San Luis vs. noise
Police department may begin crackdown on boisterous parties

BY MICHAEL STUMP
San Luis Obispo

A noise ordinance that will make a noise for police to crack down on noisy parties was considered last night at a San Luis Obispo City Council public hearing.

The proposed law would institute an electronic decibel reading system to calculate the exact amount of noise.

The noise levels which the ordinance rules as too loud are based on a study by Brown-Bunting and Associates, an acoustical firm that measured the "ambient," or normal levels of various areas of the city, said Steve Seybold, crime prevention officer.

The firm studied 12 different test sites, three times a day for four days, to determine the ambient noise level. "Any reading of 20 decibels over the ambient is cause for an automatic citation," said Seybold. "We're not going to bust people simply because they are a few decibels over," he said. "But if we have to respond a second time, the chances are much more likely.

In 1984 the police department responded to 900 noise complaints, 609 of which were party-related. "Fraternities get a lot of heat," said Seybold, "but out of the 609 party-related complaints, only 30 were due to fraternities. The problem is when they throw a party, it's a bash. Sometimes they can't control the crew and we have to break it up."

The fine for the first offense is $75; for the second offense, $150; and for the third offense, $200.

This is for a one-year period said Seybold.

The premise of initiating the law is to save the city money. "If we deter people from making excessive noise, this will save money," said Seybold. For all the people who are worried about having their parties broken up, they may actually be advantaged.

"It will eliminate the subjectivity of the complaints," said Seybold. In other words, the chronic complainer would not be able to justify his complaints.

---

More blocks for Diablo opening

WASHINGTON (AP) — A California utility is continuing to run into legal roadblocks in its effort to get its old-delayed Diablo Canyon nuclear plant into operation this year.

A federal appeals court last month denied Pacific Gas & Electric Co.'s petition to reconsider a 21-ruling by a three-judge panel of the court prohibiting full-power operation of the $1.3 billion plant. The U.S. Court of Appeals panel on Aug. 17 overturned a decision seven days earlier by the Nuclear Regulatory Commission allowing the first reactor of the twin-unit plant near San Luis Obispo to begin commercial operation.

The panel, criticizing the commission's handling of earthquake and evacuation concerns at the plant, granted opponents an injunction blocking the NRC from granting the plant an operating license pending further court review, expected sometime between late October and January.

Unhappy with the slow pace of the court review, PG&E was joined by the Reagan administration in asking Supreme Court Chief Justice Warren Burger to reverse the appeals court's order.

After Burger refused, the utility three weeks ago asked the full 12-member Court of Appeals to reconsider the three-judge panel's order, saying each week of delay in costing PG&E's customers and stockholders $16 million.

Without comment, the court refused that rehearing on Monday.

"This just about exhausts the avenues that PG&E has available to it for overturning the court's stay," Joel Reynolds, an attorney for opponents of the plant, said Tuesday in Los Angeles.

"That means we'll probably argue it sometime in late October or December," said the attorney for the Center for Law in the Public Interest.

Student arrested

Man charged as public nuisance in Kennedy Library

A male Cal Poly student was arrested Tuesday morning in the Robert E. Kennedy Library after allegedly holding up a sign that offended a female student and prompted her to report the incident to Public Safety.

Officers took Randal Walters, 18, of Paso Robles, into custody at 11:45 a.m. Walters was charged with being a public nuisance, a misdemeanour.

He was apprehended as he walked out of the library's front door shortly after allegedly running away from the scene of the incident.

Campus Police Sgt. Wayne Hall said officers detained a man fitting the suspect's description until the woman could get to the front of the library to identify him.

The sign was recovered by police but Hall said he could not reveal what the sign said.

Walters was released on a notice to appear in San Luis Obispo Municipal Court on Nov. 5.

Graphics department gets nearly $1 M in equipment

By KIM MILLER

A state-funded printing press valued at $700,000 and donated to the Graphic Arts Department has boosted Cal Poly's reputation as a leading California university for four color processing, said a University Graphic Systems manager.

Randy Thy, division manager of Princeton, a branch of UGS, said about $700,000 in press machinery donated by Heidelberg West of Germany and a $250,000 laser scanner from HCM Corp. also of Germany, arrived just weeks before Fall Quarter.

"We'll be able to service the market of four color processing now," said UGS Sales Representative Richard Wyly.

The donation is expected to jointly benefit Heidelberg West and students, said UGS Sales Representative Richard Wyly.

"One of the ways we're going to use this press," said UGS Sales Representative Richard Wyly, "is to provide new markets for UGS."

"We'll be able to service the market of four color processing now," said UGS Sales Representative Richard Wyly.

"The presses will provide next year's Poly Royal poster, and was expected to jointly benefit Heidelberg West and students, said UGS Sales Representative Richard Wyly.

"One of the ways we're going to use this press," said UGS Sales Representative Richard Wyly, "is to provide new markets for UGS."

"With the new press, UGS has the capability to take on new markets."

"We're not going to service the market of four color processing now," said UGS Sales Representative Richard Wyly.

"The presses will provide next year's Poly Royal poster, and was expected to jointly benefit Heidelberg West and students, said UGS Sales Representative Richard Wyly.

"With the new press, UGS has the capability to take on new markets."

"We're not going to service the market of four color processing now," said UGS Sales Representative Richard Wyly.
A oence of prevention...the old cliche still stands true. There are horrible crimes being committed everyday, and often they might have been prevented if precautions had been taken.

Assistant Ray Barrett of the Cal Poly Public Safety Department said that up to 90 percent of the crimes committed on campus could have been prevented.

Bikes are backpocketed, stolen, dorm rooms are picked over and people are even attacked. If a bike lock would have been used, if 25 cents had been dropped in the refundable lockers, if the latch had been locked, or if the escort service had been used, these crimes might be prevented.

Steve Svevdol of the San Luis Obispo Police Department and Wayne Carmack of the Cal Poly Police Department agree that Cal Poly students are naive about the crime rate here.

San Luis Obispo, on a per capita basis, has almost as high of a crime rate as Los Angeles! Too many students are misled by the quaint, small, hometown atmosphere of SLO.

Last year, 20 rapes were reported in San Luis Obispo. Svevdol said, however, that a more realistic figure would be reached by multiplying that by five.

Out of those possible 100 rapes, we wonder how many could have been prevented.

It pays to play it safe

Barrett recalls a shockingly sad event that occurred in 1978. A man, responsible for over 100 rapes across California was finally caught. Barrett said the man later bragged that he never had to break into any of his victim's homes.

Two days ago, a college-age woman was reportedly raped in an off-campus student housing complex. Her door was unlocked.

Please don't go around at night alone. Use the escort service.

Svevdol stressed that women, in particular, should listen to this "gut feeling." If something seems wrong, dial the emergency phone number, 911.

The Cal Poly Public Safety Department offers excellent seminars on home security. They are also offering a special program, called "Living in Peace." This program is designed to teach people to recognize warning signs of a potential home invasion.

We urge students to look into these similar programs offered by other agencies. Clubs could have a speaker from one of these programs come speak at one of their meetings.

The Public Safety Department's number is 546-2281.

How much was it that an ounce of prevention is worth? Maybe a backpack, or a bicycle or a life?

Editor:

The MBA club of Cal Poly campus, in addition to welcoming new students to the campus and welcoming back the returning students, would like to announce that from Sept. 22 to Sept. 29 was the Week of War Awareness.

This period has been set aside to emphasize the importance of world peace.

By dividing our world with all its lovely people into two sides, and ruling over them for such a long time, the east and the west superpowers now think they really own them. If a country gets rid of the oppressive force of one of the superpowers other superpower grabs the country and spreads its forces right away. Of course, they have set up their system in such a suppressive way that it is very hard to get rid of them in the first place. Every once in a while, however, a revolution takes place somewhere in the world. About these revolutions, Dr. Shariati, a great Iranian sociologist whose martyrdom took place in London and was carried out by the Shah's regime, has said: "Today, the movements that originate from the dominated countries are analyzed by the dominators in this manner if it threatens the interests of America, it is inspired by the communists. If it opposes the communists, it is said to be pro America. If it opposes both the communists and America, Russia, England and France all together, it is regarded to be fascist and reactionist."

The Islamic revolution of Iran has been said to be of the last type. As the New York Times in July 1984 published under the heading: "Unlikely Allies Charge Over Persian Gulf War. "The fortunate of the Persian Gulf war have clearly placer the United States and the Soviet Union in a defacto alliance in support of Iraq, according to diplomats here. The siding of the superpowers with Baghdad is but one of the countless international alignments to have come out of the nearly four year-old war. The Saudi Arabian monarchy is footing the bill for Communist-made arms, and France is supplying missiles that Iraq is using against oil tankers of the industrialized nations. Indeed the Islamic Republic has gone through many difficulties until now while it is being so condemned.

In summary of events:

Reaching or urging God and the participation of the masses of the people has helped the Islamic Revolution to maintain its stability, and become even more successful in its objective: applying God's laws on earth. It was due to the Islamic Republic's success and independence that a huge war was imposed on the Islamic Republic of Iran. As a last attempt with the intention of overpowering it, in 72 hours. This imposed war in addition to killing and injuring thousands, creating many homeless and consuming more than one half of the Islamic Republic's yearly budget, has delayed the progress of the Islamic Republic, but definitely was not able to stop it. And now that Iran has the upper hand in the war, and Saddam of Iraq will all of his supporters has reached its dead end, attempts are being taken to impose peace on the Islamic Republic of Iran. But, according to Iran's sources, the aggression must be finished and for the purpose the Islamic Republic of Iran has put down it terms for an honorable peace and not an imposed peace. Therefore, war between Iran and Iraq must be continued.
Institute to establish Poly forum

Alternate energies are studied

By DAWN YOSHITAKE

An architecture professor was named director of the first Cal Poly interdisciplinary research institute that will concentrate on renewable energy and energy conservation.

Kenneth Haggard was appointed as director of the Renewable Energy Institute in June. The institute is designed to promote and coordinate research and development for energy conservation and renewable energy.

Solar energy systems, electricity generated from the wind, biomass systems that capture methane gas from decomposing vegetation and cogeneration (wasted heat from combustion) are some of the fields the institute will research.

"We'll try to be as broad as possible. We're hoping to respond to whatever members have an interest in the institute," Haggard said.

A major accomplishment the institute hopes to achieve is to establish a forum for communities within Cal Poly to interact.

"We want engineering students talking to biology instructors, and people in other disciplines interacting with each other," Haggard said.

The Renewable Energy Institute is open to all students, faculty, staff and researchers. It will also bring in visiting people," Haggard said.

The proposal for the institute was developed two years ago after Haggard and Cal Poly aeronautical engineering Professor Phillip Niles had worked on various renewable energy projects together.

"We're competing with the private sector," Haggard said.

"The private sector is largely where renewables have moved. They're competing with free enterprise," Haggard said.

Cal Poly was involved with solar-energy projects before the institute was formed.

An active solar heating and storage system was designed and built by Cal Poly for a food processing firm near Fresno.

The system provided constant heat for a dehumidification tunnel and was funded by a $1.5 million grant from the U.S. Department of Energy and the National Science Foundation.

Active solar energy uses mechanical equipment to move fluid and works best when temperatures are higher. Passive systems have fewer moving parts and are used when there are smaller differences in temperature.

A handbook on how to use passive solar heating and cooling was contracted by the State Energy Commission and Cal Poly for building-design professionals.

Haggard said the institute will have a subcommittee to do an energy analysis for efficient heating and cooling of Cal Poly buildings.

The San Luis Obispo County Board of Supervisors donated $10,000 as seed money for the institute. Haggard said.

"The institute will bring more money into the county through conferences. It will also bring in faculty, staff and students."

Haggard was appointed as director of the Renewable Energy Institute in June. The institute is designed to promote and coordinate research and development for energy conservation and renewable energy.

The San Luis Obispo County Board of Supervisors donated $10,000 as seed money for the institute. Haggard said.

Ramsey to speak

Patricia Smith Ramsey, the Republican congressional candidate challenging for Democratic incumbent Leon Panetta's position in District 16, will be speaking to Cal Poly students at 6 p.m. tonight. The speech will be in Fisher Science, room 286.

While you've been planning for the future, Varian's been building it.

Energy from seawater? Varian's on the case. The first major thrust of fusion research may make it possible to draw virtually limitless energy from seawater. This is just one example of our aggressive leadership in higher technology - a leadership position that could include you.

We'd like to show you how you may help build the future in the critical areas of medicine, defense, communications and science.

Varian's Fritz Henshaw will be at Cal Poly to give a brief slide presentation and discuss the opportunities available to you.

Plan to attend Monday, October 22, 1984 at 7:00 p.m. in Staff Dining Room B, and sign up now at your Placement Office for on-campus interviews to be conducted on Tuesday, October 23, 1984.

Where There's Light There's Power.
DON'T WASTE YOUR TIME STUDYING.

For the time of your life in college, come to one of our free One Hour Evelyn Wood Seminars.

We'll show you the way to have more free time by cutting your study time in half. While you raise your grade point. There's a lot more to college than textbooks, tests, and term papers. And Evelyn Wood is the way to enjoy it.

Now's the time to make your move. Bring a friend and join us at our seminar. It's only an hour. It's free. And it's definitely not a waste of time.

Free Seminar Schedule

LOCATION: DISCOVERY INN - 1800 MONTEREY STREET

WEDNESDAY 10/3 12:00PM, 2:00PM AND 4:00PM
THURSDAY 10/4 1:00PM, 3:00PM AND 5:00PM

Man arrested for rape and kidnapping may be 'Lover's Lane Rapist' say police

MARTINEZ, Calif. (AP) — A man was arrested Monday in connection with the kidnapping and rape of a 15-year-old San Pablo girl last week, Concord police said.

Steven Louis Knox, 31, was to be arraigned on the charges Tuesday. He was being held in county jail in Martinez in lieu of $50,000 bail.

Authorities are investigating a possible connection between Thursday's kidnapping near Holland Tract and seven other unsolved rapes believed to have been committed by an attacker they've dubbed the "Lovers Lane Rapist."

"We're continuing to investigate (Knox) and may connect him to other cases," said Contra Costa County Sheriff's Sgt. George Ward.

The incidents usually begin when the victim's boyfriend managed to smash out a window as the truck sped past. The boyfriend and she were held longer than the others, although she eventually was freed. And, she was taken in an area that's new to the case.

The victim's boyfriend managed to get out of his car trunk in time to see the rapist drive off with his victim in a brown pick-up truck, and the boyfriend managed to smash out a window as the truck sped off.

Last Thursday's attack differed in a few aspects. The victim was camping in a tent with her boyfriend and she was held longer than the others, although she eventually was freed. And, she was taken in an area that's new to the case.

The victim's boyfriend managed to get out of his car trunk in time to see the rapist drive off with his victim in a brown pick-up truck, and the boyfriend managed to smash out a window as the truck sped off.

Capt. Garvin said Knox's brown pick-up truck matched the description of the suspect's vehicle. "It's a new location and a new method, going into a tent," Ward said. "But most of the other pieces fit the same pattern."

In between, six other woman have been victimized by a lone rapist whose method is almost always the same.

"We're not saying for sure it's the same guy. It might be," said sheriff's Sgt. George Ward.

All eight attacks were in secluded county areas on warm, clear nights. Most of the victims were in their teens or early 20s, and most were parked with dates.

In seven of the cases, the woman's date was locked in the car trunk, while in six cases the woman was blindfolded and taken in a house no more than half an hour away. There they were raped, then driven to an isolated area and released.

The incidents usually begin when a man wearing a ski mask taps on the car's passenger window, then flashes a light into the car and on a handout to let the victims know he is armed.

No victim has been able to provide a good description of the attacker, although police say a composite indicates he's about 5-foot-8, 150 pounds, clean shaven and 20 to 35 years old.

“Failure at all levels” cited in bond loss

SAN JOSE, Calif. (AP) — A "failure at all levels of city government" to recognize and remedy abuse led to San Jose's $60 million loss on the bond market, an independent auditor says.

"The city's overall procedures, policies and controls were not designed with speculative investments in mind," said the report by Arthur Young & Co. after a five-month study.

City officials disclosed in May that the city had severely extended itself in long-term security investments because of a series of imprudent bond transactions.

The Arthur Young accounting firm began its independent audit shortly after the disclosure.

The report, prepared at a cost of $290,000, proposes that the city undertake a wide range of reforms. The recommendations include the hiring of an independent investment adviser, council adoption of a formal investment policy and improving the method of tracking some of the city's investment transactions.

On Sept. 20, city officials filed suit in federal court against 13 investment brokers and a public accounting firm in an effort to recover the $60 million loss.
Arguments heard in federal judge case

WASHINGTON (AP) - Attorneys for a U.S. subsidiary of a Japanese import-export company accused of discriminating against white males lost a Supreme Court appeal Monday.

The justices, without comment, refused to kill a suit by three men against the company. The company still faces further action to determine his legal fee income.

Chief counsel Oscar Goodman renewed his argument the verdict should be thrown out because of the "bias, prejudice and motivation of the judge's order that refused to kill the case and instead allowed it to proceed.

Goodman also renewed his argument the verdict should be thrown out because of the "bias, prejudice and motivation of the judge." Claiborne, who could face up to six years in prison for his convictions on two counts of filing false tax returns, renewed his case in the U.S. Court here one day after losing a round in the U.S. Supreme Court.

Without comment, the justices let stand a ruling that a federal judge need not be impeached before he can be prosecuted on federal criminal charges.

The company appealed to the Supreme Court from a federal jury's decision last year that it discriminated against them to management jobs, choosing Japanese employees instead.

In a 1982 decision involving another Japanese company, the Supreme Court said foreign companies are not exempt from U.S. laws banning job discrimination.

The company appealed to the Supreme Court from a federal judge's order that refused to kill the case and instead allowed it to proceed.

AN EQUAL OPPORTUNITY EMPLOYER

American history studded with scandalous officials

WASHINGTON (AP) - While American history is studded with high-level officials charged with crimes, Labor Secretary Raymond Donovan apparently is the first cabinet officer to be indicted while in office.

Spirio T. Agnew, vice president in the scandal-plagued Nixon administration, escaped indictment by pleading no-contest to income tax evasion and resigning immediately as part of a plea-bargaining agreement.

Richard M. Nixon, himself, was named by the Watergate grand jury as a criminal conspirator, but he was not indicted. After he resigned, while prosecutors were thinking about charging him, Nixon was pardoned by his successor in office.

Three U.S. citizens, Michael E. Spiro, Jack R. Hardy and Benjamin F. Blount, said the company, Production Credit Association of America, stunk.
Trout ban sought in four counties

State aims effort at NorCal steelhead boost

SACRAMENTO (AP) — The state Fish and Game Department asked Monday for trout fishing restrictions in four Northern California counties.

The department recommended the Fish and Game Commission prohibit trout fishing along Battle Creek in Shasta and Tehama counties when fish counts at the Red Hill Diversion Dam indicate the Coleman Fish Hatchery egg take will be inadequate, said agency spokesman Joe Sheehan.

The proposal would ban trout fishing in Battle Creek from Oct. 1 to Nov. 16 in years when the estimated number of steelhead trout passing the dam from July 1 through Sept. 30 is less than 1,200, Sheehan said.

The agency suggested restricting the trout limit in Klamath River tributary drainages in Humboldt and Siskiyou counties to no more than one trout over 16 inches long, he said.

The restriction, aimed at increasing the number of steelhead trout in the Klamath River system, would apply to the area below Iron Gate and Lewiston dams from the last Saturday before Memorial Day to Nov. 16.

The department also recommended closing Mono Creek in Fresno County, and all tributaries from Edison Lake upstream to the confluence with the north fork of the creek, to all fishing from Oct. 1 to Dec. 31.

Commissioners will consider proposed 1985-86 regulations during meetings Friday in Sacramento and Nov. 13 in Redding.

Final adoption of the rules is scheduled during a Dec. 6 meeting in Los Angeles. The new rules will take effect March 1, 1985.

New law protects stocked trout preserves

THE FAR SIDE

by Michael Marter

President Reagan last Friday signed the contro­

versy-embroiled California Wilderness Protection

bill which protects 1.8 million acres of California land

from motorized recreation or commercial develop­

ment. The newly declared wilderness is more than

half the area of existing state wilderness.

The newly declared wilderness is more than half

the area of existing state wilderness. The signing

follows more than five years of

hashing out and compromise in the legislature. The

compromise efforts please at least one Cal Poly

student. "Even though I am basically a wilderness ad­

vocate, I am happy with the compromise—it's

basically all the wilderness movement could have

expected," said Professor Robert Wambach of the

natural resources management department. "I'm a

pragmatist—I'm happy with the bill."

The bill was passed Sept. 12 by the House of Re­

presentatives 368 to 41.

Twenty thousand acres in eastern San Luis Obispo

County around Manchana Mountain, east of Santa

Margarita, were declared wilderness by the bill,

which also protects a segment of the Tuolumne River

from development and answers some environmen­

talists' wishes by saving Mono Lake.

The bill also releases several million acres for

commercial development. Timber harvesting, new or

expanded ski resorts, mining projects and off road

vehicle areas are planned for those areas.

Preserving the parcel in San Luis Obispo County

was especially important because it is a relatively

undisturbed oak woodland ecosystem, said Wambach.

The latest preservation complements 21,000

acres named wilderness in San Luis Obispo County

in 1979 as the Santa Lucia Wilderness Area.

One of the most controversial elements of the bill

was placing 83 miles of the Tuolumne River in the

wild and scenic river preservation system. This was a

major defeat to Central Valley irrigation districts in­

terested in building hydroelectric dams on the

Tuolumne.

Tim Mahoney, Washington D.C. representative for

the Sierra Club, said the inclusion of the Tuolumne

River was a crucial victory for river conservationists,

giving new life to hopes of saving the wild rivers of

California.

Mahoney said the environmentalists' bitter defeat

over the New Melones dam project completed on the

Stanislaus River in 1978 put future additions to the

river system in jeopardy.

The bill also names Mono Lake in the upper Owens

Valley as a National Forest Scenic area, affording

some protection to what is believed to be one of the

oldest lakes in the world. Mono Lake is the threat­

ened habitat of several species of birds and is a ma­
jor water supply for Los Angeles.

The bill was a compromise between the 1.2 million

acres favored by the Reagan Administration and

business interests and the 2.4 million acres wanted

by environmentalists. Ironically, Reagan previously

had opposed the three main parts of the bill—the

amount of acreage and preservation of Mono Lake

and the Tuolumne River. The final bill was worked

out by U.S. Senators Alan Cranston and Pete Wilson

of California.

As Jack Burby of the Los Angeles Times said, the

work of Cranston and Wilson was crucial to saving the

Tuolumne. "Until Senators Alan Cranston and Pete

Wilson got on the case, there was a real chance

that the Tuolumne would have disappeared into

somebody's light bulb. Until recently there have been

the red helicopters hired by the Turlock-Modesto Ir­

rigation District darting through the canyon with

survey parties like airborne undertakers measuring

the canyon for a coffin."

Sierra Club representative Mahoney explained

that exactly where boundaries are drawn can be just

as important in preserving wilderness as total

acreage. If a boundary is poorly drawn he said,

development in a non-protected area could potential­

ly ruin a protected area. "Like any compromise, it's

not everything we hoped for," he said, "but the

boundaries of the areas removed (from potential

development) were well-drawn."

Professor Wambach said the future of California

preservation lies in managing existing wilderness

areas. "My interest lies in better management of ex­
isting wilderness, not so much in adding new areas,"

Wombach said.

How to interview companies all over the country in a single day.

BPI-SOURCE™
The Satellite Communications Recruiting Network.

If you are graduating with a technical degree, ready to find out what jobs await you, here's an opportunity you won't want to pass up. Come to the premiere telecast of BPI-SOURCE, the Satellite Communications Recruiting Network. We bring major companies and their career opportunities to you, the high tech college graduate.

How it works.

Major technical company presentations will be transmitted to 30 U.S. campus communities from a satellite 23,000 miles up. You'll watch their presentations live and in full color. A representative from each company will talk about their philosophy and job opportunities. And then proceed to take you on a video tour, show products, tell about the area, or have other employees give views about working for the company. Following each company's presentation, you may ask questions and see and hear the answers.

What companies are participating.

Among the companies telecasting live to your campus are Sperry Computer Systems (formerly Sperry UNIVAC) including all domestic operating units, nine divisions of Tektronix, Inc., five groups of Combustion Engineering, Inc., the Federal Aviation Administration and three operations of the National Security Agency. There will also be a special presentation, "Space Station...The Next Logical Step," by NASA.

Featured speakers include Polly Rash, Director of Marketing at Satserv (formerly with Public Service Satellite Consortium), Dr. Russell Drew, Vice President of Student Career Development of IEEE, and Dr. Marvin Centron, author of Jobs of the Future.

How you'll benefit.

Through this one day video teleconference, you'll learn about many career opportunities that are awaiting you. BPI-SOURCE gives you, the student, a chance to learn valuable and helpful information about each company.

Participating companies are recruiting students majoring in all engineering disciplines including aerospace, chemical, civil, electrical, electronic, industrial, mechanical, all disciplines of computer sciences, plus majors in aviation management, math, physics and all other technical degrees. Admission is free. High achievers and above average grades are welcome. And no registration is required.

In addition to the company presentations, question and answer periods and featured speakers, there will be special door prizes including BPI-SOURCE T-shirts, TI Scientific Calculators and a surprise Grand Prize. We'll also have helpful information on each company to take with you.

The BPI-SOURCE presentation is Oct. 9 at Chumash Auditorium, Rm. 204, University Union and will include a live morning telecast at 9:00 a.m. PST and a live repeat approximately 3 hours later. Choose the telecast that best fits your schedule. Pick up further information including presentation schedules at the placement office or call:

BPI-SOURCE 1-800-328-4032

Fill out this coupon and bring it to the BPI-SOURCE presentation. It's your entry for the door prize drawings.

Bomb destroys showroom of U.S. defense company

EVERE, Belgium (AP) — A bomb exploded through the showroom of a local subsidiary of an U.S. firm early Monday, causing extensive damage but no injuries, the local business systems subsidiary, police said.

"All the windows in the block are broken and the doors are very damaged," said Jean Pierre Dupont, the manager for Sweden, the subsidiary of Litton Business Systems. The bomb left a hole a yard wide and about 30 inches deep in the pavement outside the company's showroom, he said.

Most of Litton Business Systems' work is defense related, said spokesman A. Paratore.

There was no estimate of the damage.

Launch collides with barge and sinks

HAMBURG, West Germany (AP) — A launch carrying as many as 60 people sank Tuesday night in the harbor after a collision with a barge, police reported.

At least 31 people were pulled from the chilly harbor waters alive, initial reports said, and rescue operations continued.

Police not sure how many people were on the launch when launch when the accident occurred at 7:45 p.m. Unconfirmed reports from the scene indicated at least 15 children returning from a school field trip were aboard.

The cause of the collision was not known and there was no word on the fate of the barge.

**Study shows drug may limit eye-herpes**

SAN FRANCISCO (AP) — Recurring attacks of a form of herpes that infects and eventually robs vision from the eye may be diminished with a few drops of the drug interferon, University of California researchers reported Tuesday.

Researchers on the San Francisco campus found that rabbits whose eyes were intentionally infected with ocular herpes and treated with a form of interferon suffered fewer new attacks than those rabbits denied treatment.

Ocular herpes usually is caused by the Type 1 form of the virus, which also causes cold sores in the mouth. However, sometimes the eye infection can be caused by genital herpes.

All with support Reagan

**Los Angeles (AP) — Former heavyweight boxing champion Muhammad Ali has stepped into President Reagan's corner, because there are no black presidential candidates and the president is keeping God in school.**

"First of all, all of them (left in the race) are white," he said. "If a black man was running — like Jesse Jackson, he'd support him. Ali said.

All supported Jackson during the Democratic primary campaign.

Despite that, the former champ said he didn't oppose the President's social and civil rights policies like many blacks.

"They all make commitments that they never really fulfill. (Reagan) is keeping God in school and that's a decision by a three-member panel."

Ali was diagnosed last month as having a type of Parkinson's disease, the degenerative brain disorder. Ali speaks with a heavy slur and is unable to walk quickly without staggering.

**Man shoots and kills escaped leopard**

LAKE ELSINORE, Calif. (AP) — An escaped pet leopard that leaped at a man who stepped out on his balcony when he heard "all hell break loose" died after the man shot the cat with a .44 Magnum pistol.

"Otherwise, you'd be visiting me in the hospital. Or I'd be dead," said Wayne Clement, 41, of Moreno Valley. "A ledge break loose" died after the man shot the cat with a .44 Magnum pistol.

Clement, who managed to duck in front of the leopard, said he did not know that it was responsible for the commotion. The shot knocked the animal, said he did not know that it killed a man.

"Otherwise, you'd be visiting me in the hospital. Or I'd be dead," said Wayne Clement, 41, of Moreno Valley. "A ledge break loose" died after the man shot the cat with a .44 Magnum pistol.

**Smuggling charge upheld**

SAN FRANCISCO — Even though two Mexicans may have been lured to the United States by undercover officers promising jobs and smuggling fees, the government can charge a third man with smuggling them under appeals court rules Tuesday.

The 9th U.S. Circuit Court of Appeals reversed a ruling last February by Chief U.S. District Judge Robert Peckham, who dismissed the smuggling charges, saying they had resulted from "outrageous government conduct.

Whether the conduct was outrageous or not, the alleged smuggler wasn't the government's victim and can still be prosecuted, the appeals court said in a unanimous decision by a three-member panel.

An Immigration and Naturalization Service official said Tuesday that the practice condemned by Peckham has been halted.

The case involved a "cold line," a telephone number set up by the INS. According to Peckham, the number was circulated in Mexico for people who want to enter the U.S. illegally.

The government was "directly enhanced in the creation of crime by advising Mexican citizens that it was acceptable to cross the border illegally," Peckham said.

In reinstating the charges, the appeals court said it did not have to decide whether the conduct was "outrageous," because Valdovinos had no legal right to challenge the actions.

As a Marine Officer, you could be in charge of a Mach 2 + F/A-18A, a vertical take-off Harrier or one of our other jets or helicopters. And you could do it by the time you’re 23. But it takes a special commitment on your part. We demand leaders at all levels. We teach you to be one. If you’re a freshman or sophomore, ask about our undergraduate officer commissioning programs. If you’re a junior, check out our graduate programs. Starting salaries are from $17,000 to $23,000. And you can count on going farther... faster. We’re looking for a few good men.

Go farther... faster.
Ram safeties not a huge surprise

ANAHEIM, Calif. (AP) — Los Angeles Coach John Robinson saw no mystery in the Rams' National Football League record three safeties against the New York Giants.

"Remember, our defense was playing a lot in the shadow of the Giants' end zone," Robinson said Monday, adding with a chuckle, "and the Giants were scared the goal posts were going to fall on them."

The Rams' coach, who credited his team's offense with keeping New York in the hole during Sunday's 33-12 victory, was joking about the collapse of one goal post that delayed the contest for some 16 minutes in the second quarter.

"I met Giants Coach Bill Parcells at the middle of the field and told him, 'You kick at that goal post (lying on the ground), and we'll kick at the other one,'" Robinson said. "He didn't laugh."

Los Angeles' record number of safeties all came in the third quarter, as Ivory Sully and Norwood Vann each blocked punts by New York's Dave Jennings, and the Rams' Jack Youngblood and Reggie Dixon trapped Giants' quarterback Phil Simms in the end zone.

Robinson lauded the Rams' all-pro player, Bo Zeoli, as a former player for Cal Poly. The ruggers will hold a meeting on Oct. 4, 7:30 p.m., in room 237 of the agriculture building.

All interested newcomers and returning players should attend the meeting.

Lord of the faceoffs

A N A H E I M, Calif. (AP) - Los Angeles' record number of safeties Friday in the Rams' 33-12 victory was the perfect game for us in the style of what we want to do," said coach John Robinson, who was the Rams' Jack Youngblood and Reggie Dixon trapped Giants' quarterback Phil Simms in the end zone.

Robinson lauded the Rams' all-pro player, Bo Zeoli, as a former player for Cal Poly. The ruggers will hold a meeting on Oct. 4, 7:30 p.m., in room 237 of the agriculture building.

All interested newcomers and returning players should attend the meeting.

Longhorns move into familiar spot

By JACK KEEVER Associated Press Writer

AUSTIN, Texas (AP) — Texas, no stranger to the No. 1 spot in college football, is at the top again — for the first time since 1981 — and Coach Fred Akers says the Longhorns deserve their high ranking.

"I think we deserve it as much as anybody I've seen," Akers said Monday after the Longhorns became the fourth team this season to claim the No. 1 ranking in The Associated Press poll. "We are young and we are building, but we are making just a terrific effort and the top players are making the top plays."

Texas, which was No. 1 in the preseason ranking and has moved up one spot in each of the five regular-season polls, climbed from second to first by whipping Penn State 30-16 last week.

"We didn't have the same type of preparation for this game as we do for a game against a top-10 team this week," Akers said. "The preparation will be just like it's been for the past five games."

The Longhorns are No. 1 in the polls for the first time since 1981 when they finished 14-2; Nebraska, 11-0; Hawaii, 12-3; Texas, 10-2; University of Arizona, 9-7 and Colorado State, 15-6.

"The Top Twenty for the first

mustang daily

Wednesday, October 3 1984

Mustang running back Gary Myers holds the No. 2 spot in the Western Football Conference for yards rushed. He netted 107 yards on 29 carries last week for the second 100-yard game of his Mustang career. His total yards rushing is 322 yards. Cal Poly leads the Western Football Conference in yards rushed with 784 yards.

Poly spikers rated No. 5

The Cal Poly Women's Volleyball team maintained its high standing in the Oct. 2 nationwide Tachikara Coaches Poll, ranking No. 5 for the second week in a row.

The Poly spikers, 17-9 for the season, have played two of the top four ranked teams and won. The Mustangs handed No. 1 USC its first and only loss and beat No. 4 ranked UOP last Thursday in five games.

The team will travel to Fresno tonight to play unranked Fresno State and will play its first home game since school began this weekend.

The match will be against ninth-ranked University of Arizona at 7:30 p.m. in the main gym. There is no cost to students with valid ASI cards.

The top ten teams, according to the poll, are led by USC with record of 10-1, followed by UCLA, 10-0; Stanford, 4-1; UOP, 10-2; Florida State, 14-2; Nebraska, 11-0; Hawaii, 12-3; Texas, 10-2; University of Arizona, 9-7 and Colorado State, 15-6.

The Poll, which was No. 8 in the Western Football Conference In yards rushed, but with 784 yards. Cal Poly leads the Western Football Conference in yards rushed with 784 yards.

The uplifted 1984-86 Rugby Club has been elevated to Division 1 status this year and is now eligible to compete for a national championship. The team's first year coach, Bo Zeoli, is a former player for Cal Poly. The ruggers will hold a meeting on Oct. 4, 7:30 p.m., in room 237 of the agriculture building.

Walton signs contract with LA
Gordon also comes to terms

LOS ANGELES (AP) — Veteran center Bill Walton and first-round draft choice Lancaster Gordon of Louisville signed contracts with the Los Angeles Clippers on Monday, the National Basketball Association team announced.

The signings of Walton and Gordon come on the heels of the acquisition of veteran All-Star forward Marques Johnson on Saturday in a six-player deal in which the Clippers sent Terry Cummings to the Bucks.

The signing of Walton "fulfills a commitment that the Clippers made in order to have a successful team," Clippers Vice President and General Manager Carl Scheer said.

The Clippers moved to Los Angeles from San Diego this year after recording a 30-62 record last season.

"With Walton healthy and in good physical condition, he can be one of the dominant centers to play the game of basketball," Scheer said. "I had made a commitment to myself, the organization, and most importantly the fans of Los Angeles that we would re-sign Walton."

The agreement, whose terms were not announced, ended speculation that Walton would sign an offer sheet with another NBA team or decide to play in Italy.

"I'm very satisfied with the contract," Walton said at the Clippers training camp at Loyola Marymount University.

"I look forward to playing at home again. This is a tremendous opportunity to play on a team that could win a lot of games and do well in the season and hopefully through the playoffs."

"I think the addition of Marques, Junior Bridgeman and Harvey Catchings is a great thing. Those are three players who have spent the majority of their careers at the championship level," Walton said.

Walton played in 55 games for the team in San Diego last year, averaging 12.1 points and nine rebounds per game. The 6-foot-11 center, a two-time NCAA Player of the Year during his collegiate career at UCLA, was named the league's Most Valuable Player while with Portland in 1974.

He has been plagued by a foot injury in the latter stages of his 10-year NBA career at missed two seasons in a row, from 1980 to 1982, while under contract with the Clippers.

Walton led the Portland Trail Blazers to the NBA championship in 1977.

"We are pleased to have such a quality, versatile player such as Lancaster as part of the new Clippers era," Scheer said.

The terms of Gordon's contract also were not released.

In Saturday's deal with the Bucks, the Clippers acquired Johnson, a Los Angeles native who played one year with Walton at UCLA, swingman Junior Bridgeman and veteran forward Harvey Catchings in exchange for Cummings and guards Craig Hodges and Ricky Pierce.

"We are pleased to have a player of the caliber of Marques Catchings is a great thing. Those are three players who have spent the majority of their careers at the championship level," Walton said.

"I think the addition of Marques, Junior Bridgeman and Harvey Catchings is a great thing. Those are three players who have spent the majority of their careers at the championship level," Walton said.
