Task Force submits proposals to realign 18 departments

by John Bachman
Staff Writer

In a report released yesterday the President's Task Force on Reorganization recommended one of Cal Poly's departments be realigned and two options in the natural resources management department be phased out.

The report also calls for the establishment of a new performing arts department and a new School of Education and Applied Studies which is, in essence, a restructured school of Human Development and Education.

Under the Task Force's recommendation, Cal Poly would still have seven schools. Two of the schools—Science and Mathematics and Communications Arts and Humanities—would be restructured to emphasize theoretically oriented departments. These provide support programs in the liberal arts and sciences.

“It is important that we be part of an ambience of intellectual excitement where great ideas and appreciation of the world are discussed," said Tomlinson Fort, provost and chairman of the Task Force in his introduction to the report.

The report recommends the new School of Education and Applied Studies be made up of the education, physical education, psychology, child development, graphic communications, home economics, industrial technology, journalism and military science departments. A new department will be formed from the faculty from psychology, child development, and counseling.

Five of the schools—Agriculture, Architecture and Environmental Design, Business, and Engineering and Technology, and Education and Applied Studies—would be restructured to provide "focused, externally and professionally oriented applied programs," says Fort.

The report recommends the natural resources management department be renamed forest resources and have its four options split up. The forest resources management option would be the new forest resources management department.

Environmental services and parks and outdoor recreation options of the natural resources management department would be phased out under the report.

Fort said that Cal Poly should have two kinds of programs, applied and support. "Programs which do not fall into either of those categories should be de-emphasized and perhaps phased out. This is not to say that these programs are not important and they should not be taught elsewhere. It is simply to say that they are not appropriate for a polytechnic university striving for excellence in times of external funding."
At times like this we have to wonder just where Cal Poly students stand in our administration’s list of priorities.

Not once or twice, but many times in the past, Cal Poly students’ interests have been lost in the shuffle of administrative procedure.

The latest case is the publication of the recommendations of the Task Force Committee on Reorganization.

The Mustang Daily editorial board was informed Tuesday that the reorganization recommendations would be released to faculty on Thursday. The Mustang Daily agreed to wait until that date to publicize the report, so students and faculty would receive the news at the same time.

But Public Affairs Director Stan Bernstine released the recommendations yesterday through the Cal Poly Report (the official mouthpiece of the university sent to all faculty and staff). Students are once again lost on the communication line, despite the fact that their education is directly affected.

Bernstine told the Mustang Daily at noon yesterday that he was uncertain what the report would be released. It was delivered through campus mail to the Mustang Daily office five minutes later.

Bernstine stressed the fact that he wanted the faculty informed through the Cal Poly Report before the story ran in the Daily.

Few students read the Cal Poly Report and most do not even realize it exists.

Muzzling the Mustang Daily almost completely cuts their communication.

Letters

Poly student questions merits of Apple decision

Editor:

This letter is in response to the article about Dr. Baker turning down Apple on what I consider to be the deal of a lifetime.

As I understand it, Apple wanted to sell Macintosh computers at about $2500 each, for about $1200 each. The contrast was to say that we, THE STUDENTS, normally would not have to buy $1 million worth of computers in three years or the deal would be off, nothing to lose. That is less than 2000 computers. I personally would have bought two or three of the Macintosh computers. The article said that Dr. Baker doesn’t think that Apple is compatible with the University System of computing. Nobody would know anything about computers. Any computer can be hooked up to any other computer if the right hardware is used. A simple modem would hook up an Apple to the school’s system. I personally use an Apple IIe and last summer when I worked for Tymshare Inc. I was able to use my computer at home to do my job.

The excuse that there is “no available software” has no merit—this guy Nkovitch does not know what he is talking about. Even if he did know what he was talking about he should have a great number of senior projects available in programming for any major which uses computers. In other words, almost all majors.

He also doesn’t understand why microcomputers are so popular. Microcomputers are designed to dispose of main-frame computers. The idea is to make it possible for people to have the power of a main-frame in their own computer so they don’t have to pay a monthly bill to use someone else’s computer. This is one of the reasons why companies like Tymshare Inc. are not doing well—their customers are buying their own computers and no longer need Tymshare’s services.

Nkovitch said the Apple is a high risk. He said Apple hasn’t had a successful product for five years. Well, once again, Nkovitch doesn’t know what he is talking about. The only product that Apple has ever had that wasn’t great is the OLD Apple III. Right now I am using an Apple IIe, one of the most successful computers on the market. Last year counts among Nkovitch’s five years, well then Nkovitch is a hopeless case. I hope that when I graduate I will own an unsuccessful computer company.

If Dr. Baker made his decision on what Nkovitch said then Dr. Baker is worthless as a president. As president should he have competent advisers who know their business.

This decision is typical of Dr. Baker. He only does what will help him politically so his record shows that “most things” happened while he was here at Cal Poly.

It was also said that Cal Poly needed more time to decide because a lot of people needed to give their approval. Why does Cal Poly need more time than any other school? Since only four people made the decision, than can’t be the reason.

Even the worst bureaucrat knows a good deal when he/she sees one. Face it, our administration is incompetent.

Why is Cal Poly so much smarter than other schools? It depends on whether you believe our trustworthy president or an unannounced administrativist.

Richard Cellery
San Colwell

Apple offer best to date

Editor:

I would like to point out that Apple Macintosh computers could be offered to the campus, but the staff for $1,000 each had the Apple offer been accepted, which is even less than the $1,200 figure mentioned in the Mustang Daily article on Tuesday.

This offer from Apple was accepted by many prestigious schools, such as Harvard, Yale, Princeton, Stanford, Drexel, Carnegie Mellon, and others.

For further information about the Macintosh, see the Jan. 30 issue of Newsweek and Time. I think we should hope that President Baker will reconsider and that Apple will cooperate. If other companies give Cal Poly attractive discounts in the future, those computers could also be offered to the campus, but the Apple offer is by far the best offer to date.

Student still hopes for a bite of Apple computer

Editor:

If there is no rumor of indignation from the students of Cal Poly, I must have missed the 'bitten Apple' computer deal. It will be a surprise to me and I'm sure to many others. I don't think that there is no disappointment or indignation out there. If there is a silence, it will be a stunned silence.

I first heard of Apple's offer in late December, and at that time heard it talked of with unconfirmed excitement. Apple's offer was concrete, and it seemed that Cal Poly was getting the kind of opportunity that is usually on student's radar. Nobody talked in terms of a惘ing the possibilities of the university turning it down. Since that time I've waited for some definite, official word on the situation, and it was a shock to read in the Mustang Daily that the deal had been refused.

I have heard some really spectacular things about Apple's new computer, Macintosh. About its ease of use and its phenomenal graphics, but really that is all immaterial. What is important, is that we, as students, had the chance to purchase one of the most innovative and advanced of the microcomputers at half its normal price. It seems almost criminal that that chance has slipped through our fingers without us knowing.

I find it interesting that as universities have already signed agreements with Apple, including Harvard, Yale, Princeton, and Stanford (Newsweek, Jan. 50), it seems to me that we could do worse than take our lead from schools such as these. I am not a computer expert, but I don't know computer jargon well enough to debate the technical points of one computer over another. But I have talked to people who have seen it, demonstrated, and their enthusiasm is very real. If only half of what I myself have read and heard about Apple's new computer is true, we at Cal Poly have lost a wonderful opportunity.

I still hope and believe there is a chance to renew this or a similar deal with Apple. I just hope that our administration will move quickly enough to make it a reality for those of us who will be graduating soon.

Richard Grinnell

Poly computer manager defends Apple decision

Editor:

"The administration has committed $18,520,000 in students' private funds without disclosure of the product to be bought...

The above is the headline we could have expected had the contract with Apple Computer Corporation, discussed in yesterday's Mustang Daily, been signed with the conditions of non-disclosure asked for by Apple.

I would like to speak to how this situation came to pass. It is with concern over integrating microcomputers into the Cal Poly curriculum, and then point out the positive steps our administration has taken toward reaching the goal of making microcomputers a part of education at Cal Poly.

While it is true that approximately 25 universities throughout the nation have probably signed agreements for microcomputers in their curriculum, and that only a few if any of these would require a private disclosure, the same type of responsibility Cal Poly has to its students and to the state of California, is not out our faculty at Cal Poly to negotiate a 'deal' with student money to buy computers any more than it is our duty to decide the location of a deal for the purchase of television sets or automobiles. It is, however, our responsibility to give our students a quality state-of-the-art education which will enable them to compete in a fast moving workplace. Education today must include the use of microcomputers in each field of study. With today's tight budgets, it is impossible for Cal Poly to purchase for its students all the necessary hardware to accomplish this goal—no matter what the deal—just as at the present time we do not provide free textbooks.

To foster cooperation between the university, the faculty, and the students, a poll was conducted which determined that about 56 percent of the student body would be willing to spend $1000 for a personal computer to be integrated into the curriculum at Cal Poly. With a student body of about 17,000, this amount results in about $9.52 million for the first year and $2,800,000 every year thereafter. Unfortunately, the timing was such that Apple had to present its "deal" to five Cal Poly representatives under the terms of a non-disclosure agreement which prohibited the necessary discussion with those who would be most affected—the faculty and students. A further difficulty was the rewriting of the contract to reflect the legal difference between Cal Poly and private schools. After the contract was rewritten, there were only 48 hours left in which to make this critical $15,000,000 decision. The situation was made worse with the new bargaining tool that because of the wide curriculum variations at Cal Poly and the multiple requirements of our students and faculty, care must be taken to see that everyone is able to obtain the machine with the capabilities and performance necessary to accomplish their work. It is unrealistic to think that there might not be one machine to meet all these needs, and that many of the alternatives are done on microcomputers. The marriage between mainframes and micros is very important as well. Obviously, there must be a great deal of compatibility between various micros and mainframes. There are many facets to compatibility. Questions regarding communication between machines, data compatibility and a common user interface must be considered carefully. Also careful consideration must be given to coping with the highly volatile computer market. Chaos would result from jumping on new bandwagons every year, since new and better machines are introduced each year. While dealing with this sounds impossible, it is achievable through careful planning.

Cal Poly has taken positive action toward achieving these goals. One example is the survey of students to determine which computer systems are needed. Another is a draft of proposed functions for micros is being prepared for discussion with the faculty, staff and students. This effort to develop our specifications will allow us to approach many vendors with uniform questions as to how they might solve our problems. Hopefully, this approach will result in a choice to be made that will be best for the individual student as well as the university. The creation of my position, Manager of Microcomputers and Telecommunication Systems, is just another strong commitment on the part of the university toward tying these technologies together.

Ralph Nieovich, Manager Microcomputers and Telecommunication Systems

Editor:

A university is a place where a myriad of ideas come together, are studied, discussed and proved or disproved. The exposure to the widest possible spectrum of topics, however extraordinary, is in fact the foundation of a university.

This quest for knowledge has been limited neither as to its participants nor its methods. Historically students, faculty and staff all played their part, whether in a lecture hall, over a beer or in the streets of the local town.

New ideas have in the past sprung from university campuses to the surrounding towns, states and even nations. Some have been "good" and some "bad," where you draw the line is your choice.

I feel that by and large the result of university activities, even some of those involving breaking the law, is that we are better off.

Therefore, although I may not agree with the actions of the Concerned Cal Poly Faculty and Staff, I think they have done a great service to this California Polytechnic State University at San Luis Obispo. I respect them.

I do not like the statements of the author and believe that through them he has done service to Cal Poly only by forcing me to write this letter. I am not ashamed, do not believe educators are humiliated or that Cal Poly loses respect due to the actions of the Concerned Cal Poly Faculty and Staff.

Finally, were such activities banned, we would have to remove 'University' from our title and begin the mechanical production of specialized B.A. and B.S. degrees. Or are we perhaps doing so now? Kevin Lerman
Performing Arts Department establishment recommended

concurrently strengthen the wildlife program which is already a part of the Biological Sciences Department. It is recommended that the Environmental Services and Parks and Outdoor Recreation options within this Department be phased out. Faculty currently associated with these programs should be moved to places where they can strengthen other focused programs at Cal Poly.

SCHOOL OF ARCHITECTURE AND ENVIRONMENTAL DESIGN

No changes are suggested for departments within this School, though participation in coordinating councils should be established in strongly recommended. In particular the use of Architectural Engineering in other engineering programs duplication of some structural engineering courses between Architectural Engineering and Civil Engineering, and the needs of students in Construction and City and Regional Planning for courses in business and management need to be considered.

SCHOOL OF BUSINESS

Restrictions imposed by the accreditation requirements of the American Assembly of Collegiate Schools of Business makes addition of other departments to the present School of Business undesirable. However courses in Accounting, Business Administration, Management, and Economics are important for a large number of applied majors at Cal Poly. The Business School should work with the other departments to establish meaningful course sequences for them. The

Faculty were satisfied with the old system and half felt that there could be an improvement. Punches said. "What they quarrel about now is the mechanism."

Previously students had one week to add and three weeks to drop. The new system allows two weeks to add and only one week to drop. Many students still want the luxury of sitting in a class for three weeks before deciding to drop. Punches said.

YOU don't have to leave...
TRW is in SLO

TRW EPI San Luis Obispo Division, Manufacturer of High Reliability Electronics, is looking for Graduating Engineers (EE, IE, IT, ET, ME). TRW EPI offers salaries competitive with L. A. and the Bay Area while being located in San Luis Obispo. Interested Engineers should call for an interview or come in person to 1050 Southwood Drive, SLO, 544-2786.
The Task Force also called for the establishment of a performing arts department which would be made up of music department faculty, dance faculty from the physical education department and drama faculty from the speech and communication department. The computer science department, said the report, must decide which direction it wishes to take in the future. If it wants to stress applied professional programs such as software engineering, then it should be moved into the School of Engineering and Technology. The report goes on to say that if the computer science faculty sees itself as teaching a broadly based science program, it should stay in the School of Science and Mathematics.

The Task Force also called for the formation of a permanent Academic Coordination and Liaison Council. This body would coordinate related academic courses, programs, and activities to eliminate overlapping in various departments which has occurred in the past. This is not the Task Force's final recommendation stressed Fort. There will be discussion in the Academic Dean's Council, the student Affairs Council, the Student Senate and the Academic Senate. The Academic Senate meetings during the first two weeks of February will be open to generate reactions and further suggestions which will be considered by the Task Force.

"During March and April," said President Warren Baker in a memo to campus leaders, "the Academic Senate will consider the final Task Force report, inviting further direct participation by all those interested."

The Task Force will finalize their recommendation and send it to President Baker by May 1, 1984.

It also believes that Applied Studies is a workable linking concept for these diverse departments, one which reflects common interests and which is appropriate to the Cal Poly tradition.

The existing Home Economics curriculum is a general program with curricular concentrations in the following areas:
1. clothing, textile, and merchandising
2. business education and management
3. family finance/consumer education
4. housing, home furnishings and interior design
5. foods and nutrition
6. vocational home economics education

The Task Force feels that rapid social and technological change makes such a general program no longer appropriate for Cal Poly. The Task Force calls on the Home Economics faculty to narrow their objectives in order to concentrate their resources on a more definite focus.

Physical Education

The Task Force's first report stated, "Decision concerning the role of this department must be made before it is placed in a school." The Task Force feels that the Physical Education Department provides valuable service courses, but that the Physical Education major requires reorganization. The Recreational Administration program's role is also under consideration by the Task Force.
In most jobs, at 22 you're near the bottom of the ladder. In the Navy, at 22 you can be a leader. After just 16 weeks of leadership training, you're an officer. You'll have the kind of job your education and training prepared you for, and the decision-making authority you need to make the most of it.

As a college graduate and officer candidate, your Navy training is geared to making you a leader. There is no boot camp. Instead, you receive professional training to help you build the technical and management skills you'll need as a Navy officer.

This training is designed to instill confidence by first-hand experience. You learn by doing. On your first sea tour, you're responsible for managing the work of up to 30 men and the care of sophisticated equipment worth millions of dollars.

It's a bigger challenge and a lot more responsibility than most corporations give you at 22. The rewards are bigger, too. There's new challenges, new tests of your skills, and new opportunities to advance your education, including the possibility of attending graduate school while you're in the Navy.

Don't just take a job. Become a Navy officer, and take charge. Even at 22.

PCPA Theaterfest
George Bernard Shaw's comedy "Ma-
or Barbara" and the Studs Terkli-
ne-based musical event "Working" are
staging through Feb. 5 at the Marian
Theater on the Allan Hancock College
campus in Santa Maria.
Working features a 16-member cast, a live band and backup singers. It
includes songs of James Taylor, Stephen Schwartz ("Godspell") and
others.
For information or tickets, call 922-
8313.

Crimes Oak Players
Paso Robles High School's Crimes
Oak Players will present four plays at
their new dinner theatre on campus on
Jan. 27 and 28. Dinner will be served
from 6 to 7:45 p.m. followed by two
hours of entertainment.
The plays are "Her Fatal Beauty","Dracula's Decision," "Beautiful
Bouquet" and "The Whiteflowering of
Charity.
Tickets for the dinner performances are $5. For more information, phone
238-4446, ext. 196.

MUSIC

Pope Concert
The annual Pope Concert, in the grand
style of the Boston Pope Orchestra, will
air at the Union Plaza on Friday, Jan. 27
at 8 p.m. The concert will feature the 50-
cell Poly Symphonic Band and Stacks
and Sticks, Hot Air, a six-piece Dixieland band, and The Scenemasters, a trumpet and post hole band.
All concerts are $6 for adults, with free admission for members and children.

Monart Birthday Concert
The 19th Annual Monart Birthday Concert
will be held at the Monday Club in San-
Luis Obispo on Friday, Jan. 27 at 8 p.m.
The concert will feature pianists Jean
Nagano in a chamber recital with cellist
Heather Hay and violinist Norbert
Hamie.
A champagne reception will follow the
concert, highlighted by dancing to the
piano music of Robert Harvery.
Tickets for the concert and party are $8. For further information, call 543-
4580.

Dixieland Jazz
The Blue Street Jazz Band from Fresno
will highlight an afternoon of Dixieland music at the Veterans Memorial Building in Paso Robles Sun-
day, Jan. 29 at 12 p.m.
The group is led by burglars Helmick on trumpet, and features clarinet, trom-
bone, drums, banjo and tuba.
The band will be joined by the World Famous Desolation Jazz Ensemble and Metal Reel Repair Band.
The event is sponsored by the Basin Street Regulars (Central Coast Hot Jazz Society) and tickets for non-members are $8. For more information, call 544-
4911.

U.P. Plaza Concert
The rock band "Pegasus," featuring
bassist Chase, Chris Smith, and Jim For-
brand, will perform in the University Union Plaza Thursday, Jan. 26 at 11 a.m.
The concert is sponsored by the ASI Special Events Committee.
Organ Concert
Internationally-known organist Ollie Case will perform a Hammond organ concert at the Laguna Junior High School's multi-purpose room Friday, Jan. 27 at 7:30 p.m.
Admission is free and the event is sponsored by Oliver's Music Co.

Dance Dance
Dance to the sounds of the band “City Limits” in the student Hall multi-purpose room Saturday, Jan. 28 from 6 p.m. to 11 p.m. Admission is $3 for students with a Cal Poly ID.

Dance Masque
Dance to the music of “911” at Torrilla Flats Thursday, Jan. 26 at 10 p.m. There is no cover charge to see the band made up of Cal Poly students.

Big Band Dance
The “Over the Hill” Band will play at a big band dance at the Veterans Memorial Building in Pismo Beach Friday, Jan. 27 from 8-11 p.m. A full bar will be available and tickets are $4 at the door.

Birthday Dance
The Central Coast Highland Society will celebrate the birthday of Scottish poet Robert Burns with a dinner dance at the South County Regional Center in Arroyo Grande Saturday, Jan. 28 at 7 p.m.
A traditional Scottish meal will be served, followed by dancing to the music of Clint Garvin and the Street Band.
Tickets are $10 for adults. For more information, call 543-4933.

Two of a Kind
Two of a Kind Surfing Fellowship presents two surf films this special weekend of wine, music and sharing.

Staying Alive, Flashdance
Staying Alive, Flashdance, directed by Sylvester Stallone, the film is backed by music from the BeeGees.

Michael Flatley, the lead in the first international solo performance tour of Riverdance, is scheduled to perform Wednesday night at the Madonna Theatre.

MGM/UA’s new action film, The Living Water, will be showing at the Rainbow Theatre, Jan. 27-30

The Man from Snowy River
Kirk Douglas plays the roles to twin brothers: a gold prospector and the wild horses (played by Tom Burlinson).

The Return of Martin Guerre
Rainbow Theatre, Jan. 31-Feb. 13
This Australian outdoor epic is the coming-of-age story of a young tamer of wild horses (played by Tom Burlinson). Kirk Douglas plays the roles to twin brothers: a gold prospector and the young man’s ranch boss.

The Central Coast Highland Society will celebrate the birthday of Scottish poet Robert Burns with a dinner dance at the South County Regional Center in Arroyo Grande Saturday, Jan. 28 at 7 p.m.

MGM/UA’s new action film, The Living Water, will be showing at the Rainbow Theatre, Jan. 27-30

The Man from Snowy River
Kirk Douglas plays the roles to twin brothers: a gold prospector and the wild horses (played by Tom Burlinson).

The Return of Martin Guerre
Rainbow Theatre, Jan. 31-Feb. 13
This Australian outdoor epic is the coming-of-age story of a young tamer of wild horses (played by Tom Burlinson). Kirk Douglas plays the roles to twin brothers: a gold prospector and the young man’s ranch boss.

The Central Coast Highland Society will celebrate the birthday of Scottish poet Robert Burns with a dinner dance at the South County Regional Center in Arroyo Grande Saturday, Jan. 28 at 7 p.m.
A traditional Scottish meal will be served, followed by dancing to the music of Clint Garvin and the Street Band.
Tickets are $10 for adults. For more information, call 543-4933.

Two of a Kind
Two of a Kind Surfing Fellowship presents two surf films this special weekend of wine, music and sharing.

Staying Alive, Flashdance
Staying Alive, Flashdance, directed by Sylvester Stallone, the film is backed by music from the BeeGees.

Michael Flatley, the lead in the first international solo performance tour of Riverdance, is scheduled to perform Wednesday night at the Madonna Theatre.

Mustangs on a roll after victory over Las Vegas

By Scott Swanson

Mustangs on a roll after victory over Las Vegas

The Mustangs won a hard-fought 180-pound bout as Mike Calvino defeated Washington in the 167-pound bout.

MUSTANGS ON A ROLL after victory over Las Vegas

Chris DeLong, the only Mustang currently ranked nationally (18th at 184 pounds), upset his record with a 6-0 decision over Ray Guzman.

Washington brought Enrico Gennillo's record to 9-4.

Ernie Gennillo scored a 184-pound super-majority decision over 180-pound Chris Kitz to give Poly an 8-6 lead and his own record to 4-4 on the season.

Anthony Romero turned in one of the best performances of the evening despite a 6-2 loss to Gordon Washington in the 167-pound match. Washington had previously lost to Sylvester Carver of Fresno State, a 1983 all-American. Romero failed to score a takedown, but fought hard throughout the bout. Poly coach Vaughan Hitchcock was pleased with what he saw.

"Anthony wrestled very well," he noted. "He's coming along by leaps and bounds this season." Romero is now 5-0-1 on the season.

Roger Sayles did some leaping and rebounding in acrobatic 23-3 decision over Mike Calvino in the 177-pound bout. Sayles came close to pinning Calvino three times during the fight and Hitchcock said he showed something of what made him a junior college national champion two years ago. Sayles now has an 11-2 season record.

Jeff Steward, wrestling his third match in a row, was laid off with an injury, lost a superior 19-pound decision to 12th-ranked Bob Kopacky in the 180-pound bout. Kopacky caught Steward for six points in the first minute of the match and Stewart lost his cool and wrestled poorly the rest of the match. Steward is now 11-2.

We're not performing at either 190 pounds or heavyweight," Hitchcock admitted. "(Un)bundle is out with a combination of many things and it has hurt the team's balance.

With Steward filling in at 190, Dennis Townsend faced 14th-ranked heavyweight Kahian O'Hara in a very physical match. Steward's defense was not bad, but O'Hara never gave him a chance offensively, winning 8-1. Townsend dropped to 8-4 with the loss.

Poly was scheduled to wrestle Oregon tonight, but the Ducks' team van crashed earlier this week, leaving one wrestler dead and another paralyzed from the neck down, so the meet has been cancelled. The Mustangs will wrestle Friday at a tournament in Portland, Oregon. They will be at home again to face Arizona State Thursday, Feb. 2.

Poly gymnasts third at meet

In the all-around event the Poly women's gymnastics team continued to improve their team score, but still placed third with 100.5 points in a meet Saturday at UC Santa Barbara.

San Jose State, an NCAA Division I team placed first with 108.5 points, and UCBS was a close second with 106.6 points. UC Davis came in fourth with only 101.8 points.

"Our team scores are improving and we're very happy with our performance Friday night," said coach Tim Rivera. "Right now in team standings we are in fourth place in our region.
