103 arrested at rally after NRC OKs Diablo start-up

Some 600 protestors gathered at the gates of Diablo Canyon on August 12, less than a week before the nuclear power plant is scheduled to start up.

The Nuclear Regulatory Commission voted 3-1 last Friday to allow Diablo to operate at full power.

Officers made 103 arrests during the day-long action at Diablo Canyon, a rally organized by the Abalone Alliance, which featured speakers and music.

The people of San Luis Obispo County and California will not give up the struggle to keep their environment safe, said Donna Hofstra, right, of the Abalone Alliance.

Diablo must be shut down before it melts down, said Marion Mellow, former mayor of Pismo Beach.

"Our policemen must protect this devil's plant, but who will protect our children should its radioactive cloud cross the blue property line?"

The plant's first reactor could begin operating as soon as Friday at 3 p.m.

However, Mothers for Peace has filed an emergency petition with the U.S. District Court of Appeals in Washington asking for an injunction that would stop the reactor from starting up.

Mothers for Peace, along with other area groups, filed a 101-page brief which claims that if Diablo is allowed to operate, their rights will be violated under the National Environmental Policy Act, the Atomic Energy Act, the Administrative Procedures Act and the rules of the Nuclear Regulatory Commission.

This latest action by Mothers for Peace is but one in a series of problems that have plagued Diablo Canyon in its 21-year history.

PCoF originally chose a site at the Nipomo Dunes for its power plant in 1963. At that time, Diablo was expected to begin operation in 1971.

However, motherboards and environmental factors played a major role in the 1970s. Questions about the plant's ability to withstand earthquakes were raised as early as 1970.

In 1974, 200 abalone were found dead off the coast at Diablo. PG&E officials speculated that the animals were disturbed by tests of the plant's cooling system.

Licensing hearings began in 1976. An interim license was granted in 1977.

The pump failure at Three Mile Island in 1979 saw the number of anti-nuclear groups in San Luis Obispo County grow. Mothers for Peace, People Generating Energy, and the Abalone Alliance are joined by Concerned Citizens and the Seaside Survival Group, among others.

PG&E originally chose a site at the partner Dunes for its power plant in 1963. At that time, Diablo was expected to begin operation in 1971.

Proposition 19, the Fish and Wildlife Enhancement Act of 1984, earmarks $50 million available for local agencies, state parks and wildlife protection efforts in the county.

Marty Wheeler, one of 103 arrested, gets hauled away by sheriff's deputies at the Diablo nuclear protest Sunday.

Bond acts mean money for recreation

by Jean Linsteadt

When the heat rises, Cal Poly classes often shrink as students rush to enjoy the beaches, parks and recreation areas around San Luis Obispo.

And now students have a chance to help improve the hot spots.

San Luis Obispo's County Department of General Services is asking residents to submit their wish lists of ways to enhance parks, recreation areas, beaches, historical sites and wildlife protection efforts in the county.

Money for the improvements is available as a result of the passage of Propositions 19 and 18 in June.

San Baxter, the county recreational services manager, said both propositions make approximately $222.5 million available to local agencies throughout the state for the acquisition, development and rehabilitation of parks and outdoor resources on a competitive basis.

In past years, bond acts passed by the voters have allocated a specific amount of money to each county, said Baxter. But now the state will compare the requests of all regions to see what the needs of each area are.

Proposition 19, the Parks and Recreation Bond Act of 1984, makes a total of $370 million available for local agencies, state parks and wildlife protection efforts.

Proposition 18, the Fish and Wildlife Enhancement Act of 1984, earmarks $80 million available for local agencies, state parks and wildlife protection efforts.

Please see BONDS, page 3 for more information.

PG&E, nuclear information specialist Frederick R. Draeger reported that Diablo was built to handle the greatest earthquake that could occur. Also in 1973, the Hoskins fault (named for Shell Oil geologists Ernest L. Hoskins and John R. Griffith) was first detected.
DMV does business on appointment basis now

by Kevin H. Fox

Students are urged to participate in a new phone, mail and appointment program at the Department of Motor Vehicles.

Luis Castagnetto, office manager of the San Luis Obispo branch, said that the new program is designed to reduce customer wait time at DMV offices.

The new appointment system went into effect August 6 at the DMV's 154 field offices.

Customers are required to call the office to set up an appointment Castagnetto said.

Two full time operators will wire calls to determine if the transaction can be handled through the mail. If it can't, a check list will be mailed to the customer to fill out before going to the DMV office.

Appointments are made within a five to seven day time limit for standard transactions. Emergency schedule slots are available but Castagnetto said "everyone emergency isn't always a real one. Waiting customers will still be served but not as completely as if they had an appointment Castagnetto told the Summer Mustang.

The telephone number for the San Luis Obispo DMV office is 543-5626.

1 million to add to the protection and enhancement of wildlife, wildlife habitats and fisheries. The bond will be administered by the Coastal Conservancy and Wildlife Conservation Board.

KINIA, which has been a member of the Emergency Broadcast System for 22 years, said their switchboard is up 24 hours a day, seven days a week.

The number of sirens were increased to a total of 126 said Hobson. In the event of an emergency within the Oceano-Dyker area the sirens will sound. This signals the public to turn their radios to KHEI 920 or KIWA 1460 for further details.

People may not realize that the sirens are used for any type of emergency, not just an emergency at Diablo, Hobson said.

Each county in California is required to have an emergency response plan, which the Nuclear Regulatory Commission and the Federal Emergency Management Agency require to be validated by the counties, said PG&E.

People really need to listen to the test Hobson said. If the people in the surrounding areas don't listen to the test, the people in the San Luis Obispo area who are monitoring the test won't either.

Several people were interviewed after the test and Hobson said they also didn't listen to the test.

"One thing I do know for sure is that each county is guaranteed $200,000 automatically as a result of the bond act, added Bassett.

Western suggesione should be mailed to the Department of General Services. County Government Center, Room 400, San Luis Obispo, California 93408. Bassett said comments from residents must be received by 22, 1984 to meet the grant request deadline in November.

PG&E tests sirens; public remains calm

by Kim Miller

The annual emergency sirens tests have become a way of life for county residents who responded favorably to the test held August 17.

The siren check was marked by a calm public and working sirens throughout the county and Pacific Gas And Electric spokesperson Susan Sacarra said.

Last year two out of over 80 sirens malfunctioned, but this year only one siren failed to sound. The number of sirens has increased to a total of 126 said Hobson.

HFA not just for women

By Patti Winkleblack

Staff Writer

One focus of society today is to do away with the remaining preconceptions against opportunities including women. The women's movement has stirred another basis into the background which is equally disturbing to its victims.

While it is true that women have plunged into work and areas that were once thought of as men's, do men feel welcome or comfortable about entering the fields that women have dominated in the past?

Those people who have been dressed in red, white and blue and are visiting Cal Poly recognize the lack of representation of men in their organization. They are the Future Homemakers of America. Homemakers Related Occupations, who hold their annual Regent Officers Conference at Cal Poly.

We want to change the image of the homemaker. We want to change the stereotype of the homemaker. There is a girl from Fallbrook, California. She is a 16 year old high school senior, feels that their organization is well accepted by the state and female students all over the school in Fresno.

We have six girls in our Fresno chapter who are enthusiastic about our program. Said Valerie FHA-HERO has a membership of about 3,400 in California. It is the largest second largest secondary national vocational student organization behind Future Farmers of America.

FHA feels that men need the skills taught in home economics as much as women do.

It's a way to take what you learn in class and put it into real life. Said Stephanie. It's practical.

Through FHA-HERO students can learn the skills such as public speaking, written communication and parliamentary procedures which are vital in the professional world.

We emphasize competitive events and leadership training in FHA-HERO.

She also feels that the occupations sought by home economics students could not be held as successfully by those without a home economics background.

Poly health services aren't just for the sick

by Pattie Winkenblack

Cal Poly Student, Health Services has more to offer than service to the ill. It also promotes positive, preventive health behavior among healthy students through the Peer Health Education programs.

Under the supervision of the health educator, about 50 students instruct their peers on nutrition, alcohol education, family planning, oral health and sports medicine.

Health Educator Pam Sheppel is in charge of the Peer Health Education at Cal Poly.

"It's one woman organization," said Director of Student Health Services Dr. James H. Nash. As Health Education, Sheppel supervises the peer health educators, trains the groups with the information and instruction in their fields, and chooses the students who will participate in this program.

The Peer Health Education group is one of "students helping students," said Nash.

The group monitors their success through their popularity with the programs they offer. Last year they reached 5,659 students directly through these programs.

"People trickle in for help after the programs," said Nash.

This is one tangible way the Health Services can see the success of the peer educators.

As Peer Health Educators, students work through the departments in their majors and receive credit for their services. These students conduct seminars, workshops and special events, such as, Health Yourself Week which included a Fun Run, a seminar by Jack La Lane and presentations on such topics as how to eat healthy on a limited budget. All of these various programs are designed to help students maintain healthy lives.

"Some of the information is pretty complicated," said Nash of the material the peer health educators present to other students. "There was some doubt in the beginning as to whether the educators could present the information successfully and clearly.

Since this time the students have proven to the Health Center staff that they can present good information with responsibility.

Cal Poly Student Health Services seeks to support the students attending this university by minimizing illness through preventive medicine. The peer health educators are a major part of this task.

The total number of patient visits to the health center has decreased since last year along with fewer after hour visits. This could mean that the preventive measures are successful.

In addition to the programs already available, the center in planning on expanding the peer health education programs.

Drug abuse programs, other than alcohol, is in the planning stage.

Students are encouraged by the staff of Student Health Services to visit the health center for reasons other than illness. They offer a lot of informative and interesting tips to reduce injury, illness and stress while going to school.

Impacted programs aren't necessarily so

by Chris Counts

Many impacted programs at Cal Poly are not oversubscribed, but rather, oversupplied to the use of a more extensive entrance evaluation system.

"All impacted means is that the student must file his application prior to the filing deadline. With a more extensive academic program planner at Cal Poly," said Nash.

For a program to gain impacted status based solely upon its oversubscription, Nash explains, "It must exceed by two times the number of students who are not oversubscribed. They differ from a program that is not impacted in that students must meet a filing deadline and submit an official secondary application.

Mark is concerned students assume that when a program is impacted, it is also over subscribed.

"We're very much concerned about the negative publicity," Mark said. "When students are told Cal Poly is an impacted campus, they may choose not to even bother with applying, even if this school is their top choice.

Faculty recruiting is main goal

by Julie Rach

Recruiting faculty members is a high priority in Business Administration for next year, said the interim department head in an interview Tuesday.

Dr. Dan Bertozzi was appointed interim department head by President Baker. It is a post he will hold until June, 1984.

"We've been recruiting faculty for the last four or five years," said Bertozzi, who is still involved in sales and marketing. The demand for people in these fields is high nationwide.

Business Administration will also be looking for a permanent department head, said Bertozzi. He took the job, "to get some administrative experience in addition to teaching.

Being department head means cutting back on teaching loads," Department head is half time ad

ministrative, half time teaching," said Bertozzi. He will continue to teach one class a quarter and supervise senior project.

The entire School of Business will be preparing for reaccreditation in 1985. It was last accredited about four years ago, said Bertozzi.

"This year, we'll be preparing for reaccreditation. We're planning a new board of directors who will be the accrediting board.

We've now heard four distinctly different approaches on taxes," Ashbaugh said. "It's stick around and see what the wind blows."

The new Poly student and state Vice Chairman of the College Republicans, Brian Perry, thinks Reagan gained ground because of the taxation controversy.

"Reagan said he would veto any legislation raising income taxes," Perry said. "That's the bottom line and it's good enough for me. It's no surprise that Mondale would raise taxes, but I think a person should have expected that."

Perry, a senior political science major, will attend the convention along with 11 other current and past Poly College Republicans.

The group will be part of a California Youth Delegation, which, among other things, will meet with Gov. George Deukmejian's advisers on state reapportionment plans.

Perry thought the platform would be "agreed on" before the convention begins, and that GOP liberals and moderates would be able to accept the plank on taxes.

The county's Republican Central Committee vice chairman said Reagan still leads Mon

by Michael Finucane

Joking about bombing the Soviets, Union didn't last.

Party infighting over tax, a family woman vice presidential challenger, and the "age factor" have also hampered President Ronald Reagan's re-election campaign.

But not 'many are betting on Mondale-Ferraro.

A Harris Poll last week put Reagan up nine points over Democrat Walter Mondale, and that edge will likely increase after the Republican National Convention begins Monday in Dallas.

Inflation is down, unemployment and interest rates have settled to manageable levels, and Wall Street just ended a record summer rally. Most Americans believe the economy is strong, and largely credit Reagan with its recovery.

The one big fiscal problem that nags at the Republicans is the $1,800 million budget deficit - the largest in the country's history. Breaking up that red ink is imperative, both parties agree, but how to do it that has created the election's greatest controversy.

After accepting the nomination at the Democratic National Convention, Mondale urged a new realism. "It's a one woman organization," said Director of the plan (the plan) made people think

The group will be part of a California Youth Delegation, which, among other things, will meet with Gov. George Deukmejian's advisers on state reapportionment plans.
Public polls: what do they really measure?

Michael Deaver admitted his "methods" differed at Cabinet, meetings, but he said it was the nature of the business. "You can never tell. You don't have the president's age to blame . . . Critics point to numerous cancellations and the many vaca­
tions at his Santa Barbara ranch as evidence of Reagan's increasing isolation.

Besides finding those who say he's too old. Reagan must also ward off the attacks of Geraldine Ferraro, who campaign­
ed in California this week, and lashed out at the President as be­
ing weak on crime, among other things.

A debate between Bush and Vice President Bush has been planned, and Republicans hope the forum will show both Fer­
ro's foreign policy inexperience, and her liberalism.

by Jeff Blizard
Special to S酝酿 Morning

Public opinion polls are snapshots of people's atti­tudes and political preferences, the survey shows a candidate ahead of his opponent, then people have an established political ideology, and are not af­
ished with polls. Those who do, he says, are "political junkies."

George also differs with a Louis Harris poll that showed Mondale gaining two percentage points with the selection of Geraldine Ferraro as his running mate.

George said that the number of people polled, 1,006 registered voters, was not nearly enough for an accu­rately ranked sample. George also disagreed with a Louis Harris poll which showed Mondale gaining two percent with his selection of Geraldine Ferraro as his running mate.

"It would not surprise me if the Ferraro factor did not help Mondale at all," he said.

Many political experts believe that Ferraro will not help Mondale, but George is not one of those believers.

George said that people assume women are suppor­
tive of women's equality, but based on "tangential" evidence from studies, he found that not all women are supportive of women's equality over women.

George also disagreed with a Louis Harris poll that showed Ferraro gaining two percentage points with the selection of Geraldine Ferraro as his running mate.

Artificial reef under construction at Diablo

by Kevin H. Fox

There is more going on at Diablo Canyon Nuclear Power Plant than the construction of a nuclear energy facility. Fifteen thousand tons of broken tribars from the Diablo Canyon Breakwater, damaged last year during winter storms, is being dredged from the channel in the breakwater cove. The large chunks of cement rubble are being hauled by barge to an offshore area one and one half miles south of the plant where it is being used to construct an artificial reef.

The reef is being built for the state through the Department of Fish and Game and PG&E is providing the material and labor. The project is being managed by Tom Wilson, a biologist with PG&E's Biological Research Laboratory located at the Diablo Canyon facility. The reef is being built 400 yards offshore in 45 to 55 feet of water. Wilson said the purpose of the reef is to provide a new environment for young rock fish to live and mature. The reef is a unique experiment for California in that it is the first reef built for research. Wilson said all other reefs built by or for the Department of Fish and Game are fishing reefs.

The reef off the coast from Diablo Canyon will be used to see if fish will take to artificial environments along California's rocky central coast. Wilson said that the young fish that will hopefully live on the reef will help replenish the popular sport fish to the Central Coast. A decreased catch rate of the rock fish has been reported the past few years. Wilson said that PG&E had to pay for the removal of the cement debris from the breakwater channel and decided to help with some biological enhancement in the area. He said the decreased catch rate of rock fish isn't linked to the power plant, although he could not give a definite reason. The dredging and hauling for the project is expected to take three weeks. The recolonization of the reef should begin immediately because the cement forms have already been underwater and have developed a population of plants and animals.

HOMEMAKERS

From page 3

"Many of the jobs available to those people in home economics require the broad and general background we receive," said Sherrill. "Home economists are the male and female hotel managers, textile and clothing designers, airline food service supervisors, interior designers, costume designers, editors, advertising copywriters, day care teachers and caterers who are part of everyone's everyday life.

Obviously there are already many men in home economics-related occupations that society does not realize. FHA-HERO backs the attitude that men and women belong in all roles in society. This attitude must be presented to people at a young age which is why FHA-HERO begins as a student organization."
Local theater presents plays, dining together

by Kim Miller
Staff Writer

Dinner theater is a unique way of presenting plays and only one rep­
pery group on the central coast of­
ers such a fare.

Ron Monello, who directs the Ron
Monello Repertory Players, offers a gourmet meal along with his ver­
ions of acclaimed plays in the Ark
II Restaurant every Friday and
Saturday night.

Monello said that the difference
between his theater and the Oceano
Malodrama is his company offers a
completely different medium, he said.

"The Malodrama serves precisely
and beer, we serve a gourmet meal," said Monello.

"Our theater draws a very
sophisticated, elite group who are
looking for good entertainment. This area loves to be entertained
and not that much is being offered
to them," said Monello.

"This group is now performing its
8th production and Monello ad­
mits, "Yeah, I get burned out. We
don't because we love it.

Every day Monello keeps busy
with casting one play, rehearsing
another, and performing the third.

"And people ask me what I do dur­
ing the week," he said.

While Ron is directing his com­
pany, his wife Jan is busy with the
business details. As the production
supervisor, she must deal with all
the little problems that crop up.

"Jan has never, and would never
act," Monello said.

The couple was discovered three
years ago by Johnny Carson, Jill
Clayburgh and Jerry Conway and
asked to come to California and
start their own brand of dinner
theater.

They performed one year in Paso
Robles and are now in their second
year in the Ark II Restaurant.

"The reason people go to dinner
theater is because people like to go
to one place, park, eat, and be enter­
tained all in one place," Monello,
said.

The restaurant seats 114 people
in a candlelight atmosphere
Monello said, but Monello is looking
for his own theater. "Ark II has
been very good to us, but we don't
have control over everything," he
said.

Reservations can be made at 543­
5006. Currently "Tribute" is play­
ing through September 15.

By Jon Hilton Scott, as Lou Daniels
in the Monello Theater's production of
"Tribute," is a local character
actor.

COME AND SEE JUST HOW GOOD INDEPENDENT LIVING CAN BE!

Independent Student Living
Close to Cal Poly

A new concept in student living is taking shape at Mustang Village. As Phase 2 nears comple­tion, Mustang Village offers a wide choice in residential plans that respond to today's student lifestyles.

Three different plans are incorporated into buildings with easy access to laundry facilities, common storage rooms, recreation room, and study alcoves. There are even meeting rooms for large and small groups.

Mustang Village is just that, a village that provides an exciting blend of housing alternatives in close proximity to shopping and Cal Poly.

Come and see just how good independent living can be!
