Iran, Iraq exchange salvos

BAGHDAD, Iraq—Iraq shelled seven Iraqi cities and towns Sunday, killing 14 people and injuring 89 others, and Iraq retaliated by attacking four Iranian border towns, the official Islamic Republic News Agency said.

Both Iran and Iraq have warned each other of the attacks in some cases naming the specific city or town and warning residents to evacuate—an apparent new policy, which an Iranian official said "should be accepted by world public opinion."

The Iraqi armed forces attacked the Iranian port of Bandar Abas and the petrochemical city of Abadan in the city as well as "specific targets" in the cities of Ahwaz, Gussan Gharb and Sar-e-Pol-e-Zahab, said a communiqué from the Iraqi military command.

The official Iranian news agency, Islamic Republic News Agency, said the Iraqi attacks killed at least 15 and wounded more than 150.

"We will continue to strike at these installations until they are completely destroyed," said a communiqué aired by Baghdad Radio.

Earlier Sunday, Iranian artillery shelling shoked the Iraqi border cities of Basra, Mandall, Abadan, Khoshmus and Beyad Sedeq, the communiqué said.

Lebanese army won't fight

BEIRUT, Lebanon—About a third of the Lebanese army's combat force either has refused to fight or has been incapacitated by shrapnel, a soldier's ability to take effective action is uncertain, Western and Lebanese military sources said.

A 19-day fighting continued between the army and Shia Moslem militias Sunday, and traffic slowed to a trickle on the sole crossing between Christian- and Moslem-controlled areas.

Although the situation remained static along the old "Green Line" dividing the city's two sectors, there were reports that large numbers of Lebanese fighter were infiltrating the Lebanese capital, speculators said that no one had crossed into the off-limits, Those reports, although from several sources, could not be independently verified.

The Lebanese army was driven from West Beirut last week by fighters loyal to Nabih Berri, leader of the Amal movement.

According to Stan Halpem, Annual Giving Officer, Cal Poly alumni have given approximately $75,000 thus far in the fiscal year.

Contacts are made via direct mail campaigns and "phone-a-thons" from the information provided by the computerized University Mailing List.

"People donate because they feel good about it—for a place that has done something good for them," said Halpem.

Most of the money donated by alumni is usually designated for a specific department or program. In recent years, however, the source of the greatest private funding, many of which are cultivated by faculty members and "the university," added Price, "provides us with some large contributions."

One of the largest contributions was a $5 million grant from IBM for computer-aided design and manufacturing which included a "state-of-the-art" computer and 16 terminals.

Related to the improved success in raising corporate funding, Price noted that Cal Poly will not misuse the money earmarked by these companies—a point which is recognized by representatives of corporations who visit the university for a variety of reasons.

Price doesn't believe Cal Poly loses its autonomy by accepting large corporate donations.

"They genuinely want to assist the university and have projects which are of substantial importance, and they have no knowledge of any company trying to buy the university," added Price.

Haggard of Cal Poly's sponsorship to the public, Price commented, "We have enough believers out there that it's just a matter of saying. We need your help."

"It's not a hard sell," noted Price.

Poly raises funds in various ways

by Jerry Sheehan

In an attempt to supplement the state funding Cal Poly receives, the university is increasing its efforts to raise funds from a variety of alternative sources.

Cal Poly's fund raising efforts consist of the Annual Giving program, Alumni Association, Planned Giving and the athletic fund raising drive.

Money raised from these programs is used to help fund instructional facilities, scholarships, co-curricular programs and faculty professional development.

According to Carroll Price, director of development, Cal Poly's fund raising efforts produced $2.6 million in the 1983 fiscal year—a 57 percent increase over the previous year.

"In my estimation, that's just a picture until we get a little time and experience under our belt," commented Price. "Development is relatively new at Cal Poly."

Since initiating the development program in the 1976 fiscal year, the private support raised for the university has grown from $257,400 to its present figure.

Currently, President Baker is seeking to hire a new Vice President of University Relations who would be responsible for the administration of the total fund raising program.

In Price's opinion, the addition of a vice president in this area will greatly focus to development.

"It just points out how important private funding is to the university. We can't depend on public funding like we used to," he stated.

Price considers the improvement in fund raising to have forged a new face which includes strong alumni support, numerous corporate ties, demonstrating the resources are used effectively and having the confidence of people associated with Cal Poly.

Chinese students celebrate New Year

by Catherine Aaron

An evening of Chinese food, dancing, martial arts, juggling and skits was presented to a crowd of 250 Sunday night by the Cal Poly Chinese Student's Association.

T he event sponsored the event which included an elaborate two-hour show for a $10 ticket.

The most colorful performances of the program were the "lion dances," in which two people danced under a large, dragon dancing costume. The animal was always accompanied by a blind, dancing Chinese monk.

Also featured were four women performing a "ribbon dance." They twirled long red flags in different patterns while accompanied by a Chinese drum, gong and cymbal.

A two-man juggling team amazed the audience, as did three martial arts performers with their self-defense moves.

A fashion show emphasizing the history of Chinese garments included seven students. The garments consisted of what might have been worn by avarist, a common woman, the wealthy and a prostitute.

According to Stan Halpern, Annual Giving Officer, Cal Poly alumni have given approximately $75,000 thus far in the fiscal year.

Contacts are made via direct mail campaigns and "phone-a-thons" from the information provided by the computerized University Mailing List.

"People donate because they feel good about it—for a place that has done something good for them," said Halpern.

Most of the money donated by alumni is usually designated for a specific department or program. In recent years, however, the source of the greatest private funding, many of which are cultivated by faculty members and "the university," added Price, "provides us with some large contributions."

One of the largest contributions was a $5 million grant from IBM for computer-aided design and manufacturing which included a "state-of-the-art" computer and 16 terminals.

It’s a small world after all

Contrasts.

On one side of the world, in beautiful Santa Barbara, the sun is shining brightly. The mood is one of relaxation and recuperation. Here, the President of the United States rides his trusty ol’ horse into the sunset. It’s been a marvelous five-day vacation.

On the other side of the world, an entirely different scene is unfolding. A coffin, buried underneath a wealth of flowers, is visited by a small woman shrouded in black. She enters the hall to the melancholic strains of a piece by Frederick Chopin. As she leans on the arms of her son and daughter, she remembers her late husband, the former Soviet Union president Yuri Andropov. Outside the hall, thousands of other people wait in Moscow’s cold winter weather, wanting to pay their respects to their fallen leader.

In Beirut, Lebanon, there is an uneasy quiet. For 11 days, this town has been ravaged by a bloody civil war. Cautionously food and medical supplies seep into the country. People scuttle around, looking for supplies, help and missing relatives. So far, 450 people have died.

Off the coast of Lebanon, American Marines disembark from helicopters that have airlifted them from Beirut. They have seen over 200 of their comrades killed in the fighting already. The ships will offer them some safety and relief.

In the United States, relief is high. Two American figure skaters have finally put the United States in the Olympic medal rankings. Peter and Kitty Carruthers have won silver medals for their pairs figure skating performance in Sarajevo, Yugoslavia.

And in Washington, State Department officials released a 1,484 page report that concludes major human rights improvements were made in Latin America during 1983.

Meanwhile the historically weak and ineffective justice system in El Salvador nears total collapse. Political violence and human right abuses accelerate as rightist death squads emerge to battle left-wing guerrillas.

And in San Luis Obispo 53 people sit in a county jail cell. Their crime? All of them felt so strongly against nuclear power, that they crossed a blue line which marked the boundaries of the Diablo Canyon power plant. Once across this blue line, they sat. They did not attack the workers or attempt to tear down the plant, they just sat down, formed a circle and held hands.

letters

Greeks serve, don’t protest

Editor:

This letter is in response to the letter on Feb. 9 entitled “Greeks urged to protest Diablo Canyon.” The author stated that “Opposing Diablo Canyon would coincide with their (the Greeks) claim of being community oriented.” Although not the main reason for our existence, we are a community oriented organization.

Concerning opposition to Diablo, the writer is being unrealistic in believing that any community oriented organization should oppose Diablo. Members of fraternities, sororities, clubs and other groups do have beliefs and goals that they share in common. However, the Greek organizations, like any organization, are composed of individuals who hold different opinions. These differing opinions sometimes prevent an agreement to be reached by a majority of the organization, possibly on a topic like Diablo Canyon. We do not dictate the opinions of our members.

If you want the Greeks “to show their support and participate in promoting the safety and welfare of San Luis Obispo,” then your wish is granted. You can command us for such services as the Inter-Fraternity Council Escort Service, fundraisers for charities such as March of Dimes, and the support of underprivileged and handicapped children through Grass Roots II and Jesperson schools.

Alternative meal program

Letters

Alternative meal program

Editor:
The Cal Poly Foundation food plan program is unreasonable and wastes the money of many dorm residents. The system is not geared toward the students' wants and needs. Although it claims to be a non-profit organization, its current policies bring in a considerable profit.

I don't mind being required to purchase a meal plan, since the dorm cannot provide kitchen facilities for all residents. We are given a choice of either the 14 or 19 meal plan which costs $486 or $490 a quarter respectively. These prices are probably reasonable when considering food prices, labor, damages and upkeep.

The Foundation has set up hours in the different dining areas for breakfast, lunch and dinner as well as a cash equivalency system for each meal. This system is fine except when meal card holders miss a meal and try to make it up, or go home for a weekend. No one can use a meal card twice during one of the three specific eating periods designated at each dining area. Meals also cannot be carried over to another week. Missing a meal results in a loss of $2.80, $3.25, or $3.75, depending on the time period missed. This money is not reimbursed to the meal card holder.

Suppose a card holder goes home for a weekend. That is approximately five to seven meals missed, coming to an estimated total of either $18.50 or $23.35. The money is neither reimbursed nor is the student allowed to spend it beforehand because of the strict regulations. This is an unfair system, especially for those students on a very tight budget.

What angers me the most is that the card holder has to pay if the food chosen during a meal goes over the designated amount, and yet if he misses a meal he loses out.

The Foundation should seriously consider reimbursing the card holders for meals missed. The computers that keep track of each meal card could also be used in reverse by reimbursing for missed meals. The Foundation also might consider a weekday meal plan excluding weekends for those students who go home, are involved in sports, or go on trips frequently.

Opponents may say that the Foundation will lose money. Right now the Foundation makes a considerable profit on each meal card holder even though it is a non-profit organization. If my proposed programs went into effect, any leftover money would go back into paying for the food program, resulting in a more efficient system.

I commend the Foundation's effort in trying to bring students the best possible food they can, but I strongly suggest they consider further research into a new meal plan program that conforms more to the students' wants and needs. It would certainly make students and parents a lot happier.

Last Word

‘Let us go then, you and I...’

So, Andropov is dead. One heart among the many has stopped beating. How will this affect my party Friday night? Meanwhile, the U.S. and the Soviet Union are manufacturing seven bombs each a day and people's deodorant spray cans are destroying the stink of sweat of 80 percent of the people in India.

What if it's four ten in the afternoon, and it's a sunny day, and I've just finished eating a roast beef sandwich at the Spinella. A Buddy Holly song is playing through my head. My favorite fiction has motivated me. This moment is right.

I dream of a world where the world keeps spinning faster and faster with people clinging and hoping for something.

And you, my card holder? A new car? A stable relationship? The next Bruce Springsteen album? The T.G. next Friday?

Yup, that's what we are—reckless, alienated youth. Yeah, you know. The kind that always make cracks like, "Gravity doesn't work, the world sucks."

But, that's the point. Who cares how many gold medals we win at Sarajevo? Who cares about the fact that the only thing that gets Cal Poly students politically active is a $1,200 discount? The rain will keep falling. Oceans will rise and drop. Morning will always follow night.

Just stop and think. You could be seconds away from death. That light fixture above you might be loose and come crashing down on you head, or a car might come careening madly, smashing through the far wall and your last sight could very well be four Firestone whitewalls. Or, someone you've never seen before could push a small, red, plastic button and you're history.

And in the instant before the slap of death, you will have a second to perceive your life past and present. You won't see that new car. You won't hear the new Bruce Springsteen song. You won't taste the beer next Friday.

But you will think about those moments. And that's enough.

"There will be time, there will be time...

...Time for you and time for me..."

Soviets to name new leader

MEXICO CITY—The nation's main opposition party elected a new leader who said Mexican President Miguel de la Madrid "has lost his chance to regain the confidence of the people," the newspaper Excelsior reported Sunday.

The conservative National Action Party selected Pablo Emilio Madero, 62-year-old chemical engineer, to a three-year term as party president. Madero is from Monterrey.

Madero is the nephew of Francisco Madero, who was president of Mexico from 1910 to 1912, when he was assassinated. Famed revolutionaries Francisco "Pancho" Villa and Emiliano Zapata fought in Francisco Madero's name. In an interview with the daily newspaper Excelsior, the new conservative leader said, "Miguel de la Madrid has lost his chance to regain the confidence of the people. He has lost it because he has chosen to defend the hegemony of his party."

From the world...

Reagan returns amid crises

SANTA BARBARA, Calif.—President Reagan, en
ding his five-day vacation at his secluded ranch Sunday and headed back to the White House to begin a new round of Middle East diplomacy.

Presidential spokesman Larry Speakes, meanwhile, said the administration believes establishment of a United Nations peacekeeping force in Beirut is "worth looking into." In addition, Speakes said the president was likely to announce his timetable for the withdrawal of U.S. Marines from Beirut around mid-

week. Six days ago Reagan said he would withdraw the Marines in phases to U.S. ships off the coast of Lebanon. Although he hasn't announced his timetable, a senior administration official said the troops would be out within a month, except for perhaps 200 who would guard the U.S. Embassy. While Reagan vacat-
tion, his administration was forced to deal with
deteriorating situation in Lebanon and uncertainty
over relations with the Soviet Union following the
death of Soviet President Yuri Andropov.

Challenger returns unscathed

CAPE CANAVERAL, Fla.—Challenger came back
to Earth after its historic Florida-to-Florida trip as the
cleanest shuttle yet, and it should be back in orbit in a
record 53 days for a daring satellite rescue mission.

NASA officials said Sunday, "The orbiter is very clean, in better shape than any of the others." Ken Coffey, shuttle mechanical

systems officer, told reporters Sunday, a day after
Challenger returned from space to the first shuttle lan-
ding at its launch site.

The only problems, he said, were a failed brake, 51
damaged thermal tiles, two dusty windows and tires
scrapped where they hit the concrete runway. Com-
mmander Vance Brand had such perfect control of the
ship that he hit the runway just one-half inch off the
center line, Coffey said. Coffey said he foresaw no pro-

blem preparing Challenger for its next launch date on April 4. That means it would be back in space in 53
days, a turnaround time nine days shorter than for any
previous shuttle flight.

Industries to clean up waste

SAN JOSE, Calif.—Five San Jose area companies
have been told to clean up their industrial wastes or

lose their industrial discharge permits someplace other than San Francisco Bay.

The San Jose Mercury reported in Sunday's ed
tion the Associated Press story that the city's new
demanding that the industrial wastewater be filter
d out most of the toxic materials, such as

poisonous heavy metals and chemicals that metal-

plating and electronics companies produce, before the
wastes reach city sewer pipes.

Acid mishap causes shutdown

SAUGUS, Calif.—An industrial area was shut down
for seven hours when hydrochloric acid leaked from a
railroad tank car at a chemical plant in northern Los

Angeles County, authorities said.

There was no injury from the incident, which oc
curred Saturday afternoon at the Hassa Chemical Co.
and United Metal Plating, all of San Jose.

There were no problems in Saugus, which is located about 35 miles north-

of downtown Los Angeles.

Radiating tables found in LA

LOS ANGELES—County health officials were look-

ing into reports that some restaurant tables were conta
tined with radioactive materials. Cartons of the stand
ing radiation comparable to X-rays were found Wednes
day in a South El Monte warehouse owned by Fal

con Products of St. Louis, county health physician Joe Karbuz said Satur
day.

In Brea, 130 stands were found Wednesday at the

Edel Aluminum Company, said Jim Hartranft, Orange

County health physician.
Poly nine drops three to UCSB

Perhaps stunned after allowing a 3-0 lead to escape in the ninth inning of its game Friday, the Cal Poly baseball team received a severe thrashing in a Saturday doubleheader at the hands of visiting UC Santa Barbara.

The Gauchos, who Friday scored four times in the final frame to edge the Mustangs in Steve McFarland’s debut as Poly mentor, blistered the Mustangs’ pitching staff Saturday to the tune of 14-4 and 13-0 routs, leaving Poly 0-3. UCSB raised its season record to 8-0.

Friday the Mustangs outhit the Gauchos 7-6, led by catcher Pat Esposito’s three singles. Poly starting pitcher Steve Snyder hurled a four-hit shutout through seven innings before teammate Jeff Deal took over in the eighth.

But in the ninth Deal gave up three walks and an RBI single before giving way to Larry McEvoy. McEvoy, though walked in the second run and then surrendered a game-winning single to Jim Friedl.

The Mustangs scored their first run in the opening frame when Alray Grossi doubled and scored on Rob Lambert’s RBI single. Poly added two more in the seventh when Esposito singled, Kent Bachman walked, and, after both advanced on a ground out, both tallied on Mark Gambardella’s single.

In Saturday’s contests, Mike Cook and Mike Briare took the losses for the Mustangs. Poly managed only four baserunners in the second game, getting two singles and two walks. Gambardella and Grossi were the only Mustangs who were able to get hits.
Alley-oops! Poly edged by Chapman

by David Kraft
Staff Writer

How close is Cal Poly to the California Collegiate Athletic Association title chase? Ask Derrick Roberts. Nate Hatten or Jim Van Winden. Ask any of the Mustangs for that matter. They know the answer.

Mighty close.

In a game with more strategy than a Bobby Fischer chess match, more ups and downs than a rollercoaster, and more action and drama than The A-Team during a ratings sweep, Chapman College beat Cal Poly 42-40 in overtime Saturday night in the Main Gym. Even Mr. T would have applauded this one.

The "what if's" remain vivid for the Mustangs. What if Roberts had come down with an attempted alley-oop pass from Keith Wheeler with one second left in overtime and Poly trailing by two? What if Hatten, who played a stellar second half, hadn't fouled out with 6:54 left and the Mustangs trailing by one. And what if Van Winden, playing solidly in the middle, hadn't been whistled for a five-second violation as the Mustangs worked the ball for a final shot in overtime?

The Mustangs and head coach Ernie Wheeler can ponder the "what if's" forever. It won't change the fact that Poly is 4-5 in CCAA play, three games behind second place Chapman and five games behind frontrunning U.C. Riverside. The top two finishers go to the NCAA Division II playoffs.

Chapman head coach Walt Hazzard felt as if he'd escaped an assassin's bullet after the game. His Panthers embarked on the CCAA's Death Valley road trip to Bakersfield and San Luis Obispo and emerged with a pair of wins to cement their stranglehold on second place. No wonder Hazzard lit up a victory smoke and heaved a huge sigh of relief.

"Sweet," the Panther coach and former NBA and UCLA star said. "Two two-point wins this weekend. We got two sweet ones. They only got 40 points. Thank God we got 42." The Mustangs knew they had to control the tempo to eat the talented Panthers, and Poly did a fine job of patiently working the ball around. The Mustangs trailed by 11 midway through the first half, but Please see page 8
Mustangs close, but victory cigar is Panther’s

From page 72, literally clawed their way back within one at half-time, 26-25.

The biggest second half lead was three points as Hatten and Chapman’s Nigel Wallace matched hoop for hoop. Hatten had ten second-half points, for the game. Chapman had two of his six three-pointers on a marginal charge-block call which touched off a bench-clearing fight. Panther center Ernie Minoli also had both free throws to put Chapman up 33-35.

Poly led the game until the first half at 39-38 on a Craig Cleveland (tppoint at 5:27 left, but Wall, who had 16 points, responded a minute later with a jumper. Van Winden hit a pair of free-shots to tie it with 2:32 left. Haddad and Wheeler then set the wheels spinning,

trying to cat and mouse each other. The Panthers worked for the last shot, while Cal Poly pawed the passing lanes, looking for a one-on-one chance. Chapman spent two timeouts, the last with 16 seconds left to set up Danny Poole, the best Panther shooter. Poole got the ball, but Cleveland deflected his 20-foot baseline jumper at the buzzer.

Poly took the overtime tip and second contest to work for one shot. After working off three minutes of the clock, the 6-8 Van Winden was trapped out front with no one to pass to. He was whistled for a turnover "It wasn’t Jimmy’s fault,” Wheeler said later. “I was the fact that he was covered.”

Chapman struck back quickly, with Mitchell Grace, who had 16 points, found the open man and put Chapman up 38-35.

Wallace, who had 16 points, responded a minute later with a jumper. Van Winden hit a pair of free-shots to put Chapman up 33-35.

Hatten and Chapman’s Nigel Wallace matched hoop for hoop. Hatten had ten second-half points, for the game. Poly led the game until the first half at 39-38 on a Craig Cleveland (tppoint at 5:27 left, but Wall, who had 16 points, responded a minute later with a jumper. Van Winden hit a pair of free-shots to tie it with 2:32 left. Haddad and Wheeler then set the wheels spinning,

trying to cat and mouse each other. The Panthers worked for the last shot, while Cal Poly pawed the passing lanes, looking for a one-on-one chance. Chapman spent two timeouts, the last with 16 seconds left to set up Danny Poole, the best Panther shooter. Poole got the ball, but Cleveland deflected his 20-foot baseline jumper at the buzzer.

Poly took the overtime tip and second contest to work for one shot. After working off three minutes of the clock, the 6-8 Van Winden was trapped out front with no one to pass to. He was whistled for a turnover “It wasn’t Jimmy’s fault,” Wheeler said later. “I was the fact that he was covered.”

Chapman struck back quickly, with Mitchell Grace, who had 16 points, found the open man and put Chapman up 38-35.
