Determined to help disabled guests get into the stadium, the Evac-Chair was developed a few years ago at Cal Poly. (The Evac-Chair is shown being loaded onto the bus in this undated photograph.)

### New Rec facility idea in the works

**by John Bachman**

The proposed $12 million recreation facility failed in last week’s election by a margin of 15 percent, and both those in favor of and against the facility said they will work on a new facility idea.

“Several of the students who organized the op­position have indicated they feel we need more recreational facilities,” said Activities Plan­ning Center Director Ken Bardy. “They want to sit down and look at the possibility of an alternative recreation facility which would be less expensive.”

Students would have paid $90 a year for the pro­posed $12 million facility, and those opposed said they are relieved this facility didn’t pass, but will look into other possibilities. “I naturally am glad it failed,” said Cam Bauer, a past student senator and one of the leaders of the campaign against the facility, “I think it is an unfortunate situation with our poor facilities. The construction costs are too high. It is a matter of the lesser of two evils.”

But the voting went well, said election committee member Bill Taylor. So far no one has contested the election. “We expected a larger turnout than we ac­tually got. Everything went well.”

Almost twice as many students voted the first day as voted the second. Thirteen percent voted the first day and seven the second, and Taylor said that might have been because of the recreation center.

“Everyone was pretty hyped up over the Recre­ation Center issue,” he said. “They went out and voted the first day.” He said the second saw the scrappers voting.

Twenty percent of the student body voted, with 74 percent voting to change the bylaws. Taylor, who worked on the new bylaws, said the revisions were needed.

“I was happy they passed. I think it is a good revision, and it will be useful for the coming years.”

While most of the bylaw changes will be an im­provement, Dave Chapman, who has been involved with student government three years and worked on the bylaws, said he did not like the way the com­mittee handled the changes.

“I think there are some bad faws,” he said. “I was upset with the whole procedure. I really didn’t like the whole thing. I was happy they passed, but I was really disappointed.”

Because of a lack of time, the elections informa­tion handout had four pages of changes stapled on to the back, and Chapman added that the senate didn’t discuss some of the changes, before putting them in the election package.

“There are holes and gaps and problems,” said Chapman. Many of these gaps make the bylaws ambiguous and not as effective as they might have been if prepared more carefully, he added.

On graduation day the DSS office will be open from 10:30 a.m. to 2:30 p.m. Loading wheelchairs and giving information to disabled people will be available at the Multicultural Center. Twenty percent of the student body voted, with 74 percent voting to change the bylaws. Taylor, who worked on the new bylaws, said the revisions were needed.

“I was happy they passed. I think it is a good revision, and it will be useful for the coming years.”

### Disabled get own parking

**by Karen Eilchman**

Disabled Student Services will arrange special parking and seating for handicapped and elderly guests at Commencement 1984 said the DSS coordinator. Harriet Clendenen explained that arrangements must be made by June 1 at the DSS office in the University Union.

The C-4 parking lot northwest of Mustang Stadium, where commencement will be held, will be reserved for handicapped parking, she said. Trams will run from the lot, to special seating on the stadium field.

The DSS will issue free parking stickers and seating tickets for disabled guests. However, Clendenen emphasized, guests must also have regular commencement tickets.

“Students can’t get grandma in without a regular ticket too,” she said.

Disabled students and staff at Cal Poly now have a safer means of evacuation from buildings in case of emergencies, said the coordinator of Disabled Student Services.

Harriet Clendenen said the university purchased an evacuation chair which can be operated by one person to carry handicapped people down stairs.

“During the last power outage (March 1, 1984),” said Clendenen, “a student had to be carried down from the second floor of the Business Administration building in a 200 pound electric wheelchair.”

The Evac-Chair, developed a few years ago and purchased by the University in April, eliminates the danger of a disabled person being dropped by a rescuer, Clendenen explained.

Made of aluminum tubing and with a vinyl bucket seat, the chair uses a braking and traction system to transport people down steps. Guided by one person, the chair slowly descends by gravity and friction in proportion to the passenger’s weight.

Previously, said Investigator Lee Parrinello of the Public Safety Department, it took two to four people to evacuate a disabled person.

The Evac-Chair, valued at $600, was bought with money from a special chancellor’s fund for disabled students, the U.S. Public Safety system. The chair’s use is limited to Cal Poly employees however, Clendenen said.

“There are three permanently disabled staff, seven permanently disabled students and 80 to 90 temporarily disabled people on campus at any given time,” she said.

However, the chair cannot move people weighing more than 250 pounds or having certain mobility impairments such as broken bones or rigidity.

“No one on campus at present has one of those disabilities,” said Clendenen. “If some one did he or she would have to be carried to safety.”

### Students get their ‘chair of help’

The Evac-Chair, valued at $600, was bought with money from a special chancellor’s fund for disabled students, the U.S. Public Safety system. The chair’s use is limited to Cal Poly employees however, Clendenen said.

“There are three permanently disabled staff, seven permanently disabled students and 80 to 90 temporarily disabled people on campus at any given time,” she said.

However, the chair cannot move people weighing more than 250 pounds or having certain mobility impairments such as broken bones or rigidity.

“No one on campus at present has one of those disabilities,” said Clendenen. “If someone did he or she would have to be carried to safety.”

Editorial: Red Cross praises volunteers for year's indispensable efforts

Reader: At the school year draws near to closing, let me bring your attention to the excellent volunteer service of three Cal Poly students. Michael Schwartz of San Luis Obispo, who was recently appointed as chairperson of the SLO County Alcoholism Council, representatives of Mothers Against Drunk Drivers and French Hospital, together to discuss the problem, is a major breakthrough.

The Mothers Against Drunk Drivers are very active in trying to educate the members of our community to the seriousness of this problem. They take an active part in victim rehabilitation and trial proceedings of drunk drivers. French Hospital has organized a Chemical Dependency Recovery Program. This program will provide medical treatment and rehabilitation services not only for the alcoholic but for the whole family.

We, as another student, should be frustrated, angry, and motivated too. According to Arad, the number one health threat to people between the ages of 16 and 24 is being in an accident involving a drunk driver.

Solving the problem of drunk driving begins with the individual. Taking responsibility for your actions, which include drinking, is a big step. Realizing when you've had too much to drink and deciding not to drive is the next step. Recognizing the signs that you've had too much to drink is a good start. If you notice your friend has had too much to drink, take away their car keys and offer to get them a ride home. They may get a little angry at the time. But having a friend mad at you for a night sure beats having to visit them in jail, or even the hospital the next day.

Finance budgeting process frustrates, pushes councils towards mediocrity

Editor: Well, there you go again, striving for mediocrity. I found this year frustrating because of the shortcomings of a few Finance Committee members. It seems that the Finance Committee wanted all seven of our student councils to be exactly the same, regardless of our different wants and needs.

This idea of equality was taken so far as to regulate the councils in line item by line item, checking to make sure that they had similar dollar amounts in their budget which were not being cut in a more cut-and-dry approach to budgeting. They even went so far as to tell some councils that they were striving for the wrong goals and needed a budget of their own.

Of course, they never consulted the Senate Codes and Bylaws Committee about this, they never consulted the school councils themselves, nor did they consult with the students at large or the faculty, or anybody. They just decided that they would take it upon themselves to reinterpretable goals and purposes of our school councils and cut or add to the council budgets without regard to what those councils wanted.

That's just great, the Finance Committee wants to go beyond balancing the benefits and costs of groups against each other, to actually determining what those groups goals and purposes are.

Even more outrageous than that is the Finance Committee's goal to make everybody strive for mediocrity. While trying to make all seven councils' budgets the same, they choose to make the least effective group standard and the School of Architecture was to have several highly qualified students working on the budget for no other reason than that the other councils didn't do those kind of things. The Finance Committee doesn't like it if you do too good a job.

None of these conscientious Finance Committee members bothered to point out which shoes they cut from our budget and totally disregarded all comment made by our interim dean (Former Mayor Schwartz of San Luis Obispo) who took the time to go up and explain the valuable nature of the events they were cutting. They cut our existing budget by more than 40 percent. They figured that they were more qualified to know what is best for us than any group of our students, faculty, or administrators.

Interestingly enough, upon presentation of the budget to the Senate after the 40 percent cut in School of Architecture funding, two other school council's budgets were up for a similar sort of things that the Architecture council was doing. In fact, we were asked for advice about our events and our former budget was used as the role model, dollar for dollar, by the School of Business council and the Communicative Arts council.

Of course, we don't all have to do exactly the same things. If the Agriculture council sees no opportunity and need for their students that is different than what we see for our students. Let them fill the needs of their students.

All of our students benefit by allowing all of our students some freedom in what they want out of their ASI fee. Let the students learn by doing. The Finance Committee doesn't want us to have any say in how we spend the money that is ours to begin with. Let them change the Finance Committee, not the students.

William E. Zeller
Finance Committee Rep.
School of Architecture and Environmental Design

Committee begins interviewing

Editor: The ASI Finance Committee will begin interviewing prospective members on Monday, May 14, at 7 p.m. in the UU Room 220.

The committee, which oversees the ASI's $1.3 million budget, has been plagued by a lack of funds this year. They are trying to find a way to provide more funding for the Student Services and the School of Agriculture and Natural Resources and two spots open in the School of Architecture and Environmental Design. Representatives are also needed for the School of Education and the School of Science and Math.

Applications are available in the UU Room 217A. Final interviews will be conducted May 21 at 7 p.m. in the UU 220.

For more information contact ASI Committee Chairman at 546-1291.

The button that the left hand hits turns off the buzzer and the amount of time it took to respond to the noise and the time it takes to go from one button to another are recorded. The button that turns off the buzzer is moved to another position on the table and tested five times in each spot.

"We want to know if it is faster to move in front of the body or further back."

Saghat said Saghat said that it is not hard to find subjects for the light discrimination apparatus test.

"We ask people in class and in the halls if they would like to do an experiment in the dark," Saghat said.

The purpose of the test is to see whether a subject can discriminate light intensity by matching one spot of light with one that is constant.

Saghat explained the test applies to equipment operators who can use a light intensity system in case the numbers they need to make decisions are off.

IE major Brian Boone said he used this project in a hand grip experiment that tested his hand's grip strength at different work speeds from the body.

"I kind of know what they the students are talking about. It was understandable because I have to take the class," Boone said.

He added, "I can see how it will help with work. You don't want to be too bored."

The test will improve and increase productivity.

As instructor of the human factors course, Dr. Rosa Pouraghabagher said the purpose of the course is not to come up with perfect experiments, but to emphasize the need to investigate certain factors that may cause difficulties in living or work environments.

Before Pouraghabagher began teaching at Cal Poly in 1970, he received a General Motors grant to analyze the dash design of their compact car.

"When we are on a crowded highway, on the average, there are three major decisions per second to be made. The location of the car in the lane, speed and direction are some of the criteria for decision making. If we take our eye off the windshield to look at a confusing control panel, we are apt to have an accident very easily," he said.

When designing a product for consumer or manufacturing use, Pouraghabagher said all principles of human factor design should be incorporated at the design stage.

"After a catastrophic error, people come back and say it was a basic human factors error that should have been seen," Pouraghabagher said.

In addition to safety, product maintenance is another factor overlooked by manufacturers, according to the results his students found.

Pouraghabagher said all principles of human factors originated in military application, they are now considered in the high technology area and for designing handicap equipment.

New theater premieres movie options provided

by Rebecca Prough

At times it seems like there is nowhere to go and nothing to do in SLO Town on a slow night. There are still the movies—they've been around for about 70 years and are still going strong.

The problem is that in San Luis Obispo there are only five or six alternative choices of movies to see; but now there is a new theater and another option.

The Log Cabin Theater on Broad Street at El Capitan Way (near Tank Farm Rd.) is San Luis Obispo's newest movie theater, offering more current movies and artistic films.

The Log Cabin Theater opened May 4 after being completely remodeled including a fresh paint job and newly paved parking lot. The theater used to be Station 51, a dancing spot for the under-21 crowd.

Theater manager Sherri Merriman said the theater is showing current movies to begin with and it will probably show artistic movies.

"We are still trying to decide what types of movies will be shown," said Merriman. "We'll wait and see how it goes, and meanwhile we will work on getting all the bugs out that go along with opening any new establishment," she added.

The Log Cabin Theater is charging a $3.50 general admission rate and showing five shows a day, usually at 7 and 9 p.m. It will also show weekend matinees beginning sometime in the next few weeks, Merriman said.

The theater will show a new movie every week unless the movie plays twice. In which case, it will be held over. According to Merriman, the theater is comfortably air conditioned and seats 291 people.

The other theaters in town don't seem to be worried about any serious competition from the new theater.

Jeff Harrington, manager of the Madonna Plaza Theater, said the Log Cabin is not a threat because it is showing second-run shows.

"They are not nearly as much of a threat as the Festival Theater, which will open in Arroyo Grande in a few weeks," Harrington said.

The Festival Theater is part of a major chain and will be showing first-run films directly competing with the Madonna Plaza Theater, he explained.

Sallie, assistant manager of the Fremont Theater downtown, also said the new theater wouldn't hurt their business.

"When we asked them what the plan is, that's all we know," she said.

Currently, the Log Cabin Theater is showing Alfred Hitchcock's "Raor Window."
Outdoors
It may be tiny but little Harmony charms visitors in a big way.

Story and photos by Julie Rach

A half hour north of San Luis Obispo is the scenic little town of Harmony.

Located on Highway 1, Harmony is about a block long and has a population of 18.

But don't let its small size fool you. There's quite a bit to do and see in Harmony, more than you might expect in such a small area.

Browse through the silversmith's shop, examine the art gallery, wander through the pottery shop, pause for a moment of meditation in the chapel, dine at the restaurant—in short, relax and enjoy the pleasures this small town has to offer.

Harmony is the perfect get-away spot, either alone or with friends. It's just far enough away for you to forget about the bustle of college life, but not so far that the drive is a killer. It's also a great place to take family or friends from out of town, particularly those who enjoy exploring out-of-the-way places.

Opposite page: The Harmony Chapel. This building stands out in a town that boasts a booming population of 18.

Overlay: The tiny town of Harmony, complete with an old-time saloon.

The Cal Poly rodeo teams won again at Pierce College. It was the men's sixth victory in as many outings.

Rodeo teams 'stuck' in winning routine
by Michael Marter

It is no wonder the Cal Poly rodeo program attracts the top cowboys and cowgirls from all over California—and beyond. Of course the practices are tough and the traveling is grueling, but the rodeo pre-dawn routine is a routine of winning, that is.

This weekend the Poly riders traveled south to Pierce College in Woodland Hills and rounded-up wins for both the men's and women's teams.

With a total of 450 points, the Poly men outdistanced Pierce College by 80 points and Hartnell College of Salinas by 160.

Total points for the Poly women added up to 270 with the consistently tough team from Merced College gaining 250 and West Hills College 166.

Laurie Warburton of Las Vegas dominated women's all-around with 215 points, leaving Tootie Miller of Merced College in the proverbial dust with 120. Kelli Davis of West Hills College was third with 110.

Warburton won the breakaway roping event and placed second in goat tying. Her consistent finishes in both the first and second go-rounds of both events vaulted her to top women's honors.

Teammate Wendy Monchamp placed fourth in barrel racing and Cal Poly Rodeo Club member Leah Garcia took home third spot in breakaway roping.

Allen Gill of Cal Poly placed second in men's all-around to Jack Arroyo of hosting Pierce College. Gill picked up third in calf roping, and first and second in team roping, teaming-up with Matt Engelhart and Rich Rice, respectively.

Tony Currie, a junior transfer from Blue Mountain Community College in Oregon, placed second in both calf roping and steer wrestling to gain third place in men's all-around.

Jim Daniel of Williams and Brian Rossen, a senior from Marysville, placed first and second for the Poly riders in the saddle bronc event with Craig Root placing fourth behind Wade Denzy of Pierce College.

Troy Ellerman of Alturas tied for first place with Mel Bowman of Hartnell College in bull riding with Dan Campbell of Cal Poly close behind.

Erik Johannessen of San Luis Obispo tied up first place in steer wrestling, ahead of Tony Currie, Jack Arroyo of Pierce College and Steve Nilmeyer of Cal Poly.

Track team loses despite good marks

by Karen Kraemer

The Poly men's track team fell to three adversaries at Cal State Northridge, Cal Poly Pomona and the host the past few weeks, despite three lifetime beats and yet two more national qualifying marks.

Cal State Northridge, Cal Poly Pomona and the hosts pushed the track team into third place finish in the CCAA track and field championships.

The lone victory for the Mustangs belonged to jumper Victor Torres. Competing in his first long jump competition of the season, a leap of 23-6 3/4 gave Torres the conference title. The junior also placed third in the triple jump with a lifetime best of 50-10.

Victor Torres' victory was marred by teammate Steve Thomas' accident in the long jump pit. The pole vaulter was entered in the event to score team points but instead gained an injury which could possibly keep him out of the national meet.

"Thomas is unquestionably one of the most team-oriented individuals on the squad," said coach Ron Henderson.

Jim Haller, placing in all three of his throwing events, threw the hammer 173-9 to become national material. Haller threw fifth in the conference meet and pushed him to third on the all-time list.

The 400 meter relay also qualified with a time of 41.40. Erik Josephson (who has already qualified in the sprint, hurdles) Dru Uter, Kevin Pratt and Jeff Gardner made up the second place combination.

Although Matt Blaty, a distance runner on Cal Poly Pomona, won both the 1500 and 5000 meters, Cal Poly's Hector Perez finished both races on Blaty's heels. Blaty outdistanced Perez in the 1500 meters finishing in 4:49.60 with Perez blowing in on 4:49.64. Perez also finished third in the 8000 in 15:22.16. Those times were personal records for the senior.

Sophomore Jim McCarthy also scored points for the Mustangs, finishing fifth in the 1500 (5:51.60). In the 110 high hurdles, senior Brad Underwood placed second and ran a lifetime best of 14.55 behind Northridge's Steve Roberts. Underwood came back later in the day to again place second in the 400 intermediate hurdles (53.18) while teammate Mark Dau ran a 53.79 to take the fourth position.

Freshman Jeff Gardner, in his first open 400 meters of the season, ran an impressive 48.05 to place third.

Three sprinters, Dru Uter, Kevin Pratt, and Erik Josephson, qualified for the NCAA meet. Pratt placed second in the 200 meters but Josephson was the sole point scorer finishing sixth in the 100 with a lifetime best of 10.79 and taking third in the 200 (21.84).

As the Saturday meet came to a close, the men's 5000 began. Starting at the back of the pack, freshman Dave Livingston slowly worked his way to the front, finishing in the fifth scoring position and proving himself according to Henderson as "the toughest of the SLO men."

Said Henderson, "Dave did an outstanding job—even more impressive under the existing conditions."

Running a tough double; 3000 steeplechase and 5000, was freshman Dave Basinger. Basinger finished fourth on Friday in the 3000 steeplechase with a personal record of 9:38.4.

Other point scorers for the Mustangs were Steve Strangio and Ken Ellingboe (fourth and fifth in the 10,000, Loren Diaz (sixth place in the javelin), Mark Langsan and Anthony Mudry third and sixth in the high jump.

"Approximately 50% of our points were scored by underclassmen," he added.

Cal Poly trackman Dave Basinger aided the Mustangs with their third-place CCAA finish with his own fourth-place finish in the steeplechase.

Mustangs sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifier in the 100, Mason, a leap of 23-6 3/4 gave Torres the sectional qualifying marks.
Chris is good news.
