The plant sale in the University Union is a common sight each quarter. Plants cultivated by the Ornamental Horticulture department and baskets supplied by El Comal Bookstore are sold to students at discount prices. Cindy Barbee inspects some plants for herself, commenting, "My room is so bare!" The plant sale continues today.

San Luis mayor addresses noise

By GREGG SCHROEDER

A proposed amendment to the present city noise ordinance is not an anti-student move, said San Luis Obispo Mayor Melanie Billig. Tuesday night at the City Council meeting.

The proposed ordinance is based on a survey by Brown-Burtin Associates of existing noise levels in the town. The study suggests using a decibel meter, which measures sound levels, to reference the proposed ordinance.

Until the present ordinance, the element of proof was the subjective opinion of the responding police officer. If the proposed ordinance goes into effect, noise readings can be compared objectively to a standard decibel.

Councilwoman Debra Dovey said the new ordinance would be easier for officers to enforce. "I don't think the city is a sanctuary." said Billig.

Amaral's mission of this university is to support the educational programs. Amaral said, "We're just getting started at external funding and sponsored programs."

The Foundation accepts gifts on behalf of Cal Poly and that the funds are distributed as the donor directs. Amaral said that Cal Poly received over $4 million dollars in cash and gifts last year.

The board is made up of the university president, student president, and up to three students from the community who serve one-year terms. Seven faculty members or staff are appointed to staggered two-year terms. Said a Foundation brochure.

Amaral said he executes the board's policies.

Man intrudes on dorm resident

By DONALD MUNRO

A woman resident of Tenaya Hall was surprised Monday night when a man entered her room claiming to be looking for another person.

The incident happened about midnight, said Cal Poly Investigator Ray Berrett. The woman resident reported that when she asked the man what he was doing in her room, he claimed to be looking for another person and gave a room number down the hall.

The suspect is described as a white male, 5 feet 8 inches tall and weighs about 170 pounds. He has shoulder-length blond hair and was wearing blue jeans and a windbreaker. There have been a number of reports of suspicious persons listened in the dorms so far this quarter, said Berrett.

A woman resident of Tenaya Hall was surprised Monday night when a man entered her room claiming to be looking for another person.

The incident happened about midnight, said Cal Poly Investigator Ray Berrett. The woman resident reported that when she asked the man what he was doing in her room, he claimed to be looking for another person and gave a room number down the hall.

The suspect is described as a white male, 5 feet 8 inches tall and weighs about 170 pounds. He has shoulder-length blond hair and was wearing blue jeans and a windbreaker. There have been a number of reports of suspicious persons listening in the dorms so far this quarter, said Berrett.

Mayor Billig said another public meeting would be held. Six other residents voiced concerns about noise generated by city garbage trucks, businesses and traffic. Fourteen year resident of San Luis Obispo and Cal Poly student Richard Smith said he did not see the new ordinance as an attack on students.

"It's a lot more than a party ordinance," he said. "The existing ordinance loudening law and loudening ordinance.

Councilwoman Dovey asked representatives from Cal Poly to meet with city council members and make comments in reference to the proposed ordinance. The City Council could then form a compilation of responses for the next hearing.

Both sides would have time to work with it the proposed ordinance.

Billig told the Mustang Daily the City Council felt it was very important to make it clear that the ordinance is not an anti-student move.

"It was not meant that way," said Billig, referring to the ordinance. "It concerns us the council staff when people misconstrue.

"Students have to realize that they are one component of the city. The council represents everyone.

Billig said the proposed ordinance is designed to address community concern and neighborhood noise.

It could never be construed to students in the hallway or Cal Poly students," she said.

Eberle said she was happy with the proceedings. "There was a lack of communication between the council and the university," she said.

The ordinance is discriminatory to Cal Poly students, specifically attacking their parties. "It concerns us the council staff when people misconstrue.

"Students have to realize that they are one component of the city. The council represents everyone.

Travelling responsibly through life

College students are responsible adults, and they should take responsibility for respecting human lives, both theirs and other people's.

Drinking and driving is not responsible. Countless warnings about the severity of driving under the influence have been reiterated to people all over. Yet, the number of alcohol-related accidents continues to soar.

Mothers Against Drunk Drivers say that drunken drivers cause more deaths, injuries, and destruction than murderers, thieves, rapists, and one out of two Americans will be the victim of an alcohol-related crash.

The state has tried to discourage drunk driving by enforcing severe penalties. Steve Seybold of the San Luis Obispo Police Department said that in San Luis Obispo a person is fined a minimum $375 and spends two days in jail for a first time drunken driving arrest. A driver's insurance also increases by about 20 percent.

Seybold said on a first offense the two days in jail can usually be suspended by working 40 to 80 hours for city cleaning services. The second time a person is arrested for drunk driving, he or she will pay a $500 fine and spend a mandatory three days in jail.

Too many students think they will never be the ones to be involved in a drunk and driving accident. Friday's TGIF party or Friday night's party, which leads to driving home early Saturday morning—a little too inebriated.

Seybold said 60 percent of the people arrested for drunken driving in San Luis Obispo are college-age students. The number of weekend arrests is higher than weekend arrests.

By August there were 329 drunken driving arrests for 1984 in San Luis Obispo, a 32 percent increase from the same time in 1983, said Seybold.

Hearing the facts over and over again won't keep a potential drunken driver from getting in his car and getting on the road.

Letters

Concerned reader suggests new way of safer transport

Editor

I've read many articles concerning student safety on and off campus. How about some solutions? I'm sure there are quite a number of students, especially female, who find themselves with no means of transportation to get home during even the most unvaluable hour. Our on-call service, Poly Shuttle only runs until 11 p.m. and I'm sure there are solutions to such a problem.

Students were asked to volunteer their services or provide their own transportation for pickup. Pickups were scheduled at specified times (i.e. every hour, on the hour). The student association at my former school took on the service as an experiment, and they were surprised by the number of volunteer turnovers as well as the number of female students taking advantage of the service.

It may not be the best solution, but it is better than no solution at all.

The service can run a certain route accommodating the busiest residential areas: Valencia, Traffic Circle, etc. This can be an alternative to hitching or walking home through the dark streets of San Luis Obispo.

Grand Avenue paves confusion

Editor

Grand Avenue is more than living up to its name. It is equipped with more yellow lane dividers than any other street in the free world. Anyone entering the campus via Grand will find not difficult but two lane separating lines, colored yellow.

The expanse research on my part has determined that throughout the county, yellow lines are used to separate lanes of traffic moving in opposite directions. So what does this mean for Cal Poly? Grand is the main entrance to Cal Poly, viewed by all visiting dignitaries and more importantly by the younger impressionable freshmen living in the residence halls. Certainly a conservatice school such as Cal Poly can realise the dangerous ramifications of discouraging society's limitations. By agreeing upon standardization, we are destroying the only solution we have to make hard to create. Such an act as this could be interpreted by the community as an invitation to the beauty of a laissez faire society. Other streets, too, could be redesigned to conform.

Rose Float Committee unveils new building

By LEANNE ALBERTA

The 1985 Rose Float Committee dedicated their new building Saturday, Sept. 29 at the Rose Float Lab Facility. The lab is located on campus on Fred Mill Road.

The committee unveiled a brass plaque at the dedication ceremony which will be mounted on the building later this year. The committee also sponsored a dance later in the evening for the occasion.

The new 35 feet by 40 feet "Loft house style" Butler Manufacturing Building has been in the planning stages for four years. The building took six months to construct and cost $6,000. The concrete foundation for the building was completed last summer.

"When you consider the added costs of the rolling door, concrete slab, skylights and sewer line, the building becomes a $12,000 expansion project," Mike Colvin, Rose Float Committee chairman stated.

It would have been difficult without the support of local businesses and individuals who generously contributed to the project.

Colvin said that the building was partially financed through Associated Students Inc., which contributed $3,500. Lesley Latrop, mother of past construction chairman, Alden Bedard, donated $3,250 to the project.

Cal Poly, San Luis Obispo's half of the float building process are currently shaping all the parts to construct and cost $6,000. The concrete foundation for the building was completed last summer.

"It would have been difficult to transport our half of the float down the road to Pomona at Thanksgiving," Colvin said. "Currently we are shaping all the design work and preparing to transport half of the float down to Pomona at Thanksgiving." Colvin said. "I'm very happy with our new building." Colvin added. "It's something that we've needed for a long time."

The old lab facility will be used to store equipment, supply and by University Home. Work on the float will begin later this year. The lab facility will be open on Monday, Oct. 12, 9 a.m. to 8 p.m. at the lab facility at 10:00 a.m.

'The Cellar' makes move

The Cellar vending food facility will be open on Monday, Oct. 8 at its new location in room 11A of Dexter Library.

Lloyd Lamouria, satellite operations manager of food services, said the new location is much better than the old, which is being remodelled along with much of Dexter Library. He said he was pleased because at its new location the Cellar will have an exterior entrance, a patio directly off of its windows and improved ventilation.

If all goes as planned, said Lamouria, the vending machines will be moved in this weekend. The Cellar will be open from 6 a.m. to 12 midnight.

Goodies waiting for Miss SLO

By KEVIN H. FOX

A $5000 scholarship, an all-expense-paid trip to the
Miss California Pageant in Santa Cruz and a war,
drove worth several thousand dollars await the win-
er of the Miss San Luis Obispo County Scholarship
Contest to be held Jan. 29, 1989.

Applications are now available at the University
Union information desk or from the pageant pro-
motors, Linda Faddler 481-5707 or Susan McHannery,
481-4809. Entries will be accepted until Dec. 31.

"Applicants must live in San Luis Obispo County,
be between the ages of 17 and 26 and be a U.S. citi-
zen to participate in an audition for the pageant.
The top ten women will go on to the final pageant which
will be held at the Pismo Beach Veterans Memorial
Building.
The audition will consist of not more than a two
minute and fifty-second talent routine, swimsuit
competition and a personal interview.
Contest Executive Director Linda Faddler said that
this will be the only preliminary to the Miss Cali-
ifornia Miss America contests.

"This is more than just a beauty pageant. Take a
look at the statistics. Women make up 50 percent of the
judging," Faddler said.

"We try to make it something more than what girls
give to participate in an audition for the pageant. The
top ten women will go on to the final pageant which
will be held at the Pismo Beach Veterans Memorial
Building.
The audition will consist of not more than a two

POLICE REPORT

Cal Poly police responded to four
autorelated thefts in a period of
days, according to In-
vestigator Ray Berrett.

Parts from two Honda's parked in
the R-1 residence hall parking lot
were reported stolen Saturday.
Sept. 29. A front bumper was
taken from a 1982 silver-gray
Honda Accord sometime between
Thursday morning and Saturday
morning. The car was parked on
the level just below the water-
tower. The bumper's estimated
value was $250.

Also stolen from the R-1 lot was
a black metal grill from a 1983
Honda Accord. The car was parked
on the drive between levels three
and four of the lot. Estimated
value of the grill was $100, said
Berrett.

In another autorelated theft, a
wallet was stolen from a car parked
in the G-3 parking lot Sunday,
Sept. 30. The suspect entered the
car through a partially opened
window by pushing it down, and
then took the wallet from the glove
box. Police also reported that a car
cover was taken from a car parked
on Fischafer Way on campus.
Sept. 28. The cover was blue-green
and was worth about $40, said
Berrett.

Shuttles will seek cities

PASADENA, Calif. (AP) — When the shuttle Challenger soars
into space Friday it will carry a
camera that will be used to detect
and measure ancient hurricanes, oil spills and
icebergs, and will provide a
personal-era window on our
environment and history.

It's very important because it's
giving us an understanding of our
environment and the processes
that shape our world," said Charles Elachi, the Jet Propulsion
Laboratory physicist heading the
Shuttle Imaging Radar Project for the National
Aeronautics and Space Ad-
mistration.

Known as Shuttle Imaging
Radar B, or SIR-B, the device
is 35-by-7-foot antenna will be aimed at
Earth from Challenger's cargo
cage bay for 38 hours during the
eight-day shuttle flight. The
antenna will beam microwaves at the planet's surface,
record the echoes and relay them
to satellite to Earth.

Because the radar will scan 10
square miles twice each day — about a
fourth of the planet's landmass and
5 percent of its total surface, in-
cluding oceans — it will take
years to convert all the data into
black-and-white pictures, Elachi said.

On Tuesday, the Soviet Union
completed a space mission that
yielded almost 25,000 photos of
Earth's surface, officials said.

The three cosmonauts on the
mission spent a 237 days aboard the
laboratory, history's longest
manned space flight.

SIR-B is a descendant of the
Soviet's Soyuz satellite, launched in 1975, and
SIR-A, the device that flew aboard
shuttle in November 1981. SIR-A
was designed to map coastal
craters, tides, temperatures and
wave heights, but surprised scien-
tists by revealing hidden features
on land. SIR-A revealed ancient
dry riverbeds buried beneath the
sands of the eastern Sahara Desert
in Egypt and Sudan.

Waves the flag for true love

“This is land is your land, this land is my land...”

—Woody Guthrie

I’ve never waved an American flag. I’ve never really had the opportunity.

Sure, I’ve been to my share of Fourth of July celebrations, but there never seemed to be anything that day that was supposed to go beyond what every else in the world has always gone beyond the flag on the fourth.

In 1968, I was strange as I walked outside the Ticketron outlet in San Luis Obispo at 5 a.m. for a chance to buy a Bruce Springsteen ticket, I was also wondering as to where I might wave an American flag.

I think that my wanting to buy that flag is a direct reaction to the recent political conventions, the Olympics and the influence of a fourth of July celebration. But one thing is clear, Kaye told The Associated Press reporter said Wednesday “it remains to be seen” what that day is supposed to mean.

Frankly, I don’t think many of these commentators know what they are talking about. For instance, we’ve had the recent political conventions, the Olympics and the influence of a fourth of July celebration. Yeah, people have suddenly become patriotic.

I’m sorry but staged flag waving demonstrations on convention floors have never particularly appealed to me.

I also don’t think having the commander-in-chief of the armed forces of a country saluting the Olympic ideals that, which are beyond nationalism, should be considered a patriotic act.

For me patriotism is loving and caring for something with a fierce loyalty even when you know there are lots of things wrong with the things you love.

But, somewhere, I think it was during the 1960s, someone made a big mistake. They gave away the flag. They gave away a precious symbol of freedom.

For me patriotism is loving and caring for something with a fierce loyalty even when you know it is not what it is supposed to be.

That’s real patriotism.

—Bruce Springsteen

I am going to wave it because I think that my wanting to buy an American flag is the only person who really understands what that day is supposed to mean.

They gave it away to people ignorant of what it actually symbolizes. The day that can never be extinguished, a dream that can never be killed but likely will never be realized.

It’s unclear what’s going to happen,” said Jeff Kaye, who was ordered Tuesday by Clara Su- tler, then a state Public Utilities Commission lawyer Edward P. Davis, who is representing Kaye, to present this coupon to the driver to receive your pizza free.

This story Kaye wrote for the Mercury News on Oct. 22, 1982, the Hillestads admitted backdating a real estate document so that Mrs. Hillestad then a Los Altos Hills councilwoman, could vote on property which she held a financial interest.

The judge’s order, according to Mercury News lawyer Edward P. Davis, who is representing Kaye, to present this coupon to the driver to receive your pizza free.

The judge’s order, according to Mercury News lawyer Edward P. Davis, who is representing Kaye, to present this coupon to the driver to receive your pizza free.

The ICC went along with the state commission’s decision to get additional perspective on its costs and revenues.

The judge’s order, according to Mercury News lawyer Edward P. Davis, who is representing Kaye, to present this coupon to the driver to receive your pizza free.

I am not going to do it because I think everything is wrong with the system and we should get rid of it.

THE DOLL

Ferry sinks after colliding with barge

HAMBURG, West Germany (AP) — A ferry taking 43 passengers on a birthday cruise in rainy Hamburg harbor sank after colliding with a barge towed by a tug boat. Nineteen people were killed and 24 were injured, officials said today.

Hamburg Interior Senator Rolf Lange told a news conference 43 people were aboard the ferry Martha when it went down Tuesday night, seconds after the collision. Police previously said about 47 people were aboard.

Twenty-four passengers were rescued by the tug boat Theres and other boats that responded to an alarm, but 19 others from 13 families were either confirmed dead or presumed dead.

Lange said 12 passengers were missing and presumed dead.

Lange, the city's top security official, said the exact cause of the collision was unclear, although the investigation had established that the ferry somehow got between the tug boat and the barge.

He said examination of the barge's hull showed it collided with the ferry.

Divers found the sunken ferry early today, seven hours after it went down. High tide had hindered efforts to raise the wreck.

The ferry was on a cruise chartered by Wolfgang Rosenhagen to celebrate his 40th birthday. Rosenhagen and his wife Gudrun, both Hamburg meteorologists, were among the survivors, but their two sons, Guntram, 11, and Mathias, 5, were listed as missing, police said.
Students help out community

Hundreds of Cal Poly students are deciding to spend their extra time helping people in the community through the Cal Poly Student Community Services, instead of going to the beach or partying.

Over the years, thousands of student volunteers have assisted many people including children, senior citizens, disabled people and patients of Atascadero State Hospital.

Sam Lutrin, advisor to Student Community Services, said last year 200 students helped out in the community by being big brothers and sisters, tutoring children in grade school and junior high school and helping the disabled.

Volunteers with the Student Community Services serve in various roles ranging from leader and manager to promoter and teacher. Lutrin said the people who participated before have said, "It feels good to help people. It is such a meaningful thing to lend a hand to others."

Lutrin added, "Working with these people makes you stop and think how happy you are and how much worse things could be."

Students from all majors, including technical fields, have participated in Student Community Services. Lutrin said, "People from technical areas like participating because it is human oriented—it's a break from their major," said Lutrin.

Students or clubs who are interested in Student Community Services can stop by Room 217 of the University Union to find out more information or pick up an application.

This is your chance to make up to $15 an hour

Instructors Needed

The recreational Sports office and Recreation and Tournaments is looking for paid instructors to teach Aerobics, Water Exercise, Ski Fitness, Massage, Self defense, Guitar, Yoga, Swim Lessons, Calligraphy, Cooking and others. For information, come to the Recreational Sports Office and be sure to be at the meeting on October 8, 1984, at 7:00 pm in U.U. 218.

Kathy Renshaw (left), from Student Community Services, hands interested students Lisa Tweten, Sharon Tobias and Chris DePaoli information about Pals.

Catching fallen stars

By BRENDA BIELKE

So expressed the theme of a collaboration by four Cal Poly faculty members that includes an art show in the University Union Galerie and a recital in the Cal Poly Theatre Friday, Oct. 5.

Portraits, music, dance and dramatic literature are interwoven in "Stars, Songs, Faces," to recognize various artists who died young but left lasting impressions.

Tickets for the presentation are $2 for students and $4 for the public, available at the University Union ticket office, Cheap Thrills, Boo Boo Records and the Dance Shop.

Painter Dan Piel, oral interpreter Pamela Cook Miller, composer John Russell and choreographer Cynthia Nazzaro, all Cal Poly faculty members, combined their talents to create a two-part tribute to both classical immortals and recent young fallen stars.

Friday's recital will include works by Wolfgang Mozart and Franz Schubert, both of whom died in their early 30s. A dramatic reading from the works of John Keats and an original dance set to an original musical composition will also be featured.

The collaboration began with Piel, who painted a series of entertainers' portraits in heroic proportions. Forty of these are on display in the Galerie, Room 220, through Oct. 20. Beginning with Rudolph Valentino, who died at age 31, Piel moved through time to John Lennon by way of Jean Harlow, James Dean, Marilyn Monroe, Jim Morrison and other performers who died in the peak of their careers, some tragically.

Color and an illuminating start gradually intensifying each portrait, from the black and white of the Valentino portrait to the vibrant hues of Elvis Presley and Lennon.

Piel approached Miller, a member of the Speech Communications Department faculty, who was working on the portrait project. She agreed to select a quotation to accompany each portrait. Once the idea to use quotes with the portraits took root, Piel and Miller decided to expand on the concept.
"We first thought the music of some of these stars would be good, but original music would be better," Piél said. Russell was recommended to Piél as an excellent composer who wanted to write a modern music suite. "It was his (Russell's) idea to do a recital," Piél said. Dance became incorporated into the project and Nazzaro, who had worked previously with Russell, was chosen to choreograph.

Piél organized the Interpreters Theatre to present John Keats's "Eve of St. Agnes" at the recital. Russell was chosen to do a recital, "I composed the music while I was at home on a digital synthesizer," Piél said. The story of Endymion, a handsome shepherd, and Selene, goddess of the moon, and their love affair, was the basis of his composition. When I composed the music, I had the myth in mind. It affects the emotional content of the piece. I wanted some way of tying the ancient past (to the present). People haven't changed much, the same feelings are still felt today," Russell said.

"Russell found the ancient tale relevant to the contemporary stars in Piél's portraits. "This story is especially appropriate to Marilyn Monroe," said Piél. "We can see her in her movies which keep her forever young but we can never attain her."

Nazzaro, a member of the Theatre and Dance Department faculty, choreographed the dance to Russell's music. She and David Blood of the Oakland Ballet, the principal dancers, will dance the performance live. A videotaped dance presentation is part of the exhibit at the Galleria.

"Love relationships are the core of Nazzaro's dance. It is a symbol for the dynamics which exists between great geniuses, media stars if you will, and how that relationship exists. A love relationship can also be destructive. It's a power struggle, the pathos of love, if you will," Nazzaro said.

"When I composed the music, I had the myth in mind. It affects the emotional content of the piece. I wanted some way of tying the ancient past (to the present). People haven't changed much, the same feelings are still felt today," Russell said.

Chancellor's Office in Long Beach.

Nazzaro's dance. Russell said. The show is going on the road in November. The artist and her colleagues found the ancient past (to the present). People haven't changed much, the same feelings are still felt today," Russell said.

Factory accused of not paying Asians

SAN FRANCISCO (AP) - The U.S. Labor Department accused T and W Fashions of underpaying 424 workers, mostly female Asian immigrants, $405,000 over a three-year period at its San Francisco women's clothing factory.

The department said the company paid workers below the federal minimum wage of $3.25 an hour and failed to pay overtime as required by federal law for all hours above 40 in a week. There was no immediate comment from the company.

As allowed by federal labor law, the suit seeks twice the amount of unpaid retroactive wages, $810,000, in damages for the workers from August 1981 through the present. T and W is also the target of a private civil suit, filed last year by Babes, a legal aid group and 11 former employees.

Dennis Hayashi of the Asian Law Caucus said T and W has paid its workers as little as $18 for a 10-hour day.

Musical works to be featured Friday night include Rondo in A minor, K. 511 by Mozart performed by Ronald V. Ratcliffe on fortepiano; Schubert's Sonata in D major, Op. 137, No. 1 performed by Jeanne Clouse on violin, and Susan Axelrod-Davies, piano, and Mozart's Quintet in F flat for horn and strings, K. 407 featuring John Swapp on horn. Jeanne Clouse on violin, Louise Roberts and Cindy Foerster on violas, Lucy Nagler on cello and Clifton Swapp on bass.

Stars, Long, Fuel, Fly, a sporsponsored by the School of Communication, Arts and Humanities, and the ASL. Work was funded in part by a grant from TRW Electronics Products, Inc. of San Luis Obispo, with additional support from Idler's Appliance and TV.
Clove cigarettes making waves
by ROSEMARY COSTANZO

Clove cigarettes are quickly replacing Vuarnet sunglasses as the west coast status symbol," said Sheri Sciarrino of the American Lung Association.

"Clove cigarettes are particularly popular in beach community towns, they have become the new West Coast status symbol," said Sheri Sciarrino of the American Lung Association.

Many of the people that smoke clove cigarettes think they are a safe alternative to regular tar cigarettes. "People think they're being organic and healthy when they smoke cloves. What they don’t realize is that clove cigarettes contain high tar just like tobacco cigarettes," said Sciarrino.

"While it is not known whether cigarettes with clove oil are more dangerous to smoke than regular cigarettes, we must assume that clove oil cigarettes pose at least the same danger as regular cigarettes unless proven otherwise," said Debbie Kelley, program director of the San Diego Lung Association.

Clove oil is one of hundreds of additives currently being used by the tobacco industry to improve the flavor, aroma, and burning qualities of cigarettes, especially those with low-tar and low-nicotine.

While most of these additives appear on the ‘generally recognized as safe’ list of the U.S. Food and Drug Administration, they are presumed safe only when consumed orally in their unburned form. When burned, many of these substances may become toxic and potentially harmful to a smoker’s health.

Most clove cigarettes are imported from Indonesia which may be the root of another problem associated with these cigarettes. "Tobacco imported from Indonesia isn’t the high level of tobacco used in America," said Sciarrino. "It’s Grade B, instead of A."

The tobacco is frequently treated with DDT and other pesticides that aren’t acceptable in the United States, she said.

The clove oil in the cigarettes acts as a analgesic and it coats the bronchial tree so smokers don’t realize how deeply they’re holding in the smoke, said Sciarrino.

Some people claim to get high when smoking cloves. Sciarrino said that the high is caused by the nicotine in the cigarette.

The Manager of The Sub, Bruce Brown, samples some of his own wares by lighting up a clove cigarette. Several brands of cigarettes imported from Indonesia are available at the store.

San Francisco (AP) -- A federal appeals court on Wednesday reinstated a slander suit by the Church of Scientology of California against a lawyer who described how something went wrong with his airplane while he was in a legal dispute with the church.

The statements of Michael Flynn could be reasonably interpreted as accusing the church of trying to kill him, said the 9th U.S. Circuit Court of Appeals.

Flynn, a Massachusetts lawyer who often represents former Scientologists against the California church, was described in the lawsuit as having made the statements in a speech to about 80 people in Los Angeles in June 1983.

According to the allegations quoted by the court, Flynn discussed four years of litigation with "an enormous organization" that hires "armies of lawyers to try to destroy me and my clients."

He was quoted as saying that in October 1979, shortly after he rejected a settlement offer from the church, his private plane lost power on a flight to South Bend, Ind., and made an emergency landing.

Flynn was quoted as saying that after the landing, he and his passengers drained water from the fuel tanks. Any condensation of water in the tanks would have detected on a pre-flight examination. He was quoted as saying:

"To be here and talking about it and not in a hospital hurting is truly amazing," Rice said. His only injury was a small scrape on his right foot and there was a small tear in his wetsuit.

"It had to be a great white shark," Rice said. "I couldn't believe it was happening to me."

Rice, 25, said he was close to the entrance of the ocean when the shark suddenly appeared in the ocean off Cape Kiwanda. The shark's jaws bit once, tearing into his surfboard in the feet below and had spotted many other people with evenly breaking five-foot swells.

The 10-year veteran surfer said on Rice's surfboard and said the shark's jaws bit once, tearing into his surfboard in the feet below and had spotted many other people with evenly breaking five-foot swells.

Surfer attacked by 12-foot white shark

The Aloha native attending Oregon State University here said he could see the ocean bottom 15 feet below and had spotted many other people with evenly breaking five-foot swells.

Surfer Bob Rice says he felt "terror, sheer terror" when a 12-foot great white shark sank its teeth into his surfboard in the ocean off Pacific City.

"You could feel the bite," Rice said in an interview here Tuesday. "I couldn't believe it was happening to me."

The shark's jaws bit once, tearing into his surfboard in the feet below and had spotted many other people with evenly breaking five-foot swells.

Rice said he was sitting on his surfboard, waiting for a good wave, when the shark suddenly appeared on the ocean side and lunged at his board. The shark's jaws bit once, tearing into his surfboard in the feet below and had spotted many other people with evenly breaking five-foot swells.

Drunken driver convicted

RIVERSIDE, Calif. (AP) — A man convicted of second-degree murder for the deaths of two people in a drunken traffic accident has been sentenced to nearly 20 years to life in prison.

Charles Francis McCarns III, 33, of Gardena, was given the 19-year, 8-month to life sentence Tuesday by Judge W.J. Harpham, a Lake County Judge sitting temporarily in Riverside Superior Court.

McCarns, a refrigeration mechanic, is the first person in the county to be convicted of second-degree murder in a drunken driving accident case.

A jury in July found McCarns guilty of two counts of second-degree murder, two counts of vehicular manslaughter, drunken driving resulting in injury and hit-and-run. The judge, for technical reasons, dismissed the vehicular manslaughter counts Tuesday.

The fatal accident occurred July 23, 1983, in the Sunnymead area as McCarns returned from a fishing trip to Lake Perris. His Chevrolet crashed head-on into a Volkswagen driven by Frank Ferreira, 22, of Stanton. Ferreira and daughter Jennifer, 2, were killed. Four others in Ferreira's car were injured.

McCarns, who was driving with a revoked license, suffered a cut forehead.

Defense attorneys Rex W. Kellough and Robert Dowd of La Habra said McCarns would appeal.

Deputy District Attorney L. Kim Purbaugh argued for a long term because McCarns drank and drove despite prior convictions, a jail term and revocation of his license.

The defense contended the verdicts of murder and vehicular manslaughter were inconsistent because malice is a requirement of a murder finding, but not of vehicular manslaughter.

The prosecutor argued that California courts have ruled that the appropriate remedy is dismissal of the vehicular manslaughter counts. The judge did just that.

**Harriers No. 3 in nation**

Women ranked high in poll with Division I teams

Cal Poly Women's Cross Country team moved on Wednesday. And they moved in their favorite direction up.

The team was ranked No. 4 in the NCAA Division I Coaches Poll last week and moved up to No. 3 this week, behind No. 1 Oregon and No. 2 Wisconsin.

The outstanding factor in the ranking is that Cal Poly is in the only Division I school to be named to the Division I poll.

"Even though we don't have the financial abilities as the Division I teams, we have great runners who are able to overcome that for us," Coach Lance Harter said.

The team will not be relaxing on its laurels this week, however, since the Mustangs will be preparing for a Saturday meet against No. 5-ranked Stanford, at Stanford.

"We'll find out this week how good we really are when we play them," Harter noted.

**Chicago takes lead**

While you've been planning for the future, Varian's been building it.

Energy from seawater? Varian's contribution to fusion energy research may make it possible to draw virtually limitless energy from seawater. This is just one example of our aggressive leadership in higher technology - a leadership position.

Varian's Fritz Hesshaw will be at Cal Poly to give a brief slide presentation and discuss the opportunities available to you. Plan to attend Monday, October 22, 1984 at 7:00 p.m. in the Staff Dining Room B, and sign up now at your Placement Office for on-campus interviews to be conducted on Tuesday, October 23, 1984.

**Raiders trying to bounce back**

MANHATTAN BEACH, Calif. (AP) - The defending Super Bowl champion Los Angeles Raiders won't go unbeaten this season. The Denver Broncos made sure of that Sunday.

Coach Tom Flores of the Raiders acknowledged his disappointment Wednesday with his team's 16-1 loss to the Broncos, but also chose to evaluate the positive aspects of what's transpired so far this year.

"We haven't fallen apart," Flores said at his weekly meeting with reporters. "We're still 4-1, we're still in first place.

"We're not panicking, but it is devastating to lose when you're not used to losing. It happens, it's pretty tough nowadays to go through a season undefeated.

"It's never. You have to go on.

The loss left the Raiders and Broncos tied for first place along with Seattle in the American Football Conference's Western Division. All three teams have 4-1 records. The other two teams in the division, Kansas City and San Diego, are both 2-3.

"We're a third of the way through the season," Flores said. "It's going to be much tougher than past years. Just look at the division. The worst team is 3-2. There's no breathing room. It's going to be that way all year.

Los Angeles faces Seattle at the Los Angeles Coliseum this Sunday. The Seahawks were victorious over the Raiders in both of the regular season National Football League games played between the teams last season but dropped a 30-13 decision in the AFC Championship game.

"The Denver game was our third division game in a row and this will be our fourth, so we've said there's no love lost in games within our division.

"The loss shows that we're not unbeatable and shows how strong our division is. We're squaring off against Kansas City and Denver and San Diego and we lost to Denver.

"Flores had a simple explanation for what happened in Denver.

"We just didn't play very well," he said. "I've always been a strong believer that execution is one of the most important things. We didn't execute.

"We're playing a Monday night game and it's 33-30 victory over San Diego that was a tough game for us physically and emotionally.

That shouldn't have mattered, but maybe it did.

**No. 3 in nation**

Since the current division format was instituted in 1969, no National League team has lost the first two playoff games and won the series.

Only the 1982 Milwaukee Brewers have done it, in the American League.

The Cubs won the opening game 13-0 Tuesday, Trout, 13-7. adding another laurel to the best season of his career, gave up only five hits, struck out two and walked four, before giving way with one out in the top of the ninth to Les Smith.

Smith, who had 33 saves during the season, struck out Carmelo Martinez and got Terry Kennedy on a long fly to left to preserve the victory.

The wind in Wrigley Field changed dramatically from Game One to Game Two and so did the nature of the Cubs used five homers — two by Gary Matthews — to rough up San Diego in Game Two. The Cubs two the wind died, and the Cubs turned to the speed of Dernier to manufacture two important runs.

In between, the Cubs scored twice, and so did the Padres, before scoring in the first inning, and he stole a base and scored in the fourth.

Spikers get 15th win

JILL PERRY

It may be raining cats and dogs this week for the Cal Poly Women's volleyball team, but the winning streak plans to stay high and dry.

After sweating it out against the Fresno State Bulldogs Tuesday and coming out the victors in three sets, 17-15, 16-14, 17-14, the team will face the University of Arizona Wildcats this Saturday at 11 a.m.

"It was not a sterling effort," said coach Mike Wilton said of the victory over unranked Fresno State. "Our hitting stats were horrible," he added. Neither team was as far as hitting percentages go Tuesday night. With a division average of .256, the Mustangs recorded a low .279 percentage, while Fresno turned in .176.

Junior Lyndy Kessler scored the highest number of kills against the Bulldogs with a high of 14. Part of the problem for the team at this point is more play and less practice. The spikers have played 14 matches in the past six days.

"We have been in a skid lately," Wilton said. "The University of Arizona is ranked ninth and is going to come in here loaded for bear. We're really good. We are highly-ranked L.A. team and was a major reason for a successful conference season, but| the Mustangs need to stay high and dry."

Because Arizona is only 5-3 this season, Poly could have an edge advantage over the Wildcats with 18 matches played and a record of 15-2. But the Poly spikers are not relaxing come Saturday. "They (Arizona) should be right on top as far as hitting percentages are concerned," Wilton said.

Since the Mustangs haven't had a home game since Sept. 8, Wilton said the team is looking forward to competition on its home turf. "They're able to play at home in front of a home crowd. Our home crowds are traditionally more knowledgeable and really hang in there with us and get us going," he said. Service will be at 7:30 p.m. in the main gym. The match is free to students with valid ASI cards.

Poly ends20-15 after overtime

The Cal Poly men's soccer team continues its comeback, tying State Los Angeles in a double overtime league match Wednesday.

Cal State Los Angeles won its last seven matches and was 30-2 in the California Collegiate Athletic Association; but the Mustangs held the usually high scoring Golden Eagles to one goal.

Cal State Los Angeles started the scoring with a goal after a refereed loss. peanut ended up in the care of Cal Poly head coach Doug Roy. The midfield play of Mike Williams, Jeff Ferber, Mark Gambatz and Dave Tobias, said Gartman, was the highly-ranked L.A. team and was a major reason for a successful game.

The midfield play of Mike Williams, Jeff Ferber, Mark Gambatz and Dave Tobias, said Gartman, was the highly-ranked L.A. team and was a major reason for a successful game.

The Mustangs tied the score in the second half on a goal by midfielder Mark Gambatz on a penalty kick. The game went through two overtimes with neither team scoring.

"This is the second game in a row or two days in a row," said Gartman, "continually startled the Mustangs." The Mustangs got 15th win

LA trades Muhammad

MANHATTAN BEACH, Calif. (AP) — The Los Angeles Raiders has traded wide receiver Calvin "Pee Wee" Williams to the Washington Redskins in exchange for a selection in the 1985 National Football League draft, Coach Tom Flores announced Wednesday.

"Pee Wee" back for 49ers

"I would love him to expand himself as a whole game against blockers who are 20 to 30 pounds heavier than me," said Walsh. "I think our team is really good."

Board has been successful, obviously, or he wouldn't be on the team. The team is looking forward to coming out the victors in three matches in the past six days.

"They (Arizona) should be right on top as far as hitting percentages are concerned," Wilton said.

Since the Mustangs haven't had a home game since Sept. 8, Wilton said the team is looking forward to competition on its home turf. "They're able to play at home in front of a home crowd.
