San Luis vs. noise

Police department may begin crackdown on boisterous parties

BY MICHAEL STUMP

San Luis Obispo — A police department is expected to begin cracking down on boisterous parties this weekend, according to the San Luis Obispo Times.

The department plans to increase patrols of the city's downtown area, particularly around the University of California, Santa Barbara campus, where many partygoers gather.

A new ordinance, which takes effect on Friday, will require permits for events that generate more than 100 decibels of noise over a 500-foot radius. The permit must be obtained 10 days in advance of the event.

The ordinance is intended to reduce noise levels in the downtown area, where residents and businesses have complained about loud parties.

"We're not going to have loud parties simply because they are a few decibels over," said Chief of Police Joe Bryson. "But if we have to respond to a second time, the chances are much more likely.

In 1984 the police department responded to 1,000 noise complaints, 600 of which were party-related.

"Frenemies get a lot of beat," said Bryson, "but out of the 600 party-related complaints, only 30 were due to frenemies. The problem is when they throw a party, it's a bash. Sometimes they can't control the crowd and we have to break it up.

The fine for the first offense is $150, for the second offense $250 and for the third offense $250. This is for a one-year period said Bryson.

The premise of initiating the law is to save the city money.

"If we deter people from making excessive noise, this will save money," said Bryson.

For all the people who are worried about having their parties broken up, there may actually be advantages.

"It will eliminate the subjectivity of the complaints," said Bryson. "In other words, the chronic complainer will not be able to justify their complaints.

Harvey Levenson, graphics department head, inspects a four-color print just from the Heidelberg Press.

More blocks for Diablo opening

WASHINGTON (AP) — A California utility is continuing to run into legal roadblocks in its effort to get its proposed Diablo Canyon nuclear plant into operation this year.

A federal appeals court late Monday denied Pacific Gas & Electric Co.'s petition to reconsider a 21 ruling by a three-judge panel of the court prohibiting full-power operation of the 91-billion-dollar plant.

The U.S. Court of Appeals panel on Aug. 17 overturned a decision seven days earlier by the Nuclear Regulatory Commission allowing the first reactor of the twin-unit plant near San Luis Obispo to begin commercial operation.

The panel, criticizing the commission's handling of the plant, said the decision was in effect to save the city money.

"That means well probably argue it again," said Joel Reynolds, an attorney for opponents of the plant.

The commission has announced its intent to overturn the court's stay, and for the third offense $250. This is for a one-year period said Bryson.

"If we deter people from making excessive noise, this will save money," said Bryson.

For all the people who are worried about having their parties broken up, there may actually be advantages.

"It will eliminate the subjectivity of the complaints," said Bryson. "In other words, the chronic complainer will not be able to justify their complaints.

Opinion

It pays to play it safe

An ounce of prevention...the old cliche still stands true. There are horrible crimes being committed everyday, and often they might have been prevented if precautions had been taken.

In Los Angeles, Ray Bennett of the Cal Poly Public Safety Department said that up to 90 percent of the crimes committed on campus could have been prevented.

Bikes are backpacks, sometimes stolen, dorm rooms are picked over and personal items are even attacked. If a bike lock would have been used, if 25c had been dropped in the refundable lockers, if the latch had been locked, or if the escort service had been used, these crimes might be prevented.

Steve Seybold of the San Luis Obispo Police Department and Wayne Carmack of the Cal Poly Police Department agree that Cal Poly students are naive about the crime rate here.

San Luis Obispo, on a per capita basis, has almost as high of a crime rate as Los Angeles! Too many students are misled by the quaint, small, hometown atmosphere of SLO.

Last year, 20 rapes were reported in San Luis Obispo. Seybold said, however, that a more realistic figure would be reached by multiplying that by five.

Out of those possible 100 rapes, we wonder how many could have been prevented.

Prof addresses crowded rooms

Editor

The MSA club of Cal Poly campus, in addition to welcoming new students to the campus and welcoming back the returning students, would like to announce that from Sept. 22 to Sept. 29 was the Week of War between Iran and Iraq. This period has been called the Week of War by the Islamic Republic of Iran during which attempts shall be made once again to reveal the face of the oppressors and the oppressed to the world's public.

By dividing our world with all its lovely people into two sides and ruling over them for such a long time, the east and the west superpowers now think they really own them. If a country gets rid of the oppressive force of one of the superpowers other superpower grabs the country and spreads its forces right away. Of course, they have set up their system in such a suppressive way that it is very hard to get rid of them in the first place. Every once in a while, however, a revolution does take place somewhere in the world. About these revolutions, Dr. Sharafi, a great Iranian sociologist whose martyrdom took place in London and was carried out by the Shah's regime, has said: "Today, the movements that originate from the dominated countries are analyzed by the dominators in this manner if it threatens the interests of America, it is inspired by the communists. If it opposes the communists, it is said to be pro America. If it opposes both the communists and America, Russia, England and France all together, it is regarded to be fascist and reactionary."

The Islamic revolution of Iran has been said to be of the last type. The New York Times in July 1964 published under the heading: "Unlikely Allies Charge Over Persian Gulf War." "The fortunes of the Persian Gulf war have clearly placed the United States and the Soviet Union in a defacto alliance in support of Iraq, according to diplomats here. The siding of the superpowers with Baghdad is but one of the numerous international alignments which have grown out of the nearly four-year-old war. The Saudi Arabian monarchy is footing the bill for Communist-made arms, and France is supplying missiles that Iraq is using against oil tankers of the industrialized nations. Indeed the Islamic Republic has gone through many difficulties until now while it is being so condemned and suppressed."

Relying on Almighty God and the participation of the masses of the people has helped the Islamic Revolution to maintain its stability, and become even more successful in its objective: applying God's laws on earth. It was due to the Islamic Republic's success and independence that the huge war was imposed on the Islamic Republic as a last attempt with the intention of overpowering it in 72 hours. This imposed war in addition to killing and injuring thousands, creating many homeless and consuming more than one half of the Islamic Republic's yearly budget has delayed the progress of the Islamic Republic大大大纲 and definitely not been able to prevent it. And now that Iran has the upper hand in the war, and Saddam of Iraq still has all of his supporters has reached to a dead-end, attempts are being taken to impose peace on the Islamic Republic of Iran. But according to Iran's ideology the aggression must be punished and for that purpose the Islamic Republic of Iran has put down its terms for an honorable peace and not an imposed peace. Therefore Iraq set the terms of war, Islamic Republic of Iran will settle the conditions of peace.

Institute to establish Poly forum
Alternate energies are studied

By DAWN YOSHITAKE

Cal Poly was involved with solar-energy projects before the institute was formed. An active solar heating and storage system was designed and built by Cal Poly for a food processing firm near Fresno. The system provided constant heat for a dehydration tunnel and was funded by a $1.5 million grant from the U.S. Department of Energy and the National Science Foundation.

Active solar energy uses mechanical equipment to move fluid and works best when temperatures are higher. Passive systems have fewer moving parts and are used when there are smaller differences in temperature.

A handbook on how to use passive solar heating and cooling was contracted by the State Energy Commission and Cal Poly for building-design professionals.

Haggard said the institute will have a subcommittee do an energy analysis for efficient heating and cooling of Cal Poly buildings.

Patricia Smith Ramsey, the Republican congressional candidate challenging for Democratic incumbent Leon Panetta's position in District 16, will be speaking to Cal Poly students at 6 p.m. tonight. The speech will be in Fisher Science, room 286.

Man arrested for rape and kidnapping may be 'Lover's Lane Rapist' say police

MARTINEZ, Calif. (AP) — A man was arrested Monday in connection with the kidnapping and rape of a 10-year-old San Pablo girl last week, Concord police said.

Seven Louie Knox, 31, was to be arraigned on the charges Tuesday morning. He was being held in county jail in Martinez in lieu of $50,000 bail.

Authorities are investigating a possible connection between Thursday's kidnapping near Holland Tract and seven other unresolved rapes believed to have been committed by an attacker they've dubbed the "Lovers Lane Rapist."

"We're continuing to investigate (Knox) and may connect him to other cases," said Contra Costa County Sheriff's Capt. Stan Garvin.

Authorities said they were uncertain whether the attacks were committed by the same person. In between, six other woman have been victimized by a lone rapist whose method is almost always the same.

"We're not saying for sure it's the same guy. It might be," said sheriff's Sgt. George Ward.

All eight attacks were in secluded county areas on warm, clear nights. Most of the victims were in their teens or early 20s, and most were parked with dates.

In seven of the cases, the woman's date was locked in the car trunk, while in six cases the woman was blindfolded and taken to a house no more than half an hour away. There they were raped, then driven to an isolated area and released.

The incidents usually begin when a man wearing a ski mask taps on the car's passenger window, then flashes a light into the car and on a handicapped to let the victim know he's armed.

No victim has been able to provide a good description of the attacker, although police say a composite indicates he's about 5-foot-8, 150 pounds, clean shaven and 20 to 35 years old.

Last Thursday's attack differed in a few aspects. The victim was camping in a tent with her boyfriend and she was held longer than the others, although she eventually was freed. And, she was taken in an area that's new to the case.

The victim's boyfriend managed to get out of his car trunk in time to see the rapist drive off with his victim in a brown pick-up truck, and the boyfriend managed to smash out a window as the truck sped off.

Capt. Garvin said Knox's brown pick-up truck matched the description of the suspect's vehicle.

"It's a new location and a new method, going into a tent," Ward said. "But most of the other pieces fit the same pattern."

In 1982, the last one on Thursday, the first assault occurred April 18. 1982; the last one on Thursday, Wednesday, October 3 1984
**“Failure at all levels” cited in bond loss**

SAN JOSE, Calif. (AP) — A "failure at all levels of city government" to recognize and remedy abuses led to San Jose's $60 million loss on the bond market, an independent auditor says.

"The city’s overall procedures, policies and controls were not designed" with speculative investments in mind, said the report by Arthur Young & Co. after a five-month study.

The report, delivered to the City Council on Monday, said the city’s procedures "were not adequate to identify or control the risk inherent in speculative investments."

"Essentially, there was a failure at all levels of city government to recognize this difference between risky and safe investmental or the speculative nature of the city’s investment activity..."

City officials disclosed in May that the city had severely extended itself in long-term security investments because of a series of imprudent bond transactions.

The Arthur Young accounting firm began its independent audit shortly after the disclosure.

The report, prepared at a cost of $290,000, proposes that the city undertake a wide range of reforms.

The recommendations include the hiring of an independent investment adviser, council adoption of a formal investment policy and improving the method of tracking some of the city's investment transactions.

On Sept. 20, city officials filed suit in federal court against 13 investment brokers and a public accounting firm in an effort to recover the $60 million loss.

Arguments heard in federal judge case

Justices decline to kill suit against Itoti

WASHINGTON (AP) — A U.S. subsidiary of a Japanese import-export company accused of discriminating against white males lost a Supreme Court appeal Monday.

The justices, without comment, refused to kill a suit by three men against C. Itoh & Co. of America. The company still faces further lower court action to determine whether it may be exempt from U.S. civil rights laws in its employment policies and if not what steps it must take to correct the alleged discrimination.

The Japanese company said that under a 1953 U.S.-Japan trade treaty it should be able to place Japanese citizens in jobs here at its own discretion.

The Supreme Court sent the Itoti case back to the lower courts for further examination of the issue.

The company appealed to the Supreme Court from a federal judge's order that refused to kill the case and instead allowed it to proceed.

The 1982 ruling left open the possibility that a company validly

WASHINGON (AP) — While American history is studded with high-level officials charged with crimes, Labor Secretary Raymond Donovan apparently is the first cabinet officer to be indicted while in office.

Spiri T. Agnew, vice president in the scandal-plagued Nixon administration, escaped indictment by pleading no-contest to income tax charges.

Trout ban sought in four counties

State aims effort at NorCal steelhead boost

SACRAMENTO (AP)—The state Fish and Game Department asked Monday for trout fishing restrictions in four Northern California counties.

The department recommended the Fish and Game Commission prohibit trout fishing along Battle Creek in Shasta and Tehama counties when fish counts at the Red Bluff Diversion Dam indicate the Coleman Fish Hatchery egg take will be inadequate, said agency spokesman Joe Sheehan.

The proposal would ban trout fishing in Battle Creek from Oct. 1 to Nov. 16 in years when the estimated number of steelhead trout passing the dam from July 1 through Sept. 30 is less than 1,200, Sheehan said.

The agency suggested restricting the trout limit in Klamath River tributary drainages in Humboldt and Siskiyou counties to no more than one trout over 16 inches long, he said.

The restriction, aimed at increasing the number of steelhead trout in the Klamath River system, would apply to the area below Iron Gate and Lewiston dams from the last Saturday before Memorial Day to Nov. 15.

The department also recommended closing Mono Creek in Fresno County, and all tributaries from Edison Lake upstream to the confluence with the north fork of the creek, to all fishing from Oct. 1 to Dec. 31.

Commissioners will consider proposed 1985-86 regulations during meetings Friday in Sacramento and Nov. 13 in Redding.

Final adoption of the rules is scheduled during a Dec. 6 meeting in Los Angeles. The new rules will take effect March 1, 1985.

How to interview companies all over the country in a single day.

BPI-SOURCE™
The Satellite Communications Recruiting Network.

If you are graduating with a technical degree, ready to find out what jobs await you, here's an opportunity you won't want to pass up. Come to the premiere telecast of BPI-SOURCE, the Satellite Communications Recruiting Network. We bring major companies and their career opportunities to you, the high tech college graduate.

How it works.

Major technical company presentations will be transmitted to 30 U.S. campus communities from a satellite 23,000 miles up. You'll watch their presentations live and in full color. A representative from each company will talk about their philosophy and job opportunities. And then proceed to take you on a video tour, show products, tell about the area, or have other employees give views about working for the company. Following each company's presentation, you may ask questions and see and hear the answers.

What companies are participating.

Among the companies telecasting live to your campus are Sperry Computer Systems (formerly Sperry UNIVAC) including all domestic operating units, nine divisions of Tektronix, Inc., five groups of Combustion Engineering, Inc., the Federal Aviation Administration and three operations of the National Security Agency. There will also be a special presentation, "Space Station...The Next Logical Step," by NASA.

Featured speakers include Polly Rash, Director of Marketing at SatServ (formerly with Public Service Satellite Consortium), Dr. Russell Drew, Vice President of Student Career Development of IEEE, and Dr. Marvin Centron, author of Jobs of the Future.

How you'll benefit.

Through this one day video teleconference, you'll learn about many career opportunities that are awaiting you. BPI-SOURCE gives you, the student, a chance to learn valuable and helpful information about each company.

Participating companies are recruiting students majoring in all engineering disciplines including aerospace, chemical, civil, electrical, electronic, industrial, mechanical, all disciplines of computer sciences, plus majors in aviation management, math, physics and all other technical degrees. Admission is free. High achievers and above average grades are welcome. And no registration is required.

In addition to the company presentations, question and answer periods and featured speakers, there will be special door prizes including BPI-SOURCE T-shirts, T.I. Scientific Calculators and a surprise Grand Prize. We'll also have helpful information on each company to take with you.

The BPI-SOURCE presentation is Oct. 9 at Chumash Auditorium, Rm. 204, University Union and will include a live morning telecast at 9:00 a.m. PST and a live repeat approximately 3 hours later. Choose the telecast that best fits your schedule. Pick up further information including presentation schedules at the placement office or call:

Bomb destroys showroom of U.S. defense company

EVERE, Belgium (AP)—A bomb explosion ripped through the showroom of a local subsidiary of a U.S. firm early Monday, causing extensive damage but no injuries, the Liege Provincial Police said.

"All the windows in the block are riddled and the block is totally damaged," said Jean Pierre Dupont, the manager for Sweden, the subsidiary of Littion Business Systems. The bomb left a hole a yard wide and about 30 inches deep in the pavement outside the company's showroom, he said.

Most of Littion Business Systems' work is defense-related, Dupont said. There was no estimate of the damage.

NEWSLINE

Cosmonauts hailed as heroes in U.S.S.R.

MOSCOW (AP) — Three Soviet cosmonauts returned safely to earth on Tuesday and were hailed as heroes for making history's longest manned space flight.

Leonid Kizim, Vladimir Solovyev and Oleg Atkov rode a Soyuz descent capsule to a landing on the steppes in Soviet Kazakhstan to successfully complete 237 full days in space. The Soviet news agency Tass said that although Tuesday was the 236th day of the mission, they had completed 237 full days in space. Tass said that each cosmonaut were in good physical condition.

They surpassed the endurance record of Soviet cosmonauts Valentin Lebedev and Anatoly Berezovskiy, who spent 211 days in space in 1982.

During the mission aboard an orbiting laboratory, the three cosmonauts were visited by two orbiting space crews from the United States and one Soviet space crew. A descent capsule to a landing on the Baikonur space center from which the three returned to earth.

A crucial space flight began Feb. 8, when the three were lifted into space aboard a Soyuz capsule and docked with the orbiting Skylab 7 space complex a day later. The docking occurred on the day of President Yuri V. Andropov's death.

Six space walks totaling 22 hours and 35 minutes were taken during the mission. Tass said that extended the space walk mark set by the Skylab 3 crew in 1973-74, during which four walks were made totaling 22 hours and 13 minutes.

The months of astrophysical, medical and biological experiments performed on board the orbiting laboratory included research by Atkov, a 35-year-old cardiologist, into the effects of weightlessness on the cosmonauts.

Launch collides with barge and sinks

HAMBURG, West Germany (AP) — A launch carrying as many as 60 people sank Tuesday night in Hamburg harbor after a collision with a barge, police reported.

At least 31 people were pulled from the chilly harbor waters alive, initial reports said, and rescue operations continued.

Police not sure how many people were on the launch when the accident occurred at 7:30 p.m. Unconfirmed reports from the scene indicated at least 15 children returning from a school field trip were aboard.

The cause of the collision was not known and there was no word on the fate of the barge.

**Study shows drug may limit eye-herpes**

SAN FRANCISCO (AP) — Recurring attacks of a form of herpes that infects and eventually robs vision from the eye may be diminished with a few drops of the drug interferon, University of California researchers reported Tuesday.

Researchers on the San Francisco campus found that rabbits whose eyes were intentionally infected with ocular herpes and treated with a form of interferon suffered fewer new attacks than those rabbits denied treatment.

Ocular herpes usually is caused by the Type 1 form of the virus, which also causes cold sores in the mouth. However, sometimes the eye infection can be caused by genital herpes.

With each recurrence of the virus, clear cells of the cornea, which help the eye to focus, are killed and replaced by cloudy cells, which progressively fog vision.

Dr. Gilbert Smolin, a professor of ophthalmology at UCSF, said each year about 500,000 Americans are afflicted with herpes infections of the eye. He said if interferon is used successfully in humans as it was with rabbits, many recurrent attacks could be prevented.

But, he said, there are questions in treating humans, such as when and if the drug should be administered.

In rabbits, researchers artificially triggered an outbreak of the virus and immediately dropped interferon into the eyes of the rabbit, preventing lesions from surfacing.

But in humans, there is no way of knowing when an attack will take place. Therefore, the drug cannot be administered ahead of time, Smolin said.

Researchers believe outbreaks in humans are triggered by increased stress, menstruation, fever and sometimes sunburn.

The recurring bouts may be contained if people suffering from ocular herpes could recognize these factors and administer a few drops of the solution into the eye, Smolin said.

When interferon is dropped into the eye, it coats the eye and "sits in the cells. It protects them from infections," he said.

Smolin said he hopes to test the drug in humans in the next year.

**All will support Reagan**

LOS ANGELES (AP) — Former heavyweight boxing champion Muhammad Ali has stepped into President Reagan's corner, because there are no black presidential candidates and the president is "keeping God in school." All said.

The aging 42-year-old Ali appeared to be tired and weak during a campaign reception for the Republican ticket Monday night.

"First of all, all of them (left in the ring) when they get in office," Ali said. "I'm just supporting the boxers that I respect. I'll support Muhammad Ali, he'd support Jesse Jackson, he'd support [independent candidate John] B. Anderson and the conservatives in the campaign."

"I've always been a conservative. I'm for the U.S. to go back to the family values. And I know that the conservative candidates are the ones that respect that." He said. "First of all, all of them (left in the ring) when they get in office."

**Smuggling charge upheld**

SAN FRANCISCO (AP) — Even though two Mexicans may have been lured to the United States by undercover officers promising jobs and smuggling fees, the government can charge a third man with smuggling them; a federal appeals court ruled Tuesday.

The 9th U.S. Circuit Court of Appeals reversed a ruling last February by Chief U.S. District Judge Robert Peckham, who dismissed the smuggling charges, saying they had resulted from "outrageous" government conduct.

Whether the conduct was outrageous or not, the alleged smuggler wasn't the government's victim and can still be prosecuted, the appeals court said in a unanimous decision by a three-member panel.

An Immigration and Naturalization Service official said Tuesday that the practice condemned by Peckham has been halted.

The case involved a "cold line," a telephone number set up by the INS. According to Peckham, the number was circulated in Mexico for people who want to enter the U.S. legally.

The government was "directly involved in the creation of crime by advising Mexican citizens that it was acceptable to cross the border illegally," Peckham said.

In reinstating the charges, the appeals court said it did not have to decide whether the conduct was outrageous, "because Veloz had no legal right to challenge the actions."

**Man shoots and escapes leopard**

LAKE ELsinore, Calif. (AP) — An escaped pet leopard that leaped at a man who stepped out on his balcony when he heard "all hell break loose" died after the man shot the cat with a .44 Magnum pistol.

"Otherwise, you'd be visiting me in the hospital. Or I'd be dead," said Wayne Clement, 41, of Monday's shooting. "It's a shame, because he was a beautiful animal, a gorgeous animal."

The leopard was a 3-year-old female that had been kept for the past 10 months by Mary Decuir at his home a few blocks north of Clement's Decuir, who said he had the proper legal permits to keep the animal, said he did not know if it had escaped its cage until contacted by official.

Clement had been awakened at 3 a.m. in his home in a rural section of Lake Elsinore, about 55 miles southeast of Los Angeles. He keeps three German shepherds and horses in a corral near the house.

"All of a sudden it sounded like World War III out there," Clement said, with the dogs barking and the sound of roofing tiles being scattered.

Clement said he grabbed the pistol because he thought a neighborhood dog, which had killed some of his livestock in the past, was responsible for the commotion.

Spouting "hell break lose," the man returned to bed. But he was awakened again at 4:30 a.m., and was met by the animal. He contacted by official. Ram safeties not a huge surprise

ANAHEIM, Calif. (AP) — Los Angeles Coach John Robinson saw no mystery in the Rams' National Football League record three safeties against the New York Giants.

"Remember, our defense was playing a lot in the shadow of the Giants' end zone," Robinson said Monday, adding with a chuckle, "and the Giants were scared the goal posts were going to fall on them."

The Rams' coach, who credited his team's offense with keeping the Giants' end zone soné, "Iroman Robinson said playing a lot in the shadow of the Giants' end zone was joking around play against New York, saying, "It was the perfect game for us in the style ... of what we want to do."

He said one of the team's big question marks has been its rush, which was outstanding against the Giants.

New status for ruggers

The 1984-85 Rugby Club has been elevated to Division I status this year and is now eligible to compete for a national championship.

The team's first year coach, Bo Zanoli, is a former player for Cal Poly. The ruggers will hold a meeting on Oct. 4, 7:30 p.m., in room 227 of the agriculture building.

All interested newcomers and returning players should attend the meeting.

Poly spikers rated No. 5

The Cal Poly Women's Volleyball team maintained its high standings in the Oct. 2 nationwide Tachikara Coaches Poll, ranking No. 5 for the second week in a row.

The Poly spikers, 21-5 for the season, have played two of the top four ranked teams and won. The Mustangs handed No. 1 USC its first and only loss and beat No. 4-ranked UVPI last Thursday in five games.

The team will travel to Fresno tonight to play unranked Fresno State and will play its first home game since school began this weekend.

The match will be against ninth-ranked University of Arizona at 7:30 p.m. in the main gym. There is no cost to students with valid ASI cards.

The top ten teams, according to the poll, are led by USC with record of 10-1, followed by UCLA, 10-1; Stanford, 4-1; UVPI, 10-2; Pu-142, Nebraska, 11-0; Hawaii, 12-3; Texas, 10-2; University of Arizona, 9-7 and Colorado State, 15-4.

Longhorns move into familiar spot

By JACK KEEVER Associated Press Writer

AUSTIN, Texas (AP) — Texas, no stranger to the No.1 spot in college football, is at the top of the Associated Press Poll, ranking No. 1 in the Oct. 2 national rankings.

The Longhorns moved into their familiar spot for the first time since 1981 — and Coach Fred Akers says the Longhorns deserve their high ranking.

"I think we deserve it as much as anybody I've seen," Akers said Monday after the Longhorns became the fourth team this season to claim the No. 1 ranking in The Associated Press poll. "We are young and we are building, but we are making just a terrific effort and the top players are making the top plays."

Texas, which was No. 6 in the preseason ranking and has moved up one spot in each of the five regular-season polls, climbed from second to first by whipping Penn State State 23-8 Saturday while top-ranked Nebraska was upset by Syracuse 17-0.

Wide receiver Mike Rauseo tumbled from first place to eighth and Penn State added from fourth to 11th, Texas received 61 of the 61 first-place votes and 1,183 of a possible 1,500 points from the nationwide panel of sportswriters and sportscasters.

The Longhorns (10-1) will face Oklahoma State, Washington, Colorado and Ohio State, while Nebraska moved to No. 3 in the Top Twenty for the first time in 38 years.

Texas, winner of national championships in 1956 and 1969, has been ranked No. 1 at some time during the season 10 times since 1961.
Walton signs contract with LA
Gordon also comes to terms

LOS ANGELES (AP) — Veteran center Bill Walton and first-round draft choice Lancaster Gordon of Louisville signed contracts with the Los Angeles Clippers on Monday, the National Basketball Association team announced.

The signings of Walton and Gordon come on the heels of the acquisition of veteran All-Star forward Marques Johnson on Saturday in a six-player deal in which the Clippers sent Terry Cummings to the Bucks.

The signing of Walton "fulfills a commitment that the Clippers made in order to have a successful team," Clippers Vice President and General Manager Carl Scheer said. "We are pleased to have such a quality, versatile player such as Lancaster as part of the new Clippers era," Scheer said.

The terms of Gordon's contract also were not released.

"With Walton healthy and in good physical condition, he can be one of the dominant centers to play on a team that could win a lot of games and do well in the season and hopefully through the playoffs," Walton said at the Clippers training camp at Loyola Marymount University. "I look forward to playing at home again. This is a tremendous opportunity to play on a team that can win a lot of games and do well in the season and hopefully through the playoffs."

"I think the addition of Marques, Junior Bridgeman and Harvey Catchings is a great thing. Those are three players who have spent the majority of their careers at the championship level," Walton said. "They're running up against some tough calculations. End the pencil-and-paper drudgery with the HP-12C. The most powerful decision-maker on the market!
