Concert facilities needed for Cal Poly

by Nancy Lewis
Special to the Daily

The ASI Concert Committee is still without a facility in which to hold concerts, and the chance to sign performers to a concert at Cal Poly before June is slipping away.

The Concert Committee, a part of the ASI Program Board, has been without a facility to hold concerts since October when Jim Bailey, Physical Education Department head, refused to allow any more concerts in the gymnasium until further guidelines of gymnasium procedures could be drawn up.

The Concert Committee chaired by Jerry Morales and Bailey along with Harry Buusen, dean of the School of Human Development and Education, have come up with guidelines acceptable to the three of them, but are waiting for approval from the university's Facility Use Committee.

The Facility Use Committee is a standing committee chaired by Provost Tomlinson Fort, Jr. Its function is to interpret regulations concerning the use of campus facilities. The group only meets as issues arise, according to Morales.

Morales explained that the rest of the Concert Committee members have been waiting two weeks for the Facility Use Committee to make general endorsement of the new guidelines for concert procedures, and will probably wait another week while the members of the Facility Use Committee respond to a proposal of the San Luis Obispo County Jail.

"None of the people in the group will pay the fine," said Wolff. "Most of the group will plead not guilty and try and use the defense of necessity."

"Defense of necessity is where a person commits a crime in order to prevent a greater crime," said Wolff. He explained that this defense has never been allowed in a civil disobedience case but would set an important precedent if it were allowed.

Each person is allowed to make a statement and to support his or her defense. "I don't think my resolution will pass," said Clayton. "I'm not pushing my political views, I just want to introduce bills and resolutions which are of great importance to Cal Poly students as citizens of the United States."

"I'm not pushing my political viewpoints," said Johnson. Please see page 8

A broken down press in University Graphics Systems prevented Tuesday's Mustang Daily from being printed. For that reason, the Valentine's Day classified advertisements are being run today. Please see page 6 for a belated valentine greeting.

Six more instructors arrested in latest of Diablo protests

by Jesse Chavarría

Eleven members of Concerned Cal Poly Faculty, Staff and Friends were arrested Saturday as approximately 1,000 demonstrators protested against the Diablo Canyon Nuclear Power Plant.

"We are not happy with the way things are going on this plant. That's why we're here," said Ron Nader, one of the demonstrators.

"If the committee members generally agree to the new guidelines, the Concert Committee can bid on performers for possible concerts on campus spring quarter, according to Morales.

The situation is frustrating for the 106-member Concert Committee because until the committee has a guaranteed facility to use, it cannot enter any contracts with a performing group, Morales said.

The Concert Committee plans to meet with the Facility Use Committee to make a proposal for a temporary solution. Morales said the committee has been trying to do something about the concerts since October when Jim Bailey, Physical Education Board, has been without a facility to hold concerts in which to hold concerts, and the chance to sign one of these acts is getting slimmer as they wait for the Facility Use Committee to make a decision.

Student senators to decide tonight on peace resolution

by John Bunschman

The Student Senate tonight is voting on a Peace Package which would send a message to the California Legislature that Cal Poly students support the Legislature's peace resolution.

If the Student Senate passes the Peace Package, said Julie Clayton, author of the resolution and senator from Human Development and Education, it would send a letter to San Luis Obispo city council members to forward to the San Luis Obispo County Council. The resolution calls for a letter to be sent to Congress and the President of the United States urging them to enter into immediate talks of nuclear power plant and dialogue in order to decrease United States/Soviet Union tensions.

Student senators are trying to introduce bills and resolutions which are of great importance to Cal Poly students as citizens of the United States.

"I'm not pushing my political views," said John Bachman. Please see page 8
Letters

Ignorant pen calls Student Senate ASInine

Editor: As Student Senators from the School of Human Development and Education we wish to address your Feb. 8, 1984 Opinion page calling us ASInine. To begin with, let me say that the Editorial Board stated that "...only one fourth of the 24 bills were authored by ASI senators, who cannot even vote on them." You are correct in stating that a small percentage of senators have introduced bills. The majority of business that is conducted at the senate meetings is in the form of resolutions and motions. We might suggest that you know the difference between the two before you go writing with an "ignorant" pan.

The Editorial Board also states a "...90% of the resolutions were authored by ASI senators." We are completely self-sufficient and don't have to rely on outside help. We can only speak for ourselves. I feel that I have obtained an essay of my goals.

As far as ASI funds being allocated to put on a "tailgate" party and also ASI funds spent to fly not one but two ASI officers to the East Coast for lobbying purposes, we have set up a "inset your ASI Senator" with, let us set the record straight. The Editorial Board surveyed 600 Cal Poly students in order to find out what they would like to see their commencement ceremony run. From the results of the survey, I introduced and had passed a resolution reflecting the majority's opinion.

Finally, I have spent a day at our State Capital lobbying for an increase in funding for the California State University System's budget. The last goes on and on but perhaps we would not need to waste the ink on this page if the Editorial Board had cared enough to sit in on one of our many senate meetings in order to find out what we were up to.

The Student Senate meets for a formal meeting every Wednesday night form 7 p.m. on. I can send you meeting in which the Student Senate sat from 7 p.m. tills midnight discussing pertinent issues that would affect the Cal Poly student body. We meet Informally every Monday night to debate resolutions and bills before they are brought to the Wednesday night meeting. We also attend our school council meetings and all major standing committees such as: Instructional Related Activities Board which oversees funding to the Mustang Daily, Codes and Bylaws and the Academic Committee.

What does this all add up to? Roughly, 10 to 20 hours of voluntary service to the ASI. What do we receive in return? A slap in the face from the Editorial Board of the Mustang Daily!

John Clayton

Editors note: The Mustang Daily is completely self-sufficient and is supported only by those revenues it generates in advertising. None of its funding comes from IBA, or erroneously stated in the above letter.

And once again you have missed the point of the editorial. Speaking out against an action is fine and dandy, but what specific actions franchises do not count — they're merely recommendations) has the Student Senate accomplished which has directly affected the student body of Cal Poly?
FREE SPINAL EXAMINATION

FEB. 1-29

Johnston Chiropractic Clinic, Inc. is sponsoring a spinal check-up and Scoliosis Screening program as a public service. This service will include consultation, physical examination, and a report of findings.

WARNING SIGNS OF SPINAL MISALIGNMENTS

- Headache
- Blurred Vision
- Neck, Shoulder & Arm Pain
- Lower Back & Leg Pain
- Pulled Between Shoulders
- Numbness in Hands & Arms
- Loss of Sleep
- Difficulty Breathing
- Numbness in Legs & Feet

If you suffer from any of these warning signs call immediately to prevent possible advancing complications. This Free Spinal public service is for a limited time only, by appointment, please.

For An Appointment Call 541-2727

So Bob, don't send me a card, well, he's going to pay for it.

Yea, that's right, I'm gonna tell him a few things.

Wait a minute, it's not right to be angry like this, I need some sound advice.

We have combined our leftover odds & ends athletic shoes from our January sales from the following Copeland's stores & have brought them to Copeland's Fine Shoes in San Luis Obispo:

- Alto Kids Sports, Fresno
- Coley's Sports, Santa Barbara
- Kamele the Sport Shoe, Santa Barbara
- Sports Plaza, Bakersfield
- Copeland's Sports, Bakersfield
- Exercise Warehouse, Fresno

 Featuring such brands as:
- adidas
- Nike
- Vans
- New Balance
- Brooks

Some models slightly blemished.

We are featuring thousands of pairs of odds & ends athletic shoes priced at $14.99 or less.

Prices are good through 2/1/94, subject to change without notice.

Past concert problems cause request for change

The group X was one of few this year able to perform in the Cal Poly main gym.

The bands that are still available for possible concerts before June include John Cougar, Elvis Costello, Roy Orbison, .38 Special and U2, said Morales. No more concerts have been held in the gym since October when Railey put a halt to them. Railey's concern came after the Motels and X concerts. These concerts didn't cause specific problems, but according to Morales, it was the last straw for Railey in dealing with concerts over the years. "He got to a point where he had to stop and evaluate the situation," said Morales.

"There were some concerns he had that we didn't know were causing problems," said Morales. The biggest issue was the use of the gym floor. In the past, the Concert Committee has tried to control the entry of people wearing hard-soled shoes on the floor, the amount of smoking and the abuse of the gym floor. "However with 3,000 people in there with a sold-out concert, it's almost inevitable someone will light up a cigarette," said Morales.

Railey feels the facility was built as a physical education area and the use of the facility should be for those purposes. "The gym was not built for concerts, it was built for participatory activities," he said.

But the Concert Committee still needs a facility, said Morales. "We understand it is a privilege to be able to use it, and we feel we can work together since we don't have one to use," he said.

One of Railey's biggest complaints was a gouge in the wooden floor that was taken out when the stage platform was moved in for the Motels concert. "The gouge is there forever, because we can't sand it out," said Railey.

To protect the floor in the future, guidelines state a plastic floor covering will be laid across the floor from bleacher to bleacher for all sit-down concerts. Shoe checks will also be more strictly enforced to prevent hard-soled shoes, and smoking, food and drinks will be forbidden in the gym.

Another problem is caused by the lobby doors being blocked during concerts, said Railey. Previously, the

Political science major new Poly Royal queen

By Margarita Mita

The first major event of Poly Royal concluded with the announcement of this year's queen and her court of four princesses.

Rebecca Oshausen, a junior political science major, was chosen from a field of 36 contestants representing various campus organizations to act as the official spokesperson for Poly Royal.

The new queen, sponsored by College Republicans, will work with four princesses, Karen Gustafson from Theta Chi, Lauren Shankman from National Agricultural Marketing Association, Nancy Ortman from the Ornamental Horticulture Club, and Angela Robledo from the Economics Club, to promote Cal Poly and Poly Royal through radio and television promotions, newspaper advertisements, and appearances.

Each entrant was required to have at least junior status, be in her second quarter at Cal Poly and be taking at least 11 units with a minimum 2.2 grade point average.

The 36 girls were given a list of six questions two weeks prior to the pageant about Poly Royal and their school activities so they could do the necessary research and have time to think about each question.

Master of Ceremonies Monte Mills, who returned as host from two years ago, asked each contestant one of the six questions.

Ten finalists were chosen by seven judges on the basis of poise, appearance, speaking ability and presentation of ideas.

The remaining five finalists were Vicki Pitta, Margaret Barrett, Lisa Stanilee, Yvonne Barber and Denise Altman.

The 10 finalists were then sent backstage and asked to respond to a spontaneous question: "What aspect of your personality has been enhanced since you've been at Cal Poly?"

Oshausen was crowned by the 1983 Poly Royal Queen, Adrienne LeFebre.

Oshausen's duties will include in addition to radio and television appearances to be at student events, go on a tour of other campuses, participate in the Poly Royal parade, speak at opening ceremonies and finally to be available at all Poly Royal events.

Morton said that although the bulk of the new queen's duties will be during spring quarter, her reign will continue through the year until next Poly Royal.

Although Oshausen was crowned Monday night, she will make her formal introduction to the student body at the Poly Royal Coronation Ball April 21.
Poly loses out on concerts for lack of facilities

From page 2

lobby doors have been used as an entry for media, but this makes it difficult for any faculty who wanted to enter their offices during a concert," Ray said. He said the last few concerts have been held on Sunday and Monday nights when faculty were coming to campus, according to the offices, "It causes a special problem for coaches who work seven days a week during the season," he added.

Guidelines now state that the media door will move to the main entrance so as not to obstruct entry to the lobby of the gym. A security officer will be stationed at the media door as well.

Ray said he's still concerned about the entire building being shut down for a concert being held in one area of the building. "Students by the dozens to be on the weekends and closing the building obstructs their right to use the building," he said. No solution for that problem is stated in the guidelines.

Performers have also abused parts of the building, according to Ray. He said rooms used by the performers have smelled so strongly of marijuana that "instructors reported that they couldn't breathe."

As a result, the wrestling room will no longer be used as a snack bar and classrooms will no longer be used as dressing rooms for performers and concert workers. Instead, trailers or motor homes, when needed, will be moved to the back of the gym for dressing or rest areas for the performers, guidelines state.

Other guidelines deal with crowd control procedures. Because of police concern, concert-goers will not be allowed to line up for concerts until four hours before the performance. That lineup used to be able to start at 6 a.m. the morning of the concert, but Ray believes that encourages people to bring coolers and picnic lunches and through the building, he said. No solution for that problem is stated in the guidelines.

Ag Forum addresses 'hidden costs' of agriculture

Dr. William Jackson, director of the Land Institute in Salina, Kansas said that 99% of all university research support capital intensive agriculture with an emphasis on energy rather than ecology. Jackson said research money is coming from chemical companies so that "energy inputs have superior mechanisms." He feels the school of agriculture and biological science need to break traditional patterns of specialization and merge together their research data from both fields to improve the problems in agriculture.

Stein noted that sustainable agriculture is still in its infancy, with basic research just being started. In order for it to work, members believe, a greater understanding and cooperation with all life forces needs to exist. People need to develop farms as small ecosystems, Stein said. Where animal manure can be used to fertilize soil which feeds the animals. To prevent erosion and a loss of nutrients, crops can be rotated. Farmers can use smaller tractors to get the job done and conserve fuel.

Ag Forum believes big farms have never been assessed on the hidden costs and support taxing farmers for the mismanagement of farm land.

Maybe if we tax the farmers for soil loss, we could bring a balance between the amount of production and the amount of environmental destruction. The group feels the only way to achieve high productivity is ecologically. Organic farms will preserve the land and models for future generations. Jackson also commented that all ecological agriculturists speak about their activities and discussed major problems facing the future of agriculture.

Jerry Harbison, a graduate student said that every time an oil shortage occurs, the cost of fertilizer skyrocket, which in turn brings up the cost of food. "The prices of lettuce on your table shouldn't be dependent on a barrel of oil," he said.

Ag Forum will be discussing sustainable agriculture at their next meeting at 11 am. on Thursday, Feb. 23, in room 111 at the Ag Building.

UCSB research shuttle up for Baker's approval

A proposal up for approval by President Baker and the Academic Senate would make it possible for Cal Poly researchers to use the library resources at the University of California Santa Barbara.

Under the terms of the proposal a free shuttle would be provided between the two universities for people who meet researcher qualifications. Library officials would determine who meets the requirements.

According to Lynne Gamble, Academic Senate long range planning committee chairman, a researcher could be faculty, staff or students working on special assignments.

The proposal encourages faculty to pursue research activities and notes that the nearest forge research center is at UCSB.

Gamble said that Cal Poly officials would not necessarily have to buy a new vehicle. "Administrators could set up a shuttle with a state car or van," she explained.

Gamble added that the muttle should operate between normal working hours, possible leaving Poly at 7 a.m. and returning by 5 pm. However, schedules could be flexible, said Gamble. If researchers made prior arrangements for living quarters, researchers could take advantage of UC Santa Barbara's library for more than a day.

The acadmic senate is expected to vote on the library shuttle proposal at its next meeting, March 6. According to Academic Senate chairman Jim Simmons, the proposal appeared to have met senate members' approval.

Conference to be held

by Margie Cooper

The 7th Annual Conference on Direct Marketing and the Family Farm Conference will be held Feb. 18 and 19 at Cal Poly.

Farm Conference '84 will provide current information relevant to small scale agriculture and direct marketing.

For more information call toll free 1-800-952-5772 or contact Greg Groth at 546-2201.

**Lacrosse club looking to upset Santa Barbara**

Good memories won't remain for the Cal Poly lacrosse club after last weekend's loss of UC Berkeley. After an unplanned hour delay, the opposing Bears went on to win the game with a decisive 10-3 victory.

Senior guard Kendall Peareon, club president, described the game as slow moving, unemotional and "just a crummy situation."

"By the time Berkeley showed, we had lost any competitive edge," said Pearson. "But by next game...."

This weekend the club will try to offset the cloudy beginning with a win over UC Santa Barbara, last year's state champions. The Saturday game will start at 1:00 in the Mustang Stadium. Admission is free.

**Women even CGAA record**

by Sheri Birgen

The Cal Poly women's basketball team had the home crowd on its feet at the end of Thursday night's game against Cal State Los Angeles.

Senior guard Kaitlyn Ulrich provided the drama when she dropped in a 10-footer with two seconds left on the clock to win the game, 68-66.

"I knew there was one second on the clock," said Ulrich. "I just kind of threw it. I knew it had to go in."

Chris Hester put the first point on the board for the Mustangs with a free throw, followed by two buckets from Sue Farmer.

Despite top scorer Terre Macauley's 13 consecutive points of a game-high 27 points, Cal Poly trailed the Hidden Eagles 35-26 at the half.

The second half had more back-and-forth court action than a tennis match, when both teams alternated taking the lead, although never building up anything substantial.

With 53 seconds left on the clock and the score tied at 64-64, the Lady Mustangs called a timeout. When the team hit the court, the rally began again, with Sherrie Atteberry pulling the team and the home crowd on its feet.

**Poly sinks Pacific**

by Kim Foster

On a cold, windy Saturday afternoon, the Cal Poly women's swim team finished dual meet season undefeated, drowning the University of Pacific, 64-41.

Senior All-American Ann Stier led the Mustangs with three victories, two of which qualified her for the national meet. She broke the 100 free (5:06.35) and the 400 medley relays, but their 200 free relays, 400 medley relay and 800 freestyle relay were disqualified. The Mustangs already have three victors for nationals to be held in New York.

Other individual winners for the Mustangs included: Joan Mary Laubacher, 50 free (25.79); Susan Watt, 100 free (56.19); Nancy Martin, 200 Breast (2:33.50) and Jennifer Sheffield, 200 freestyle (2:12.89).

In diving, Donna McEvoy put the first point on the board for the Mustangs with a game-high 27 points.

"Ann has been very productive throughout the season," said coach Duane Foster, who has already qualified two of which are to be held in New York. The famous Ulrich shot put another CGAA game in the win column for the Mustangs.

"I'm happy we won," said Hester. "As soon as Kelly put up the shot I knew we'd win. She (Ulrich) was confident."

Cal Poly extended its winning ways when it defeated Cal State Northridge, 77-59 Saturday night.

Ulrich led the Mustangs scoring with a game-high 20 points. MacDonald and Atteberry also scored in double-digits, with 16 and 14 points respectively.

Center Horosz pulled down 18 rebounds. The Mustangs were led by top scorer Darleen Brungman with 17 points and Rene Loch with 15 points.

Forward Diana Vala pulled down nine rebounds, to lead her team in that department.

The Lady Mustangs are now 4-4 in conference play. Their next game will be Thursday against Chapman in Orange. The team returns home Saturday to play against Cal State Dominguez Hills.

The game will begin at 7:30 p.m.
Winning the all-around competition, freshman Janet Lehman helped the Cal Poly gymnastics team to a win at home last weekend against three other schools.

The Cal Poly women's gymnastics team ousted their competitors in win their first meet last weekend with their highest score of the year in front of a capacity crowd at Central Gym.

Poly's team score of 164.65 tops their previous best score of this season by four points. Cal Poly Pomona was second with 166. 8 and Southern Utah State was third with 136.3, and San Francisco State was fourth with 81.35.

"The girls were great. This was their best meet—they were really working at it," said coach Tim Ramirez.

"This is the first time we have had a full team (six girls on each event)."

The all-around event Poly outclass the competition. Jana Lehman, freshman, placed first with her highest all-around score this season with a 38.4. Azumi Norimoto, senior, who competed in the all-around for the first time this season by adding a floor routine was second with a score of 38.45 and Lisa Malacarri tied for third with a score of 38.7.

Also in the all-around were Cathy Papagi who scored a 30.55 and Denise Storch with a score of 29.65. Poly's first event of the evening, the vault, was won by Norimoto with a score of 8.4. Terry Thiel was second with an 8.35, Lehman was third with an 8.3 and Malacarri was fourth with an 8.25.

Other scores on the vault were: Storch, a 7.7 and Papagi with a 7.5.

On the uneven parallel bars Lehman won the event with a score of 8.7 and Norimoto was fourth with an 8.5.

This score an 8.5 on the bars, Storch scored a 7.5 and Papagi scored an 8.2.

Despite a fall during warmups before the meet, in which Norimoto bruised her shoulder falling off of the bar, she still held on to the lead in the all-around.

The girls improved on their form, I was impressed. They all stuck their landing," said Rivers. "Two leashes of their feet in a challenge to take a step on a balance beam. By the end, many can really hurt the team as well as individual scores could have." They were great.

On the floor exercise Lehman had the highest score given out on any event, she was first with a score, tumbling to the sound of Beethoven's Fifth symphony. Malacarri was third with an 8.35 dipping an unfortunate fall on the last move of her first tumbling run.

This had a score of 8.2 on the floor. Papagi scored an 8.15, Norimoto scored an 8.05 and Storch scored 7.45. Norimoto needed an all-around score for regionals, the routine she did was put together just last week during practice.

"This was a real high energy meet, by my doing a floor routine I added excitement for the floor," said Norimoto. "This was the best meet ever. We really worked together as a team," agreed Lehman and Papagi.

The next home meet for Poly is March 9, and the girls agreed that this was the best audience that they had competed in front of all season.
