of Communicative Arts and Humanities, said the preliminary proposal.

The School of Communicative Arts and Humanities would be renamed the School of Humanities, Social Sciences, and Education.

Psychology, child development, education, and liberal studies would be moved into the renamed school of Humanities, Social Science, and Education.

The School of Human Development and Education would be eliminated. Child development and psychology would be united into a single department.

The preliminary recommendations also called for the creation of a new performing arts department. The new department would be formed out of music department programs, physical education and dance programs, speech communication programs, and drama programs.

Port stressed that he wanted everyone to read the report before commenting on its recommendations. He said the report explains the philosophy behind the proposed realignments and must be viewed in terms of Cal Poly's future education role.

Internships give students government experience

by Jerry Sheahan

Cal Poly's reputation for "learning by doing" is more than just a saying as shown through the Washington Center for Learning Aligned Research Internships.

All students may apply for the one-quarter internships, which offer up to 16 credits for a wide range of research activities.

University Licens for the program, Carl Liedin, said the Center "provides students with hands-on experience that will help them develop as better people."

Political science major Carl Gross participated in the program last fall quarter, working for Amnesty International, an international human rights organization.

Gross worked for the organization's area coordinator for Latin America and was involved in a variety of activities. "I went to congressional hearings, held in testimony given by other organizations, and heard U.S. State Department versions on human rights violations," said Gross.

Gross said Amnesty International is a non-political organization which officially publishes information on human rights violations around the world and responds to pleas for release of individuals for fear of torture or death.

Gross gave one example of violations in El Salvador which took the form of vans equipped with electric shock devices to punish those persons who helped refugees. The vans were then driven to "torture centers" where additional punishment was administered to the captives.

"I got a real good look at background information on what is happening in other countries," he added.

Gross is planning to initiate a group on campus which promotes the goals of Amnesty International. "I think it's real important to enlighten Cal Poly students on human rights issues," stated Gross.

Lila Gross, junior history major, Denise Berruz, is amid over 80 Cal Poly students in the last three years who have traveled some 3,000 miles and relocated for a quarter to intern through the program.
How do you like them apples?

Foolish, foolish, foolish.

No better words can describe President Baker's recent decision to deny students the opportunity to buy Apple home computers at less than half the regular price. And these words are being used by students and faculty who realize the opportunity they may have missed.

Besides being foolish, the decision appears to have been made carelessly. The computers are advanced home systems. President Baker said servicing them would be difficult because they could not hook up to the Cal Poly computer system. Yet, if a student operates the computer from home he may not necessarily want to be hooked up to the Poly system. An Apple Macintosh is an intelligent computer system, meaning it doesn't necessarily need to be hooked up to another system. It would therefore be the student's decision and should not be Baker's.

President Baker also told the Student Senate he feared the university would be unable to sell the $2 million worth of computers in the three-year time limit. But even this is hardly restrictive, since Apple agreed to just cancel the deal if they couldn't hook up to bigger computers. The Cal Poly Foundation even considered offering loans to students at 12 percent.

President Baker has denied Cal Poly students and faculty a great opportunity without justification. It is ludicrous that an institution of higher learning should deny students the opportunity to advance their knowledge in a world that increasingly demands more.

Last Word

Living arrangement is not so surprising

"Oh, you live with five other girls?!?"

"No.

"I thought you said there were six people living at your place."

"You mean you live with guys?!?"

A typical response to my admission of living with members of the opposite sex. Sometimes it's accompanied with wide eyes and a gasp of surprise, or a nod and a wink. But almost always people consider it something unusual—at the very least.

Lord knows what the neighbors think, who are quick to glare and ask a friendly "hello" from any one of us as we pass by. Later on, we ALL call each other students, and worse, we are of both sexes. Living together. In sin, they think.

The couple above us has a game of watching "the commune." Mrs. Nowey doorstep the poor jumplin' that border her deck, which overlooks our backyard in anticipation of catching one of us greeting another with a hug. I've never seen anyone water plants so much.

We always thought they would make happier if we moved out, but I've realized together with my roommates that we are the purpose of their existence. They must look forward to waking every morning to someone's glee and to someone else's.<ref>

Rotten deal on Apples

Editor:

It was with an open and indifferent mind that I began reading the article of Baker's decision to not allow Apple to sell some of its computers to Cal Poly students for half price. As portrayed in the article, the offer seemed reasonable enough. Cal Poly students and faculty purchase $2 million worth of computers in three years, or lose the fifty percent discount.

According to Ralph Nicovich, "Apple is a high risk." But if one looks around the microcomputer market, one sees Texas Instruments giving away the product of its poor performance. Warner Communications steadily loses money in its Atari division. Adam Osborne—whose company marketed one of the first successful portable micros—has declared bankruptcy. IBM is mocked for its lack of innovation and reluctance to submit to any but its own standards.

Nicovich says he doesn't want anyone to get stuck with a machine that couldn't hook up to bigger computers. In the first place, with 128k memory and a high capacity disk drive, there are a lot of things that one could be able to do on his own.

Of course there may have been aspects considered in the decision that were not presented in the article. But when I read that Cal Poly was the only school that had received the offer from Apple and turned it down, I felt for the first time in my three years of Cal Poly administrative decisions, a twinge of regret that I had decided on this place for my higher education.

Letters

Student should feel disgraced for insulting faculty, staff

Editor:
A letter appearing Jan. 23 tells of a disgraced Poly student. Indeed a person who would write such a letter should feel disgraced.

This person’s letter does not deal with the issue of Diablo, which obviously he has feelings about, but dictates what he thinks a proper teacher should be. It would seem that the writer thinks educators should be non-feeling, non-thinking, non-acting individuals so afraid of the image they project that they don’t dare stand for their beliefs.

That is the real issue here, standing up for what you believe. The faculty and staff that “flagrantly” committed a criminal act perpox in a community, non-violent act of civil disobedience.

Beyond being teachers these people are members of a concerned community and they have every right to stand up for what they believe. These highly educated people we are talking about are not just a “handful of radicals” but are professionals who have put a lot on the line to have their concern over Diablo Canyon heard.

Civil Disobedience is the ultimate act of protest. It’s only used when all else fails and something must be done. In a non-violent action Sunday, Jan. 16 instructors from Cal Poly allowed themselves to be arrested for a cause they believe in.

How could anyone say they have “smearred mud on the pride of being an educator”? It’s up to educators to earn our respect and teach us, right?

But if they believe strongly in something yet do nothing about it, then I ask you, what is education all about?

The Concerned Cal Poly Faculty and Staff deserve to be commanded. They did what most of us would be afraid to do, that is if we would get up off our butts, think, and act.

If the disgraced student would like to call “for President Baker and his staff to put a stop to this shameful action” perhaps he would also like to explain that teachers are supposed to be independent and unmotivated.

And then this new, non-criminal group could be called Apathetic Cal Poly Faculty and Staff.

Signed,
A proud student

Teresa Heest

Civil disobedience— was ‘an act of conscience’

Editor:
I think the letter calling members of Concerned Cal Poly Faculty, Staff, & Friends criminals reflects poorly on the education the author has been receiving at Cal Poly. As an educator and a person who was arrested on Sunday, Jan. 15th, I can’t resist answering. You advocate the removal of our constitutional, as well as academic, rights. If you check the US Bill of Rights, you will find in the first amendment the rights of freedom of speech and to assemble peaceably. In the 5th and 6th amendments you'll find that one cannot be deprived of life, liberty or property without due process of law. Presumably we will be considered by the courts, even if not by you, to be innocent until proven guilty.

I crossed that blue line onto a county road leased by PG&E to protest peacefully against the operation of that plant whose building procedures have been so suspect, that will produce routine admissions of radioactive wastes, and could have an accident material during operation, that plant whose building procedures have been so

thought out carefully on a personal basis, so that you myself, my community and persons yet unborn is more important than some county ordinance that gives PG&E the right to say who goes on that road. If nuclear power plants are so safe, why don't they open them up to public tours so they do in hydroelectric plants?

We spent three days in jail and then most of us pled Not Guilty. The sentence was four days with credit for time served. We could have gone back to jail for another few hours and served all our sentence and have it all finished. Personally I think lives and safety are a more important basis for laws and regulations than corporate greed and mismanagement.

Maybe you are unaware of the civil rights movements that have occurred in this century in this country. The vote for women, civil rights for ethnic minorities, the end of the war in Viet Nam were all accompanied by people going into the streets and refusing to leave until someone listened to them.

I certainly wouldn’t advocate civil disobedience or any other form of law breaking in the classroom, particularly considering the power of the teacher in the classroom. Also this sort of purposeful act must be thought out carefully on a personal basis, so that you are integrated, body, mind and head, into the action. An awful lot of soul searching proceeded my first action at Diablo in 1981. It is an act of conscience, and no one can be someone else’s conscience. Mine is nice and clean concerning Diablo.

Gail M. Jacobson, P&D Biochemistry

Faculty not asked

Editor:
The Mustang Daily, in the article “Students denied chance to buy half-priced Apple computers,” Tuesday, Jan. 24, states that “People in the computer science department did advise the university in this matter.”

In fact, faculty in the computer science department was not consulted.

Defense of Greek System voiced by non-sorority member

Student appalled at thoughtless criticism by peers

Fine reputation of Poly's teachers remains unhurt

Editor:
I am so sick and tired of the mindless, discriminatory attacks directed toward the Greek System. Nothing of value is ever stated; few opinions are changed one way or the other. I am still waiting for someone to tell me what is the point trying to be made.

What is hoped to be accomplished by these "saviors" of the college system? What "horrors" of the greek system are they hoping to protect us from?

Student appalled at thoughtless criticism by peers

Editor:
Sometimes I can't believe the thoughtless criticism that people write in about the Civil War. What about Socrates or Gandhi? If you don't like greeks, then don't associate with them. No one forces you to go to their T.G.'s and to drink their beer. Aren't you people who criticize the greeks adult enough to choose your own friends? Most of us have the common sense not to associate with people who we do not gel along with. Can't you find something more constructive to do with all this built-up energy frustration? you're wasting on letter-writings that accomplish nothing? If you have some constructive criticism to offer which can benefit the greek system, then I'm sure they'd be more than happy to hear it.

Maybe this is too idealistic, but I wish everyone would just shut up and let me be me, the sorority girls be sorority girls, the punkers be punkers, the aggies be aggies, etc. Instead of focusing so heavily upon the faults of others, why don't you "experts on criticism" take a good hard look at yourselves. A little self-improvement could be good for all of us.

Fine reputation of Poly's teachers remains unhurt

Editor:
Eric Baucom (Letters, 1/23) claims to be ashamed of Cal Poly's faculty and staff that participated in the demonstrations at Diablo Canyon.

I am proud that these "radicals" are concerned enough about my future to protest what they see as an obvious wrong, and that they are courageous enough to try and do something about it. That they had to resort to civil disobedience is not a reflection on them, but on the system in general. If the public cannot be heard in matters that they passionately care about, they must find a way to make themselves heard.

I do not think that Cal Poly's fine reputation will be damaged, but rather enhanced by the actions of these teachers. It shows that they are active, caring members of the community, and not just automatons for who they are?

Perhaps this is too idealistic, but I wish everyone would just shut up and let me be me, the sorority girls be sorority girls, the punkers be punkers, the aggies be aggies, etc. Instead of focusing so heavily upon the "faults" of others, why don't you "experts on criticism" take a good hard look at yourselves. A little self-improvement could be good for all of us.

Graduating Engineers...

Our Engineers enjoy challenging careers while living in SLO.

TRW in SLO

TRW EPI San Luis Obispo Division, Manufacturer of High Reliability Electronics, is looking for Graduating Engineers (EE, IE, IT, ET, ME). TRW EPI offers salaries competitive with L.A. and the Bay Area while being located in San Luis Obispo.

Interested Engineers should call for an interview or come in person to 1050 Southwood Drive, SLO, 544-2786.
BUSINESS/TECHNICAL MAJORS!
YOUR FUTURE IS NOW!

Start at $16,400 to $18,800 with rapid raises. Don’t wait! Call toll-free 800-252-0559 or see the Navy Officer Information Team on Campus Jan. 30-31-Feb. 1 at the Placement Center.

ACQUIRE A UNIQUE PERSPECTIVE AT LITTON DATA SYSTEMS

If you’d like to begin your computer engineering career with a company that looks at everything from all angles and explores even the most remote possibilities, come to Litton Data Systems.

Ever since computer technology was recognized as a vital part of military operations, Litton Data Systems has been searching for new ways to meet the challenging needs of our nation’s defense systems. We are dedicated to continuous research and development in the application of modern software and circuit technologies to command, control and communications (C3) systems that provide greater performance reliability, maintainability and cost efficiencies.

As one of the largest divisions of Litton Industries’ international family, we can get your software or hardware engineering career off to a great start with opportunities in a variety of programs. This diversity offers continuous possibilities for challenge and advancement within the company.

Our salaries are excellent and our benefits package includes health, dental and life insurance, recreational programs and educational reimbursement. You’ll also find our Southern California location very appealing.

If you would like to be a part of a company that’s never satisfied with things as they are, join Litton Data Systems and acquire our unique perspective.

Sunny weather during the typically rainy month of January lets Cal Poly students relax on the grass rather than slip on the mud.

Dorm Antics

SO YOUR BLOW DRYER BLEW UP ON YOU, HUH?

COME ON, IT'S NOT THAT BAD, THINGS COULD BE W

Dry January may be second driest Central Coast history, says professor

If weather remains dry for another week this January could be second driest Central Coast history, said Poly agriculture professor.

Joe Glass, who happens to have weather records for the San Luis Obispo area for the past 100 years, said, "Even though this January has been far below average, that is no implication that it will stay that way."

He explained that there have been dry Januaries in the past, most recently during the 1971-72 and 1974-76 rain seasons, but that the rain picked up afterwards.

"If the weather keeps dry then this will be the driest January we’ve had since 1976," said Glass.

Although January has been dry, Glass pointed out that taken together with November and December of this school year it averaged out to an above average rainfall for the three-month period.

"We are still two inches above average," said Glass, "in fact until December we had far above average rainfall."

"Last year we had no rainfall in January until the 16th," he added.

This same time last year the area had received 6.33 inches; this year, we have only received .15 inches of rain.
How to dress for weather

by Jesse Chavarria

When students make the decision to attend Cal Poly, or perhaps, are lucky enough to be accepted, they must prepare themselves for the climate they will encounter in San Luis Obispo. However, many students do not take the climate into consideration until it is too late. To help students prepare themselves, the Outdoors section has taken it upon itself to present this short list of suggestions on how to handle the weather conditions at Cal Poly.

The first thing to know is that the weather here can be described in four words: rainy, sunny, cloudy, and windy. Here are suggestions on how to handle each condition.

Rain: It will come. It is inevitable. The best thing Poly students can do is buy a sturdy umbrella. In fact, they should be standard issue around campus. They have been known to ruin thin's Poly students can do is buy a sturdy umbrella. In fact, they should be standard issue around campus. They have been known to ruin

by Steve Cowden

Travel Center sponsors Yucatan trip

The University Union Travel Center is sponsoring a trip to Yucatan, Mexico over spring quarter break to visit various ruin sites including the mysterious Mayan Pyramids. The trip includes flights, hotels, transportation to Los Angeles International Airport and a guide for the total cost of $550. Linda Fielden, travel adviser at the center, said, “The trip combines an archeological-educational trip and a beach-resort trip.”

Participants will leave Saturday, March 17 and return Saturday, March 24. The first stop of the trip will be four nights in Merida, Mexico, the driest in area history. The second stop is La Isla de Las Mujeres (The Isle of the Women) where the group will spend its time on more relaxing pastimes such as skin-diving, snorkeling, sunbathing and swimming.

Rain gauge located near hanger helps Poly professor keep track of rainfall.

SLO TRANSIT ANNOUNCES TRIAL EVENING SERVICE

Guardian Industries Corp. will be on campus interviewing for Engineers on January 31st and February 1st. We are one of the Top growth companies in the U.S. with a people-oriented, participative management philosophy. We have positions available in our new $68 million glass mtg. facility in the Fresno area. Desire candidates with BS EE, BSME, BS, Excellent growth potential with comprehensive wages and benefit program, includes bonus. If a future with our company is of interest to you, please contact the Placement Center for more information, or call Ron Smith and Hank Serat (former Cal Poly Graduates) at 1-209-896-6400. EOE M/F

Washington Center for Learning Alternatives. Bernstein worked for the George Washington Community Legal Clinic which provides legal aid to low-income students. As an intern, Bernstein was allowed to help prepare for court cases involving immigration.

Student Senate meeting postponed; strip search, commencement put off

The Student Senate has cancelled tonight's meeting because matters pending before the board do not warrant a meeting.

The two resolutions the senate was scheduled to discuss, one dealing with commencement and one dealing with strip searches, have been put off until next week.

Both resolutions, said ASI Vice President Steve Sommer, still need work before coming to the full senate for discussion and voting, leaving no business items for tonight's scheduled meeting.

ASI President Jeff Sanders said the strip search resolution, which he is currently putting together, is a message to the California State Legislature supporting his attempt to override Governor Dewey's recent veto of a bill which would have stopped strip searches for misdemeanors.

"It was given a lot of responsibility and attention," said Bernstein. "I would advise any major to do it. It's exciting to be in Washington D.C.," she added.

After graduating from Cal Poly, Bernstein plans to attend law school with George Washington University remaining a possible option, since her internship allowed her the opportunity to work with professors from the school.

Although Washington D.C. internships are often associated with working for a member of Congress, many other options are available to students.

Cal Poly students have worked for various organizations including the F.C.C., F.T.C., Security and Exchange Commission, Department of Housing and Urban Development, President's Council on Physical Fitness, and Office of Technological Assessment.

Dr. Lutrin emphasized that unique internships may be obtained by those interested in a specific organization or agency. "If the student knows what he wants—he'll get it. That's what is great about the program."

James Watt will speak on campus in February

Former Secretary of the Interior James Watt will speak at Cal Poly on Feb. 23. Details of Watt's appearance are not yet available. Ticket prices and sale dates will be announced later this week.

Watt resigned from his job as Interior Secretary in October, 1985, after heavy criticism of his policies.

German leader visits Jews

JERUSALEM—Chancellor Helmut Kohl of West Germany paid tribute Tuesday to Jewish victims of the Nazi Holocaust while urging death camp survivors to dig deeper roots, binding and strengthening the nation.

Kohl then opened talks with Prime Minister Yitzhak Shamir. They were expected to focus on West German plans to sell sophisticated weaponry to Saudi Arabia, European support for Palestinian self-determination and on Israeli-European trade.

Kohl is the first West German chancellor to visit Israel since Willy Brandt in 1973. He said on arrival that his six-day visit was a sign "of the bridge built between our two countries and peoples across the abyss of the past."

He also urged all involved parties to join in new Mideast peace negotiations, saying that only a negotiated settlement would "free the region forever from the scourge of war."

Shamir, whose parents and two sisters perished in the Holocaust, said he wanted to "please understand my feelings when I hear about the legitimation of the SS."

From the nation...

Reagan ready with address

WASHINGTON—President Reagan will endorse in his State of the Union speech Wednesday night a manned orbiting station as the cornerstone of this nation's future in space, government sources reported Tuesday.

The station, to be operational early in the next decade, would signal a permanent U.S. presence in space and could expand to such objectives as a manned lunar base and expeditions to Mars, said the sources, who asked to remain anonymous.

There was no comment from the White House or the National Aeronautics and Space Administration. However, NASA has scheduled a news briefing Thursday on "Success at Treblinka in Poland."

White House science advisor George A. Keyworth said recently that the president wants to "redecorate the vision of Apollo" and maintain U.S. leadership in space at a time when the Soviet Union is pursuing ambitious space plans.

A bold commitment to a long-range program centered on a space station and other space declaration by the United States since President Kennedy's near-apocalyptic vision in 1962 should land on the moon before the end of that decade.

As a down payment on the $8 billion station, Reagan was expected to ask Congress for a $13 billion, 1985 budget, which goes to Congress Feb. 1, the sources reported.

Preliminary 1985 spending projections given earlier this month to Republican congressmen by budget director David Stockman show that administration wants to add $6 billion to NASA's budget over the next five years, principally for developing a station.

That's a large increase for an agency whose budget has been hovered around $5 billion and $6 billion over the past 20 years, which has seen some lean years since the glory days of the Apollo moon flights.

The sources said Reagan, in his speech, will urge Congress to support a station as a means of moving the United States ahead in space and technologically in space.

Reagan is expected to cite the commercial opportunities offered by a space station. A station also could be used as a scientific platform for viewing the stars and planets, as well as the Earth and its atmosphere. And it could enhance national security by providing a military reconnaissance platform overlooking most areas of the globe.

Under the Reagan plan, a station supporting six to eight men and women would be operational in 1991 or 1992.

Several American industrial firms and governments of many European countries and Japan have expressed an interest in contributing to a U.S. space station, and NASA has been exploring joint ventures with several commercial and foreign entities.

The Soviets have flown several preliminary space stations, keeping men aloft for as many as 21 days. Soviet officials have said they plan a permanent station, manned initially by six persons in 1986.

Reagan visits Capitol Hill

WASHINGTON—President Reagan, seeking to defuse congressional calls for the withdrawal of Marines from Beirut, visited Capitol Hill Tuesday to urge Senate Republicans to resist election-year challenges to his Middle East policies.

"In Lebanon, the peace progress has been slow and painful, but we've made genuine progress," Reagan said.

As he addressed his political allies in the Senate, Speaker Thomas P. O'Neill Jr., D-Mass., said more than half the House Democrats who voted to back the continued presence of Marines in Lebanon now changed their minds.

They would vote for the president to move the 1,600 U.S. Marines and to cut off funds," O'Neill said.

In a closed portion of his meeting with the 55 Senate Republicans, Reagan gave general answers to about a dozen questions on Lebanon, taxes, the federal deficit and other issues likely to be raised on Capitol Hill during the short-term election season.

He was to return to Capitol Hill Wednesday night to deliver his State of the Union address to a joint session of Congress.

Those at Tuesday's meeting said Reagan urged unity among GOP Senate members, but offered no specific reasons to believe the Marines can leave Beirut, or that there will be any major effort to reduce federal deficits of almost $300 billion.

House leader blasts Reagan

WASHINGTON—House Majority Leader Jim Wright, in a preemptive Democratic strike at Presi­dent Reagan's State of the Union address, said Tues­day that nation's priorities are "truly off base" at the White House, with rising military spending draining human resources.

And the Democratic leader Gerald Ford urged Reagan to stretch out the defense budget and impose new taxes to stem "the tide of deficits" that the president's budget is expected to increase by about 14 percent, with a projected federal deficit of $150 billion, in fiscal 1985, beginning Oct. 1. Officials say Reagan will seek no major new taxes.

On the eve of the annual presidential address to Con­gress, Wright, of Texas, delivered a virtual campaign platform to reverse Reagan policies "to revive the American dream, to renew America's spirit, to rekindle America's faith in our future."

"In a wave of distorted values, the United States—whose example should be leading the world to sanity—has, since the fall of 1984, with our priorities cruelly deranged," Wright said.

Ford said, "If you look at those outyear future deficits, you'll see beyond $150 billion, they're scary and something has to be done about them."

Reminding that Reagan opposes new taxes, Ford said, "I respectfully disagree with him. I can't justify the kind of deficits we are forecasting for calendar 1985 and fiscal 1986. The only dark, ominous cloud on the economic front is the forecast of those deficits."
LOS ANGELES—A special effect created by the "Hammer's" movie set Sunday that a helicopter he wore while detonating explosives was "difficult" for him to see the helicopter that crashed onto actor Vic Morrow's set.

James Cameron also said special effects coordinator John Lopatka wouldn't fly over the mock Vietnamese village set that was used in the making of two movies featuring Morrow flying with the children.

Cameron testified before Municipal Court Judge Bruce Brandy about the preliminaries hearing to determine whether Stewart and four others should be held in custody together. All five have pleaded innocent.

Director John Landis, Stewart and helicopter pilot Dower Wingo are charged in the July 23, 1982, deaths of Morrow, 53, Renee Chen, 6, and Myra Le, 7, who were crushed by the copter on the set 35 miles northwest of Los Angeles.

The prosecution says the copter's tail rotor was damaged by debris from a special effects explosion that was negligently supervised.

Associate producer George Foye, Jr. and unit production manager Dan Allingham are charged only in connection with the failure of an engine and landing gear that forced a Frontier Airlines flight to abort flight.

The others face a maximum six-year sentence.

"That's the only thing that happened that I was responsible for," said Morrow in cross-examination with defense attorneys after testifying he couldn't foresee the problem with the helicopter."I'm not that the lesson we learn from this tragedy?" Braun asked.

The trial is expected to last four weeks. Cameron replied.

Landing gear aborted flight

IRVINE—Damage to a shield over the right wheel well of a DC-9 Super 80 has been blamed for the failure of an engine and landing gear that forced a Frontier Airlines Jet to abort a weekend flight carrying 120 people.

Sunday's mishap, which ended in a safe return to the airport, prompted McDonnell Douglas in March 1982 to ask other airlines to check out the Boeing 737.

Under the amendment, approved 4-0 by the Senate Constitutional Amendment Committee, candidates for governor and lieutenant governor would run separately in their party primaries and in November. The party nominees would run as a team in November. A voter would cast one vote for governor and lieutenant governor instead of two.

State Sen. Leroy Greene, D-Sanctuary, said his proposal would ensure that a losing candidate wouldn't be isolated from voters, "If a lieutenant governor succeeded a governor in mid-term the chances of friction between the two top officials."

But critics said the measure would "foreclose an eternal choice just at a time when their local school overflows its capacity.

Under the district's racial balance policies, schools to which students are forced to remain at least 40 percent white enrollment.

The board voted 5-2 Monday to let the policy fall in place where parents prefer short distance busing to "crowded schools with staff shortage," she said.

"I just want to make sure parents make the ultimate decision," she said. They should be given the choice. "When their children do school on a year round schedule, or are bused to another school with empty space," said school board member Susan Twine.

"We think next will be to make sure that we get this implemented to the fullest extent possible," board member Jackie Golding said.

In most of the city's 10 overcrowded schools, district officials said, parents are already given the choice of either busing their child or sending them to a school on a year round schedule.

But the Gonzalez model, which was based on a federal court's order, states a comprehensive solution to an integration violation, would add more schools to which students would be forced to move.

The city's densely crowded neighborhoods are near downtown Los Angeles, and the only schools with a substantial number of "urban" classes are in West Los Angeles, Westchester and the west San Francisco Valley.

By far the most criticism of the plan has had its emphasis in the new motion. Ms. Goldberg, in a motion rejected by the board, said "race conscious policies" requires 40 white students in integrated schools. "provides a tool for many empty classrooms in under-served schools.

**Student helps athletes overcome overuse injuries**

**by Becky Marr**

Students and instructors fill out a questionnaire at the end of a workshop which includes a section for comments and suggestions. Feldman said he or his assistants can add or delete items from the workshop according to what the instructor feels is most important for students. The workshop focuses on the prevention factors of overuse injuries, the physical symptoms of injuries, and the care and prevention of overuse injuries.

Feldman said such ailments fall into three main categories: (1) Shin splints: a catch-all term for any discomfort of the lower leg. A shin splint involves bone and bone covering, tendon, and muscle; (2) Tendonitis: an irritation of the tendon covering. A tendon is a tough cord of dense white fibrous connective tissue that unites a muscle with some other part and transmits the force which the muscle exerts according to Webster's New World Dictionary, eighth edition; (3) Stress fractures: these are the smallest of the fractures, the most minute. Sometimes they don't show up on x-ray, said Feldman. He explained that is why people with chronic shin splints should see a doctor because it could be stress fracture.

The best way to avoid overuse injuries, according to Feldman is to regulate workout increases: increases either of speed or duration. "For a beginning runner, you should increase distance and speed very slowly," he explained.

The second most important factor is good shoes designed for the activity, according to Feldman. Third is the exercise surface. "In regards to shock absorption by the body, it is better to run on grass than cement," he said. "A runner that has already run in a hotel is going to go just fine on cement, it's probably safe. Gradual change allows the body to develop stronger connective tissues such as bone and bone covering, he said. "A grass runner who changes to cement should do it slowly."

He said the fourth most important factor is warm-up. "The fifth most important factor is the amount of rest. The rest is needed for the athlete to recuperate and prevent future overuse injuries." Feldman said they often are allotted a half hour for warmups.

Feldman explained that the majority of services-related injuries he observed were incurred during off-campus exercising and not in Poly P.E. classes. "And only a minority of runners were from Poly classes," he added.

Feldman will give a sports health workshop for the university community on Feb. 28, from 9 a.m. to noon, in Science Building 52, Room A 12. The workshop is free of charge. At that time, he said, plans to delve more deeply into cause and prevention of overuse injuries that, like the classroom workshops, won't be strictly lectures. "Interaction of question and answer are encouraged!"
