President Baker to give response to protesters

President Warren Baker will release today an official response to the protesters who marched into his office yesterday questioning his Apple computer decision. Over 100 students demanded reasons for the Apple computer deal, which would have allowed students the chance to purchase the Apple Macintosh at less than half the original price.

Students go to Baker, express desire for Apple

Cal Poly students assembled in President Baker's office Tuesday morning at 11 a.m. to express their objections on his decision not to accept Apple Computer's offer to be part of the Macintosh Consortium.

Over 100 people appeared to hear Baker's explanation. Baker told students that the Apple issue is "not a dead issue." Baker restated the administration's reasons for not accepting Apple's offer, including the difficulty in meeting Apple's deadlines, and overcoming the problems Cal Poly faced because it is a public and not a private institution.

"Protestations are not over, we just couldn't come to a conclusion on the date in December that they (Apple) wanted us to announce our participation," Baker said. He said the university did ask Apple for more time, but the decision had to be made.

Brian Rasnow, physics major, was the key representative for the students. He questioned Baker on his decision, and stated the views of the majority of students who were present at the gathering.

"Students are appalled at the way the original decision was made," Rasnow said.

Rasnow said that most of the physics students and most other students he has talked to have "no more confidence in these people who are doing the negotiating."

"I am really shocked at their (Ralph Nicovich and Dr. Emily Attalla) statements. But, they have shown a bias toward Apple and all microcomputers," he said.

Baker said, "I am not discouraged that we have lost a fantastic opportunity and I think we can still have that kind of opportunity. If you want to buy a Macintosh in a way which we can do it and provide it at a good deal, I don't have any objection to doing that."

Baker said he did get the chance to work with a Macintosh. "I thought it was an excellent machine," he said.

Students questioned Baker on some of the key issues involved in the Apple decision. Baker said that there were more than 48 hours Attalla originally claimed to the administration. "There were more than 48 hours," Baker said, "but we still have not yet been able to resolve all the satisfaction the issues concerned with the decision."

Baker also said that he was not aware that the Foundation was willing to give students the chance to purchase the Apple computer.

Baker pointed out to Baker that students were upset because the decision to buy the Macintosh was made in less than 24 hours.

Amy Roth, senior English major, addressed Baker saying that not only the students, but the faculty and staff too, were upset with his "paternalistic attitude in making a decision for us, that affects us." "I resent this decision being made for us," she said.

Another student at the rally, Richard Collyer, sophomore physics major, said, "I strongly believe it was important for us to accept an offer like this. It doesn't matter what company offers it. It was not up to him (Baker), it was up to the students."

Andrew Farrell, biological science major, said, "I think what happened was he (Baker) made up a committee to advise him on the deal and he took their option. I think with this uproar he is having to think for himself."

Brian Carstens, junior computer science major, said the key negotiator with Apple, Ralph Nicovich, "seems to fundamentally misunderstand the nature of microcomputers."

Carstens said that the "Apple toys" that Nicovich referred to were one of the best-selling lines on the market. He said the machines can hook up to mainframes easily. "There is a lot the computer can do," he added.

Baker said he would be issuing a public statement about the Apple issue within the next day. Students urged Baker to include in his statement the exact terms of the Apple contract, who his advisors were, and what other computer firms they represent, if any.

Baker also said he would set up a time to meet with a group of student representatives to discuss the issue in greater detail.

Baker said that the negotiations are not over with Apple. Rasnow said the timing is crucial. A new deal he be contracted soon or graduating seniors may never see a deal, he said.

According to The Chronicle of Higher Education, the search resolution which would send a letter to San Luis Obispo's assemblyman and senator in support of the Cal Poly Foundation, and of Governor Deukmejian's veto of Assembly Bill 270. Please see page 5
Opinion
Let's keep those lines open
Cal Poly students are making it clear to the administration that they are tired of being kept in the dark.
Twice in the last three months students have gathered in President Baker's office and the hallway leading to it to demand explanations for administration decisions they could not understand.

That those rallies even took place indicates some positive things are happening to the students of this university.

Students are tired of poor communication between the top levels of the university administration and the student body. They are improving that communication by going straight to the top—President Baker. And they are getting answers.

Students at Cal Poly have been accused more than once of being apathetic. The fact that students care enough about what is happening on campus to gather in Baker's office and demand answers proves that those accusations are at least partially unfounded.

The administration cannot ignore the fact that students care. Students take what happens at Cal Poly seriously.

They are voicing their questions and objections over things that take place and demanding answers.

These student activities will do more than anything else to increase communication with the president and the other leaders of Cal Poly. All the letters and memos in the world don't have as much impact as 200 students jamming the fourth floor hallway of the administration building.

Obviously, for reasons of safety we can't have sit-ins, protests and rallies every time a pin drops on campus. Those students who have taken part in the recent rallies are to be commended for being relatively peaceful and responsive in their actions.

But if students make it clear through means such as letters and phone calls that they are concerned with what goes on at this campus, communication with the administration should continue to improve.

Because the administration knows students care enough to make the trip to President Baker's office to demand answers, the administration will hopefully give us answers much more readily in the future and take serious note of student opinion when making decisions.

Letters

Apple reasoning struck down
Editor:
In his letter to the editor of Monday, Jan. 30, Emilie Attala gives his two main reasons for turning down an Apple renegotiation offer from the university. I believe the Apple offer was first made to Cal Poly last August. I know for a fact that it was made for repeated it last Nov. 11.

Dr. Attala gives as his second reason the trip to President Baker's office to demand answers, the fact that students care enough to make the trip to President Baker's office to demand answers, the administration should continue to improve.

Because the administration knows students care enough to make the trip to President Baker's office to demand answers, the administration will hopefully give us answers much more readily in the future and take serious note of student opinion when making decisions.

Library sensors don't erase floppies
Editor:
The statement that floppy disks are erased by the library's security system is not correct. The magnetic field surrounding the exit sensor is too weak to cause such problems.

It is possible, however, that a disk could be erased were it to come in contact with the machine that serializes and deserializes library materials.

These machines are located in restricted areas behind circulation desks of the Reserve Room. Current

Poly students would benefit from an Apple renegotiation
Editor:
It appears that many in the university community have lost sight of, or possibly were not aware of, the objectives of the committee organized to investigate the acquisition of microcomputers.

The committee was established for the purpose of negotiating with microcomputer vendors for a "deal" for the UNIVERSITY. Every effort would be made, and in fact it would be one of the main considerations, for the deal to include individual purchases by faculty/staff and students. But the initial priority was to get a break on the cost of microcomputers for the university departments and offices.

At the current time individual departments are purchasing microcomputers at almost full cost. $350,000 to buy 100 computers was requested by campus offices on the 1983-84 equipment request forms. It became a critical need to seek a vendor or vendors that would give the university and thereby the taxpayers the best deal possible.

The committee was organized to investigate the microcomputer market, negotiate with vendors, and make recommendations to the university.

The processing used in most business offices of the various computers. The committee has done an excellent job, although they have been somewhat slow in July we were told we should have something in place by Nov. 1, 1983.

Also, buying a computer is like buying a car. Everyone has their own personal preference and looks at how the machine fits their own needs. If the campus community has two or three computer needs and they choose from them individuals can select the one that fits their need. Any price break is better than none.

Pam Parsons, Senior Secretary
State School of Science and Mathematics
Letters

Parents should get tickets

Editor:

I strongly agree with Enoch Tsukahirwa's proposal to issue tickets reserving seats for parents at commencement ceremonies.

My husband graduated last June. His parents, who had traveled from the East Coast, were bitterly disappointed with the crowded situation. Not only were they unable to get seats even though they had tickets and arrived an hour early, but they couldn't even see the graduates from the School of Engineering and Technology from which their son graduated. They were squeezed into a SRO area behind the President's platform.

This June I will be attending the commencement ceremony, and my parents will be here, having traveled 8,000 miles from England to see their daughter graduate. While I expect no special treatment, I would feel reassured to know that they will be able to see me in the stadium and enjoy the ceremonies in relative comfort.

Is that too much to ask?

Louise Grimm

Parking should be big issue

Editor:

To hell with the Apples, to hell with the sororities, and to hell with Martin Luther King. I want a place to park! I have a parking permit, but returned to my truck the other day to find it defaced with one of those little pink tickets (who decided to make them pink, anyway, one of the sororities?).

I received the ticket because the "Public Safety" department had installed brand new no-parking signs on that last bastion of open car space—the swing unit road. Instead of merely ticketing those cars without parking permits, why doesn't the campus police tow them away to make room for me?

As it is, one must drive around the parking lots for 15 minutes waiting for someone to leave, rush for the open space, fire several blasts from your shotgun to ward off would-be infiltrators from "your" space, and then wait a mile and a half down to class.

Perhaps I wouldn't be so angry if all the money from parking tickets was used to pave over the airstrip for a new lot, but to use it to buy new "no-parking" signs is just too much.

Feb. Space Shuttle flight Challenger will be piloted by Cal Poly alumnus

by Karen Kramer

On Friday, Feb. 3, space shuttle Challenger will blast off from the Kennedy Space Center in Florida. The pilot will be Cal Poly alumnus, Navy Commander Robert L. Gibson.

The eight-day mission is expected to involve the testing of a self-contained, propulsive backpack. The unit could allow future astronauts a freedom of movement not accustomed to in space travel.

Other events include the deployment of two communications satellites. The flight will be the first shuttle to return directly to its launch site.

Gibson began his ascent into space travel at 17, after obtaining his private pilot rating. From there he went on to receive an aeronautical-engineering degree at Cal Poly in 1969.

Gibson went from the Poly hanger into the Navy soon after commencement. His naval record includes three years of combat duty in Southeast Asia and graduation from the Navy's Test Pilot School at Patuxent River, Md.

Gibson is also credited with more than 3,000 hours in 35 different types of civilian and military aircraft. To add to the list, Gibson also holds commercial pilot, multi-engine and instrument ratings and has made more than 800 carrier landings.

Selected in 1978 by the National Aeronautics and Space Administration for astronaut training, Gibson completed the program two years later. The 37-year-old Gibson is married to Dr. M. Rhea Seddon, fellow NASA astronaut, a surgeon and mission specialist and they have an 18-month-old son. Another upcoming shuttle will make Seddon the first mother in space.

Students with a flair for writing are urged to enter the 14th annual Cal Poly Creative Writing Contest. Cash prizes will be awarded for both short story and poetry divisions: $50 for first place, $35 for second and $20 for third.

The contest, sponsored by the English department, is open only to enrolled Cal Poly students. All entries must be turned in to the English department, faculty office building section 35, by 4 p.m. Monday, Feb. 13.

Contestants must use a pseudonym, or pen name, on their manuscripts. Also, they should include a sealed envelope with their pseudonym written on the outside and their real name, address and telephone number written on the inside.

ATTENTION GREEKS!

Februay is Greatest Reduction Month!

This is more than just a hike, it's an adventure

by Jesse Chavarría
Outdoors Editor

A favorite pastime of the avid student hiker during sunny weather is the climbing of nearby Bishop's Peak. Located just a few miles from the Cal Poly campus, the peak provides a satisfying climb for any hiker. The time it takes to climb the peak can take anywhere from 45 minutes to an hour and a half depending on rest stops and the pace of the hikers. After reaching the top of the Peak the hiker is rewarded by a scenic view of the San Luis Obispo area. The Cal Poly campus lies to the east, while to the southwest one can see the sun glimmer on Laguna Lake. The Men's Colony can be seen to the north and doesn't look very far from the Poly Campus from up there.

The view is definitely worth the climb. The most popular way to approach the Peak is by driving on Foothill Boulevard. A dirt shoulder along the roadside just before reaching This Ode House Restaurant makes a good parking area.

A quick jump over a barbed wire fence will land the climber in a grassy pasture. From there the hiker has several choices of how to climb the hill. One mistake not to make is to be lured by a highly visible dirt road to the left side of the hill. It will end half-way up the hill and the hiker will have to make his own trail.

The best, easiest way to climb is to follow the barbed wire fence until a dirt trail becomes visible on the right side of the hill. This trail leads across the pasture into a shady patch of trees. This route can be taken at a leisurely pace, as opposed to the other routes which are far more exhausting.

The climb can be divided into two distinct parts. The first involves crossing the pasture and climbing up the trail through the grove of trees. This is called the green part of the trip.

The second part of the trip begins when the hiker comes to an exposed dirt trail that is lined with poison oak, poison ivy, and weeds. This makes for the most difficult climbing of the hike. The trail on rock is twice as steep.

The climb down the peak seems to go by much faster than the climb up. It is also a far more perilous climb. At times during the climb down the trail is so steep the hiker is forced to lower himself down by sliding on his hands.

On any given day, a hiker will hear the story of how several hikers decided to repel off the side of the peak and spray paint a "B." They will be told of how some careless students died in the latter, so that it only forms a "P."

Those who have climbed the peak say it gives a feeling of accomplishment and satisfaction of overcoming an obstacle physically and spiritually. A challenge for nature met by man and won.

Come join a Tradition of Excellence for over a decade—

Shugart.

We will be On Campus:

Tuesday, February 7. Join us at an informational session on Monday, February 6 at the Graphic Arts Building, Room 106, 7-9 p.m.

Shugart, for over a decade a leader in the design, development and manufacture of disk drives, continues to forge new technological directions in our ever-expanding industry. We seek highly talented and motivated individuals to join us in the following positions:

- Electronic Engineers Analog/Digital Microprocessors
- Mechanical Engineers Small Mechanism Design/Development
- Quality Assurance Engineers

Sign up today in the Career Planning and Placement Center. We are proud to be an affirmative action employer M/F.

Sunnyvale, CA 94086
The first mistake I made was going on the hike up Bishop's Peak with two people who had never climbed it before, myself included. The second mistake was not taking along a canteen of water. It started out as a reasonably decent workout, for a person who believes physical activity shouldn't consist of anything more than getting up to change the channel on the television set. By the time the hike was over I felt like John Belushi did at the beginning of the film "Continental Divide", totally out of my environment. The problems started when we came to the end of the dirt road, which had hired us to the left side of the hill. We came to this high brush. The decision was made that instead of going completely around to the other side to try and find a visible trail we would forge ahead and hope we luckily ran into one. Images of getting lost, breaking my leg and having to be carried down the peak ran rampant through my mind. I pretended at times to be lost in the jungle struggling for survival. The only thing that kept me in touch with civilization was the Sony Walkman I was wearing. I was trying to figure out a way to transform it into a radio to send out rescue messages, when one of the people I was with informed me that we had finally made it through the brush and had luckily hit a trail. From then on the trip wasn't nearly as bad. Although I was still nursing the scrapes I had received courtesy of wild ivy, I managed to make it to the top. However, it was only a small reprieve. Then we started our way down. We followed a family we had met at the top of the peak. A large obese man led the way, followed by several crying children and a playful dog that abandonedly believed the steepest parts of the trails were the best time to bump into people legs. Eventually we overtook them, but only after thoroughly scrabbling the bottom pockets of my jeans with dirt and grit. We rested when we hit the true grove and then something really strange happened. We all started saying how much fun that had been and remembering what a great view it was from the top. I experienced a feeling of regret leaving the peak, as I made my way back to the car. But even at this time I made a solemn vow never again to return. My body just ached too much. Two days later I awakened at six a.m. I put on a snug sweatshirt, my tennis shoes, and grabbed my camera. Then my roommate and I drove the car over to the Foothill entrance of Bishop's Peak. We got out and began climbing.
Beirut is quiet—relatively

BEIRUT, Lebanon—U.S. warplanes shrieked over Beirut on Tuesday to reconnoiter positions of militiamen who had shelled American Marines, and a spokesman for the Shiite militia said there were strict orders to avoid new clashes.

Diplomatic activity intensified in the Syrian capital of Damascus, meanwhile, and there were reports that officials were seeking ways to replace U.S. and other Western troops in Lebanon with U.N. peacekeeping forces.

Pairs of F-14 Tomcat interceptors crisscrossed the hazy Beirut skies at daylight, midmorning and midday. Local radio stations reported that no one fired at the jets.

One Marine was killed and three others were wounded—on Monday in a battle with anti-government Shiite Moslem militiamen. Shiites said Marine fire killed three civilians and wounded 22 others.

The Marine Corps office in Washington identified the slain Marine as Lance Cpl. George L. Dramis of Cape May, N.J. The Marine spokeeman in Beirut, Maj. Dennis Brooks, said all was quiet Tuesday around the Marine base at Beirut International Airport. A spokesman for Anael, the dominant Shiite militia, said the group's leaders had issued strict orders to avoid new frictions with the Marines.

Police said Lebanese army troops and Druse insurgents traded sporadic artillery and rocket barrages on hills south and southeast of the Marine base. They reported that one army soldier was wounded.

President Amin Gemayel's administration denied widespread rumors that its army plans a major operation against Druse or Shiite militiamen in and around Beirut.

Diplomats from Finland, Australia and the United Nations were visiting Damascus on Tuesday. Both states and privately owned Beirut radio stations said the officials were seeking to replace the 4,400-man multinational force, including the Marines, with United Nations peacekeepers.

Shultz visiting El Salvador

SAN SALVADOR, El Salvador—Secretary of State George P. Shultz said Tuesday he was "proud to stand together" with the Salvadoran government, and he assailed violence by both leftist guerrillas and rightist death squads.

Arriving at San Salvador's airport, Shultz called the leftist insurgency a "totalitarian" movement that "depends on outside support" for its survival.

Our enemies are weak,” he said. "They represent forces that are foreign to this hemisphere and offer only totalitarianism."

Shultz asserted that "the tactics of totalitarian terror and the death squads have no place in a democracy."

Shultz’s visit to El Salvador, the first stop of a five-nation tour of Latin America and the Caribbean, was seen as a bid to boost the morale of a Salvadoran government attempting to come to grips with the problems of uninterrupted warfare and a faltering economy.

South Africa slows down war

CAPE TOWN, South Africa—South Africa announced Tuesday it was "disengaging" its forces in Angola, calling it a first step toward cease-fire in the 17-year bush war in South West Africa.

Prime Minister P.W. Botha told Parliament the disengagement was based on assurances received from the United States during a visit last week by Chester Crocker, assistant secretary of state for African affairs.

He would not disclose those assurances and would not define the "disengagement" precisely.

Asked at a news conference if South African forces would withdraw from Angola, Botha answered, "It might include a withdrawal, but there is more to it than that. It is the preparatory steps to a cease-fire."

He said progress depended on the response of the other parties in the dispute, including the Angolan government and the guerrillas of the South-West Africa People’s Organization. SWAPO is fighting for independence from Angola for South Africa to end South African rule over South West Africa, also known as Namibia.

The mineral-rich territory lies along the Atlantic Ocean between South Africa and Angola.

South African troops conducted a six-week invasion of southern Angola in December and January, pushing more than 100 miles into the country. South Africa said it killed hundreds of Angolans and SWAPO soldiers.

South Africa first offered a disengagement on Dec. 15, proposing a 30-day halt to action in Angola on condition that the Angolan government agreed not to exploit the step.

U.S. officials held secretive talks with an Angolan delegation in Cape Verde two weekend locations throughout the country. They signed interim view schedules for formal interviews which will take place on March 1.

Poly grad. studies abroad, gains insight

Cal Poly Architecture graduate David Ho stop-
ped by the university recently. What's so unusual
about his trip abroad?
Considering Ho had just spent a year and a half in
Paris, France, where he studied fine arts, his visit to
Fontainebleau is a testament to the influence of
his education.

Ho was selected to study at the Fontainebleau school,
a highly selective and prestigious institution that
has been a beacon for artists and architects from
around the world.

Library displays hand-made paper
by Rosemary Costanzo

A collection of hand-made paper from around the
world is now on display in Kennedy Library's Special
Collections and Archives. Nursery Love, head
librarian of Special Collections, said the exhibit
will be on display through June 1.

The paper collection is put on by the Library
Association. Nancy Lowe, head librarian of Special
Collections, said the exhibit will be on display through June 1.

The paper collection is put on by the Library
Association. Nancy Lowe, head librarian of Special
Collections, said the exhibit will be on display through June 1.

The Library Association is made up of friends of
the library, they are people from the community, students and
faculty members who support the library," said Lowe.

According to the display, paper was first invented in
China around 105 AD. The display includes a variety of
papers from around the world, including Indian,
Japanese, Korean, and Thai materials. Some of the
papers are used to demonstrate the different
methods of papermaking around the world.

The display also includes photographs and
books on paper making in Thailand, Korea and Mexico.

The Image Hand Paper Mill of Oakland is also
featured in the display. Along with the colorful paper
products of the paper mill, they make this claim: "A
long felt need for a good source of the high quality pulp
that artist's faces and special surfaced boards, and
superior texts for the hand printers is being answered in
the output of the Image Mill."

Library visitors are encouraged to look around and enjoy
the unique variety of materials and applications
that are showcased in this exhibit.

WASHINGTON—Congressional leaders got a preview Tuesday of the $232 billion fiscal 1984 budget President Reagan officially sends to Capitol Hill on Wednesday. The legislators said they were not surprised by the election-year package, even by the red ink—$140 billion worth.

"The budget deficit will be larger than we would like it to be. But not as large as some had predicted and many feared," Senate Majority Leader Howard H. Baker Jr., R-Tenn., said after he and other Republican congressional leaders escaped from a White House budget briefing with Reagan.

The outlines of the budget plan have been leaking out for weeks. Those who attended budget briefings Tuesday confirmed anonymously that the spending package calls for spending 492.5 billion during the fiscal year that begins Oct. 1, including more than $800 billion on the military, with a deficit of just over $180 billion.

The sources said the budget includes recommendations for raising about $4 billion by closing various tax loopholes and another $3.9 billion by requiring employees to pay Social Security and income taxes on employer-paid health insurance.

Also included is $1 billion in Medicare savings and about $1.2 billion in savings for programs such as guaranteed student loans and cost-of-living adjustments for federal retirees. In addition, Reagan’s plan recommends a $2.8 billion cut in Medicaid and welfare programs.

Reagan defends tax program

CHICAGO—President Reagan, in an indirect attack on Democrats in general and Walter F. Mondale in particular, said Tuesday that opponents who attack the administration’s tax program are "trying to appeal to greed and envy."

"The finger-pointers and hand-wringers of today were the policy-makers of yesterday," the president said, "and they gave an economic message that encouraged double-digit inflation."

"This is the same anti-business, anti-success attitude that brought this country to the brink of economic collapse," Reagan said, referring to the inflation and interest rates at the end of the Carter administration when Mondale was vice president.

In his budget address, Reagan said after formally announcing his candidacy, Reagan made his attack in remarks as a candidate and as a presidential contender. Asked whom Reagan was referring to, and specifically whether it was Mondale, White House spokesman Larry Speakes said, "We’ll never say. They know who they are."

Reagan, deviating from the text of the speech, referred to a possible controversy over whether the trip was political.

Reagan, who campaigned in 1980 on a proposal of balancing the federal deficit, said he has attempted to keep the plans "from being totally politicized" this year by urging creation of a bipartisan congressional group in each way of limiting the flow of red ink.

Reagan made no reference by name to Mondale or the seven other Democratic presidential candidates, but he said, "As the political rhetoric heats up this year there will be those trying to appeal to greed and envy—make no mistake, that is what they are trying to do—so we urge our tax program favors the rich."\n
Mondale and other candidates have talked about a possible political partition of the 25 percent tax cut which took effect over the first three years of Reagan’s term, claiming that it favors wealthy Americans over the middle class.

Budget beefs up border patrol

WASHINGTON — The Reagan administration plans to use money from the 1985 federal budget to beef up the Border Patrol and stop the record flow of illegal aliens from Mexico, Justice Department officials said.

Under President Reagan’s proposed budget, the Immigration and Naturalization Service would add 1,000 new officers, including 850 Border Patrol agents, said the officials, who spoke on condition they not be identified.

The agents would represent a 35.4-percent increase in the 2,600-mile-long border. Five percent of Border Patrol arrests occur in the 2,000-mile border between the mountains and other natural barriers make the border hazardous to cross.

The proposed budget—which will be submitted officially to Congress on Wednesday—also calls for the immigration agency to receive another 108 detention and deportation officers and 19 new legal officers to concentrate on deterring organized rings that smuggle aliens into this country for profit.

The nearly $100 million new officers will cost an additional $41.4 million and bring the immigration service’s budget up to $241.1 million, up $1.1 billion over fiscal 1983. The INS apprehensions have been running about 17 percent above last year’s record rate.

Nelson attributed the record flow across the U.S.-Mexico border to more aggressive immigration policy, particularly illegal in central America and in improvement in the U.S. economy. Nelson noted that aliens entering the country illegally in search of jobs and "have no reason to fear that crossing the border Pat ol would be a useful first step toward immigration reform, particularly while Congress is debating the administration’s immigration legislation."

Fugitive to fight extradition

MIAMI—One of the FBI’s 10 most wanted fugitives, charged with a mass murder in Long Beach, Calif., indicated to a federal magistrate Tuesday that he intends to fight extradition to Florida.

The man was arrested by the FBI Monday under the name George Bridgette. But he told U.S. Magistrate Charles Anderson that he is actually George Dade.

According to a federal complaint, the magistrate said, Bridgette said he would be returned to state authorities here for extradition proceedings. Federal court officials, however, only the charge of unlawful flight to avoid prosecution.

The magistrate set a revocation hearing for Bridgette for Sept. 23, 1982, charging him with unlawful interstate flight to avoid prosecution for murder and assault with a deadly weapon.

FBI spokesman Chris Massella said federal authorities believe Bridgette may have fled to Miami and was arrested by the Miami police.

The FBI charges Bridgette and two accomplices—James E. Cade and Willie Thomas—but entered a Long Beach home and shot five people, four fatally in "the worst mass murder in Long Beach, Calif., history."

Jet crashes on Catalina Island

SANTA CATALINA ISLAND, Calif. — A Lear Jet 24 crashed over a cliff and exploded in flames Monday as it landed at Island In The Sky Airport on this resort island, killing all six people aboard, authorities said.

The twin-engined jet, registered to a San Francisco company, "overran the runway and burst into flames as it skidded off the runway," shortly after 1:30 p.m., Los Angeles County sheriff’s Deputy John Broussard said.

The plane finally came to rest, fully engulfed in flames, with six people trapped inside. "Broussard added.

The plane, leaving skid marks 50 feet from the end of the runway, skidded over the cliff and crashed into heavy brush feet below the cliffs near one of several herd s of wild buffalos on the island.

Cal Tech rejects Think Tank

PARADISE—The Army’s new think tank at Jet Propulsion Laboratory should be a "a little later than the earliest possible time" by California Institute of Technology administrators, Caltech faculty members have voted.

The overwhelming, show-of-hands vote came Monday after a starry two-hour-long meeting with Caltech president Marvin L. Goldberger was chastised for not keeping the faculty informed of negotiations for the so-called Arroyo Center.

More than 200 faculty members were on hand—the most heavily attended meeting in recent years. Goldberger said later that the recent battles over the center had left him "not too happy" but added 250 months older and wiser."

The Arroyo Center has been operating at JPL for months. Caltech runs JPL under contract with the National Aeronautics and Space Administration. JPL is noted for developing military and unmanned space missions for NASA, and some faculty members thought it inappropriate for the laboratory to house a military research center.
Poly AMA chapter travels to Anaheim

In addition to workshops on resume development and interviewing processes, representatives from IDS (a subsidiary of American Express, Brokaw, Shirley & Co., E. & J. Gallo and Ford Motor Co. were present for actual job placements.

"I really learned a lot from the professional view points. It gave me a new outlook on the profession," commented. "They told us things we've all heard before about how to get a job, but in a different light."

There’s no place like home, literally, for spikers

Home is a hazy concept for the Cal Poly men’s volleyball club. Last in priority for gym space behind intercollegiate sports, intramurals, and physical education classes, court time for the squad is harder to come by than plaintiffs in a civil suit.

Nonetheless, the Poly club ventured away from home, wherever it is at the moment, to compete last weekend at the 20-team UC Santa Barbara tournament, stacked with top-ranked NCAA squads who have no trouble finding an open net. The Mustangs were quickly made to feel out of place, dropping their first three matches to Chiive State, eventual champion UCLA, and San Diego State. Poly won only a single set in those three games.

The spikers, though, made themselves feel right at home throughout the remainder of the tourney, capturing their last four matches in a row to garner 11th place. The wins included straight sets victories over UC San Diego and Loyola. The Mustangs also downed UC Berkeley and Arizona State.
