The California State Legislature is considering an amendment which would give the CSU system more flexibility in its fiscal dealings, and more autonomy in administrative matters, said California State University Chancellor W. Ann Reynolds in a speech to the President's Cabinet Monday.

The amendment proposed by Senator Alquist would shift constitutional control of the CSU system from the State Legislature to the Board of Trustees, giving the Board of Trustees unlimited authority in setting rules and fees.

Reynolds said the CSU system is slow to deal with many problems, and the amendment would improve the system's educational programs, making them more "timely and effective."

"There is no major educational institution in the United States which doesn't have constitutional status," she said. The amendment would provide "internal flexibility so we can deal with sudden needs," she added.

Reynolds said that the CSU has many restraints on its fiscal resources. To get money for various programs "we must now go to the Legislature and get a bill passed," she said.

The California State Students Association is opposed to a State Amendment giving the State University system constitutional autonomy.

The amendment, if passed, would give the CSU system a structure similar to the University of California system. "The CSU system has always had a second-class status," said Don Erickson, Cal Poly's CSISA representative. "This is an attempt to bring it up."

The CSISA opposes the amendment for five reasons: 1) It will hurt CSU's status as the 'people's university.' 2) It will adversely affect the CSU in its role as an undergraduate institution. It will allow the Board of Trustees unrestricted power over fees, 3) students and faculty will have no voice in decision making, 4) campus organizations will lose their unique function and relative independence.

The CSU system has a better minority access record than the UC system, said Erickson of CSISA's stand on the amendment. "If the programs could be lost under unrestricted Board of Trustees control, Erickson went on to say that CSU's role as a graduate university would be lost. "We feel that CSU students could be forced to pay tuition," said CSISA Legislative Director Curtis Richards in a letter to Alquist, "if the Trustees have unrestricted rule-making authority. Just last month, the Board of Trustees came within two votes of charging students a tuition fee."

Evan Reynolds, who spoke to the President's Cabinet Monday.

Returning preacher labels Poly as 'party' school

"Cal Poly is in just a good place to party for four years," a Twre Haute evangelist told a crowd of students Monday in the University Union Plaza.

George "Jed" Smock, used to come to campus to talk students of his transition from a hippie of "the Death" into "the Life." Smock came to Cal Poly two years ago.

Smock described his previous life as a hippie in the Height-Ashbury district of San Francisco and later in Berkeley to hearing students who won autographed copies of his pamphlet. "From Death Unto Life" for guessing influences of his sinful life of "drugs, sex and rock and roll," like Janis Joplin and the Rolling Stones.

He faced at one female student with a short haircut, saying that her parents didn't beat her enough when she was Little. "That's why she turned out the way she is. I'm going to beat the hell out of my kids so they won't turn out that way,"

Cal Poly police officer A. J. Anderson said Smock didn't do anything to cause an arrest. "He made some references to homosexuals, but the crowd is in jovial mirth and not causing any real publicity. He's not so dumb—he's attracted a crowd bigger than most speaker forums."
Opinion

What happens when the lights don't come back on

It has been five days since the lights went out in San Luis Obispo.

With the end-of-the-quarter pressures of student life, the event is already receding rapidly from most of our minds. But the question is just as valid now as when the electricity went off—What if it had been something serious? What if the power had been out for more than a couple hours?

Just how dependent we are on electricity was demonstrated by a mass exodus to the city streets. The only place where there was light was in the car. So a lot of people got in their cars and began cruising town. It was like cruise night on Van Nuys Boulevard. Fortunately, despite the lack of traffic signals, there were no serious accidents.

Many people who had candles lit them; however, since studying by candlelight is not easy, most went on a quest for beer—and started partying. By and large, it was fun while it lasted.

But if it had lasted longer, it wouldn't have been as much fun because most of us weren't prepared for a blackout. The novelty would have worn off as soon as the candles burnt down or the beer ran out.

Our food would have spoiled. Our gas would have run out—gasoline pumps need electricity to run. Many of us would have been without hot water. It would have been dull, to say the least.

So what's the point of all this? The point is that we need to get smart and prepare ahead of time for possible failures of services we take for granted. In the event of some serious occurrence, such as an attack on our country or some accident that puts utilities out of order for more than a few hours, most of us would be hurting.

It is easy to laugh now and say how much fun it was, partying by candlelight. But it also might be a good idea to think ahead and formulate a plan of action to follow in case the lights go out for an extended period of time. Such a plan could preserve more comfort. It could preserve our lives.

Method of research 'lazy' in local restaurant poll

Editor

What a vile invective have you wrought upon our Sebastians? I may be inclined to a certain bias as I am a Sebastian's employee, nonetheless, I find your restaurant poll (w Mustang Daily, March 21) newspaper trip and a disturbing example of unsupported, shoddy journalism. I believe an engineering student at Poly, believe myself able to offer significant evidence to support this claim.

Your method of obtaining data, i.e. the poll-taking techniques you employ, reflect a certain amount of laziness in your approach. There are more than 16,000 students attending Cal Poly. On the basis of the opinion of 16 of these, you make a judgement attaching descriptive 'Worst Restaurant' to a local business establishment? This is hardly a fair assessment, this is hardly a poll. This is an absurd little filter that raises some serious doubts concerning the ability of the Mustang Daily to provide the student body of Cal Poly with responsible worthwhile journalism.

I cannot speak for Sebastian's, however, I am aware of their community involvement and the support they extend to some fine programs in the areas of local education. The restauranteurs employ many local students, thus giving us the opportunity to afford the education we hold so dear.

Validity of restaurant poll questioned by student

Editor

This letter is in regard to the article, "McLintocks Best Restaurant, Sebastian's Worst." I am inquiring about the credibility of the students surveyed and the survey techniques used.

As some may already know, Sebastian's was sold April 1, 1983 and has undergone tremendous changes. They have improved the quality of the food and the portions are more generous now than ever. The chef is doing a fantastic job creating new specials and portions are more generous now than ever.

The question stands to the credibility of those surveyed. Have any of those sixteen students who voted Sebastian's as the worst restaurant dined there in the last 11 months? If the answer is "no," then how can they validate their comment? The restaurant is almost a totally new place.

The next question is that of the survey's credibility. Firstly, 100 students surveyed out of 16,000 is a very small percentage who disliked the restaurant.

I feel the article was over dramatized and sensationalized. The comment made were unfair and until the writer of the article has sampled the food and service at Sebastian's for herself, an apology would be applicable.

Dyan McL stosha
'A concerned Employee of Sebastian's Restaurant and Cal Poly student'

ASI officer quest begins

Editor

As was reported in the Daily last week, filing for ASI elective offices has begun and will continue through Friday, March 9. Currently, only 12 people have filed for the 23 open Senate positions:

5 Ag & Natural Resources Positions - 1 Person Filed
2 Arch & Environmental Design - 2 Persons Filed
2 Business - 2 Persons Filed
5 Comm Arts & Humanities - 6 Filed
5 Engr & Technology - 0 Filed
3 Human Development & Education - 1 Filed
3 Science & Math - 0 Filed

Any registered student, in good academic standing, is eligible and encouraged to file in the Activities Planning Center - UP 217.

As many people will no doubt recognize, this is an annual problem. It apparently stems from the idea that student opinion does not account for much at Poly. Such an attitude merely promotes such a situation, especially in a place where great efforts are made to hear that opinion. The truth is that the students of Cal Poly enjoy a good working relationship with the faculty and administration of Cal Poly and the city of San Luis Obispo — something rare, as others will attest.

William D. Prigmore
Editor

"You wanted to see me Greg?"

Unless a clear-cut apology is forthcoming, I will and must request that the parties responsible make a serious attempt to develop a restaurant poll that will fairly determine the hierarchy of local eateries.

William D. Prigmore
Protester knows what he's protesting

Editor:
I am one of those people who have been arrested for protesting Diablo nuclear power plant. I know what I'm protesting against, having studied nuclear power and working on an operating nuclear plant as a chemical and radiation control technician for several years. The operation of the plant is not going to be stopped. This whole nuclear industry is neither safe nor economically practical, from mining uranium to building plants to plant operation to disposal of waste.

But we were told public power so cheap that it would drastically reduce our cost of energy has done just the opposite, due mostly to the many unforeseen problems that have arisen. Even ARB has said that rates would go up 10%, to begin as soon as possible.

Starting with the mining of uranium, there are a great many problems. In mining them to a radion into the atmosphere and in the tailings left over. At one time these tailings were thought to be harmless and were used in the production of concrete and used to build W. With the cancer rate increased in the area of these buildings it was discovered they were radioactive and causing this increased cancer rate, mostly thyroid, being one of the most vulnerable areas of the body to radiation exposure. If you don't believe radiation is harmful just look at the definition of a RAR, which is the unit of measurement for radiation. It is an equivalent biological damage caused.

Next is the problem of building plants that are safe and can be operated safely. The list of possible accidents is long and varied, ranging from mechanical failure to operator errors or combinations of both. If your 100% for nuclear power maybe you should do some research. This time do a little digging. You might want to start with The Cult of the Atom by Daniel Ford which goes into the secret papers of the Atomic Energy Commission, NRC's predecessor. The papers talk about concessions made in the safety of plants in order to make them cost effective.

Lastly is the problem of the nuclear wastes remaining after the fuel core has been used up. The state of California is dealing with it being stowed in a bindy. In his talk last week Mr. Watt avoided the question of waste disposal and Mr. Reagan has continued to put off choosing a permanent disposal site.

The people out there protesting Diablo are aware of all these problems and in greater depth than could be put in this letter. Their research has gone beyond library research to find out ALL the facts on nuclear power. That's why we are protesting, getting arrested and speaking out, not to mention other activities such as working on renewable alternative energies.

8th annual Milk Carton Race sponsored by Los Lecheros

by Lisa McKinno

Butt White

Pasersby on Madonna Road Satur­
day afternoon were probably shocked to see a huge black duck floating in Laguna Lake. But they had nothing to fear. The "duck" was the Poultry Club entry in the boat races included in the 8th annual Milk Carton Race sponsored by the Cal Poly Los Lecheros Dairy Club.

The boat race in Laguna Lake Saturday and a Celebrity Float/Boat con­test in the University Union plaza Thursday were planned by the Dairy Club in celebration of Dairy Club Week. Twenty-seven different clubs and organizations were represented in the boat race.

Gino Boster, chairperson of the Milk Carton Boat Race committee and a third-year dairy student, said this was the first year such a wide variety of organizations had participated. More than 200 students and faculty entered along with the usual number of agricultural-related organizations, he said.

Divisions in the boat races included peninsula, boating mechanically powered boats (no motor) and open. The winners in these divisions were, respectively: California Future Farmers of America Divisions, the Poultry Club, the Agricultural Engineering Society and Dance Committee.

Diablo's entry proved sea-worthy, but the best idea that stood must physical education major Jeff Nolan was using to move the boat broke soon after the race began. He made a valiant attempt at paddling with his hands, but the race was lost.

In a second boat, Nolan was given a second chance and a new paddle, and he brought Diablo's entrant to the final stage, which was participated by all the competitors. Bob Cocchieta, a fourth-year civil engineering major and the boat's designer, went on to win first place for Diablo residence hall in the canoe division.

Agricultural Engineering Society's paddle wheel boat was the only boat to place in the mechanical division. "It's a five-year-old design," said Ken Acampora, a senior agricultural engineering student and race participant of the boat. "We entered it just for fun and no one ever competes against it.

Winners received small butter churns handed out by California Dairy Princess Kayra Schaedler. Awards also went out to winners of "Imagination Galore", "The Titanic Award" and "High Carton Count." The Poultry Club placed first in the division with its entry, a top hat black duck, and Ornamental Horse came second in the second place. Floral-decked boat complete with a bunion decorated with marbles. The "Fizzling Award", which goes to participants who sink or are tipped over, was won by California Future Farmers of America. "High Carton Count" went to Or­ginal Horticulture Division. Alpha Zeta took second with 400, and Roes Float took third with 250.

An entry fee of $5 was charged in the races covered the cost of the awards, Boster said.
Country stars make enemies of bluegrass sound

by Shawn Turner

Call it a country music starting point. Or call it a plea from Bill Monroe not to forget him and his music amid electric instruments and country music that is more and more losing its distinctiveness in order to sound like pop.

The only sure thing is that the "Bill Monroe and Friends," the latest release from Monroe, known as the father of bluegrass music, under two generations of country musicians.

Should friends tell you that they're tiring of rock - MTV forbid - and want to listen to country, you might tell them to start with Bill Monroe and work their way forward.

"Bill Monroe and Friends" is just that. It's Bill Monroe and Willie Nelson, Bill Monroe and Barbara Mandrell, Monroe and the Oak Ridge Boys. The album cover has several photographs of Monroe with country's latest stars, like a gallery of photos a business executive might display.

All but two of the songs are Monroe's, and none of them are new. They're classics, naturally - and bluegrass veterans - who know how to sing, which forces these relative greenhorns to accept Monroe's "Bill Monroe and Monroe's terms."

To hear some of the country performers join in four-part harmonies with Monroe isn't what usually they are backed by nearly 300 different studio violins - was a treat. At first I thought, "I didn't know they had it in them," but I realized in most cases bluegrass is

most cases bluegrass is where these performers began.

Hicky Skaggs, for example, knows how to complement Monroe's familiar high, sorrowful wail. Skaggs, who last year dominated Country Music Association honors, knows exactly how to apply guitar-ripping speed to heartbreaking lyrics - the essence of bluegrass. But Skaggs grew up in bluegrass. As part of J.D. Crowe's New South, he helped garner a Grammy last week. Monroe's music is nothing new to him, and he shows the father of bluegrass a little respect.

The same is true of Emmylou Harris and the Gatlin Brothers Band, of whom join Monroe in rich harmonies.

Waylon Jennings fares the worst in Monroe's world. Jennings, whose singing quality is questionable to begin with - he is an Outlaw, and he sings like I imagine Jesse James would - is too gruff in "With Body and Soul" to blend with Monroe's delicate voice. Thumpa-thumpa music from deep Texas doesn't mix with the fast boom-chicka-chick of Kentucky.

But there are some surprises. Barbara Mandrell, who doesn't record unless she is backed by a mega-band, adapts well to the stronger, accoutrements treat-ment of Monroe's "My Rose of Old Kentucky." And Monroe stays in the background on a Johnny Cash composition, "I Still Miss Someone," to let Cash's mournful quavering come clear.

Some of the surprises are disappointing. John Hartford, who wrote " Gentle on My Mind," doesn't sound right with Monroe on "Old Riverman," a piece on which the two collaborated. Perhaps it is because Hartford's Mississippi River-style bluegrass, heavier and slower and full of long ballads, is too slow for Monroe.

Each selection begins with the country performers offering praise to "the man who started it all," Monroe, which makes the album sound like a cross between a testimonial dinner and the impromptu conversations recorded on the Nitty Gritty Dirt Band's historic album "Will the Circle Be Unbroken," which united the Dirt Band with country music's greats. Ironically, Monroe refused to join his contemporaries on that album. Maybe this recording is Monroe's making up for missing all the fun.

To each compliment Monroe says, "Thank you. I'd like to record more of your music." He also says, "I wish he had said it sooner."

Monroe says, "I wish he had said it sooner."

Monroe少 a band as hard-driving as you want a bluegrass band to be, including Gary Scruggs, son of banjo master and former Monroe band member Earl Scruggs, on guitar. Now, if Monroe only had more of a solid bluegrass band of country performers to sing with.
Troop withdrawal pact scrapped

BEIRUT, Lebanon — President Amin Gemayel's government scrapped Lebanon's troop withdrawal pact with Israel on Monday as part of a deal with Syria designed to end the Lebanese civil war.

Gemayel held an emergency session of his Council of Ministers to announce abrogation of the U.S.-mediated pact signed May 17.

"The council has decided to cancel this... accord, consider it null and void and alter everything that may have resulted from it," said a statement from the council, Lebanon's Cabinet.

The Lebanese government also decided to take the necessary steps toward security arrangements that would ensure sovereignty, security and stability in southern Lebanon, prevent infiltration across the southern border and bring about the withdrawal of Israeli forces from all Lebanese territory," the Cabinet's statement said.

The cancellation was a big setback for U.S. policy here. But White House spokesman Larry Speakes said the United States "does not intend to abandon" Lebanon and will keep up diplomatic efforts here.

Mondale nomination not so easy

by Carole Feldman
Associated Press Writer

Walter Mondale conceded Monday the race for the Democratic presidential nomination "could go either way." An exultant Gary Hart moved South, trying to sustain the momentum that swept him to victory in Maine and New Hampshire.

Mondale said his "major mistake" has been not responding to Hart's portrayal of himself as the candidate of the future and Mondale as the candidate of the past: "I took in all those incoming rounds and didn't return any, I got hurt bad."

 Asked earlier Monday if he is still the favorite to win the Democratic presidential nomination, Mondale replied, "No, no, I think it's a tight, close race and it could go either way."

A Boston Globe poll Monday said Hart has a 41-29 percent lead over Mondale in Massachusetts, with Sen. John Glenn third with 13 percent. A mid-January poll gave Mondale 43 percent, Glenn 19 percent and Hart 3 percent. Former Sen. George McGovern, hoping for a strong showing there, was supported by only 4 percent, down from 8 percent in January. The Rev. Jesse Jackson also had 4 percent.

Jackson was in Little Rock, Ark., on Monday, renewing his voter registration drive and attacking Reagan administration policies.

"There's a freedom train a coming, but you got to register to ride," Jackson said three times in a cheering throng of about 500, most of them black, in the rotunda of the Arkansas State Capitol. He met with a consumer group, black leaders, a few white farmers and others in a swing through Arkansas, whose primary is March 17.

Nuke worker dies after collapse

LAS VEGAS, Nev. — One of 14 workers injured when ground collapsed following a nuclear weapons effects test last month has died in a Las Vegas hospital.

Charles Miesz Jr., 56, died about 2:30 a.m. Sunday.

Miesz was admitted to the hospital Sunday afternoon. He was injured Jan. 28 when ground coUapsed following a nuclear weapons effects test at the Nevada Test Site.

An autopsy was to be conducted to determine the cause of death.

West said there have been 23 industrial deaths at the test site since the DOE took over operations in 1963.

Testing began at the desert site in January of 1961. West said no deaths have been attributed to the tests themselves.

Reagan changes arms approach

WASHINGTON — With nuclear arms control talks stalled, President Reagan has authorized a new U.S. approach to the Soviet Union that could break the deadlock in negotiations to reduce concentrations of ground troops in Central Europe.

The United States is consulting with its NATO allies, who also have a big stake in the talks scheduled to resume March 16 in Vienna, Austria, about the president's decision.

Administration officials said Monday the decision is designed to get around a stubborn disagreement with the Soviet Union over how many Warsaw Pact troops are in the area. The two sides have already agreed informally to a common ceiling of 700,000 men if the reductions can be verified.

But they are sharply at odds over how many Warsaw Pact troops are in the region. The Soviets and their allies claim there are about 800,000, while NATO insists there are at least 800,000 more.

U.S. officials, accusing Moscow of "lying about dates," said Reagan's decision would give the Soviets an opportunity to provide new totals without admitting their current figures are off. "It's for them a face-saving device," an official told The Associated Press.

The officials spoke on condition they not be identified.

The mutual and balanced force reduction talks are now 11 years old. They cover active duty ground and air forces stationed in West Germany, Belgium, the Netherlands and Luxembourg on NATO's side, and East Germany, Czechoslovakia and Poland of the Warsaw Pact.
From the nation...

School prayer debate begins

WASHINGTON — With President Reagan pressing for approval and Liberals threatening a filibuster, the Senate began debate Monday on a proposed school prayer amendment that Southern Baptist leaders predicted would be the best chance of passage in more than a decade.

The measure to permit short prayers in public schools, supported by both the Senate Majority Leader Howard Baker Jr. and Sen. Strom Thurmond, R-S.C., chairman of the Judiciary Committee, said: "Nothing in this Constitution shall be construed to prohibit individual or group prayer in public schools or other public institutions. No person shall be required by the United States or by any state to participate in prayer."

The working of the prayer would be up to each local school.

The Senate also is expected to consider rival versions providing silent prayer or a students' individual choice of a prayer.

From the state:

Court denies charge reduction

SANTA ANA — Superior Court Judge Myron Brown denied a request Monday to reduce the first degree murder charge brought against John S. Griffin, 28, of Riverside, who is charged with the beating death of a 24-year-old Riverside man.

Griffin, who was found dead on Jan. 8 near a phone booth in a Riverside Park, was shot and stabbed several times.

Griffin was seen on video surveillance at 2:40 a.m. leaving a Rite Aid store with a younger man. Griffin was wearing a leather jacket and a red cap.

The younger man was positively identified as Griffin's friend:

William Powell dies at age 91

Palm Springs — William Powell, the dapper sleuth of the "Thin Man" movies whose film career extended from the silent era to " Mister Roberts" in 1955, died Monday at the age of 91.

"He was not only filled with qualities of decency," said Powell's biographer Richard Leary. "He had a sense of compassion, humor and modesty about all, and the grace and elegance. That man spread an awful lot of sunshine."

Turlock man burns in shed

TURLOCK — A Turlock man who was killed in a fire apparently had ignitable material in a car he was cutting apart with a torch, a Stanislaus County Fire department spokesman said Monday.

The body of Orson Raymond Griffin Jr., 44, was found after firefighters put out a fire in a metal shed at West Main and Prairie Flower Sunday evening.

A Dodge Charger found partially dismantled in the shed was believed to have been stolen in the 1920s.

Griffin apparently was trapped in the shed by smoke after cutting a torch guard at the scene ignited flammable material, said Ron Moore, county arson expert.

The GOLD CONCEPT, Visit our Studio at 970 Chorro 544-8988
The Cal Poly women's tennis team suffered a disappointing loss this weekend in an important California Collegiate Athletic Association conference match.

The Mustangs were defeated Saturday by Cal State Northridge 6-4, in "the most exciting match of our season," Coach Oriana Yeast said. Going into Saturday's match, both Cal Poly and Northridge were undefeated in conference play. Yeast said he didn't think Northridge was necessarily the better team, but they just happened to get the breaks.

"The match was exciting and suspenseful," Yeast said. After splitting singles matches 3-2, the Mustangs had to win two of the doubles matches. Both the No. 1 and No. 2 doubles teams split sets, but they couldn't hold on to win.

"Losing by one set is not so bad," Yeast said, "and the entire team played well. It was very, very close."

Laurie Moss, No. 1 singles, lost a tough match to Northridge's Missy Conn. Moss lost the tiebreaker in the first set 6-7; came back to win the second set 6-2, but then lost a third set 6-7.

In doubles play, Orachoo and Mimi McAlere, the No. 3 team, won easily 6-2, 6-2, remaining undefeated in conference action. Orachoo and Langenfeld haven't even lost a set this season.

Cal Poly's No. 2 and No. 3 singles, Patti Hilliard and Sally Russell, also lost their matches to tough competition. Russell had three match points in her singles play, but lost to Shari Ryan 4-6, 6-2, 6-7.

Hilliard was optimistic about the season even though she lost her match to Northridge's Lara Boroi, 6-4, 6-1.

Kathy Orachoo, No. 4 singles, Nancy Allison, No. 5 singles, and Mary Langenfeld, No. 6 singles, each garnered wins from Northridge.

Allison, who lost match 6-2, 6-2, said, "these girls are consistent, and the match was tough." She said though she didn't play outstanding, "I feel like I am playing consistent," adding that the season is going really well for the team.

"Orachoo, Allison, and Langenfeld are all undefeated in conference action. Orachoo and Langenfeld haven't even lost a set this season."

In doubles play, Orachoo and Mimi McAlere, the No. 3 team, won easily 6-2, 6-2, remaining undefeated in conference action. The No. 1 doubles team, Moss and Hilliard, didn't have such good fortune. They split sets but were defeated by Moss and Ryan 16-8, 7-6, 3-6. Russell and Allison also had a close match, splitting sets but losing 6-4, 6-7.

Cal Poly's No. 1 and No. 2 doubles and the Mustangs will beat everyone in the conference, and Cal Poly can beat Northridge when they meet again in April, then the Mustangs would get the bid to the nationals.

"There is a tie for first place," Yeast said, "the matches that are at the end of the season will go to nationals."

The Mustangs, now 4-1 in conference play and 9-4 overall, host Cal State Bakersfield March 8 in another CCAA match after taking on Westmont today in a nonconference contest in Santa Barbara.

---

Records tumble for gymnasts

by Kathy Messenger

Most of Poly's women's gymnasts had a good first weekend at the NCAA 5-Division I western region meet Friday and Saturday.

The Triangular meet, held at the University of Arizona, featured the school record. MccAllister was third with an 8.85, Siemiorno Morimoto and Teryl Thies with identical scores of 8.05, and Cathy Pagani with a 7.8.

Next, on the uneven parallel bars, Poly was able to raise their team score to see who would win.

On the vault, Lisa McCAllister placed fourth with an 8.45. Other Poly scores were Jana Lehman with an 8.15, Kasumi Morimoto and Teryl Thies with identical scores of 8.05, and Cathy Pagani with a 7.8. After a short start Poly was down by two points. "The scoring was low on the vault and we really didn't do our best on either of the two events," said coach Tim Padgett.

Starting on the third event, the balance beam, Poly was senior Pam Dickie who displayed a clean and solid routine. When the score went up Dickie had tied the highest score of the evening and broken the school record with a 9.15.

In the rankings Norimoto was first, Dickie was third and Lehman was third with a 9.0 despite one fall. Other scores were Pagani with an 8.75 and Thies with a 7.6.

Poly also broke the school record on the beam with a team score of 45.05. Fourth up on the beam was senior Norimoto who performed a personal best and broke the school record for a second time by receiving the highest score of the evening, a 9.45.

In the all-around scoring Norimoto came in second with a 34.95 breaking the school record. McCAllister was third with a personal best of 34.6. Lehman was fourth with an 33.85. Other all-around scores were Pagean with a 31.3 and Thies with a 31.10.

Poly will travel to Pomona this weekend at the Pomona Invitational. This will be the last chance for Poly to bring up their scores and make it to regionals. Poly is still ranked fifth in NCAA Division II western region.
