President's Cabinet scheduled to meet this week

by Jerry Sheahan
Staff Writer

The President's Cabinet will hold its annual meeting at Cal Poly on March 8 and 9 to discuss the specific goals for Cal Poly as outlined by President Baker. Members of the President's Cabinet include William Randall, Dean of the College of Business Administration; Dr. Arthur Anderson, Vice President of I.B.M.

Carolyn Price, executive secretary to the President's Cabinet and director of development, said the group, selected by Baker, is interested in "maintaining the university at a high level of excellence.

The cabinet is divided into five committees that

work toward achieving specific goals slated for the upcoming year. The committees include Health and Breadth; Computing, Communication and Information Systems; Quality of Campus Life; Faculty Development, Recruitment and Retention; and Equipment and Physical Plants.

"This is the best group I've ever worked with," said Price, commenting on the cabinet with those at other universities he worked for.

"I don't think there is any school in the Cal State University system that can even come close to it," added Price.

According to Price, the Health and Breadth Committee tries to insure that Cal Poly's General Education requirements do not become overly focused.

"From the standpoint of education, they view a broad general education as extremely important. They want individuals who are broad in perspective, can relate to other people, and have an understanding of the world around them," noted Price.

The Computing, Communication, and Information Systems Committee makes recommendations to the university regarding the costly long-term purchases of computer, telecommunications and digital equipment.

The newest addition to the cabinet is the Quality of Campus Life Committee which will meet for the first time in March.

This committee confers with a seven-member group at Cal Poly including the Dean of Students, Intern Interim Dean of the School of Human Development and Education, Director of the Activities Planning Center, Interim Director of Recreational Sports, and Interim Director of Physical Plant.

Poly observes National Women's History Week

by Sherman Turntine
Staff Writer

Cal Poly began its 3rd annual Women's History Week yesterday with the speech, "Women's Activities of the 60's - notes for the 80's." More activities are scheduled throughout the week.

Starting as a county-wide observance in the schools and in the community under the auspices of the Education Task Force of the Sooma County Commission on the Status of Women in 1978, Women's History Week spread rapidly from its originating county and leaped across the nation.

By 1981, National Women's History Week had been proclaimed by the U.S. Senate. The governors and legislators of over half of the states proclaimed Women's History Week 1981 as an official observance.

In 1982 the U.S. Congress issued a joint resolution declaring National Women's History Week.

It will be the third year that Cal Poly has celebrated the contributions of women in America through National Women's History Week.

Guest speakers will talk about affirmative action, the feminism of poetry, the history of women's fashions and sports, comparable worth and family violence from the male perspective. The following is a partial list of events:

Tuesday, 2 p.m. - "The Athletic/Disabled Woman," co-sponsored by Disabled Student Services, Mustang Lounge.

Tuesday, 3 p.m. - Lecture: "Crime Against Women and Children: A Sociological Perspective" by Connie Hannauer, co-sponsored by Student Health Advisory Council, University Union Room 220.

Tuesday, 5 p.m. - "A Black Chautauqua: An Evening with Sojourner Truth, Maria Stewart, Frederick Douglass and Malcolm X," presented by Marshall Sapers, Sheldon Moore, Crystal Culmer and Shon Bowles, co-sponsored by the Afro-American Student Union, Health Center Conference Room.

Wednesday, 1 p.m. - Films: "Quilts in Women's Lives," "Maya Angelou," and "Riding us Softly," Health Center Conference Room.

Wednesday, 2 p.m. - "Primed Against Women," presented by Victor Williams, co-sponsored by Student Health Advisory Council, University Union Room 220.

Wednesday, 2 p.m. - "From the standpoint of education, they view a broad general education as extremely important. They want individuals who are broad in perspective, can relate to other people, and have an understanding of the world around them," noted Price.

The Computing, Communication, and Information System Committee makes recommendations to the university regarding the costly long-term purchases of computer, telecommunications and digital equipment.

The newest addition to the cabinet is the Quality of Campus Life Committee which will meet for the first time in March.

This committee confers with a seven-member group at Cal Poly including the Dean of Students, Intern Interim Dean of the School of Human Development and Education, Director of the Activities Planning Center, and Principal Director of Recreational Sports.

Bettina Apthecker, a leader of the 1960's Free Speech movement at the University of California, makes a point during a talk to a Cal Poly audience Monday. Her speech was part of the Women's History Week activities at Poly.

New recreational sports director takes post

by Shari Ewing
Staff Writer

Programming close to half the university's student population, the recreation department is an attractive place to work. But getting there is no easy feat, but new Director of Recreational Sports Marc Stoddard doesn't seem to mind.

"If I really need to listen, I love the environment," she said. "The people here are so supportive, they make my job easy.

"It's not as though she's a rookie in the field, however. Stoddard was Director of Recreational Sports at San Diego State for three-and-a-half years before moving to the Central Coast.

She said that while the program at San Diego State was larger, Cal Poly has more participants percentage-wise.

The main difference between the programs, she cited, is that at San Diego there are 'distraction' mainly the beach where students prefer to spend time. At Cal Poly students recreate, she said, participating in school-based sports programs.

To cover the various fitness needs of its participants, the rec sports program aims to provide a variety of events. These include the usual football, basketball, volleyball and softball tournaments, as well as tennis and racquetball tournaments and track meets.

If students are interested in a sport not offered through rec sports, the program will try to fill their needs, said Stoddard.

"We work on coordinating facilities and have to be creative," said Stoddard. The program has expanded use of off-campus facilities.

Beyond her program-juggling duties, Stoddard enjoys seeing students grow through sports.

"I like to see what they're getting out of the program," she said. "It's a good use of leisure time, it develops social skills.

The worst thing about working with students, said Stoddard, is that after graduation they leave.

But that's something she should be getting used to, considering her extensive background in college recreational sports.

Stoddard graduated from Cal Berkeley in 1976 with a B.A. in Physical Education. While attending Cal she competed in gymnastics and refereed water polo games.

She then transferred to Oregon State to attend the masters program in College Student Service Administration. She obtained the San Diego State job through Cal and eventually wound up in San Luis Obispo.

"Here San Luis Obispo I like the community in general," she said. "The student community, specifically, is really friendly. Everyone's been real receptive to ideas.

One of those ideas planned for spring is a fundraiser. Stoddard said the event will be a fun run, probably held at night. When there are so many races in the community, anything original will increase attendance, she said.

by Dr. Fred Shultz and Dr. Pat Engle in Health Center Conference Room.

Thursday 12 noon-2 p.m. A look at affirmative action and women at Cal Poly. A review of the past ten years. Faculty and staff session from noon to 2 p.m.; "Is Anybody Listening?" Current needs and priorities as reported by female students at Cal Poly. Student session at 2 p.m. Both in Health Center Conference Room.

Friday, 12:30 p.m. Luncheon Lecture: For further information contact Women's Week Activities Coordinator, Dr. Willie Coleman. 546-2478.
Opinion

Boil, boil, oil and trouble

Kharg Island is a small island off the coast of Iran in the Persian Gulf, 130 miles southeast of Iraq.

It is the terminal through which most of Iran's daily output of 2.4 million barrels of oil is exported to the West. On Monday, Iraqi warplanes attacked Kharg Island as part of an attempt to blockade the area. It is the latest and most serious episode in the war which began in September of 1980 when Iraq invaded Iran in a dispute over ownership of the Shatt al Arab, the waterway that constitutes Iraq’s only access to the Persian Gulf.

Iraq has threatened to attack Kharg, to prevent Iran from exporting oil. Iran has repeatedly threatened to use force to close the Gulf, the origin of about 25 percent of the Western world's oil.

President Reagan has declared that the United States will do what is necessary to keep the Gulf open to civilian tankers. Britain has also indicated that it might join the United States in a military venture.

Iraq has warned all oil tankers and ships against approaching Kharg or dealing with Iran. Iraq has vowed to continue the attacks until Iran stops fighting and agrees to abide by the United Nations Security Council resolutions that seek an end to the war and free navigation in the region.

The latest developments pose a distinct problem for the West. Both Iran and Iraq hold to an entirely different set of values than those of the United States and Western Europe. Neither has much respect for the West. Threats have been cast at both the United States and the Soviet Union by Iran if either of the two nations were to involve themselves in the conflict.

The United States knows little about what is going on in the Persian Gulf. Journalists are rarely allowed in the area and generally, the West must rely on announcements and releases from the governments that are doing the fighting.

As the State Department has said it doesn't think Iraq will actually attack the terminal on Kharg or other nations ships. But according to Western intelligence sources, Iran is poised to throw 300,000 troops into an invasion of Iraq in an attempt to end the conflict. What could happen is anyone's guess.

The United States must be cautious. Both Iran and Iraq are staunch Muslim countries with their own values, one of which is the honorableness of fighting to the death. Should the conflict in the Persian Gulf escalate, we will find ourselves with a hot potato much larger than Lebanon or El Salvador.

Letters

Panel questions don't give people their money's worth

Editor:

I guess what I misunderstood most about the "Most Misunderstood Man in America" evening was the poorly thought out and fuddled questions by the hosting panel. Too much time was spent on rambling questions that robbed Watt and the audience of the question-and-answer period that Watt is best at. After all, I did pay to hear James Watt, didn't I?

Brie Sujeta, Soil Science student

Senate seats available now

Two Student Senate positions for the School of Engineering & Technology are open for the current school year. Interested applicants must be engineers majors in good academic standing. They will serve until the end of spring quarter. If interested, contact Michelle Hughes, Brian Prew or Donald Erickson at 541-1689, the Engineering Club Council Representative, the ASI Office or attend the Council meetings Wednesdays at 8 p.m.
Speaker addresses computer impact on education

by Jerry Sheshan
Staff Writer

Dr. James Fairweather, a world-renowned education expert told a Cal Poly audience he considers the implementation of computers in society, and particularly the classroom, to be vital.

Fairweather, of SRI International gave a speech in the Cal Poly Theatre Thursday entitled "Technology and Education: Revolution or Fad?"

"In education, you have seen far less impact than you have in the rest of society," he noted.

Fairweather emphasized that the greatest impact has been in administration, not in direct educational use.

According to Fairweather, there are four indications that there has been a trend towards a revolution in education.

The first is evidenced by the increase in micro, or personal computers, resulting in part from lower prices, higher quality and greater availability.

The explosion of computer sales by companies such as I.B.M. is the second sign of an educational revolution, in Fairweather's opinion.

"For the first time, we have a standardization for those that are developing institutional programs, the fourth sign that a revolution may be in our educational system's future.

"Most of the institutional hardware has taken place in elementary education," said Fairweather.

He described the people who create the new technology as "Tech Junkies.

"They're really hooked on the stuff," he added.

Fairweather considers the ultimate determination of whether there is actually an educational revolution is if there is "significant change in the basic nature of instruction.

"Fairweather outlined a number of consequences of technology as they relate to education.

"There have been great strides in education," said Fairweather. "13% of all school children have some type of access to computers," he added.

Another consequence is the great change in software programs for education, according to Fairweather.

"The early software was tedious - too much 'drill and practice' and not enough interactive programs.

"In Fairweather's opinion, the educational system's attitude toward change kept experimentation with new technology at a minimum.

"Education doesn't believe in doing something that's new unless there's a reason," he remarked.

With the recent emphasis by educational institutions on applying new computer technology, Fairweather doesn't envision software to be a block to any potential revolution in education.

"Major changes are often cosmetic - 80% are for political reasons," he stated.

Fairweather commented that organizational indicators are necessary in determining whether technology in education will be reality or a fad. These indicators include increased computer purchases by schools, teacher training programs for the new technology, buying computers for a recognised purpose, demonstrated effectiveness increased reading ability, for example, and where the funding comes from.

"What did I say, Alex? . . . Every time we invite the Zombies over, we all end up just sitting around staring at each other."
“Lassiter,” the latest Tom Selleck movie now showing at the Madame Theatre, omits one of the basic sins of filmmaking by being mediocre. You can depend on the virtues of a really good film or complain about the drawbacks of a real stinker, but a mediocre film can be summed up all too quickly: “It...okay.” Well, not even a two and a half second shot of Tom Selleck’s bare buttocks can salvage “Lassiter” from the vast morass of truly insipid films.

A British production company worked on “Lassiter,” and this fact speaks of a real stinker in atty in a white, double-breasted dinner jacket by US« McKinnon.

Period settings and costumes are pleasurable elements of film making by being mediocre. “Lassiter” is loaded with silly ‘theme’ dialogue, like this nifty exchange between Lassiter and Sara.

He: “Someone else dealt the cards. I’m just playing them out.”

She: “Well, it looks like you got the losing hand.”

Pub-bee.

This is television-quality script writing at its worst. Why go to a theater and pay $4 for the privilege of being subjected to it when you can stay at home and get it for free?

“Lassiter” isn’t nearly as much fun as Selleck’s last film, “High Road to China.” For one thing, there’s too much confusion as to what sort of person Nick Lassiter is.

At one moment, he is very loving with Sara. The next, he’s rather nastily shoving her away at arm’s length. Next, he’s fun-loving. Then he’s full of false macho bravado.

Is Lassiter a thief with a heart of gold, as he’s shown to be in roughly half the movie? Is he a bookie making a living? Is he a loner, as shown in roughly the other half? I’ve heard of multi-faceted characters before, but Selleck is nowhere near the accomplished actor needed to bring such a character to believable life. Perhaps he really is Nick’s identity himself, just decided to turn the character into a schizophrenic.

There’s something about “Lassiter” that smacks of a “made for TV” production. It’s not just the dreadful script, colorless plot and two-dimensional characters. It’s the length.

At approximately one hour and 40 minutes long, “Lassiter” would fit very nicely into a slot on any network. Since most networks run about 16 minutes worth of specials in every hour of programming. The coincidence is, to say the least, curious.

In short, “Lassiter” will most likely fail to excite anyone who is not a tried and true television. “Magnum P.I.” or Tom Selleck fan.

**Footloose**—more than a shallow extended dance video

When I went to see “Footloose” I expected it to be an anniversary edition of the movie “Flashdance.” I expected it to be merely a series of dancing scenes strung together by a thin plot. I expected an attractive lead and supporting cast with personalities as shallow as a wading pool, but what I got was a real movie.

But how could I anticipate anything less than a scheme to attract bodies of young people to the theater. But it distinguishes itself because it is a serious attempt to make a movie and not just an extended video. “Footloose” is the story of a teenage boy who moves from Chicago to a rural Midwestern town. He soon discovers that what is hip in the Windy City is frowned upon in the conservative town of Bomont. In this setting, Ren McCormack is destined to be called a misfit.

Ren gets himself into trouble early when he calls the book “Slaughterhouse Five” a classic. It seems that some of the townspersons want to have the book banned.

The first impression he gives his schoolmates is no better. Bomont is a town where American cars, crew cuts and cowboy boots are the norm. Ren drives into the school parking lot the first day in a VW Bug with Quiet Riot’s “Metal Health” blaring on the stereo.

**Footloose**

The Air Force has a program that pays more than $1,200 per month to you during your senior year of engineering school. The College Senior Engineer Program is open to students in electrical, nuclear, aeronautical and astronautical engineering.

Seniors may enter the program as late as 90 days before graduation. Juniors may apply after completion of the first academic term of their junior year and start receiving checks up to 12 months before graduation. Certain graduate students also are eligible. While you’re completing your engineering degree, you will receive full pay and allowances. Plus, you’ll be entitled to other Air Force benefits such as complete medical and dental care and discount shopping privileges.

Candidates for this program must qualify for a commission as an Air Force officer. You must be a U.S. citizen under the age of 35. For more information on the College Senior Engineering Program, call:

MSgt. Kampion (865) 543-0934
T Sgt. Washington (213) 831-8312

Film positively portrays rebel's conflict with old values

By John Lithgow who feels responsible for the moral guidance of the town. But this is a heavy burden to bear, especially because his daughter Ariel repeatedly tests the edges of morality.

The appearance of Ren poses a new problem for the minister. Ren not only refuses to conform to the moral and social codes but also is a threat to lead other people astray.

So screenwriter Dean Pitchford presents a substantial conflict: the freewheeling youth versus the harsh moral constraints of society. At what point does conservatism become senseless suppression?

Elizabeth Dyer of the American Ballet Theatre. In one terrific scene, Ren executes the moves with spontaneity and energy.

Film positively portrays rebel's conflict with old values

Patin needed to avoid the self-conscious and brooding nature of "Rebel Without A Cause" and focuses on hope rather than hopelessness.

Newcomer Kevin Bacon is the self-assured Ren. His infectious smile and relaxed manner give the film an upbeat, positive air. Ren is not a malicious punk, but a person who knows what he likes to do—and does it.

Lithgow does an excellent job of portraying the struggle the minister has with his conscience.

The dancing sequences were wonderfully choreographed by Lynne Taylor-Corbett of the American Ballet Theatre. In one terrific scene, Ren displays his graceful and acrobatic dancing inside and empty warehouse. Both Bacon and his dancing double Peter Tramm execute the moves with spontaneity and energy.

Paul Hirsch did some excellent editing work on another sequence in which Ren teaches his buddy (Christopher Penn) how to dance. The scene is humorous and a joy to watch.

Pitchford avoids the self-conscious and brooding nature of "Rebel Without A Cause" and focuses on hope rather than hopelessness.
Shasta-Whitney fun run earns halls winning profit

by Robgcca Prough

Runners of all ages showed up on a bright and sunny Saturday morning to participate in a 10-kilometer run through campus. "The First-Ever Shasta / Whitney Athlete's Fun Run" on Feb. 25 was a fund-raiser for the Shasta and Whitney residence halls. The approximate $100 the dorms made will be used for dorm activities.

The 50 participants came from all over the area including runners from Grover City, Morro Bay, Santa Maria, San Luis Obispo, and even two runners from Las Vegas.

Prizes were awarded to the two winners in each of the following divisions: women 15-54, men 15-54, runners 55 and over, and runners 14 and under. Gift certificates to Les Hermanos restaurant were given to the winners in the 15-54 division, and gift certificates to Swe- son's Ice Cream Parker were given to the winners in the seniors division.

The winner in the 15-54 men's division with a time of 32:07 was Mike Krige, a senior electrical engineering student. Krige said he is graduating this quarter and hadn't raced in a long time, so he decided to run in this 10k run. "It was my last chance to go for it," he said.

Sheryl Fisher, a freshman architecture student, won first place in the women's 15-54 division with a time of 40:27. She said she was happy with her time and participated in the race just so she could run. "I am doing it mostly for my training," Fisher said.

Bob Ellingwood said, "Running is such a superior sport for young kids. There are no pressures, hassles, and no sitting on the bench. They don't have to compete against the bigger fifth or sixth graders. Running is an objective way of improving yourself."

The winner of the 55 and over division was 55-year-old Rod Rodenberg with a time of 1:14:16. Rodenberg is from Santa Maria and said he decided to run at the last minute because he thought "it would be a nice challenge."

Rodenberg has been running for five years, and belongs to several running clubs along with his wife, he said. "The course was very challenging and I was very happy with my time. Running is the greatest thing that could happen to me," Rodenberg said.

Steve Sharp, 14, won the 14 and under division. Sharp is a freshman at San Luis Obispo High School, and runs on the track team. His time was 39:25.

John Ernott won second place in the men's 15-54 division with a time of 33:26. Ernott is a junior mechanical engineering student at Cal Poly. Second place in the 15-54 women's division went to Elizabeth Vanderliet, a sophomore photography student.

Fifty-six-year-old Jean Spierling from Grover City took second place in the 55 and over division with a time of 48:40. She said she did better than she expected.

"I ran in this race because I needed a little competition and a little company on the weekend," Spierling said.

Spierling has also competed in the Ironman Triathlon, a race consisting of running, swimming, and bicycling.

Also participating in the race was a father/daughter team. BJ Perkins, a resident adviser at Diablo residence hall, and her father Richard Perkins from Lafayette, California, both enjoyed the course and the race.

The course was basically around Cal Poly's outer perimeter, going out Highland Dr. and then looping back up by the building business, going behind the health center, behind the tennis courts, and then up Grand Ave. back to Shasta dorm. After completing the loop once, the runners had to do the loop again omitting the Highland Dr. section.

Several runners voiced suspicions that the course was shorter than 10 kilometers, or 6.2 miles. They said their times were too good.

Mandy York, a junior mechanical engineering student, and Jim Quaschick, a junior aeronautical engineering major, were happy with the course through Cal Poly. "Bob Quaschick said they are happy with the success of the race. But, he added, if they do the race again next year there will be a few changes, including more age categories for the runners and smaller prize.

Most of the participants said they enjoyed being able to run in a race and were happy with the course through Cal Poly.

Intramural swim Saturday

The meet is open to everyone, with participants broken down into various age groupings. In addition, there will be two categories of events, one for beginners and another for advanced. Each category will feature both team and individual races.

Entries will be taken on the day of the meet at the pool until a half-hour before the competition begins. For more information, call either the residence halls at 544-1366, or Dianna Cozzi at 544-6014.
Mustangs win 1 of 2 on tennis swing down south

by Sherman Turntine

In a sweep through Southern California this weekend, the Cal Poly men's tennis team gained experience while beating Cal State Dominguez Hills and losing to Long Beach State and Cal State Fullerton.

Both Long Beach State and Cal State Fullerton are Pacific Coast Athletic Association Division I teams.

Against the 4ers of Long Beach on Thursday, who are in the top 20 in Division I, Poly played well in losing the match, 6-3. The only singles win for coach Hugh Bream's team was in the No. 2 singles where David Reynolds defeated Steve Chance, 6-3, 6-4.

Captain Rob Pritzkow and Thor Holt lost close tie-breakers in the No. 3 and No. 4 singles. But in the doubles Poly was in winning form again, beating the No. 1 and No. 2 doubles both in three sets. In the No. 3 doubles Thor Holt and Mike Guisto lost in a third set tie breaker 7-6, 3-6, 7-6.

"Overall it was an extremely close and well played match. Great experience for us down the road," said coach Bream.

On Friday, the Mustangs shut-out California Collegiate Athletic Association opponent C.B. Dominguez Hills 9-0. It was the second shut-out of the season of an CCAA opponent for Poly. Their conference record is 2-0 to date this season.

All matches, singles and doubles were convincingly won in two sets. Coach Bream was pleased with his team for bouncing back after the tough loss to Long Beach.

"Gave us an opportunity to work on certain parts of our game that we might not in a close match," said coach Bream.

David Reynolds, No. 2 singles player, did not compete against the Toros because he had to return to Poly to take a test. His replacement was Guisto, who played in the No. 6 singles won 6-4, 6-0 over Sid Jacques. Guisto is 2-1 in singles play this season.

The Titans of Fullerton showed poise in defeating the Mustang's 6-4 on Saturday.

It was a disappointing loss for coach Bream, who saw his team lead in the third set at both No. 6 singles and No. 2 doubles only to lose both matches.

In those two matches Blake Reed was defeated in the singles by David Pratt 6-2, 3-6, 7-4. And in the No. 2 doubles Jim Rakela and Reynolds was outlasted by Julian Lowan and Donnie Young 6-4, 3-6, 7-5.

Pritzkow, Holt and Rakela all won their single matches, while Fullerton won the No. 1 doubles by defeating Randy Havens and Pritzkow in two sets 6-4, 6-2. Holt and Guisto teamed up to beat Craig Smythe and Rob Gram in two sets 7-6, 6-3.

"It was a disappointing loss for us. Our mental outlook and on court behavior was at a low point in several matches. We proved that without self-control we do not play very well," said coach Bream.

With a home stance of 7 matches running from Thursday March 1-Monday March 18, coach Bream was glad that the match with CSIF came prior to some of the league matches and also because each of the 7 opponents that the Mustang's will meet are close to their level.

The Mustang's play host to Cal State Northridge on Thursday at 2 p.m. with University of California at Davis and Claremont-Mudd College visit on Saturday and Sunday for 9:30 a.m. matches.
Poly women capture two wins in CCAA net play by Rebecca Prough Staff Writer

The Cal Poly women's tennis team had a successful weekend, winning both Cal State Davis-Dominique Hills and Cal State Los Angeles in California Collegiate Athletic Association play.

On Saturday, Mustangs beat Dominique Hills, the Mustangs played strongly, winning 8-1. Number one doubles defeated Dominique Hills in five sets, 8-6, 6-4. Sally Russell, Cal Poly's No. 3 player, split sets and defeated her opponent, Sharyel Anderson, 6-7, 6-3.

On Sunday, Mustangs defeated Dominique Hills 6-3, 7-5, and No. 2, Singles, Patricia Franco won 6-3, 7-5. Mustangs took the only win the Toros, 7-0, 4-6, 6-3.

Saturday's match against Cal State Los Angeles was also an easy win for the Mustangs. Cal Poly defeated Los Angeles, 7-0.

Again the scores indicate that Cal Poly was definitely the stronger team. Mustangs defeated Mary Kaiser, 6-3, 6-3 and Hilarienned Defeat Panama, 6-4, 6-2. Russell won her match 6-1, 7-6 and Allison won her match 6-2, 6-0.

Mimi McAffe, moved up to play No. 6 singles, had some trouble but lost her match 6-7, 7-5.

Once again Moss and Hallard couldn't hold together the No. 1 doubles win over Los Angeles. They were defeated by Katera and Sawyer, 4-6, 6-4.

Coach Orion Yeast said, "The team played well as a group. With each doubles team.

"I think the women are mentally ready for the matches to come," he said.

The Mustang's record is now 5-3. The team plays Cal State Northridge Saturday at 11 a.m. on Cal Poly's upper tennis courts. Yeast said Northridge will be the team Cal Poly has to defeat.
